

Protection of Migratory Birds in the United States and Canada.” Additionally, in its public comments on the draft EIS for the MBTA rule, Canada stated that it believes the rule “is inconsistent with previous understandings between Canada and the United States (U.S.), and is inconsistent with the long-standing protections that have been afforded to non-targeted birds under the *Convention for the Protection of Migratory Birds in the United States and Canada* . . . as agreed upon by Canada and the U.S. through Article I. The removal of such protections will result in further unmitigated risks to vulnerable bird populations protected under the *Convention*.”

Therefore, we invite public comments on the MBTA rule to allow interested parties to provide comments about issues of fact, law, and policy raised by that rule, and so that we can consider any petitions for reconsideration involving the rule. We also invite public comments on whether the rule should be amended, rescinded, delayed pending further review by the agency, or allowed to go into effect. In particular, the USFWS would appreciate comments on the scope of the MBTA as it applies to conduct resulting in the injury or death of migratory birds protected by the MBTA, the impact of the MBTA rule on our treaty partners, the impact of the MBTA rule on regulated entities, the effect of the pending litigation on the MBTA rule, and the appropriateness of delaying the effective date of the MBTA rule beyond March 8, 2021. The USFWS will consider these comments in reviewing the MBTA rule. See **DATES** and **ADDRESSES**, above, and Public Comments, below, for more information on submitting comments.

Public Comments

You may submit your comments and materials concerning the rule by one of the methods listed in **ADDRESSES**. Comments must be submitted to <http://www.regulations.gov> before 11:59 p.m. (Eastern Time) on the date specified under *Written comments* in **DATES**. We will not consider mailed comments that are not postmarked by the date specified under *Written comments* in **DATES**. Comments previously submitted need not be resubmitted and will be fully considered in our review of the rule.

We will post your entire comment—including your personal identifying information—on <http://www.regulations.gov>. If you provide personal identifying information in your comment, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we

will be able to do so. Comments and materials we receive will be available for public inspection on <http://www.regulations.gov>.

Administrative Procedure Act

Our implementation of this action delaying the effective date of the MBTA rule from February 8, 2021, to March 8, 2021, without opportunity for public comment, effective immediately upon filing for publication in the **Federal Register**, is based on the good cause exceptions provided in the Administrative Procedure Act. Pursuant to 5 U.S.C. 553(b)(B), we have determined that good cause exists to forgo the requirement to provide prior notice and an opportunity for public comment thereon for this rule as such procedures are unnecessary where the agency lacks discretion to choose an alternative course of action. As discussed above, the change of the effective date to March 8, 2021, is being made to comply with the 60-day effective date delay for major rules provided for in the Congressional Review Act. 5 U.S.C. 801(a)(3). For the same reasons discussed above, USFWS finds that there is good cause to waive the effective date delay under 5 U.S.C. 553(d)(3) and 5 U.S.C. 808(2).

Authority: The authorities for this action are 16 U.S.C. 668a–d, 703–712, 742a–j–l, 1361–1384, 1401–1407, 1531–1543, 3371–3378; 18 U.S.C. 42; and 19 U.S.C. 1202.

Shannon A. Estenoz,

Senior Advisor to the Secretary, Exercising the Delegated Authority of the Assistant Secretary for Fish and Wildlife and Parks.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

[Docket No. 180117042–8884–02; RTID 0648–XA795]

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; Purse Seine category annual quota adjustment; quota transfer.

SUMMARY: NMFS is adjusting the Atlantic bluefin tuna (BFT) Purse Seine and Reserve category quotas for 2021, as

it has done annually since 2015. NMFS also is transferring 26 metric tons (mt) of BFT quota from the Reserve category to the General category January 2021 subquota period (from January 1 through March 31, 2021, or until the available subquota for this period is reached, whichever comes first). The transfer to the General category is based on consideration of the regulatory determination criteria regarding inseason adjustments and applies to Atlantic tunas General category (commercial) permitted vessels and Highly Migratory Species (HMS) Charter/Headboat category permitted vessels with a commercial sale endorsement when fishing commercially for BFT.

DATES: Effective February 8, 2021, through December 31, 2021.

FOR FURTHER INFORMATION CONTACT:

Sarah McLaughlin, sarah.mclaughlin@noaa.gov, 978–281–9260, Nicholas Velseboer, nicholas.velseboer@noaa.gov, 978–675–2168, or Larry Redd, Jr., larry.redd@noaa.gov, 301–427–8503.

SUPPLEMENTARY INFORMATION:

Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated Atlantic HMS Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006), and amendments. NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota.

