ADDRESSES:

DATES:

ACTION:

AGENCY:

Aviation Airplanes

Airworthiness Directives; Dassault
Aviation Planes

AGENCY: Federal Aviation
Administration (FAA), Department of
Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is superseding
Airworthiness Directive (AD) 2019–03–
27, which applied to all Dassault
Aviation Model Falcon 10 airplanes. AD
2019–03–27 required repetitive detailed
inspections of certain wing anti-ice
outboard flexible hoses, and
replacement of certain wing anti-ice
outboard flexible hoses. This AD
continues to require the actions in AD
2019–03–27, and also adds a new
life limit for the improved wing anti-ice
flexible hose; as specified in a European
Union Aviation Safety Agency (EASA)
AD, which is incorporated by reference.
This AD was prompted by a report
indicating that certain wing anti-ice
outboard flexible hoses were found
damaged, likely resulting from the
installation process, and the
development of an improved wing anti-ice
flexible hose. The FAA is issuing
this AD to address the unsafe condition
on these products.

DATES: This AD is effective March 31,
2021.

The Director of the Federal Register
approved the incorporation by reference of a
certain publication listed in this AD
as of March 31, 2021.

ADDRESSES: For material incorporated
by reference (IBR) in this AD, contact
the EASA, Konrad-Adenauer-Ufer 3,
50668 Cologne, Germany; phone: +49
221 8999 000; email: ADs@
www.easa.europa.eu. You may find this
IBR material on the EASA website at
https://ad.easa.europa.eu. You may
view this IBR material at the FAA,
Airworthiness Products Section,
Operational Safety Branch, 2200 South
216th St., Des Moines, WA. For
information on the availability of this
material at the FAA, call 206–231–3195.
It is also available in the AD docket on
the internet at https://
www.regulations.gov by searching for
and locating Docket No. FAA–2020–
0977.

Examining the AD Docket
You may examine the AD docket on
the internet at https://
www.regulations.gov by searching for
and locating Docket No. FAA–2020–
0977; or in person at Docket Operations
between 9 a.m. and 5 p.m., Monday
through Friday, except Federal holidays.
The AD docket contains this final rule,
any comments received, and other
information. The address for Docket
Operations is U.S. Department of
Transportation, Docket Operations, M–
30, West Building Ground Floor, Room
W12–140, 1200 New Jersey Avenue SE,
Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:
Tom Rodriguez, Aerospace Engineer, Large
Aircraft Section, International
Validation Branch, FAA, 2200 South
216th St., Des Moines, WA 98198;
phone and fax: 206–231–3226; email:
tom.rodriguez@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion
The EASA, which is the Technical
Agent for the Member States of the
European Union, has issued EASA AD
2020–0127, dated June 4, 2020 (EASA
AD 2020–0127) (also referred to as the
Mandatory Continuing Airworthiness
Information, or the MCAI), to correct an
unsafe condition for all Dassault
Aviation Model Falcon 10 airplanes.

The FAA issued a notice of proposed
rulemaking (NPRM) to amend 14 CFR
part 39 to supersede AD 2019–03–27,
Amendment 39–19579 (84 FR 7801,
March 5, 2019) (AD 2019–03–27). AD
2019–03–27 applied to all Dassault
Aviation Model Falcon 10 airplanes.
The NPRM published in the Federal
Register on November 2, 2020 (85 FR
69269). The NPRM was prompted by a
report indicating that certain wing anti-ice
outboard flexible hoses were found
damaged, likely resulting from the
installation process, and the
development of an improved wing anti-ice
flexible hose. The NPRM proposed to
continue to require the actions in AD
2019–03–27, as specified in an EASA
AD. The NPRM also proposed to require
adding a new life limit for the improved
wing anti-ice flexible hose, as specified
in EASA AD 2020–0127.

The FAA is issuing this AD to address
damaged wing anti-ice outboard flexible
hoses, which could lead to a loss of
performance of the wing anti-ice
protection system that is not
announced to the pilot, and could
result in reduced control of the airplane.
See the MCAI for additional background
information.

