**Abstract:** The BIA is seeking renewal of the approval for the information collection conducted under 25 U.S.C. 43, 36 Stat. 472, inter alia, and implementing regulations, at 25 CFR part 5, regarding verification of Indian preference for employment. The purpose of Indian preference is to encourage qualified Indian persons to seek employment with the BIA and the Indian Health Service (IHS) by offering preferential treatment to qualified candidates of Indian heritage. The BIA collects the information to ensure compliance with Indian preference hiring requirements. The information collection relates only to individuals applying for employment with the BIA and/or IHS. The tribe's involvement is limited to verifying membership information submitted by the applicant. The collection of information allows certain persons who are of Indian descent to receive preference when appointments are made to vacancies in positions with the BIA and the IHS as well as in any unit that has been transferred intact from the BIA to a Bureau or office within the Department of the Interior or the Department of Health and Human Services and that continues to perform functions formerly performed as part of the BIA and the IHS. You are eligible for preference if (a)

you are a member of a federally recognized Indian tribe; (b) you are a descendent of a member and you were residing within the present boundaries of any Indian reservation on June 1, 1934; (c) you are an Alaska native; or (d) you possess one-half degree Indian blood derived from tribes that are indigenous to the United States.

**OMB Control Number:** 1076–0160.

**Form Number:** BIA 4432.

**Respondent's Obligation:** A response is required to obtain a benefit.

**Frequency of Collection:** On occasion.

**SUPPLEMENTARY INFORMATION:** DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The O\*NET Data Collection Program is an ongoing effort to collect and maintain current information on the detailed characteristics of occupations and skills for more than 900 occupations. Section 308 of the Workforce Innovation and Opportunity Act (WIOA) authorizes this collection and requires the Secretary of Labor to oversee the “development, maintenance, and continuous improvement of a nationwide workforce and labor market information system” which shall include, among other components, “skill trends by occupation and industry.” The resulting database provides the most comprehensive standardized source of occupational and skills information in the nation. O\*NET information is used by a wide range of audiences, including individuals making career decisions, public agencies and schools providing career exploration services or education and training programs, and businesses making staffing and training decisions. The O\*NET system provides a common language, framework and database to meet the administrative needs of various federal programs, including workforce investment and training programs supported by funding from the

Departments of Labor, Education, and Health and Human Services.

The O\*NET database provides:

- Detailed information for more than 900 occupations.
- Descriptive information using standardized descriptors for skills, abilities, interests, knowledge, work values, education, training, work context, and work activities.
- Occupational coding currently based on the 2018 Standard Occupational Classification (SOC) taxonomy.

The O\*NET electronic database and related O\*NET products and tools have been incorporated into numerous public and private sector products and resources, examples of O\*NET use are presented in the *O\*NET Products at Work (PAW)* document at <http://www.onetcenter.org/paw.html>. These products in turn serve millions of customers.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB Control No. 1205-0421.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, (e.g., permitting electronic submission of responses).