Annual Adjustment of the BFT Purse Seine and Reserve Category Quotas

The current baseline Purse Seine, General, and Reserve category quotas are codified as 219.5 mt, 555.7 mt, and 29.5 mt, respectively. See § 635.27(a). Pursuant to § 635.27(a)(4), NMFS has determined the amount of quota available to the Atlantic Tunas Purse Seine category participants in 2021, based on their BFT catch (landings and dead discards) in 2020. In accordance with the regulations, NMFS makes available to each Purse Seine category

participant either 100 percent, 75 percent, 50 percent, or 25 percent of the individual baseline quota allocations based on the previous year's catch, as described in § 635.27(a)(4)(ii), and reallocates the remainder to the Reserve category. NMFS has calculated the amounts of quota available to the Purse Seine category participants for 2021 based on their individual catch levels in 2020 and the codified process adopted in Amendment 7. NMFS did not open the Purse Seine fishery in 2020 because there were no purse seine vessels permitted to fish for BFT and thus no catch in 2020. As a result, each Purse Seine category participant will receive 25 percent of the individual baseline quota amount, which is the required distribution even with no fishing activity under the current regulations. The individual baseline amount is 43.9 mt (219.5 mt divided by five Purse Seine category participants), 25 percent of which is 11 mt. Consistent with § 635.27(a)(4)(v)(C), NMFS notifies Atlantic Tunas Purse Seine category participants of the amount of quota available for their use this year through the Individual Bluefin Quota electronic system established under § 635.15 and in writing.

By summing the individual available allocations, NMFS has determined that 55 mt are available to the Purse Seine category for 2021. Thus, the amount of Purse Seine category quota to be reallocated to the Reserve category is 164.5 mt (219.5 mt – 55 mt). This reallocation results in an adjusted 2021 Reserve category quota of 194 mt (29.5 mt + 164.5 mt), before any further transfers to other categories.

Transfer of 26 mt From the Reserve Category to the General Category

Each of the General category time periods (January, June through August, September, October through November, and December) is allocated a subquota or portion of the annual General category quota. Although it is called the “January” subquota, the regulations allow the General category fishery under this quota to continue until the subquota is reached or March 31, whichever comes first.

Under § 635.27(a)(9), NMFS has the authority to transfer quota among fishing categories or subcategories after considering regulatory determination criteria at § 635.27(a)(8). For 2021 to date, NMFS has transferred 19.5 mt from the General category December 2021 subquota period to the January 2021 subquota period (85 FR 83832, December 23, 2020), resulting in an adjusted General category January period subquota of 49 mt.

NMFS has considered all of the relevant determination criteria and their applicability to the inseason quota transfer. These considerations include, but are not limited to, the following:

Regarding the usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock (§ 635.27(a)(8)(i)), biological samples collected from BFT landed by General category fishermen and provided by BFT dealers provide NMFS with valuable data for ongoing scientific studies of BFT age and growth, migration, and reproductive status. Additional opportunity to land BFT over the longest time-period allowable would support the continued collection of a broad range of data for these studies and for stock monitoring purposes.

NMFS also considered the catches of the General category quota to date (including during the winter fishery in the last several years), and the likelihood of closure of that segment of the fishery if no adjustment is made (§ 635.27(a)(8)(ii) and (ix)). As of February 2, 2021, the General category has landed 17.6 mt of its adjusted January 2021 subquota of 49 mt. Commercial-size BFT are currently readily available to vessels fishing under the General category quota. Without a quota transfer at this time, General category participants would have to stop BFT fishing activities with very short notice, while commercial-sized BFT remain available in the areas General category permitted vessels operate. Transferring 26 mt of BFT quota from the Reserve category would result in a total of 75 mt being available for the General category for the January 2021 subquota period.

Regarding the projected ability of the vessels fishing under the particular category quota (here, the General category) to harvest the additional amount of BFT quota transferred before the end of the fishing year (§ 635.27(a)(8)(iii)), NMFS considered General category landings over the last several years and landings to date this year. Landings are highly variable and depend on access to commercial-sized BFT and fishing conditions, among other factors. NMFS anticipates that all 26 mt of transferred quota will be used by March 31. In the unlikely event that any of this quota is unused by March 31, the unused quota will roll forward to the next subperiod within the calendar year (*i.e.*, the June through August time period), and NMFS anticipates that it would be used by the subquota category before the end of the fishing year.

NMFS also considered the estimated amounts by which quotas for other gear

categories of the fishery might be exceeded (§ 635.27(a)(8)(iv)) and the ability to account for all 2021 landings and dead discards. In the last several years, total U.S. BFT landings have been below the total available U.S. quota such that the United States has carried forward the maximum amount of underharvest allowed by ICCAT from one year to the next. NMFS will need to account for 2021 landings and dead discards within the adjusted U.S. quota, consistent with ICCAT recommendations, and NMFS anticipates having sufficient quota to do that, even with this 26-mt transfer to the General category.

