Monday

No. 88

May 10, 2021

Books 1 of 2 Books

Pages 24697–25798

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 86 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

Proclamation 10203 of May 5, 2021

The President

National Day of Prayer, 2021

By the President of the United States of America

A Proclamation

Throughout our history, Americans of many religions and belief systems have turned to prayer for strength, hope, and guidance. Prayer has nourished countless souls and powered moral movements—including essential fights against racial injustice, child labor, and infringement on the rights of disabled Americans. Prayer is also a daily practice for many, whether it is to ask for help or strength, or to give thanks over blessings bestowed.

The First Amendment to our Constitution protects the rights of free speech and religious liberty, including the right of all Americans to pray. These freedoms have helped us to create and sustain a Nation of remarkable religious vitality and diversity across the generations.

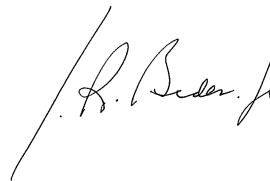

Today, we remember and celebrate the role that the healing balm of prayer can play in our lives and in the life of our Nation. As we continue to confront the crises and challenges of our time—from a deadly pandemic, to the loss of lives and livelihoods in its wake, to a reckoning on racial justice, to the existential threat of climate change—Americans of faith can call upon the power of prayer to provide hope and uplift us for the work ahead. As the late Congressman John Lewis once said, “Nothing can stop the power of a committed and determined people to make a difference in our society. Why? Because human beings are the most dynamic link to the divine on this planet.”

On this National Day of Prayer, we unite with purpose and resolve, and recommit ourselves to the core freedoms that helped define and guide our Nation from its earliest days. We celebrate our incredible good fortune that, as Americans, we can exercise our convictions freely—no matter our faith or beliefs. Let us find in our prayers, however they are delivered, the determination to overcome adversity, rise above our differences, and come together as one Nation to meet this moment in history.

The Congress, by Public Law 100–307, as amended, has called on the President to issue each year a proclamation designating the first Thursday in May as a “National Day of Prayer.”

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 6, 2021, as a National Day of Prayer. I invite the citizens of our Nation to give thanks, in accordance with their own faiths and consciences, for our many freedoms and blessings, and I join all people of faith in prayers for spiritual guidance, mercy, and protection.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of May, in the year of our Lord two thousand twenty-one, and of the Independence of the United States of America the two hundred and forty-fifth.

A handwritten signature in black ink, appearing to read "Joe Biden", is written over a diagonal line that serves as a signature line.

Rules and Regulations

Federal Register

Vol. 86, No. 88

Monday, May 10, 2021

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

[Docket No. USDA–2020–0011]

RIN 0503–AA72

Civil Monetary Penalty Inflation Adjustments for 2021

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the U.S. Department of Agriculture's civil monetary penalty regulations by making inflation adjustments as mandated by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015.

DATES: Effective May 10, 2021.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen O'Neill, Office of Budget and Program Analysis, USDA, 1400 Independence Avenue SW, Washington, DC 20250–1400, (202) 720–0038.

SUPPLEMENTARY INFORMATION:

I. Background

On November 2, 2015, the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act), which further amended the Federal Civil Penalties Inflation Adjustment Act of 1990, was signed into law to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. The 2015 Act requires agencies to adjust for inflation annually.

This rule amends 7 CFR part 3 to update the amount of civil monetary penalties that may be levied by U.S. Department of Agriculture (USDA) agencies to reflect inflationary adjustments for 2021 in accordance with the 2015 Act. As required by the 2015 Act, the annual adjustment was made for inflation based on the Consumer Price Index for the month of October 2020 and rounded to the nearest dollar

after an initial adjustment. The civil monetary penalties are listed according to the applicable administering agency.

II. Notice and Comment Not Required

This rule is required by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, with no issue of policy discretion. Accordingly, pursuant to the administrative procedure provisions in 5 U.S.C. 553, we find upon good cause that prior notice and other public procedure with respect to this action are not necessary. We also find good cause for making this action effective less than 30 days after publication in the **Federal Register**.

III. Procedural Requirements

Executive Order 12866

The Office of Management and Budget has determined that this regulatory action does not meet the criteria for significant regulatory action pursuant to Executive Order 12866, Regulatory Planning and Review.

This rule contains inflation adjustments in compliance with the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. The great majority of individuals, organizations, and entities participating in the programs affected by this regulation do not engage in prohibited activities and practices that would result in civil monetary penalties being incurred. Accordingly, we believe that any aggregate economic impact of this revised regulation will be minimal, affecting only the limited number of program participants that may engage in prohibited behavior in violation of the statutes.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this final rule because USDA was not required to publish notice of proposed rulemaking under 5 U.S.C. 553 or any other law. Accordingly, a regulatory flexibility analysis is not required.

