k. Description of Request: The applicant requests a temporary amendment of its reservoir elevation and minimum average daily flow requirements at the Rhodhiss development from March 1, 2021 through June 30, 2023. The application proposes to regularly exceed its normal maximum reservoir elevation of 995.1 feet mean sea level (full pool), particularly between Monday morning and Friday afternoon during the temporary amendment period. Additionally, rather than complying with its 225 cubic foot per second minimum flow release requirement by averaging flows over each day, the applicant proposes to instead use a rolling 7–day average to determine compliance. The amendment is being requested to facilitate removal of debris from the forebay and replacement of trashracks at the development.
