B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2021-0038 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. II. Additional Information

The NRC is issuing for public comment a DG in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, “Safety-Related Steel Structures and Steel-Plate Composite Walls for other than Reactor Vessels and Containments” is a proposed new guide temporarily identified by its task number, DG–1304. It proposes guidance to meet regulatory requirements for safety-related steel structures and steel-plate composite walls for other than reactor vessels and containments. It endorses with, exceptions and clarifications, the 2018 edition of ANSI/AISC N690–2018, “Specification for Safety-Related Steel Structures for Nuclear Facilities.”

The staff is also issuing for public comment a draft regulatory analysis (ADAMS Accession No. ML20339A559). The staff develops a regulatory analysis to assess the value of issuing or revising a regulatory guide as well as alternative courses of action.

III. Backfitting, Forward Fitting, and Issue Finality

Issuance of DG–1304, if finalized, would not constitute backfitting as that term is defined in title 10 of the *Code of Federal Regulations* (10 CFR) section 50.109, “Backfitting,” and as described in NRC Management Directive 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; constitute forward fitting as that term is defined and described in MD 8.4; or affect issue finality of any approval issued under 10 CFR part 52, “Licenses, Certificates, and Approvals for Nuclear Power Plants.” As explained in DG–1304, applicants and licensees are not required to comply with the positions set forth in DG–1361.