Paperwork Reduction Act

This final rule imposes no new reporting or recordkeeping requirements necessitating clearance by OMB.

List of Subjects in 7 CFR Part 3

Administrative practice and procedure, Claims, Government

employees, Income taxes, Loan programs-agriculture, Penalties, Reporting and recordkeeping requirements, Wages.

Accordingly, we are amending 7 CFR part 3, subpart I, as follows:

PART 3—DEBT MANAGEMENT

- 1. The authority citation for part 3, subpart I, continues to read as follows:

Authority: 28 U.S.C. 2461 note.

- 2. Section 3.91 is amended by revising paragraphs (a)(2) and (b) to read as follows:

§ 3.91 Adjusted civil monetary penalties.

(a) * * *

(2) *Timing.* Any increase in the dollar amount of a civil monetary penalty listed in paragraph (b) of this section applies only to violations occurring after May 10, 2021.

* * * * *

(b) *Penalties—(1) Agricultural Marketing Service.* (i) Civil penalty for improper record keeping codified at 7 U.S.C. 136i–1(d), has: A maximum of \$975 in the case of the first offense, and a minimum of \$1,894 in the case of subsequent offenses, except that the penalty will be less than \$1,894 if the Secretary determines that the person made a good faith effort to comply.

(ii) Civil penalty for a violation of the unfair conduct rule under the Perishable Agricultural Commodities Act, in lieu of license revocation or suspension, codified at 7 U.S.C. 499b(5), has a maximum of \$5,308.

(iii) Civil penalty for violation of the licensing requirements under the Perishable Agricultural Commodities Act, codified at 7 U.S.C. 499c(a), has a maximum of \$1,695 for each such offense and not more than \$423 for each day it continues, or a maximum of \$423 for each offense if the Secretary determines the violation was not willful.

(iv) Civil penalty in lieu of license suspension under the Perishable Agricultural Commodities Act, codified at 7 U.S.C. 499h(e), has a maximum penalty of \$3,388 for each violative transaction or each day the violation continues.

(v) Civil penalty for a violation of the Export Apple Act, codified at 7 U.S.C. 586, has a minimum of \$153 and a maximum of \$15,481.

(vi) Civil penalty for a violation of the Export Grape and Plum Act, codified at 7 U.S.C. 596, has a minimum of \$296 and a maximum of \$29,622.

(vii) Civil penalty for a violation of an order issued by the Secretary under the Agricultural Adjustment Act, reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, codified at 7 U.S.C. 608c(14)(B), has a maximum of \$2,963. Each day the violation continues is a separate violation.

(viii) Civil penalty for failure to file certain reports under the Agricultural Adjustment Act, reenacted by the Agricultural Marketing Agreement Act of 1937, codified at 7 U.S.C. 610(c), has a maximum of \$296.

(ix) Civil penalty for a violation of a seed program under the Federal Seed Act, codified at 7 U.S.C. 1596(b), has a minimum of \$101 and a maximum of \$2,020.

(x) Civil penalty for failure to collect any assessment or fee for a violation of the Cotton Research and Promotion Act, codified at 7 U.S.C. 2112(b), has a maximum of \$2,963.

(xi) Civil penalty for failure to pay, collect, or remit any assessment or fee for a violation of a program under the Potato Research and Promotion Act, codified at 7 U.S.C. 2621(b)(1), has a minimum of \$1,328 and a maximum of \$12,247.

(xii) Civil penalty for failure to obey a cease and desist order under the Potato Research and Promotion Act, codified at 7 U.S.C. 2621(b)(3), has a maximum of \$1,328. Each day the violation continues is a separate violation.

(xiii) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Egg Research and Consumer Information Act, codified at 7 U.S.C. 2714(b)(1), has a minimum of \$1,535 and a maximum of \$15,353.

(xiv) Civil penalty for failure to obey a cease and desist order under the Egg Research and Consumer Information Act, codified at 7 U.S.C. 2714(b)(3), has a maximum of \$1,535. Each day the violation continues is a separate violation.

(xv) Civil penalty for failure to remit any assessment or fee or for a violation of a program under the Beef Research and Information Act, codified at 7 U.S.C. 2908(a)(2), has a maximum of \$11,977.

(xvi) Civil penalty for failure to remit any assessment or for a violation of a program regarding wheat and wheat foods research, codified at 7 U.S.C. 3410(b), has a maximum of \$2,963.

(xvii) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Floral Research and Consumer Information Act, codified at 7 U.S.C. 4314(b)(1), has a minimum of \$1,394 and a maximum of \$13,940.

(xviii) Civil penalty for failure to obey a cease and desist order under the Floral Research and Consumer Information Act, codified at 7 U.S.C. 4314(b)(3), has a maximum of \$1,394. Each day the violation continues is a separate violation.

