The Rule

This amendment to 14 CFR part 71 establishes Class E airspace extending upward from 700 feet above the surface within a 6-mile radius at Calais Regional Heliport, Calais, ME, providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for IFR operations at heliport. Subsequent to publication of the NPRM, the FAA found the geographic coordinates in the airport’s description were incorrect. This action makes the correction.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures an air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures,” paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Manufactured Home Construction and Safety Standards; Delay of Effective Date

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule; delay of effective date.

SUMMARY: The Department of Housing and Urban Development is delaying the effective date of its final rule published on January 12, 2021, that amends the Federal Manufactured Home Construction and Safety Standards (the Construction and Safety Standards) that were based upon the third group of recommendations made to HUD by the Manufactured Housing Consensus Committee (MHCC), as modified by HUD. The March 15, 2021, effective date does not provide adequate time for affected manufacturers and stakeholders to implement the new requirements. By extending the effective date from March 15, 2021, to July 12, 2021, manufacturers and other stakeholders will have sufficient time to implement the new or amended requirements.
