II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “Reactor Site Criteria.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a Federal Register notice with a 60-day comment period on this information collection on December 10, 2020, (85 FR 79532).

1. The title of the information collection: “Reactor Site Criteria”.

2. OMB approval number: 3150–0093.

3. Type of submission: Extension.

4. The form number, if applicable: N/A.

5. How often the collection is required or requested: As necessary in order for the NRC to assess the adequacy of proposed seismic design bases and the design bases for other site hazards for nuclear power and test reactors constructed and licensed in accordance with Parts 50 and 52 of title 10 of the Code of Federal Regulations (10 CFR)