(xix) Civil penalty for violation of an order under the Dairy Promotion Program, codified at 7 U.S.C. 4510(b), has a maximum of \$2,577.

(xx) Civil penalty for pay, collect, or remit any assessment or fee or for a violation of the Honey Research, Promotion, and Consumer Information Act, codified at 7 U.S.C. 4610(b)(1), has a minimum of \$774 and a maximum of \$7,939.

(xxi) Civil penalty for failure to obey a cease and desist order under the Honey Research, Promotion, and Consumer Information Act, codified at 7 U.S.C. 4610(b)(3), has a maximum of \$794. Each day the violation continues is a separate violation.

(xxii) Civil penalty for a violation of a program under the Pork Promotion, Research, and Consumer Information Act of 1985, codified at 7 U.S.C. 4815(b)(1)(A)(i), has a maximum of \$2,396.

(xxiii) Civil penalty for failure to obey a cease and desist order under the Pork Promotion, Research, and Consumer Information Act of 1985, codified at 7 U.S.C. 4815(b)(3)(A), has a maximum of \$1,198. Each day the violation continues is a separate violation.

(xxiv) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Watermelon Research and Promotion Act, codified at 7 U.S.C. 4910(b)(1), has a minimum of \$1,198 and a maximum of \$11,977.

(xxv) Civil penalty for failure to obey a cease and desist order under the Watermelon Research and Promotion Act, codified at 7 U.S.C. 4910(b)(3), has a maximum of \$1,198. Each day the violation continues is a separate violation.

(xxvi) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Pecan Promotion and Research Act of 1990, codified at 7 U.S.C. 6009(c)(1), has a minimum of \$1,951 and a maximum of \$19,496.

(xxvii) Civil penalty for failure to obey a cease and desist order under the Pecan Promotion and Research Act of 1990,

codified at 7 U.S.C. 6009(e), has a maximum of \$1,949.

(xxviii) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Mushroom Promotion, Research, and Consumer Information Act of 1990, codified at 7 U.S.C. 6107(c)(1), has a minimum of \$948 and a maximum of \$9,476.

(xxix) Civil penalty for failure to obey a cease and desist order under the Mushroom Promotion, Research, and Consumer Information Act of 1990, codified at 7 U.S.C. 6107(e), has a maximum of \$948. Each day the violation continues is a separate violation.

(xxx) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of the Lime Research, Promotion, and Consumer Information Act of 1990, codified at 7 U.S.C. 6207(c)(1), has a minimum of \$948 and a maximum of \$9,476.

(xxxi) Civil penalty for failure to obey a cease and desist order under the Lime Research, Promotion, and Consumer Information Act of 1990, codified at 7 U.S.C. 6207(e), has a maximum of \$948. Each day the violation continues is a separate violation.

(xxxii) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Soybean Promotion, Research, and Consumer Information Act, codified at 7 U.S.C. 6307(c)(1)(A), has a maximum of \$1,951.

(xxxiii) Civil penalty for failure to obey a cease and desist order under the Soybean Promotion, Research, and Consumer Information Act, codified at 7 U.S.C. 6307(e), has a maximum of \$9,706. Each day the violation continues is a separate violation.

(xxxiv) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Fluid Milk Promotion Act of 1990, codified at 7 U.S.C. 6411(c)(1)(A), has a minimum of \$948 and a maximum of \$9,476, or in the case of a violation that is willful, codified at 7 U.S.C. 6411(c)(1)(B), has a minimum of \$18,623 and a maximum of \$189,510.

(xxxv) Civil penalty for failure to obey a cease and desist order under the Fluid Milk Promotion Act of 1990, codified at 7 U.S.C. 6411(e), has a maximum of \$9,753. Each day the violation continues is a separate violation.

(xxxvi) Civil penalty for knowingly labeling or selling a product as organic except in accordance with the Organic Foods Production Act of 1990, codified at 7 U.S.C. 6519(c), has a maximum of \$18,951.

(xxxvii) Civil penalty for failure to pay, collect, or remit any assessment or fee or for a violation of a program under the Fresh Cut Flowers and Fresh Cut Greens Promotion and Information Act of 1993, codified at 7 U.S.C. 6808(c)(1)(A)(i), has a minimum of \$893 and a maximum of \$8,935.

(xxxviii) Civil penalty for failure to obey a cease and desist order under the Fresh Cut Flowers and Fresh Cut Greens Promotion and Information Act of 1993, codified at 7 U.S.C. 6808(e)(1), has a maximum of \$8,935. Each day the violation continues is a separate violation.

