F. Grant Award Notice

A. Program Description
Section 190 of the FAA Reauthorization Act of 2018 (Pub. L. 115–254) creates a pilot program for environmental mitigation projects. The environmental mitigation projects should introduce new environmental mitigation techniques or technologies that have been proven in laboratory demonstrations. These projects should propose methods for efficient adaptation or integration of new concepts into airport operations. In addition, these projects must measurably reduce or mitigate aviation impacts on noise, air quality, or water quality at the airport or within five miles of the airport, and demonstrate whether new technologies or new technologies are practical to implement at or near public-use airports.

FAA may establish and publish information identifying best practices for reducing or mitigating aviation impacts on noise, air quality, and water quality at airports or in the vicinity of airports based on the projects carried out under the program. The program shall terminate five years after FAA makes the first grant under the program.

B. Federal Award Information
Per Section 190(a), FAA may fund up to six projects at public use airports. Per Section 190(k), additional projects may be carried out at a site previously, but not currently, managed by the Department of Defense (DOD) if the DOD provides funds to the FAA for funding such projects.

FAA may make grants from the Airport Improvement Program’s noise and environmental set-aside (49 U.S.C. 47117(e)(1)(A)). Each project is limited to not more than $2,500,000 in federal funding. The federal share of the cost of the project carried out under the program is 50 percent, and requires 50 percent in airport matching funds.

C. Eligibility Information
The law specifies that projects must be carried out by an eligible consortium consisting of two or more of the following entities:

- Businesses incorporated in the U.S.
- Public or private educational or research organizations located in the U.S.
- Entities of state or local governments in the U.S.
- Federal laboratories.

D. Pre-Application and Submission Information
Airport Sponsors should submit a pre-application to their local FAA Airports District Office that includes a project title and location, and identifies the entities that will carry out the project. The pre-application should include a description of the roles and responsibilities of each entity and must be signed by each entity. The pre-application should include a project description that discusses the project and anticipated benefits, the roles and responsibilities of each entity involved in the program, and how the project meets the program’s goals of funding mitigation that is not widely available at airports; and could introduce a novel, applicable mitigation opportunity for airport development operations.

The pre-application should also describe how environmental benefits will be measured and include a draft scope of work that describes how the entity will implement the environmental mitigation project. In addition, the pre-application should include a schedule for completion of the project within 24 months of grant award and feature quarterly reporting to the airport sponsor’s Regional or Airport District Office. Last, the pre-application should include a preliminary SF–424, with estimated project cost broken out by federal and local share.

In short, the pre-application should include the information necessary for FAA to determine that the project satisfies project requirements as described in Section A and C and to assess the selection criteria specified in Section E. The pre-application should be prepared with standard formatting preferences including a single-spaced document, using standard 12-point font such as Times New Roman, with 1-inch margins. The pre-application may not exceed 25 pages in length, including any attachments or appendices. If the pre-application includes information the applicant considers to be trade secret or confidential commercial or financial information, the applicant should note on the front cover that the submission “Contains Confidential Business Information” and mark each affected page. DOT protects such information from disclosure to the extent allowed under applicable law.

Pre-applications should be submitted by the airport sponsor, not the consortium, to the sponsor’s local Regional or Airports District Office. A listing of FAA Regional Airports Divisions and Airports District Offices by State is located at https://www.faa.gov/about/office_org/headquarters_offices/arp/regiona.../.

E. Pre-Application Review Information
FAA will give priority consideration to projects that will achieve the greatest reductions in aircraft noise, airport emissions, or airport water quality impacts either on an absolute basis or on a per dollar of funds expended basis, and will be implemented by an eligible consortium.

F. Grant Award Notice
Following the evaluation outlined in Section E, FAA will notify candidates about grant awards. If selected through the pre-application process, the local FAA Regional or Airports District Office will commence a conventional grant process (including standard application materials).

This policy does not have the force and effect of law and is not meant to bind the public in any way, it is intended only to provide clarity to the public regarding existing requirements under the law or agency policies.

Issued in Washington, DC.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Notice of Actions on Special Permits

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice of actions on special permit applications.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation’s Hazardous Material Regulations, notice is hereby given that the Office of Hazardous Materials Safety has received the application described herein.

DATES: Comments must be received on or before June 9, 2021.

ADDRESSES: Record Center, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC 20590.
Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: Copies of the applications are available for inspection in the Records Center, East Building, PHH–30, 1200 New Jersey Avenue Southeast, Washington DC.

This notice of receipt of applications for special permit is published in accordance with part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on May 3, 2021.

Donald P. Burger, Chief, General Approvals and Permits Branch.

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Notice of Applications for New Special Permits

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: To authorize the transportation in commerce of lithium ion batteries exceeding 35 kg net weight in non-DOT specification packaging by cargo-only aircraft.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation’s Hazardous Material Regulations, notice is hereby given that the Office of Hazardous Materials Safety has received the application described herein. Each mode of transportation for which a particular special permit is requested is indicated by a number in the “Nature of Application” portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before May 25, 2021.

ADDRESSES: Record Center, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC 20590.

This notice of receipt of applications for special permit is published in accordance with part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on May 3, 2021.

Donald P. Burger,
Chief, General Approvals and Permits Branch.
