any particular provider. The Commission also determined that CTIA’s petition to revise the 2021 and 2023 deadlines was untimely, as these deadlines were established in the 2015 Fourth Report and Order. In response to CTIA’s argument that postponement of Stage Zb testing created an insurmountable obstacle for meeting the Commission’s timelines, the Commission found that it had already determined in the Sixth Report and Order and Fifth Report and Order that compliance was feasible, and the deployment of mobile OS-based technologies had no bearing on that feasibility. In response to CTIA’s argument that indoor location accuracy benchmarks are a mandate that providers use barometric sensor-based solutions, the Commission noted that the Sixth Report and Order does not require providers to use any particular technology. The Commission also disagreed with CTIA’s claim that the Sixth Report and Order improperly relied on vendors’ claims, as the Sixth Report and Order underscored the active role that CMRS providers would need to play in the deployment of z-axis solutions. In addition, the Commission found that, contrary to CTIA’s assertions, it had adequately considered the benefits of the nationwide providers’ proposed solution in the Sixth Report and Order, and the decision was consistent with Commission precedent. Further, the Commission found that it had reasonably relied on confidence and uncertainty standards in the rules.

4. Similarly, the Commission determined that APCO’s petition for reconsideration of certain requirements was repetitive, untimely, and misconstrued the record of this proceeding, which affirms that a diverse array of technological approaches could be used to provide dispatchable location. The Commission determined that APCO’s petition for reconsideration was repetitive, as the Commission had already considered and rejected in the Sixth Report and Order APCO’s suggestion that the Commission revise its rules to require CMRS providers to provide dispatchable location for a minimum percentage of 911 calls. The Commission also determined that APCO’s argument that notice was insufficient for the Commission’s decision to convert the NEAD benchmark to an “any database” benchmark misconstrued the record, as the Commission anticipated the possibility of the NEAD failure in the Fifth Further Notice and proposed allowing CMRS providers to use other databases to support dispatchable location. In addition, the Commission determined that APCO’s argument asking the Commission to substitute a dispatchable location requirement based on a minimum percentage of calls was untimely, as the deployment and reference point requirements were adopted in the 2015 Fourth Report and Order. The Commission further found, contrary to APCO’s arguments, that the existing reference point benchmark was reasonable and that the demise of the NEAD does not require changing it; in amending the rules to allow alternatives to the NEAD, the Commission made clear that any carrier using a non-NEAD database to support dispatchable location must meet the same technical and functional requirements that would have applied to the NEAD. The Commission affirmed its requirement adopted in the Sixth Report and Order that CMRS carriers provide dispatchable location with wireless E911 calls when it is technically feasible and cost effective to do so. The Commission also found that APCO’s proposed percentage-of-calls approach was arbitrary and lacked any showing of technical feasibility or cost-effectiveness.

I. Procedural Matters

5. Paperwork Reduction Act Analysis. This Order on Reconsideration does not contain any new or modified information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. Thus, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).

6. Congressional Review Act. The Commission will not send a copy of this Order on Reconsideration to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A), because no rule was adopted or amended.

7. Regulatory Flexibility Act Analysis. In the Sixth Report and Order, the Commission provided a Final Regulatory Flexibility Analysis pursuant to the Regulatory Flexibility Act of 1980, as amended (RFA). We received no petitions for reconsideration of that Final Regulatory Flexibility Analysis. In this present Order on Reconsideration, the Commission promulgates no additional final rules. Our present action is, therefore, not an RFA matter.
be amended, rescinded, delayed pending further review by the agency, or allowed to go into effect. Public comments must be received or postmarked on or before March 1, 2021.

**ADDRESSES:** You may submit comments by one of the following methods:

1. **Electronically:** Go to the Federal eRulemaking Portal: [http://www.regulations.gov](http://www.regulations.gov). In the Search box, enter FWS–HQ–MB–2018–0090, which is the docket number for the rule. Then, click on the Search button. You may submit a comment by clicking on “Comment Now!”

We request that you send comments only by the methods described above. We will post all comments on [https://www.regulations.gov](https://www.regulations.gov). This generally means that we will post any personal information you provide us (see Public Comments, below, for more information).

**FOR FURTHER INFORMATION CONTACT:**

**SUPPLEMENTARY INFORMATION:** On January 7, 2021, we, the U.S. Fish and Wildlife Service (USFWS), published a final rule defining the scope of the Migratory Bird Treaty Act (MBTA) as it applies to conduct resulting in the injury or death of migratory birds protected by the MBTA. During the course of review, the Office of Information and Regulatory Affairs (OIRA) of the Office of Management and Budget (OMB), based on information provided by the USFWS, determined that the MBTA rule was economically significant under Executive Order 12866, because it was likely to have an annual effect on the economy of $100 million or more, and that it was therefore a “major rule” under subtitle E of the Small Business Regulatory Enforcement Fairness Act (the “Congressional Review Act” or “CRA”).