(xxxix) Civil penalty for a violation of a program under the Sheep Promotion, Research, and Information Act of 1994, codified at 7 U.S.C. 7107(c)(1)(A), has a maximum of \$1,742.

(xl) Civil penalty for failure to obey a cease and desist order under the Sheep Promotion, Research, and Information Act of 1994, codified at 7 U.S.C. 7107(e), has a maximum of \$870. Each day the violation continues is a separate violation.

(xli) Civil penalty for a violation of an order or regulation issued under the Commodity Promotion, Research, and Information Act of 1996, codified at 7 U.S.C. 7419(c)(1), has a minimum of \$1,644 and a maximum of \$16,449 for each violation.

(xlii) Civil penalty for failure to obey a cease and desist order under the Commodity Promotion, Research, and Information Act of 1996, codified at 7 U.S.C. 7419(e), has a minimum of \$1,644 and a maximum of \$16,449. Each day the violation continues is a separate violation.

(xliii) Civil penalty for a violation of an order or regulation issued under the Canola and Rapeseed Research, Promotion, and Consumer Information Act, codified at 7 U.S.C. 7448(c)(1)(A)(i), has a maximum of \$1,644 for each violation.

(xliv) Civil penalty for failure to obey a cease and desist order under the Canola and Rapeseed Research, Promotion, and Consumer Information Act, codified at 7 U.S.C. 7448(e), has a maximum of \$8,224. Each day the violation continues is a separate violation.

(xlv) Civil penalty for violation of an order or regulation issued under the National Kiwifruit Research, Promotion, and Consumer Information Act, codified at 7 U.S.C. 7468(c)(1), has a minimum of \$823 and a maximum of \$8,224 for each violation.

(xlvi) Civil penalty for failure to obey a cease and desist order under the National Kiwifruit Research, Promotion, and Consumer Information Act, codified

at 7 U.S.C. 7468(e), has a maximum of \$823. Each day the violation continues is a separate violation.

(xlvii) Civil penalty for a violation of an order or regulation under the Popcorn Promotion, Research, and Consumer Information Act, codified at 7 U.S.C. 7487(a), has a maximum of \$1,644 for each violation.

(xlviii) Civil penalty for certain violations under the Egg Products Inspection Act, codified at 21 U.S.C. 1041(c)(1)(A), has a maximum of \$9,476 for each violation.

(xlix) Civil penalty for violation of an order or regulation issued under the Hass Avocado Promotion, Research, and Information Act of 2000, codified at 7 U.S.C. 7807(c)(1)(A)(i), has a minimum of \$1,495 and a maximum of \$14,965 for each violation.

(l) Civil penalty for failure to obey a cease and desist order under the Hass Avocado Promotion, Research, and Information Act of 2000, codified at 7 U.S.C. 7807(e)(1), has a maximum of \$14,965 for each offense. Each day the violation continues is a separate violation.

(li) Civil penalty for violation of certain provisions of the Livestock Mandatory Reporting Act of 1999, codified at 7 U.S.C. 1636b(a)(1), has a maximum of \$15,481 for each violation.

(lii) Civil penalty for failure to obey a cease and desist order under the Livestock Mandatory Reporting Act of 1999, codified at 7 U.S.C. 1636b(g)(3), has a maximum of \$15,481 for each violation. Each day the violation continues is a separate violation.

(liii) Civil penalty for failure to obey an order of the Secretary issued pursuant to the Dairy Product Mandatory Reporting program, codified at 7 U.S.C. 1637b(c)(4)(D)(iii), has a maximum of \$14,965 for each offense.

(liv) Civil penalty for a willful violation of the Country of Origin Labeling program by a retailer or person engaged in the business of supplying a covered commodity to a retailer, codified at 7 U.S.C. 1638b(b)(2), has a maximum of \$1,202 for each violation.

(lv) Civil penalty for violations of the Dairy Research Program, codified at 7 U.S.C. 4535 and 4510(b), has a maximum of \$2,577 for each violation.

(lvi) Civil penalty for a packer or swine contractor violation, codified at 7 U.S.C. 193(b), has a maximum of \$29,616.

(lvii) Civil penalty for a livestock market agency or dealer failure to register, codified at 7 U.S.C. 203, has a maximum of \$2,019 and not more than \$101 for each day the violation continues.

(lviii) Civil penalty for operating without filing, or in violation of, a stockyard rate schedule, or of a regulation or order of the Secretary made thereunder, codified at 7 U.S.C. 207(g), has a maximum of \$2,020 and not more than \$101 for each day the violation continues.

(lix) Civil penalty for a stockyard owner, livestock market agency, or dealer, who engages in or uses any unfair, unjustly discriminatory, or deceptive practice or device in connection with determining whether persons should be authorized to operate at the stockyards, or with receiving, marketing, buying, or selling on a commission basis or otherwise, feeding, watering, holding, delivery, shipment, weighing, or handling of livestock, codified at 7 U.S.C. 213(b), has a maximum of \$29,616.

