

Program and with law enforcement agencies.

FRA will use the information collected under the form to identify problem areas and take necessary action to prevent potential accidents of the type indicated by the information submitted from occurring.

FRA's proposed revisions to the form include: (1) Adding several dropdown menus for form elements (*e.g.*, type, title, preferred method of contact, position, category of submission, date, time, city, State, and entity involved) so that users can quickly provide complete contact and incident information while having to hand-enter less information; (2) adding a question requesting the users identify if they are members of the public, a railroad employee, or other; and (3) informing users that they will receive an automated response from FRA after the form is submitted. The revisions are designed to make the existing form easier to use and more understandable, and to simplify the collection of information. If users elect to provide any identifying information, it will be protected to the extent allowed under Federal law and FRA will only use this identifying information to follow up with users regarding their submissions. The revised form will ensure that users provide the necessary information so that FRA staff can review and respond more quickly. The revised form also will facilitate FRA's ability to maintain the data collected in a more useful and uniform manner, as the new dropdown boxes will assist FRA in receiving more standardized responses.
