Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP)—Funding Opportunity Announcement (FOA), RFA OH–21–003, Extension of the World Trade Center Health Registry (U50); Amended Notice of Meeting

Notice is hereby given of a change in the meeting of the Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP)—Funding Opportunity Announcement (FOA), RFA OH–21–003, Extension of the World Trade Center Health Registry (U50), April 13, 2021, 9:00 a.m.–6:00 p.m., EDT in the original FRN.

The virtual meeting was published in the Federal Register on Monday, January 11, 2021, Volume 86, Number 6, page 1976.

The meeting on April 13, 2021 is being amended to change the time and should read as follows:

Time: 1:00 p.m.–3:00 p.m., EDT.

The meeting is closed to the public.

FOR FURTHER INFORMATION CONTACT:

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign Federal Register notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,
Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

National Center for Advancing Translational Sciences; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Center for Advancing Translational Sciences Special Emphasis Panel; CTSA Revision Award.

Date: March 9, 2021.

Time: 12:00 p.m. to 6:00 p.m.

Prospective Grant of an Exclusive Patent License: Autologous Therapy for the Treatment of Autoimmune Disease Using Chimeric Antigen Receptors Targeting CD19

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute, an institute of the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an Exclusive Patent License to practice the inventions embodied in the Patents and Patent Applications listed in the Supplementary Information section of this notice to Kyverna Therapeutics ("Kyverna") located in Berkeley, CA.
The following represents the intellectual property to be licensed under the prospective agreement:

The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America. The prospective exclusive license territory may be worldwide and the field of use may be limited to the following:

“...The development, production and commercialization of an anti-CD19 targeting chimeric antigen receptor (CAR)-based immunotherapy using autologous (meaning one individual is both the donor and the recipient) T lymphocytes transduced using a lentivirus, wherein the vector expresses a CAR having at least:

(1) The complementary determining region (CDR) sequences of the anti-CD19 antibody known as Hu19;

(2) a CD8a hinge and transmembrane domain;

(3) and a CD28z T cell signaling domain; for the treatment of autoimmune diseases..."

This technology discloses the development of chimeric antigen receptors that recognize the CD19 cell surface protein. CD19 is expressed on the cell surface of several autoimmune disease cells, including lupus nephritis. For many autoimmune diseases there are no FDA-approved therapies, underscoring that there is an unmet need. The development of an autoimmune disease therapeutic targeting CD19 will benefit public health by providing a treatment for patients who may not have any options. This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404. In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a completed license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Richard U. Rodriguez,
Associate Director, Technology Transfer Center, National Cancer Institute.
