

This notice is issued and published pursuant to sections 702 and 777(i) of the Act, and 19 CFR 351.203(c).

Dated: April 19, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix—Scope of the Investigation

The merchandise covered by this investigation consists of gas-powered, walk-behind snow throwers (also known as snow blowers), which are snow moving machines that are powered by internal combustion engines and primarily pedestrian-controlled. The scope of the investigation covers certain snow throwers (also known as snow blowers), whether self-propelled or non-self-propelled, whether finished or unfinished, whether assembled or unassembled, and whether containing any additional features that provide for functions in addition to snow throwing. Subject merchandise also includes finished and unfinished snow throwers that are further processed in a third country or in the United States, including, but not limited to, assembly or any other processing that would not otherwise remove the merchandise from the scope of this investigation if performed in the country of manufacture of the in-scope snow throwers.

Walk-behind snow throwers subject to the scope of this investigation are powered by internal combustion engines which are typically spark ignition, single or multiple cylinder, and air-cooled with power take off shafts.

For the purposes of this investigation, an unfinished and/or unassembled snow thrower means at a minimum, a sub-assembly comprised of an engine, auger housing (*i.e.*, intake frame), and an auger (or “auger paddle”) packaged or imported together. An intake frame is the portion of the snow thrower—typically of aluminum or steel—that houses and protects an operator from a rotating auger and is the intake point for the snow. Importation of the subassembly whether or not accompanied by, or attached to, additional components including, but not limited to, handle(s), impeller(s), chute(s), track tread(s), or wheel(s) constitutes an unfinished snow thrower for purposes of this investigation. The inclusion in a third country of any components other than the snow thrower sub-assembly does not remove the snow thrower from the scope. A snow thrower is within the scope of this investigation regardless of the origin of its engine.

Specifically excluded is merchandise covered by the scope of the antidumping and countervailing duty orders on certain vertical shaft engines between 225cc and 999cc, and parts thereof from the People’s Republic of China. See *Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof, from the People’s Republic of China: Amended Final Antidumping Duty Determination and Antidumping Duty Order*, 86 FR 12623 (March 4, 2021) and *Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof from the People’s Republic of China: Countervailing Duty Order and Amended Final Affirmative*

Countervailing Duty Determination, 86 FR 12619 (March 4, 2021).

The snow throwers subject to this investigation are typically entered under Harmonized Tariff Schedule of the United States (HTSUS) subheading 8430.20.0060. Certain parts of snow throwers subject to this investigation may also enter under HTSUS 8431.49.9095. The HTSUS subheadings are provided for convenience and customs purposes only, and the written description of the merchandise under investigation is dispositive.