(lx) Civil penalty for a stockyard owner, livestock market agency, or dealer, who knowingly fails to obey any order made under the provisions of 7 U.S.C. 211, 212, or 213, codified at 7 U.S.C. 215(a), has a maximum of \$2,020.

(lxi) Civil penalty for live poultry dealer violations, codified at 7 U.S.C. 228b–2(b), has a maximum of \$86,156.

(lxii) Civil penalty for a violation, codified at 7 U.S.C. 86(c), has a maximum of \$289,430.

(lxiii) Civil penalty for failure to comply with certain provisions of the U.S. Warehouse Act, codified at 7 U.S.C. 254, has a maximum of \$37,412 per violation if an agricultural product is not involved in the violation.

(2) *Animal and Plant Health Inspection Service.* (i) Civil penalty for a violation of the imported seed provisions of the Federal Seed Act, codified at 7 U.S.C. 1596(b), has a minimum of \$101 and a maximum of \$2,020.

(ii) Civil penalty for a violation of the Animal Welfare Act, codified at 7 U.S.C. 2149(b), has a maximum of \$12,023, and knowing failure to obey a cease and desist order has a civil penalty of \$1,803.

(iii) Civil penalty for any person that causes harm to, or interferes with, an animal used for the purposes of official inspection by USDA, codified at 7 U.S.C. 2279e(a), has a maximum of \$14,965.

(iv) Civil penalty for a violation of the Swine Health Protection Act, codified at 7 U.S.C. 3805(a), has a maximum of \$30,077.

(v) Civil penalty for any person that violates the Plant Protection Act (PPA), or that forges, counterfeits, or, without authority from the Secretary, uses, alters, defaces, or destroys any certificate, permit, or other document

provided for in the PPA, codified at 7 U.S.C. 7734(b)(1), has a maximum of the greater of: \$74,824 in the case of any individual (except that the civil penalty may not exceed \$1,496 in the case of an initial violation of the PPA by an individual moving regulated articles not for monetary gain), \$374,119 in the case of any other person for each violation, \$601,152 for all violations adjudicated in a single proceeding if the violations do not include a willful violation, and \$1,202,304 for all violations adjudicated in a single proceeding if the violations include a willful violation; or twice the gross gain or gross loss for any violation, forgery, counterfeiting, unauthorized use, defacing, or destruction of a certificate, permit, or other document provided for in the PPA that results in the person deriving pecuniary gain or causing pecuniary loss to another.

(vi) Civil penalty for any person (except as provided in 7 U.S.C. 8309(d)) that violates the Animal Health Protection Act (AHPA), or that forges, counterfeits, or, without authority from the Secretary, uses, alters, defaces, or destroys any certificate, permit, or other document provided under the AHPA, codified at 7 U.S.C. 8313(b)(1), has a maximum of the greater of: \$71,811 in the case of any individual, except that the civil penalty may not exceed \$1,437 in the case of an initial violation of the AHPA by an individual moving regulated articles not for monetary gain, \$359,054 in the case of any other person for each violation, \$601,152 for all violations adjudicated in a single proceeding if the violations do not include a willful violation, and \$1,202,304 for all violations adjudicated in a single proceeding if the violations include a willful violation; or twice the gross gain or gross loss for any violation, forgery, counterfeiting, unauthorized use, defacing, or destruction of a certificate, permit, or other document provided under the AHPA that results in the person's deriving pecuniary gain or causing pecuniary loss to another person.

(vii) Civil penalty for any person that violates certain regulations under the Agricultural Bioterrorism Protection Act of 2002 regarding transfers of listed agents and toxins or possession and use of listed agents and toxins, codified at 7 U.S.C. 8401(i)(1), has a maximum of \$359,054 in the case of an individual and \$718,110 in the case of any other person.

(viii) Civil penalty for violation of the Horse Protection Act, codified at 15 U.S.C. 1825(b)(1), has a maximum of \$5,925.

(ix) Civil penalty for failure to obey Horse Protection Act disqualification,

codified at 15 U.S.C. 1825(c), has a maximum of \$11,579.

(x) Civil penalty for knowingly violating, or, if in the business as an importer or exporter, violating, with respect to terrestrial plants, any provision of the Endangered Species Act of 1973, any permit or certificate issued thereunder, or any regulation issued pursuant to section 9(a)(1)(A) through (F), (a)(2)(A) through (D), (c), (d) (other than regulations relating to record keeping or filing reports), (f), or (g), as specified at 16 U.S.C. 1540(a)(1), has a maximum of \$54,158 for each violation.

