

Expected respondents: All applicants who have submitted proposals and reviewers who have reviewed NSF proposals between FY 2018 and 2020 will be invited to participate in the 2021 survey and comparable individuals who participated between FY 2020 and FY 2022 will be invited to participate in the 2023 survey. This is estimated to be approximately 87,000 individuals per survey round.

Average time per reporting: The online survey is comprised primarily of close-ended questions and is designed to be completed by respondents in approximately 20 minutes.

Frequency: Eligible applicants and reviewers will be asked to complete the 2021 Merit Review survey one time in fall 2021. For the 2023 survey,

eligible applicants and reviewers will be asked to complete the survey one time in fall 2023.

Estimate of burden: It is estimated the survey will require approximately 20 minutes (on average) to complete. The anticipated universe size for each survey cycle is 87,000 individuals, which includes all applicants who submitted proposals and all reviewers between FY 2018 and FY 2020 (for the 2021 survey) and between FY 2020 and FY 2022 (for the 2023 survey). The estimated survey response rate for each the 2021 and 2023 survey rounds is 40 percent. Therefore, the total burden is 23,200 hours; this is a respondent burden of 11,600 hours per survey year (2021 and 2023).

Based on 2019 merit review survey data, it is anticipated that most survey respondents will be working at an academic institution, likely in a teaching and/or research capacity. Therefore, for the purpose of burden estimates, we have used the annual mean wage for postsecondary teachers from Bureau of Labor Statistics, which is \$79,540.¹ Assuming a 40-hour workweek over the course of 52 weeks annually, the hourly wage for this occupation is approximately \$38.00. Therefore, the overall cost to survey respondents for each survey year (2021 and 2023) would be approximately \$440,800 (11,600 burden hours × \$38.00 per hour), as shown in table A.12.1 below.

TABLE A.12.1—ESTIMATE OF RESPONDENT BURDEN AND COST BY YEAR

Year	Number of respondents	Number of responses per respondent	Average burden per response (hours)	Total burden hours	Average hourly wage	Total cost
2021	34,800	1	0.33333	11,600	\$38	\$440,800
2022	0	0	0	0	0	0
2023	34,800	1	0.33333	11,600	38	440,800
Total	69,600	1	0.33333	23,200	38	881,600

NUCLEAR REGULATORY COMMISSION**[NRC-2020-0233]****Report on Waste Burial Charges; Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities****AGENCY:** Nuclear Regulatory Commission.**ACTION:** NUREG; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing NUREG-1307, Revision 18, "Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities." This report, which is revised periodically, explains the formula acceptable to the NRC for determining the minimum decommissioning fund requirements for nuclear power reactor licensees, as required by NRC regulations. Specifically, this report provides the adjustment factor and updates the values for the labor, energy, and waste burial escalation factors of the minimum formula.

DATES: NUREG-1307, Revision 18, is available on February 3, 2021.

SUPPLEMENTARY INFORMATION:**I. Discussion**

Pursuant to section 50.75 of title 10 of the *Code of Federal Regulations* (10 CFR), "Reporting and Recordkeeping for Decommissioning Planning," the NRC requires nuclear power reactor licensees to adjust annually, in current year dollars, their estimate of the cost to decommission their plants. The annual updates are part of the process for providing reasonable assurance that adequate funds for decommissioning will be available when needed.

Revision 18 of NUREG-1307, "Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities," modifies the previous revision to this report issued in February 2019 (ADAMS Accession No. ML19037A405) and incorporates updates to the adjustment factor and to the labor, energy, and waste burial escalation factors of the NRC minimum decommissioning fund formula. Due to modest pricing changes in low-level waste burial charges at the nation's four low-level waste disposal facilities, the minimum decommissioning fund formula amounts calculated by licensees, based on revised low-level waste burial factors presented in this report, will likely

reflect minimum decommissioning fund requirements (on average) that are similar to or slightly lower than those reported by licensees in 2019.

II. Additional Information

The NRC published a notice in the **Federal Register** on November 17, 2020 (85 FR 73299) requesting public comment on draft NUREG-1307, Revision 18. The public comment period closed on December 17, 2020. The NRC received four public comments. The public comments and the NRC staff's responses are presented in a comment resolution matrix available in ADAMS under Accession No. ML21008A253. The staff considered the public comments received on the draft document in preparing final NUREG-1307, Revision 18.
