[Docket No. FAA-2018-1087]

Agency Information Collection Activities: Requests for Comments; Clearance of a New Approval of Information Collection: Operation of Small Unmanned Aircraft Systems Over People

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request Office of Management and Budget (OMB) approval for a new information collection. The collection involves operators and owners of small unmanned aircraft systems (UAS) issued an airworthiness certificate under Part 21, and mandates that these entities must retain records of all maintenance performed on their aircraft and records documenting the status of life-limited parts, compliance with airworthiness directives, and inspection status of the aircraft. These records are used to validate that aircraft are maintained in a manner that ensures the reliability associated with having an airworthiness certificate and that the operations-over-people privileges afforded to category 4 operations continue to be appropriate. The owner or operator may keep these records electronically or by paper.

DATES: Written comments should be submitted by May 27, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/

PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Jeff Bergson by email at: jeffrey.bergson@faa.gov; phone: (816) 329-4163.

SUPPLEMENTARY INFORMATION: *Public Comments Invited:* You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA’s performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120-0775.

Title: Operation of Small Unmanned Aircraft Systems over People.

Form Numbers: N/A.

Type of Review: New.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on January 26, 2021 (86 FR 7167). On January 15, 2021, the FAA published the final rule Operation of Small Unmanned Aircraft Systems over People (RIN 2120-AK85; Docket No. FAA-2018-1087). In that rule, the FAA is requiring that owners and operators of small UAS issued an airworthiness certificate under part 21 retain records of all maintenance performed on their aircraft and records documenting the status of life-limited parts, compliance with airworthiness directives, and inspection status of the aircraft. The records must be kept for the time specified in § 107.140, and they must be available to the FAA and law enforcement personnel upon request. The owner may keep these records electronically or on paper.

Respondents: The FAA estimates that an average of two owners per year will be subject to this recordkeeping requirement. The FAA further estimates that each of those owners operates a fleet of 100 UAS.

Frequency: On occasion.

Estimated Average Burden per Response: The FAA estimates that creation and retention of these records would require 30 minutes per UAS.

Estimated Total Annual Burden: 100 hours per year, based on an estimate of 2 owners per year, each owning 100 UAS and spending 30 minutes per UAS.

Issued in Washington, DC, on April 21, 2021.
