Abstract of Proposed Collection

The Refugee Biographic Data Sheet includes a refugee applicant’s personal information and is needed to initiate refugee resettlement processing, adjudicate the refugee applicant’s application for admission to the United States, to run security checks on refugee applicants by law enforcement and intelligence communities, to conduct medical screenings, and to plan international travel before a refugee applicant can be approved to travel to the United States. In addition, the information is used to match the refugee with a sponsoring voluntary agency for initial reception and placement in the U.S. under the United States Refugee Admissions Program administered by the Bureau of Population, Refugees, and Migration (PRM).

The information collected includes date and place of birth, gender, contact information, including social media handles, marital status, family ties, religion, ethnic group, background, education, occupation, skills, medical information, English language ability, associated family members’ refugee resettlement cases, and identity documents. The data is used to initiate refugee resettlement processing, to adjudicate the refugee claim by USCIS, to run security checks on refugees by law enforcement and intelligence communities before refugees can be approved to travel to the United States. Data is also provided to conduct a medical screening before the refugee’s arrival in the United States, to plan the refugee’s international travel, and to resettlement agencies to determine an appropriate resettlement location in the United States. If the data were not collected, refugees could not be properly vetted by law enforcement and intelligence communities, and therefore refugee applicants could no longer be processed through the U.S. Refugee Admissions Program. In addition, the resettlement agencies would not be able to provide appropriate initial reception and placement services as provided for in the Refugee Act.

Methodology

Biographic information is collected in a face-to-face intake process with the applicant overseas. An employee of a Resettlement Support Center, under cooperative agreement with PRM, collects the information and enters it into the Worldwide Refugee Admissions Processing System. The Department is also building a new case management system to replace WRAPS to allow for more effective and efficient electronic management of refugee resettlement
