Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC is issuing a new guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the NRC staff uses in evaluating specific issues or postulated events, and data that the NRC staff needs in its review of applications for permits and licenses.

II. Additional Information

RG 1.237 was issued with a temporary identification of draft regulatory guide (DG)-1321. The NRC published a notice of the availability of DG-1321 in the **Federal Register** on May 5, 2020 (85 FR 26725) for a 60-day public comment period. The public comment period closed on July 6, 2020. Public comments on DG-1321 and the staff responses to the public comments are available in ADAMS under Accession No. ML20349A336.

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting, Forward Fitting, and Issue Finality

This RG provides guidance on implementation of a process for making changes to the design of structures, systems, and components of a facility being constructed under a combined license. Issuance of this RG, would not constitute backfitting as defined in section 50.109 of title 10 of the *Code of*

Federal Regulations (10 CFR), "Backfitting," and as described in NRC Management Directive 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests"; affect issue finality of any approval issued under 10 CFR part 52, "Licenses, Certificates, and Approvals for Nuclear Power Plants"; or constitute forward fitting as defined in MD 8.4, because, as explained in this RG, licensees are not required to comply with the positions set forth in this RG. If, in the future, the NRC were to impose a position in this RG in a manner that would constitute backfitting or forward fitting or affect the issue finality for a part 52 approval, then the NRC would address the backfitting provision in 10 CFR 50.109, the forward fitting provision of MD 8.4, or the applicable issue finality provision in part 52, respectively.

Dated: February 19, 2021.

For the Nuclear Regulatory Commission.

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.