(xi) Civil penalty for knowingly violating, or, if in the business as an importer or exporter, violating, with respect to terrestrial plants, any other regulation under the Endangered Species Act of 1973, as specified at 16 U.S.C. 1540(a)(1), has a maximum of \$25,935 for each violation.

(xii) Civil penalty for violating, with respect to terrestrial plants, the Endangered Species Act of 1973, or any regulation, permit, or certificate issued thereunder, as specified at 16 U.S.C. 1540(a)(1), has a maximum of \$1,367 for each violation.

(xiii) Civil penalty for knowingly and willfully violating 49 U.S.C. 80502 with respect to the transportation of animals by any rail carrier, express carrier, or common carrier (except by air or water), a receiver, trustee, or lessee of one of those carriers, or an owner or master of a vessel, codified at 49 U.S.C. 80502(d), has a minimum of \$170 and a maximum of \$870.

(xiv) Civil penalty for a violation of the Commercial Transportation of Equine for Slaughter Act, 7 U.S.C. 1901 note, and its implementing regulations in 9 CFR part 88, as specified in 9 CFR 88.6, has a maximum of \$822. Each horse transported in violation of 9 CFR part 88 is a separate violation.

(xv) Civil penalty for knowingly violating section 3(d) or 3(f) of the Lacey Act Amendments of 1981, or for violating any other provision provided that, in the exercise of due care, the violator should have known that the plant was taken, possessed, transported, or sold in violation of any underlying law, treaty, or regulation, has a maximum of \$26,930 for each violation, as specified in 16 U.S.C. 3373(a)(1) (but if the plant has a market value of less than \$360, and involves only the transportation, acquisition, or receipt of a plant taken or possessed in violation of any law, treaty, or regulation of the United States, any Indian tribal law, any foreign law, or any law or regulation of any State, the penalty will not exceed the maximum provided for violation of

said law, treaty, or regulation, or \$26,930, whichever is less).

(xvi) Civil penalty for violating section 3(f) of the Lacey Act Amendments of 1981, as specified in 16 U.S.C. 3373(a)(2), has a maximum of \$673.

(3) *Food and Nutrition Service.* (i) Civil penalty for violating a provision of the Food and Nutrition Act of 2008 (Act), or a regulation under the Act, by a retail food store or wholesale food concern, codified at 7 U.S.C. 2021(a) and (c), has a maximum of \$120,231 for each violation.

(ii) Civil penalty for trafficking in food coupons, codified at 7 U.S.C. 2021(b)(3)(B), has a maximum of \$43,325 for each violation, except that the maximum penalty for violations occurring during a single investigation is \$78,017.

(iii) Civil penalty for the sale of firearms, ammunitions, explosives, or controlled substances for coupons, codified at 7 U.S.C. 2021(b)(3)(C), has a maximum of \$39,009 for each violation, except that the maximum penalty for violations occurring during a single investigation is \$78,017.

(iv) Civil penalty for any entity that submits a bid to supply infant formula to carry out the Special Supplemental Nutrition Program for Women, Infants and Children and discloses the amount of the bid, rebate, or discount practices in advance of the bid opening or for any entity that makes a statement prior to the opening of bids for the purpose of influencing a bid, codified at 42 U.S.C. 1786(h)(8)(H)(i), has a maximum of \$183,629,453.

(v) Civil penalty for a vendor convicted of trafficking in food instruments, codified at 42 U.S.C. 1786(o)(1)(A) and 42 U.S.C. 1786(o)(4)(B), has a maximum of \$15,877 for each violation, except that the maximum penalty for violations occurring during a single investigation is \$63,509.

(vi) Civil penalty for a vendor convicted of selling firearms, ammunition, explosive, or controlled substances in exchange for food instruments, codified at 42 U.S.C. 1786(o)(1)(B) and 42 U.S.C. 1786(o)(4)(B), has a maximum of \$15,487 for each violation, except that the maximum penalty for violations occurring during a single investigation is \$63,509.

(4) *Food Safety and Inspection Service.* (i) Civil penalty for certain violations under the Egg Products Inspection Act, codified at 21 U.S.C. 1041(c)(1)(A), has a maximum of \$9,476 for each violation.

(ii) [Reserved]

(5) *Forest Service*. (i) Civil penalty for willful disregard of the prohibition against the export of unprocessed timber originating from Federal lands, codified at 16 U.S.C. 620d(c)(1)(A), has a maximum of \$975,230 per violation or three times the gross value of the unprocessed timber, whichever is greater.

(ii) Civil penalty for a violation in disregard of the Forest Resources Conservation and Shortage Relief Act or the regulations that implement such Act regardless of whether such violation caused the export of unprocessed timber originating from Federal lands, codified in 16 U.S.C. 620d(c)(2)(A)(i), has a maximum of \$146,285 per violation.

