Data Confidentiality Provisions: The Annual Tank Car Facility Survey may collect confidential business information. The confidentiality of these data will be protected under Title V of the E-Government Act, the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA). In accordance with this legislation, individual responses will not be disclosed in any direct or indirect manner and only aggregated statistical information will be made available through reports.

Frequency: This survey will be updated every year until 2029.

Estimated Average Burden per Response: The burden per respondent is estimated to be an average of 30 minutes. This includes the time required to gather records as well as respond to the survey.

Estimated Total Annual Burden: Across the nation there are approximately 400 tank car facilities that are currently registered or certified to build or modify tank cars. However, the majority of these do not have the capacity to modify or build to the 117 or 117R Specifications. It is estimated that, at most, 175 tank car shops possess the required capacity to build or modify to these new safer requirements. The total annual burden is estimated to be 87.5 hours (that is 30 minutes per respondent for 175 respondents equals 5,250 minutes).