NMFS also considered the effects of the adjustment on the BFT stock and the effects of the transfer on accomplishing the objectives of the 2006 Consolidated HMS FMP (§ 635.27(a)(8)(v) and (vi)). This transfer would be consistent with the current U.S. quota, which was established and analyzed in the 2018 BFT quota final rule, and with objectives of the 2006 Consolidated HMS FMP and amendments, which include measures to meet obligations related to ending overfishing and rebuilding stocks (§ 635.27(a)(8)(v) and (vi)). Another consideration is the objective of providing opportunities to harvest the full annual U.S. BFT quota without exceeding it based on the objectives of the 2006 Consolidated HMS FMP and amendments, including to achieve optimum yield on a continuing basis and to optimize the ability of all permit categories to harvest their full BFT quota allocations (related to § 635.27(a)(8)(x)). Specific to the General category, this includes the goal of providing opportunity equitably across all time periods.

NMFS also anticipates that some underharvest of the 2020 adjusted U.S. BFT quota will be carried forward to 2021 and placed in the Reserve category, in accordance with the regulations, later this year. This, in addition to the fact that any unused General category quota will roll forward to the next subperiod within the calendar year and NMFS' plan to actively manage the subquotas to avoid any exceedances, makes it likely that General category quota will remain available through the end of 2021 for December fishery participants. NMFS also may transfer unused quota from the Reserve or other categories, inseason, based on consideration of the determination criteria, as it did in 2020 (*i.e.*, transferred 111.6 mt from the Reserve category effective September 17, 2020 (85 FR 59445, September 22, 2020); 40 mt from the Reserve category effective October 9, 2020 (85 FR 64411,

October 13, 2020); 68.7 mt from the Reserve category effective October 26, 2020 (85 FR 68798, October 30, 2020); and 19.5 mt from the Reserve category effective December 1, 2020 (85 FR 75918, November 27, 2020).

NMFS anticipates that General category participants in all areas and time periods will have opportunities to harvest the General category quota in 2021, through active inseason management measures, such as retention limit adjustments and/or the timing of quota transfers (§ 635.27(a)(8)(viii)). Thus, this quota transfer would allow fishermen to take advantage of the availability of fish on the fishing grounds, taking into consideration the expected increases in available 2021 quota from carryforward later in the year, and provide a reasonable opportunity to harvest the full U.S. BFT quota, without precluding vessels in another area from having a reasonable opportunity to harvest a portion of the category's quota.

Based on the considerations above, NMFS is transferring 26 mt from the adjusted Reserve category to the General category for the January 2021 fishery, resulting in a subquota of 75 mt for the January 2021 fishery and 168 mt in the Reserve category.

Monitoring and Reporting

NMFS will continue to monitor the BFT fishery closely. Dealers are required to submit landings reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS' ability to timely implement actions such as quota and retention limit adjustment, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required to report the catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing hmspermits.noaa.gov or by using the HMS Catch Reporting app, or calling (888) 872-8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional action (e.g., quota adjustment, daily retention limit adjustment, or closure) is necessary to ensure available subquotas are not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. If needed, subsequent adjustments will be published in the **Federal Register**. As needed, NMFS will close the General category fishery when the adjusted January 2021 period

subquota has been reached. Even if the adjusted subquota is not reached, the General category fishery will close automatically on March 31, 2021, and will remain closed until it reopens on June 1, 2021. Fishermen may call the Atlantic Tunas Information Line at (978) 281-9260, or access hmspermits.noaa.gov, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is consistent with regulations at 50 CFR part 635, which were issued pursuant to section 304(c) of the Magnuson-Stevens Act and the Atlantic Tunas Convention Act, and is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that it is impracticable and contrary to the public interest to provide prior notice of and an opportunity for public comment on, the transfer from the Reserve category to the General category for the following reasons:

The regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason quota transfers to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. These fisheries are currently underway and the fishery would be closed absent the additional quota. Affording prior notice and opportunity for public comment to implement the quota transfer is impracticable and contrary to the public interest as such a delay would result in exceedance of the General category January 2021 subquota or earlier closure of the fishery while fish are available on the fishing grounds. This action does not raise conservation and management concerns. Transferring quota from the Reserve category to the General category does not affect the overall U.S. BFT quota, and available data shows the adjustment would have a minimal risk of exceeding the ICCAT-allocated quota. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota, measures to reallocate quota, and the inseason adjustment criteria. For all of the above reasons, there is good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: February 3, 2021.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 200221-0062; RTID 0648-XA782]

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Catcher Vessels Less Than 50 Feet (15.2 Meters) Length Overall Using Hook-and-Line Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for catcher vessels less than 50 feet (15.2 meters (m)) length overall using hook-and-line (HAL) gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the A season allowance of the 2021 total allowable catch (TAC) of catcher vessels less than 50 feet (15.2 m) length overall using HAL gear in the Central Regulatory Area of the GOA.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), February 5, 2021, through 1200 hours, A.l.t., June 10, 2021.

FOR FURTHER INFORMATION CONTACT: Obren Davis, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The A season allowance of the 2021 Pacific cod TAC apportioned to catcher vessels less than 50 feet (15.2 m) length overall using HAL gear in the Central Regulatory Area of the GOA is 945 metric tons (mt) as established by the final 2020 and 2021 harvest