(iii) Civil penalty for a person that should have known that an action was a violation of the Forest Resources Conservation and Shortage Relief Act or the regulations that implement such Act regardless of whether such violation caused the export of unprocessed timber originating from Federal lands, codified at 16 U.S.C. 620d(c)(2)(A)(ii), has a maximum of \$97,523 per violation.

(iv) Civil penalty for a willful violation of the Forest Resources Conservation and Shortage Relief Act or the regulations that implement such Act regardless of whether such violation caused the export of unprocessed timber originating from Federal lands, codified in 16 U.S.C. 620d(c)(2)(A)(iii), has a maximum of \$975,230.

(v) Civil penalty for a violation involving protections of caves, codified at 16 U.S.C. 4307(a)(2), has a maximum of \$21,314.

(6) [Reserved]

(7) *Federal Crop Insurance Corporation*. (i) Civil penalty for any person who willfully and intentionally provides any false or inaccurate information to the Federal Crop Insurance Corporation or to an approved insurance provider with respect to any insurance plan or policy that is offered under the authority of the Federal Crop Insurance Act, or who fails to comply with a requirement of the Federal Crop Insurance Corporation, codified in 7 U.S.C. 1515(h)(3)(A), has a maximum of the greater of: The amount of the pecuniary gain obtained as a result of the false or inaccurate information or the noncompliance; or \$12,650.

(ii) [Reserved]

(8) *Rural Housing Service*. (i) Civil penalty for a violation of section 536 of Title V of the Housing Act of 1949, codified in 42 U.S.C. 1490p(e)(2), has a maximum of \$207,313 in the case of an individual, and a maximum of \$2,073,133 in the case of an applicant other than an individual.

(ii) Civil penalty for equity skimming under section 543(a) of the Housing Act of 1949, codified in 42 U.S.C. 1490s(a)(2), has a maximum of \$37,412.

(iii) Civil penalty under section 543b of the Housing Act of 1949 for a violation of regulations or agreements made in accordance with Title V of the Housing Act of 1949, by submitting false information, submitting false certifications, failing to timely submit information, failing to maintain real property in good repair and condition, failing to provide acceptable management for a project, or failing to comply with applicable civil rights laws and regulations, codified in 42 U.S.C. 1490s(b)(3)(A), has a maximum of the greater of: Twice the damages USDA, guaranteed lender, or project that is secured for a loan under Title V suffered or would have suffered as a result of the violation; or \$74,824 per violation.

(9) [Reserved]

(10) *Commodity Credit Corporation*.

(i) Civil penalty for willful failure or refusal to furnish information, or willful furnishing of false information under of section 156 of the Federal Agricultural Improvement and Reform Act of 1996, codified at 7 U.S.C. 7272(g)(5), has a maximum of \$16,449 for each violation.

(ii) Civil penalty for willful failure or refusal to furnish information or willful furnishing of false data by a processor, refiner, or importer of sugar, syrup and molasses under section 156 of the Federal Agriculture Improvement and Reform Act of 1996, codified at 7 U.S.C. 7272(g)(5), has a maximum of \$16,449 for each violation.

(iii) Civil penalty for filing a false acreage report that exceeds tolerance under section 156 of the Federal Agriculture Improvement and Reform Act of 1996, codified at 7 U.S.C. 7272(g)(5), has a maximum of \$16,449 for each violation.

(iv) Civil penalty for knowingly violating any regulation of the Secretary of the Commodity Credit Corporation pertaining to flexible marketing allotments for sugar under section 359h(b) of the Agricultural Adjustment Act of 1938, codified at 7 U.S.C. 1359hh(b), has a maximum of \$12,023 for each violation.

(v) Civil penalty for knowing violation of regulations promulgated by the Secretary pertaining to cotton insect eradication under section 104(d) of the Agricultural Act of 1949, codified at 7 U.S.C. 1444a(d), has a maximum of \$14,811 for each offense.

(11) *Office of the Secretary*. (i) Civil penalty for making, presenting, submitting or causing to be made, presented or submitted, a false, fictitious, or fraudulent claim as defined

under the Program Fraud Civil Remedies Act of 1986, codified at 31 U.S.C. 3802(a)(1), has a maximum of \$11,804.

(ii) Civil penalty for making, presenting, submitting or causing to be made, presented or submitted, a false, fictitious, or fraudulent written statement as defined under the Program Fraud Civil Remedies Act of 1986, codified at 31 U.S.C. 3802(a)(2), has a maximum of \$11,804.

John Rapp,

Acting Director, Office of Budget and Program Analysis.

