

that rebuttal by April 19, 2021. The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, which are set forth in the Notice,³⁰ in addition to any other comments they may wish to submit about the proposed rule change. In particular, the Commission seeks comment on the following:

1. What are commenters' views on whether the market in Benchmark Component Futures Contracts represents a significant market, *i.e.*, a market of significant size?
2. What are commenters' views on the possibility that the Fund could acquire a substantial portion of the market for some or all of the Benchmark Component Futures Contracts? What are commenters' views on whether such a concentration of holdings could affect the Fund's portfolio management, the liquidity of the Fund's portfolio, or the pricing of the Benchmark Component Futures Contracts?
3. What are commenters' views on the risks of price manipulation and fraud in the underlying spot water markets and how these risks might affect the Benchmark Component Futures Contracts? What are commenters' views on how these risks might affect the Fund's NAV and trading in the Shares of the Fund? What are commenters' views on how an investor may evaluate the price of the Shares in light of these risks?
4. In its proposal, the Exchange states that the Fund may obtain exposure to the Benchmark through investment in OTC swap agreements, OTC forward contracts, both exchange-listed and OTC options, exchange-listed futures, and exchange-listed options on futures. What are commenters' views on the current availability and price transparency of the OTC financial instruments? What are commenters' views on the ability of the Fund to invest in these instruments if the underlying spot or futures water market experiences emergencies, disruptions, or significant volatility? What are commenters' views on the potential effect of manipulation in the underlying water markets on the pricing of the Fund's OTC water interests?
5. What are commenters' views on whether the Fund would have the information necessary to adequately value, including fair value, the Fund's Benchmark Component Futures Contracts and other water interests when determining an appropriate NAV for the Fund?