Specifically, the public has a strong interest in conserving the migratory bird resource and fulfilling shared objectives and obligations with a treaty partner, Canada. These interests could be harmed by allowing this regulation to take effect on its current effective date. Notwithstanding this statutory requirement, the MBTA rule was published in the Federal Register without the requisite delay. This final rule corrects the effective date to March 8, 2021, in accordance with the CRA.

In addition, on January 20, 2021, the White House issued a memorandum (86 FR 7424, January 28, 2021) instructing Federal agencies to consider postponing the effective date of any rules that have published in the Federal Register but not yet taken effect, for the purpose of reviewing any questions of fact, law, and policy they may raise. The memorandum directs that, for rules postponed in this manner, where appropriate and consistent with applicable law, agencies consider opening a comment period to allow interested parties to provide comments about issues of fact, law, and policy raised by those rules, and consider any petitions for reconsideration involving such rules.

For the reasons explained above, in accordance with the Congressional Review Act, we are delaying the effective date of the MBTA rule we published on January 7, 2021 (86 FR 1134). The original effective date of the rule was February 8, 2021; with this document, we are changing the effective date of the rule to March 8, 2021, 60 days from its initial publication.

Immediate implementation of the MBTA rule on March 8, 2021, significantly impacts the public interest. Specifically, the public has a strong interest in conserving the migratory bird resource and fulfilling shared objectives and obligations with a treaty partner, Canada. These interests could be harmed by allowing this regulation to take effect on its current effective date. First, as noted in the environmental impact statement (EIS) developed to analyze the impacts of the MBTA rule (85 FR 76077, November 27, 2020), its implementation may have significant impacts on migratory bird species and other resources. The EIS concluded that implementing the MBTA rule may have significant impacts on migratory birds, vegetation, other wildlife, and associated ecosystem services and other economic activities, but admitted that data are not readily quantifiable and available to determine the magnitude of those impacts. Neither the EIS nor the associated record of decision (“ROD”) set forth a monitoring plan to ascertain the magnitude of those impacts after implementation of the final rule. Thus, there is a high likelihood that the public interest in these resources will be harmed given that the magnitude of the impacts is likely significant but unknown and no monitoring plan is in place to determine that magnitude.

Second, further delay of the effective date may make it possible to avoid costly and unnecessary litigation. As noted above, the District Court for the Southern District of New York, in vacating Solicitor’s Opinion M–37050, has already expressly rejected the legal rationale of the MBTA rule, and two additional suits have been filed challenging the MBTA rule itself.

Third, further consideration of concerns expressed by one of our treaty partners may counsel in favor of further delay of the effective date of the MBTA rule. The MBTA implements four bilateral migratory bird Conventions with Canada, Mexico, Russia, and Japan. See 16 U.S.C. 703–705, 712. The Government of Canada communicated its concerns with the MBTA rule both during and after the rulemaking process, including providing comments on the EIS associated with the rule.

After the public notice and comment period had closed, Canada’s Minister of Environment and Climate Change summarized the Government of Canada’s concerns in a public statement issued on December 18, 2020 ([https://www.canada.ca/en/environment-climate-change/news/2020/12/minister-wilkinson-expresses-concern-over-proposed-regulatory-changes-to-the-united-states-migratory-bird-treaty-act.html](https://www.canada.ca/en/environment-climate-change/news/2020/12/minister-wilkinson-expresses-concern-over-proposed-regulatory-changes-to-the-united-states-migratory-bird-treaty-act.html)). Minister Wilkinson stated the Government of Canada’s concern regarding “the potential negative impacts to our shared migratory bird species” of allowing the incidental take of migratory birds under the MBTA rule and “the lack of quantitative analysis to inform the decision.” He noted that the “Government of Canada’s interpretation of the proposed changes . . . is that they are not consistent with the objectives of the Convention for the
Protection of Migratory Birds in the United States and Canada.”

Additionally, in its public comments on the draft EIS for the MBTA rule, Canada stated that it believes the rule “is inconsistent with previous understandings between Canada and the United States (U.S.), and is inconsistent with the long-standing protections that have been afforded to non-targeted birds under the Convention for the Protection of Migratory Birds in the United States and Canada . . . as agreed upon by Canada and the U.S. through Article I. The removal of such protections will result in further unmitigated risks to vulnerable bird populations protected under the Convention.”

