Supplementary Information: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the Federal Register concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

OMB Control Number 0910–0052—Extension

This information collection supports Agency regulations. Under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360), any person owning or operating an establishment that manufactures, prepares, propagates, compounds, or processes a drug or device must register with the Secretary of Health and Human Services, on or before December 31 of each year, his or her name, places of business, and all such establishments, among other information and must submit, a listing of all drug and device products manufactured, prepared, propagated, compounded, or processed by him or her for commercial distribution, among other information. In 21 CFR part 607, FDA has issued regulations implementing these requirements for manufacturers of human blood and blood products.

The regulations set forth procedures and requirements pertaining to establishment registration and product listing for manufacturers of human blood and blood products and licensed devices, including initial registration, annual registration, product listing updates, and waiver requests. Owners or operators of certain establishments that engage in the manufacture of blood products shall register and submit a list of every blood product in commercial distribution (21 CFR 607.20(a)). Initial and subsequent registrations and product listings must be submitted electronically through FDA’s Center for Biologics Evaluation and Research (CBER) Blood Establishment Registration and Product Listing system.
or any future superseding electronic system, unless FDA has granted a request for waiver of this requirement prior to the date on which the information is due (21 CFR 607.22(a)). Waiver requests must be submitted in writing and must include, among other information, the specific reasons why electronic submission is not reasonable for the registrant (21 CFR 607.22(b)). Establishment registration and product listing information assists FDA in its inspections of facilities, among other uses, and its collection is essential to the overall regulatory scheme designed to ensure the safety of the Nation’s blood supply.

**Description of Respondents:** Respondents to this collection of information are human blood and plasma donor centers, blood banks, certain transfusion services, other blood product manufacturers, independent laboratories that engage in quality control and testing for registered blood product establishments and manufacturers of devices licensed under section 351 of the Public Health Service Act.

We estimate the burden of the information collection as follows:

1 There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on our evaluation of Fiscal Year 2019 data from CB ER’s Blood Establishment Registration and Product Listing system, we have adjusted the currently approved burden estimate we attribute to establishment registration and product listing to reflect a slight increase in submissions; however, the overall burden has not changed.

Lauren K. Roth,
Acting Principal Associate Commissioner for Policy.
