

If a workforce investment area includes areas that would be covered by more than one LLSIL figure, the Governor may determine which is to be used.

A state's policies and measures for the workforce investment system shall be accepted by the Secretary to the extent that they are consistent with WIOA and WIOA regulations.

III. Disclaimer on Statistical Uses

It should be noted that publication of these figures is only for the purpose of meeting the requirements specified by WIOA as defined in the law and regulations. BLS has not revised the lower living family budget since 1981, and has no plans to do so. The four-person urban family budget estimates series were terminated by BLS in 1982. The CPI-U adjustments used to update LLSIL for this publication are not precisely comparable, most notably because certain tax items were included in the 1981 LLSIL, but are not in the CPI-U. Thus, these figures should not be used for any statistical purposes, and are valid only for those purposes under WIOA as defined in the law and regulations.

Suzan G. LeVine,

Principal Deputy Assistant Secretary for Employment and Training, Labor.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information

with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Respiratory Protection Standard (29 CFR 1910.134; hereafter, "the Standard") contains information collection requirements that require employers to: Develop a written respirator program; conduct worker medical evaluations and provide follow-up medical evaluations to determine the worker's ability to use a respirator; provide the physician or other licensed healthcare professional with information about the worker's respirator and the conditions under which the worker will use the respirator; and administer fit tests for workers who will use negative- or positive-pressure, tight-fitting facepieces. In addition, employers must ensure that workers store emergency-use respirators in compartments clearly marked as containing emergency-use respirators. For respirators maintained for emergency use, employers must label or tag the respirator with a certificate stating the date of the inspection, the name of the individual who did the inspection, the findings of the inspection, required remedial action, and the identity of the respirator.

The Standard also requires employers to ensure that cylinders used to supply breathing air to respirators have a certificate of analysis from the supplier stating that the breathing air meets the requirements for Type 1—Grade D breathing air; such certification assures employers that the purchased breathing air is safe. Compressors used to supply breathing air to respirators must have a tag containing the most recent change date and the signature of the individual authorized by the employer to perform the change. Employers must maintain this tag at the compressor. These tags provide assurance that the compressors are functioning properly.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and

- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Respiratory Protection Standard (29 CFR 1910.134). The agency requests an adjustment decrease of 443,290.41 hours, from 7,622,100 to 7,178,809.59 hours, as a result of updating the number of establishments and workers covered by the Standard. The agency is also requesting a \$20,004,491.30 decrease as a result of updating the number of employees covered by the Standard; and the inclusion of medical costs for those employees that will have additional medical examinations. The agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Respiratory Protection Standard (29 CFR 1910.134).

OMB Control Number: 1218-0099.

Affected Public: Business or other for-profits.

Number of Respondents: 699,048.

Frequency of Responses: Initially; Annually; On occasion.

Total Responses: 25,318,635.

Average Time per Response: Varies from 5 minutes (.08 hour) to mark a storage compartment or protective cover to 8 hours for large employers to gather and prepare information to develop a written plan.

Estimated Total Burden Hours: 7,178,809.59.

Estimated Cost (Operation and Maintenance): \$352,304,878.70.
