BILLING CODE 6560-50-P

**ENVIRONMENTAL PROTECTION AGENCY****40 CFR Part 147****[EPA-HQ-OW-2020-0595; FRL 10019-85-OW]****State of Michigan Underground Injection Control (UIC) Class II Program; Primacy Approval****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

**SUMMARY:** The U.S. Environmental Protection Agency (EPA or Agency) is proposing to approve the State of Michigan's Underground Injection Control Class II (UIC) Program for primacy. EPA determined that the State's program is consistent with the provisions of the Safe Drinking Water Act (SDWA) at Section 1425 to prevent underground injection activities that endanger underground sources of drinking water. The Agency's approval allows Michigan to implement and enforce its state regulations for UIC Class II injection wells located within the State. Michigan's authority excludes the regulation of injection well Classes I, III, IV, V and VI, and all wells in Indian country, as required by rule under the SDWA. The Agency requests public comment on this proposed rule and supporting documentation. In the "Rules and Regulations" section of this **Federal Register**, the Agency published EPA's approval of the State's program as a direct final rule without a prior proposed rule. If the Agency receives no adverse comment on the direct final rule, EPA will not take further action on this proposed rule.

**DATES:** Written comments must be received by April 19, 2021.

**ADDRESSES:** You may submit comments, identified by Docket ID No. EPA-HQ-OW-2020-0595, through the Federal eRulemaking Portal at: <https://www.regulations.gov/>. EPA continues to carefully and continuously monitor information from the Centers for Disease Control and Prevention (CDC), local area health departments, and our federal partners so that we can respond rapidly as conditions change regarding COVID-19.

**II. The Proposed Rule**

EPA proposes to approve Michigan's UIC Program primacy application for Class II injection wells located within the State (except all wells in Indian country), because it meets all requirements under SDWA for such programs. The proposed rule would grant Michigan primary enforcement authority to prevent Class II (oil and gas-related) underground injection activities that endanger underground sources of drinking water. Accordingly, the Agency proposes to codify the State's program in the Code of Federal Regulations (CFR) at 40 CFR part 147. EPA will continue to administer the UIC Program for injection well Classes I, III, IV, V and VI, and for all wells in Indian country.

EPA has published a direct final rule in the "Rules and Regulations" section of the **Federal Register**, approving the State's program because EPA views this approval as noncontroversial and anticipates no adverse comment. For the Agency's rationale for approval and additional supplementary information, please see the preamble to the direct final rule. If EPA receives no adverse comment on the direct final rule, the Agency will not take further action on this proposed rule. If EPA receives adverse comment on the direct final rule, the Agency will withdraw the direct final rule and it will not take effect. The Agency would then consider and address all public comments in any subsequent final rule based on this proposed rule. The Agency does not intend to institute a second comment period. Any parties interested in commenting must do so at this time.

### Initial Paperwork Reduction Act of 1995 Analysis

The NPRM seeks comment on proposed rule amendments that may result in modified information collection requirements. If the Commission adopts any modified information collection requirements, the Commission will publish another notice in the **Federal Register** inviting the public to comment on the requirements, as required by the Paperwork Reduction Act. Public Law 104-13; 44 U.S.C. 3501-3520. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, the Commission seeks comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees. Public Law 107-198; 44 U.S.C. 3506(c)(4).

### Synopsis

1. In the NPRM, document FCC 20-161, the Commission proposes to complete the process of updating the mechanism for the funding of internet-based TRS. When the Commission first authorized use of the internet to provide TRS, it decided as an interim measure that all of the costs of providing internet-based TRS should be paid by contributors to the TRS Fund, based only on their interstate telecommunications revenue. In the *IP CTS Contributions Order*, published at 85 FR 462, January 6, 2020, the Commission recognized that this "interim" funding mechanism, which disproportionately burdens providers and users of interstate services, was no longer justifiable as a means of supporting one internet-based form of TRS—internet Protocol Captioned Telephone Service (IP CTS), and expanded the contribution base for that service to include intrastate as well as interstate end-user revenues. The Commission now proposes to expand the TRS Fund contribution base for the other two forms of internet-based TRS—video relay service (VRS) and internet Protocol Relay Service (IP Relay)—so that providers of intrastate voice communications must contribute to the TRS Fund for the support of these services as well.

2. To conform the funding of VRS and IP Relay to the requirements of section 225 of the Communications Act of 1934, as amended (the Act), and to harmonize cost recovery for these services with the cost recovery plan adopted for IP CTS, the Commission proposes to expand the