Therefore, we invite public comments on the MBTA rule to allow interested parties to provide comments about issues of fact, law, and policy raised by that rule, and so that we can consider any petitions for reconsideration involving the rule. We also invite public comments on whether the rule should be amended, rescinded, delayed pending further review by the agency, or allowed to go into effect. In particular, the USFWS would appreciate comments on the scope of the MBTA as it applies to conduct resulting in the injury or death of migratory birds protected by the MBTA, the impact of the MBTA rule on our treaty partners, the impact of the MBTA rule on regulated entities, the effect of the pending litigation on the MBTA rule, and the appropriateness of delaying the effective date of the MBTA rule beyond March 8, 2021. The USFWS will consider these comments in reviewing the MBTA rule. See DATES and ADDRESSES, above, and Public Comments, below, for more information on submitting comments.

Public Comments

You may submit your comments and materials concerning the rule by one of the methods listed in ADDRESSES. Comments must be submitted to http://www.regulations.gov before 11:59 p.m. (Eastern Time) on the date specified under Written comments in DATES. We will not consider mailed comments that are not postmarked by the date specified under Written comments in DATES. Comments previously submitted need not be resubmitted and will be fully considered in our review of the rule.

We will post your entire comment—including your personal identifying information—on http://www.regulations.gov. If you provide personal identifying information in your comment, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Comments and materials we receive will be available for public inspection on http://www.regulations.gov.

**Administrative Procedure Act**

Our implementation of this action delaying the effective date of the MBTA rule from February 8, 2021, to March 8, 2021, without opportunity for public comment, effective immediately upon filing for publication in the Federal Register, is based on the good cause exceptions provided in the Administrative Procedure Act. Pursuant to 5 U.S.C. 553(b)(B), we have determined that good cause exists to forgo the requirement to provide prior notice and an opportunity for public comment thereon for this rule as such procedures are unnecessary where the agency lacks discretion to choose an alternative course of action. As discussed above, the change of the effective date to March 8, 2021, is being made to comply with the 60-day effective date delay for major rules provided for in the Congressional Review Act. 5 U.S.C. 801(a)(3). For the same reasons discussed above, USFWS finds that there is good cause to waive the effective date delay under 5 U.S.C. 553(d)(3) and 5 U.S.C. 808(2).

Shannon A. Estenoz,
Senior Advisor to the Secretary, Exercising the Delegated Authority of the Assistant Secretary for Fish and Wildlife and Parks.

**National Oceanic and Atmospheric Administration**

**50 CFR Part 635**

[Docket No. 180117042–8884–02; RTID 0648–XA795]

**Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; Purse Seine category annual quota adjustment; quota transfer.

**SUMMARY:** NMFS is adjusting the Atlantic bluefin tuna (BFT) Purse Seine and Reserve category quotas for 2021, as it has done annually since 2015. NMFS also is transferring 26 metric tons (mt) of BFT quota from the Reserve category to the General category January 2021 subquota period (from January 1 through March 31, 2021, or until the available subquota for this period is reached, whichever comes first). The transfer to the General category is based on consideration of the regulatory determination criteria regarding inseason adjustments and applies to Atlantic tunas General category (commercial) permitted vessels and Highly Migratory Species (HMS) Charter/Headboat category permitted vessels with a commercial sale endorsement when fishing commercially for BFT.

**DATES:** Effective February 8, 2021, through December 31, 2021.

**FOR FURTHER INFORMATION CONTACT:** Sarah McLaughlin, sarah.mclaughlin@noaa.gov, 978–281–9260, Nicholas Velseboer, nicholas.velteboer@noaa.gov, 978–675–2168, or Larry Redd, Jr., larry.redd@noaa.gov, 301–427–8503.

**SUPPLEMENTARY INFORMATION:**

Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 et seq.) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 et seq.) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subordinates the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated Atlantic HMS Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006), and amendments. NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota. Annual Adjustment of the BFT Purse Seine and Reserve Category Quotas

The current baseline Purse Seine, General, and Reserve category quotas are codified as 219.5 mt, 555.7 mt, and 29.5 mt, respectively. See § 635.27(a). Pursuant to § 635.27(a)(4), NMFS has determined the amount of quota available to the Atlantic Tunas Purse Seine category participants in 2021, based on their BFT catch (landings and dead discards) in 2020. In accordance with the regulations, NMFS makes available to each Purse Seine category
