Matters To Be Considered:

The United States Chemical Safety and Hazard Investigation Board (CSB) announces that it will convene a public meeting to release its final investigation report into a fatal incident on October 26, 2019. The incident occurred when a release of water containing hydrogen sulfide—a toxic gas—occurred at a facility called a “waterflood station” which is used to improve the extraction of oil from underground oil reservoirs. The release fatally injured an employee and a member of the public. This facility is operated by Aghorn Operating, Inc. (Aghorn).

CSB staff will present its final report findings and recommendations followed by a vote by the CSB’s Board. Staff presentations are preliminary and are intended to allow the Board to consider in a public forum the issues and factors involved in this case.

To submit public comments for the record please email us at public@csb.gov. Public comments sent in advance may be addressed at the meeting.
