Merchandise Subject to the Anti-Circumvention Inquiry

This anti-circumvention inquiry covers certain uncoated paper rolls that are commonly, but not exclusively, known as “sheeter rolls,” from Australia that are further processed in the United States into individual sheets of uncoated paper that would otherwise be subject to the Order (i.e., paper that weighs at least 40 grams per square meter but not more than 150 grams per square meter; and that either is a white paper with a GE brightness level of 83 +/- 1% or higher or is a colored paper (as defined the “Scope” section of the Preliminary Decision Memorandum), except as noted below. The uncoated paper rolls covered by this inquiry are able to be converted into sheets of uncoated paper using specialized cutting machinery prior to printing, and are typically, but not exclusively, between 52 and 103 inches wide and 50 inches in diameter. For clarity, we herein refer to “subject-paper rolls” when referencing the certain uncoated paper rolls that may be converted into subject merchandise. Subject-paper rolls are classified under Harmonized Tariff Schedule (HTS) code 4802.55.

Methodology

Commerce has made this preliminary negative circumvention determination in accordance with section 781(a) of the Act and 19 CFR 351.225(g). Barium Chloride From the People’s Republic of China: Final Results of the Expedited Fifth Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) finds that revocation of the antidumping duty order on barium chloride from the People’s Republic of China (China) would be likely to lead to continuation or recurrence of dumping at the levels indicated in the “Final Results of Sunset Review” section of this notice.

SUPPLEMENTARY INFORMATION:

Background

On October 17, 1984, Commerce issued the Order on barium chloride

See Temporary Rule Modifying AD/CVD Service Requirements Due to COVID–19; 85 FR 17006 (March 26, 2020); and Temporary Rule Modifying AD/CVD Service Requirements Due to COVID–19; Extension of Effective Period, 85 FR 41363 (July 10, 2020).
from China. On October 1, 2020, Commerce published the notice of initiation of the five-year sunset review of the Order, pursuant to section 751(c) of the Act, as amended (the Act). On October 6, 2020, Commerce received a notice of intent to participate in this review from Chemical Products Corporation (CPC) within the deadline specified in 19 CFR 351.218(d)(1)(i). CPC claimed interested party status under section 771(9)(C) of the Act as a manufacturer of a domestic like product in the United States. On October 30, 2020, CPC provided a complete substantive response for this review within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i). We received no substantive responses from any other interested parties, nor was a hearing requested. On November 20, 2020, Commerce notified the U.S. International Trade Commission (ITC) that it did not receive an adequate substantive response from respondent interested parties. As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of the Order.

Scope of the Order

The merchandise covered by the order is barium chloride, a chemical compound having the formulas BaCl2 or BaCl2·2H2O, currently classifiable under subheading 2827.39.4500 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of this order is dispositive.

Analysis of Comments Received

All issues raised in this review, including the likelihood of continuation or recurrence of dumping in the event of revocation and the magnitude of the margins likely to prevail if the Order were revoked, are addressed in the accompanying Issues and Decision Memorandum. A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at http://access.trade.gov. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the internet at http://enforcement.trade.gov/frn/. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Final Results of Sunset Review

Pursuant to sections 751(c)(1), and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the antidumping duty order on barium chloride from China would likely lead to continuation or recurrence of dumping, and that the magnitude of the margin likely to prevail is up to 155.50 percent.

Administrative Protective Order (APO)

This notice serves as the only reminder to interested parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested.
