Hercules basic models set forth in a PTO value of 92 percent for the Total not running time/Day (hr.) = 22.4
Total run time/Day (min.) = 96
Door Cycle time = 48 Sec.
Door Cycles/Day = 120
PTO calculated = .96
B. Second Example: Hercules Vertical Lift Door Models
Hercules Listed Model Groups:

• EVL—D—Electric Vertical Lift

Our second example covers doors within our vertical lift model group. Hercules Vertical Lift door basic models are operated at a maximum of 120 cycles (operations) per day, as specified by the DOE. One cycle is defined as one opening and closing cycle of a door. There is a maximum possible door travel of 288 inches operating at a constant speed of 12 IPS in both opening and closing directions.

The amount of time that the door is in the open and stopped position does not add to the calculation as the motor is not powered during this time.

Door Cycles/Day = 120
Door Cycle time = 48 Sec.
Total run time/Day (min.) = 96
Total not running time/Day (hr.) = 1.6
Total not running time/Day (hr.) = 22.4
PTO calculated = .96
Based on the PTO examples above Hercules would request a waiver to use a PTO value of 92 percent for the Hercules basic models set forth in Appendix I. The calculation for all door models demonstrates a much lower motor run time than the standards currently assume, which results in a much larger energy savings. Hercules is requesting this waiver so that we can continue to sell power operated doors which are more convenient and efficient for our customers. These doors represent a large part of the WICF market, and our business would be severely impacted if we could no longer make these doors available for our customers.

III. Interim Waiver Request

Hercules is also requesting an interim waiver for the identified Hercules basic models and individual models in Appendix I. Given the economic realities of business, it is imperative that the interim waiver be granted so that Senneca may ship Hercules doors to be used in DOE-regulated environments during the pendency of DOE’s review. Without a waiver, Hercules would be in a position of disadvantage in the marketplace for our products. Other manufacturers of similar product design, such as Jamison Doors, have petitioned and previously been granted Interim and permanent waivers on the same basis.

IV. Other Manufacturers

Manufacturers that are known to us of other basic models that are distributed in the United States and that incorporate designs with similar characteristics that are subject to this petition include: JAMISON DOORS, HH TECHNOLOGIES and FRANK DOORS.

Appendix I

For a list of the specific basic models for which the test procedure applies see the FRTC

§ 15.712(h)(1) were to the introductory text of (h)(1) and not (h)(1) as a whole.

This correction clarifies that the

§ 15.712(h)(1) introductory text, and (i)(1).

§ 15.712(h)(1) were to the introductory

d. Adding paragraph (c)(2)(iii); and

c. Revising paragraph (c)(2)(ii); and

e. Revising paragraphs (d), (f), and (g); and

§ 15.712 [Corrected]

1. On page 2293, in the second column, instruction number 6 amending § 15.712 is corrected to read as follows:

6. Amend § 15.712 by:

a. Revising the introductory text and paragraphs (a)(2) and (3) and (b)(3)(ii) and (iii);

b. Adding paragraph (b)(3)(iv); and

c. Revising paragraphs (c)(2)(ii); and

d. Adding paragraph (c)(2)(iii); and

e. Revising paragraphs (d), (f), and (g); and

§ 15.712(h)(1) introductory text, and (i)(1).

The revisions and additions read as follows:

Federal Communications Commission.

Marlene Dortch,
Secretary.

In FR Doc. 20–26706, appearing on page 2278 in the Federal Register on January 12, 2021, the following correction is made:

§ 15.712 [Corrected]

1. On page 2293, in the second column, instruction number 6 amending § 15.712 is corrected to read as follows:

6. Amend § 15.712 by:

a. Revising the introductory text and paragraphs (a)(2) and (3) and (b)(3)(ii) and (iii);

b. Adding paragraph (b)(3)(iv); and

c. Revising paragraphs (c)(2)(ii); and
