[Release No. 34–91124; File No. SR–BX–2020–033]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Order Granting Approval of a Proposed Rule Change To Utilize the FIX Protocol To Submit Orders to BX's Price Improvement Auction Mechanism

February 12, 2021.

I. Introduction

On October 27, 2020, Nasdaq BX, Inc. (“BX” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder,² a proposed rule change to utilize the “Financial Information eXchange” (“FIX”) ³ protocol for BX Participants ⁴ seeking to submit orders into the Price Improvement Auction (“PRISM”) mechanism. The proposed rule change was published for comment in the **Federal Register** on November 16, 2020.⁵ On December 29, 2020, the

Commission extended the time period within which to approve, disapprove, or institute proceedings to determine whether to approve or disapprove the proposed rule changes.⁶ The Commission received no comments on the proposed rule change. The Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

Pursuant to BX Options 3, Section 13, a BX Participant may electronically submit for execution an order it represents as agent on behalf of a Public Customer,⁷ broker dealer, or any other entity (“PRISM Order”) against principal interest or against any other order ⁸ it represents as agent (an “Initiating Order”), provided it submits the PRISM Order for electronic execution into the Auction. According to the Exchange, BX Participants currently solicit contra-side Initiating Orders to pair with their PRISM Orders using methods such as telephone, electronically using an external order management system, or utilizing instant message.⁹ BX proposes to provide BX Participants (“sender”) the option to use the FIX protocol to send a message, which includes a PRISM Order, to one or more BX Participants (“recipient”) requesting that they provide a contra-side Initiating Order in response, which would result in the start of a PRISM auction (“Request for PRISM”). BX Participants must opt-in in order to receive Requests for PRISM. A Request for PRISM would be sent simultaneously to all BX Participants who opted in to receive Requests for PRISM,¹⁰ and a BX Participant who opts-in would receive all Requests for PRISM from all senders.¹¹

⁶ See Securities Exchange Act Release Nos. 90815, 86 FR 353 (January 5, 2021), in which the Commission designated February 14, 2021 as the date by which it should approve, disapprove, or institute proceedings to determine whether to disapprove these proposed rule changes.

⁷ A “Public Customer” means a person that is not a broker or dealer in securities and is not a Professional as defined within BX Options 1, Section 1(a)(48). See BX Options 1, Section 1(a)(49). A “Professional” means any person or entity that (i) is not a broker or dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). All Professional orders shall be appropriately marked by Participants. See BX Options 1, Section 1(a)(48).

⁸ PRISM Orders submitted during the final two seconds of the trading session in the affected series are not eligible to initiate an Auction and will be immediately cancelled. See BX Options 3, Section 13(i)(F).

⁹ See Notice, *supra* note 5, at 73095 n.7.

¹⁰ Proposed BX Options 3, Section 7(d)(1)(A)(1)(b).

¹¹ Proposed BX Options 3, Section 7(d)(1)(A)(1)(a).

The Exchange proposes to establish a certain time period up to one second ¹² within which a recipient, if it chooses to respond to the Request for PRISM, may utilize FIX to submit the sender's PRISM Order, along with its Initiating Order, into the System for execution into PRISM pursuant to Options 3, Section 13 (“response”).¹³ The System would enter the PRISM Order and the Initiation Order of the first recipient to respond into the PRISM through FIX to start a PRISM auction and would send a reject message to subsequent responders.¹⁴ Any Initiating Order must match the PRISM Order and is not permitted to improve the price, or else it would be rejected.¹⁵ However, the Initiating Order may be configured to improve the PRISM Order stop price pursuant to Options 3, Section 13(ii)(A)(1)(c);¹⁶ the configuration would apply only if the System initiated a PRISM auction.¹⁷ If there are no responses to the Request for PRISM, the PRISM Order would be placed on the Order Book as a Limit Order or cancelled, consistent with the sending BX Participant's instruction.¹⁸

Once a recipient of a Request for PRISM has responded to the Request for PRISM by adding the Initiating Order, the PRISM may not be cancelled.¹⁹ The sender may not cancel a Request for PRISM once that Request for PRISM has

¹² The Exchange will initially set the time period to 100 milliseconds to respond to the Request for PRISM or otherwise not respond before the Request for PRISM would become unavailable. The Exchange will post the time period on its System settings page. See Notice, *supra* note 5, at 73096 n.8.

¹⁶ *Id.* BX Options 3, Section 13(ii)(A)(1) provides three options to submit a PRISM Order and initiate the PRISM Auction. Specifically, the Initiating Participant must mark the PRISM Order for Auction processing, and specify either: (a) A single price at which it seeks to execute the PRISM Order (a “stop price”); (b) that it is willing to automatically match as principal or as agent on behalf of an Initiating Order the price and size of all PAN responses, and trading interest (“auto-match”) in which case the PRISM Order will be stopped at the NBBO on the Initiating Order side; or (c) that it is willing to either: (i) Stop the entire order at a single stop price and auto-match PAN responses and trading interest at a price or prices that improve the stop price to a specified price (a “No Worse Than” or “NWT” price); (ii) stop the entire order at a single stop price and auto-match all PAN responses and trading interest at or better than the stop price; or (iii) stop the entire order at the NBBO on the Initiating Order side, and auto-match PAN responses and trading interest at a price or prices that improve the stop price up to the NWT price.