Comments
The FAA gave the public the
opportunity to participate in developing
this final rule. The FAA received no
comments on the NPRM or on the
determination of the cost to the public.

Conclusion
The FAA reviewed the relevant data
and determined that air safety and the
public interest require adopting this
final rule as proposed, except for minor
editorial changes. The FAA has
determined that these minor changes:

• Are consistent with the intent that
was proposed in the NPRM for
addressing the unsafe condition;
and
• Do not add any additional burden
upon the public than was already
proposed in the NPRM.

Related Service Information Under 1
CFR Part 51

EASA AD 2020–0127 describes
procedures for repetitive detailed
inspections of certain wing anti-ice
outboard flexible hoses, replacement of
certain wing anti-ice outboard flexible
hoses, a new life limit for certain wing
anti-ice outboard flexible hoses, and
optional terminating actions for the
repetitive inspections (replacement of
all damaged affected wing anti-ice
outboard flexible hoses or
accomplishing and passing an
inspection on an affected wing anti-ice
outboard flexible hose after it has
accumulated 100 flight cycles since
installation on an airplane). This
material is reasonably available because
the interested parties have access to it
through their normal course of business
or by the means identified in the
ADDRESSES section.

Costs of Compliance

The FAA estimates that this AD
affects 54 airplanes of U.S. registry. The
FAA estimates the following costs to
comply with this AD:
Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a “significant regulatory action” under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

§ 39.13 [Amended]

The following provisions also apply to this AD:

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by:

a. Removing Airworthiness Directive (AD) 2019–03–27, Amendment 39–19579 (84 FR 7801, March 5, 2019), and

b. Adding the following new airworthiness directive:

2021–03–12 Dassault Aviation:

 Amendment 39–21415; Docket No. FAA–2020–0977; Project Identifier MCAI–2020–01106–T.

(a) Effective Date

This airworthiness directive (AD) is effective March 11, 2021.

(b) Affected AD

(c) Applicability

This AD applies to all Dassault Aviation Falcon 10 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 30, Ice and rain protection.

(e) Reason

This AD was prompted by a report indicating that certain wing anti-ice outboard flexible hoses were found damaged, likely resulting from the installation process, and the development of an improved wing anti-ice flexible hose. The FAA is issuing this AD to address damaged wing anti-ice outboard flexible hoses, which could lead to a loss of performance of the wing anti-ice protection system that is not annunciated to the pilot, and could result in reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0127, dated June 4, 2020 (EASA AD 2020–0127).

(h) Exceptions to EASA AD 2020–0127

(2) Where EASA AD 2020–0127 refers to its effective date, this AD requires using the effective date of this AD.

(3) (i) The “Remarks” section of EASA AD 2020–0127 does not apply to this AD. 

(4) Where EASA AD 2020–0127 refers to paragraph (4) of EASA AD 2017–0108 for applicable life limits, for this AD refer to FAA AD 2016–19–07, Amendment 39–18656 (81 FR 63688, September 16, 2016).

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2020–0127 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

1. Alternative Methods of Compliance (AMOCs): The Manager, Large Aircraft Section, International Validation Branch,
FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) Contacting the Manufacturer: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Dassault Aviation’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Related Information

For more information about this AD, contact Tom Rodriguez, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3226; email: tom.rodriguez@faa.gov.

(I) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on March 31, 2021.

(ii) [Reserved]

(4) For EASA AD 2020–0127, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADs@easa.europa.eu; internet www.easa.europa.eu. You may find this EASA AD on the EASA website at https://ad.easa.europa.eu.

(5) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket on the internet at https://www.regulations.gov by searching for and locating Docket No. FAA–2020–0977.

(6) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fedreg_legal@nara.gov, or go to https://www.archives.gov/federal-register/cfr/ibr-locations.html.

Issued on January 28, 2021.

Lance T. Gant,
Director, Compliance & Airworthiness Division, Aircraft Certification Service.

For information on the availability of this material at the FAA, call (781) 238–7759. It is also available at https://www.regulations.gov by searching for and locating Docket No. FAA–2020–0371.
