SUPPLEMENTARY INFORMATION:

Title: FERC–725HH, RF Reliability Standards.

OMB Control No.: 1902–0301.

Type of Request: Three-year renewal of FERC–725HH.

Abstract: This collection of information pertains to the Commission’s compliance with section 215 of the Federal Power Act (FPA) (16 U.S.C. 824o), which enables the Commission to strengthen the reliability of the “bulk-power system.”1 The Commission’s implementation of FPA section 215 involves review and approval of a system of mandatory Reliability Standards that are established and enforced by an “Electric Reliability Organization” (ERO).2 The

1 FPA section 215(a)(1) defines “bulk-power system” as follows: “(A) facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof); and (B) electric energy from generation facilities needed to maintain transmission system reliability. The term does not include facilities used in the local distribution of electric energy.”

2 FPA section 215(a)(2) defines “Electric Reliability Organization” as “the organization certified by the Commission under subsection (c) the purpose of which is to establish and enforce reliability standards for the bulk-power system, subject to Commission review.”
Commission has certified the North American Electric Reliability Corporation (NERC) as the ERO.³

Reliability Standards that the ERO proposes to the Commission may include Reliability Standards that are proposed to the ERO by a Regional Entity.⁴ A Regional Entity is an entity that has been approved by the Commission to enforce Reliability Standards under delegated authority from the ERO.⁵ On March 17, 2011, the Commission approved a regional Reliability Standard submitted by the ERO that was developed by the ReliabilityFirst Corporation (RF).⁶ RF promotes bulk electric system reliability in the Eastern Interconnection. RF is the Regional Entity responsible for compliance monitoring and enforcement in the RF region. In addition, RF provides an environment for the development of Reliability Standards and the coordination of the operating and planning activities of its members as set forth in the RF bylaws.

There is one regional Reliability Standard in the RF region. The Commission requests renewal of OMB clearance for that regional Reliability Standard, known as BAL–502–RF–03 (Planning Resource Adequacy Analysis, Assessment and Documentation).

On December 7, 2020, the Commission published a notice in the Federal Register inviting public comments on this information collection for 60 days. The Commission received no comments in response.

Type of Respondents: Planning coordinators.

Estimate of Annual Burden: The estimated burden and cost⁸ are as follows:

Comments: Comments are invited on:
(1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility;
(2) the accuracy of the agency’s estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used;
(3) ways to enhance the quality, utility and clarity of the information collection; and
(4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: March 11, 2021.
