*Title:* Operation of Small Unmanned Aircraft Systems over People.

*Form Numbers:* N/A.

*Type of Review:* New.

*Background:* The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on January 26, 2021 (86 FR 7167). On January 15, 2021, the FAA published the final rule Operation of Small Unmanned Aircraft Systems over People (RIN 2120-AK85; Docket No. FAA-2018-1087). In that rule, the FAA is requiring that owners and operators of small UAS issued an airworthiness certificate under part 21 retain records of all maintenance performed on their aircraft and records documenting the status of life-limited parts, compliance with airworthiness directives, and inspection status of the aircraft. The records must be kept for the time specified in § 107.140, and they must be available to the FAA and law enforcement personnel upon request. The owner may keep these records electronically or on paper.

*Respondents:* The FAA estimates that an average of two owners per year will be subject to this recordkeeping requirement. The FAA further estimates that each of those owners operates a fleet of 100 UAS.

*Frequency:* On occasion.

*Estimated Average Burden per Response:* The FAA estimates that creation and retention of these records would require 30 minutes per UAS.

*Estimated Total Annual Burden:* 100 hours per year, based on an estimate of 2 owners per year, each owning 100 UAS and spending 30 minutes per UAS.
