

2010 SO₂ NAAQS attained the standard by the attainment date: Hayden (parts of Gila County and Pinal County, Arizona; Miami (part of Gila County), Arizona; Muscatine (part of Muscatine County), Iowa; St. Bernard Parish, Louisiana; Detroit (part of Wayne County), Michigan; Jackson County (part), Missouri; Sullivan County (part), Tennessee; and Rhinelander (part of Oneida County), Wisconsin. The proposed consent decree would require EPA to make a determination for the areas in Arizona, Michigan and Wisconsin by January 31, 2022 and make a determination for the areas in Iowa, Louisiana, Missouri and Tennessee by March 31, 2022.

While the amended complaint also identified Southwest Indiana (parts of Daviess County and Pike County), Indiana as an area for which EPA was required to make a determination of whether the area attained the 2010 SO₂ NAAQS by the attainment date, on February 22, 2021, EPA signed a final rule redesignating the Southwest Indiana nonattainment area to attainment for the 2010 SO₂ NAAQS. *Final Rule*, 86 FR 12107–12108 (March 2, 2021), mooted the claim as to Southwest Indiana.

Third, while the amended complaint included claims regarding EPA's failure to make a finding of failure to submit a nonattainment SIP for certain nonattainment areas for the 2010 SO₂ NAAQS pursuant to CAA section 110(k)(1)(B), on October 8, 2020, the EPA Principal Deputy Assistant Administrator for the Office of Air and Radiation signed findings of failure to submit SIPs required for attainment of the 2010 SO₂ NAAQS for the areas identified in the amended complaint, and the findings were published in the **Federal Register** on November 3, 2020, *Final Rule*, 85 FR 69504, 69506–69508 (November 3, 2020), mooted those claims.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed consent decree. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

Abstract: The U.S. Environmental Protection Agency's (EPA) Chesapeake Bay Program (the Program) is interested in tracking its progress at attaining its goals under the 2014 Chesapeake Bay Watershed Agreement (the Agreement). To do this, the Program plans to implement three surveys: The Citizen Stewardship Survey, the Diversity

Profile Survey, and the Local Leadership Survey.

EPA has specified the target audience and the implementation approach for each to maximize the data that can be obtained. The Citizen Stewardship Survey will be implemented as a multi-mode survey that includes phone, web, and mail components and will target residents living in the Chesapeake Bay area, stratified by jurisdiction (states and the District of Columbia). The Diversity Profile Survey will be implemented among people who work on partnership efforts within the Bay area as a web-based survey. The Local Leadership Survey will be implemented among state and local elected officials involved in policy making in the Bay area also as a web-based survey.

The Program will be using the data from these three surveys to track its progress under the Stewardship goal of the 2014 Agreement. The Stewardship goal includes three outcomes: (1) Citizen stewardship, (2) local leadership, and (3) diversity. Three surveys under this ICR each address one of the outcomes and contributes to EPA's Government Performance and Results Act (GPRA) goals (EPA Goal 1, A Cleaner, Healthier Environment; Objective 1.2: Provide for Clean and Safe Water).

Each of the surveys under this ICR were funded and implemented by other partners in the Chesapeake Bay area in prior years. The Program determined that the best approach for continued implementation of these surveys would be for the EPA assume the responsibility for implementing these surveys; thus, EPA is seeking approval for implementing these surveys under this ICR.

Collecting these data and publishing them for public review will allow the public to track how well the Agreement is working to preserve and protect the Chesapeake Bay region from the standpoint of the Stewardship goal outlined in the Agreement. Overall, the Agreement contains 10 goals and their associated outcomes; data for the other nine goals are collected through other means. Combining the data for Stewardship goal outcomes from these surveys with the data for the other nine goals will provide the public will have a comprehensive picture of the progress being made to preserve and protect Chesapeake Bay watershed.
