

Accordingly, we are rescinding this review, in part, with respect to the companies identified above, pursuant to 19 CFR 351.213(d)(1).

In the **Federal Register** of March 20, 2017, in FR Doc 2017–05429, on page 14345, correct the first paragraph of the “Final Determination of No Shipments” section to read:

In the *Preliminary Results*, Commerce preliminarily determined that Zhejiang Gem-Chun Hardware Accessory Co., Ltd. (Zhejiang Gem-Chun) did not have any reviewable transactions during the POR.³ Consistent with Commerce’s assessment practice in non-market economy (NME) cases, we completed the review with respect to Zhejiang Gem-Chun. Based on the certifications submitted by Zhejiang Gem-Chun, and our analysis of CBP information, we continue to determine that the company did not have any reviewable transactions during the POR. As noted in the “Assessment Rates” section of the *Final Results*, Commerce intends to issue appropriate instructions to CBP for Zhejiang Gem-Chun based on the final results of this review.

In the **Federal Register** of March 20, 2017, in FR Doc 2017–05429, on page 14345, after the “Final Determination of No Shipments” section, add section “China-Wide Entity” to read:

In the *Preliminary Results*, we found that 14 companies, Cana (Tianjin) Hardware Industrial Co., Ltd., China Staple Enterprise (Tianjin) Co., Ltd., Huanghua Jinhai Hardware Products Co. Ltd, Huanghua Xiong Hua Hardware Product Co., Ltd., Huanghua Yufutai Hardware Products Limited, Liaocheng Minghui Hardware Products Co., Ltd., Mingguang Abundant Hardware Products Co., Ltd., Qingdao D&L Group Co., Ltd., Shandong Qingyun Hongyi Hardware Products Co., Ltd., Shanghai Yueda Fasteners Co., Ltd., Shanxi Tianli Enterprise Co., Ltd., Smart (Tianjin) Technology Development Co., Ltd., Tianjin Hongli Qiangsheng Import and Export Co., Ltd., and Tianjin Lianda Group Ltd., for which a review was requested had not established eligibility for a separate rate and, thus, we considered them to be part of the China-wide entity.

Products Co., Ltd. because the company changed its English name. Because Mingguang Ruifeng Hardware Products Co., Ltd. self-requested a review, we have not rescinded this review with respect to the company(ies). Similarly, we find Qingdao D&L Group, Ltd. and SDC International Australia (PTY) Ltd. to be the same as Qingdao D&L Group Co., Ltd. and SDC International Aust. PTY. Ltd., respectively, which self-requested a review. Therefore, we have not rescinded this review with respect to Qingdao D&L Group, Ltd. and SDC International Aust. PTY. Ltd.

³In the *Final Results*, Commerce inadvertently included Besco Machinery Industry (Zhejiang) Co., Ltd., Jining Huarong Hardware Products, Nanjing Yuechang Hardware Co., Ltd., PT Enterprise Inc., and Shanxi Yuci Broad Wire Products Co., Ltd. in the no shipments category. However, the petitioner made a timely request to rescind the review on these companies. Therefore, Commerce has removed these companies from the no shipments category.

However, this list was incorrect. Mingguang Abundant Hardware Products Co., Ltd., under its new name Mingguang Ruifeng Hardware Products Co., Ltd., and Qingdao D&L Group Co., Ltd., under Qingdao D&L Group Ltd., were granted separate rate status. For the remaining companies, except Tianjin Lianda Group Co., Ltd., Commerce has rescinded the review, as noted above.

For the *Final Results*, we find that, for two companies, Suzhou Xingya Nail Co., Ltd. and Tianjin Lianda Group Co., Ltd., we have not received any information since the issuance of the *Preliminary Results* that provides a basis for reconsidering this preliminary determination. Therefore, Commerce continues to find that Suzhou Xingya Nail Co., Ltd. and Tianjin Lianda Group Co., Ltd. are part of the China-wide entity.

This project characterizes cellular emissions (LTE uplinks) to support interference models used to coordinate commercial carrier deployments in the AWS–3 band (1755–1780 MHz band) with Department of Defense systems that remain in the band. This effort consisted of two parts: (1) A Factor Screening effort which identified the key factors impacting emissions, and (2) characterization of factors impacting UE uplink emissions when closed-loop power control is enabled in the cell, and models of the emissions over operational scenarios. The output of this work can aid in the development of emissions models and interference calculations in the AWS–3 band and beyond.