[FR Doc. 2021-09542 Filed 5-7-21; 8:45 am]

BILLING CODE 3410-90-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1310

[Docket No. DEA-542]

Designation of 3,4-MDP-2-P methyl glycidate (PMK glycidate), 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid), and alpha-phenylacetamide (APAA) as List I Chemicals

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Final rule.

SUMMARY: The Drug Enforcement Administration is finalizing a December 21, 2020, notice of proposed rulemaking to designate three chemicals, known as PMK glycidate, PMK glycidic acid, and APAA, as list I chemicals under the Controlled Substances Act (CSA). PMK glycidate and PMK glycidic acid are used in and are important to the manufacture of the schedule I controlled substance 3,4-methylenedioxymethamphetamine (MDMA) and other “ecstasy”-type substances, and APAA is used in and is important to the manufacture of the schedule II controlled substances amphetamine and methamphetamine. This final rulemaking subjects handlers (manufacturers, distributors, importers, and exporters) of PMK glycidate, PMK glycidic acid, and APAA to the chemical regulatory provisions of the CSA and its implementing regulations. **DATES:** Effective June 9, 2021.

FOR FURTHER INFORMATION CONTACT: Terrence L. Boos, Drug and Chemical Evaluation Section, Diversion Control Division, Drug Enforcement Administration; Mailing Address: 8701 Morrisette Drive, Springfield, Virginia 22152; Telephone: (571) 362-3249.

SUPPLEMENTARY INFORMATION: This final rule designates the following chemicals as list I chemicals and subjects them to the regulatory requirements applicable to list I chemicals:

- 3,4-MDP-2-P methyl glycidate (PMK glycidate), including its optical and geometric isomers;
- 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid), including its salts, optical and geometric isomers, and salts of isomers; and
- *alpha*-phenylacetamide (APAA), including its optical isomers.

Legal Authority

The Controlled Substances Act (CSA) and the Drug Enforcement Administration's (DEA) implementing regulations give the Attorney General, as delegated to the Administrator of DEA, the authority to specify, by regulation, a chemical as a "list I chemical."¹ This term refers to a chemical that is used in manufacturing a controlled substance in violation of subchapter I (Control and Enforcement) of the CSA and is important to the manufacture of the controlled substance.² The current list of all list I chemicals is available in 21 CFR 1310.02(a).

In addition, the United States is a Party to the 1988 United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances (1988 Convention), December 20, 1988, 1582 U.N.T.S. 95. Under Article 12 of the 1988 Convention, when the United States receives notification that a chemical has been added to Table I or Table II (tables annexed to such Convention), the United States must take measures it deems appropriate to monitor the manufacture and distribution of that chemical within the United States and to prevent its diversion, including measures related to international trade.

Background

In a letter dated May 23, 2019, the Secretary-General of the United Nations, in accordance with Article 12, paragraph 6 of the 1988 Convention, informed the United States Secretary of State that the Commission on Narcotic Drugs (CND) voted to place the chemicals 3,4-MDP-2-P methyl glycidate (PMK glycidate) (and all stereoisomers), 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid) (and all stereoisomers), and *alpha*-phenylacetamide (APAA) (and all optical isomers) in Table I of the 1988 Convention (CND Decisions 62/10, 62/11, and 62/12,

respectively) at its 62nd Session on March 19, 2019.

On December 21, 2020, DEA published a notice of proposed rulemaking (NPRM) [85 FR 82984] to designate 3,4-MDP-2-P methyl glycidate (PMK glycidate), including its optical and geometric isomers; 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid), including its salts, optical and geometric isomers, and salts of isomers; and *alpha*-phenylacetamide (APAA), including its optical isomers, as list I chemicals under the CSA.³

PMK glycidate, PMK glycidic acid, and APAA are close chemical relatives of controlled list I precursor 3,4-methylenedioxyphenyl-2-propanone (3,4-MDP-2-P), and have been made specifically to circumvent existing precursor controls. DEA has not identified any known legitimate uses for these chemicals, other than possible research purposes. The first two substances, PMK glycidate and PMK glycidic acid, are closely related in chemical structure to precursors of 3,4-methylenedioxymethamphetamine (MDMA) (schedule I) and other "ecstasy"-type substances in schedule I. APAA is a precursor of schedule II controlled substances amphetamine and methamphetamine.

All three chemicals are used for the illicit manufacture of two precursors listed in Table I of the 1988 Convention (3,4-MDP-2-P and 1-phenyl-2-propanone (P-2-P)). For years, countries have reported to the International Narcotics Control Board (INCB) the illicit trafficking and use of these chemicals in manufacturing controlled substances, with increasing frequency and amounts reported in 2018 and 2019.⁴

Comments Received and Designation of PMK Glycidate, PMK Glycidic Acid, and APAA as List I Chemicals

In response to the December 21, 2020, NPRM, DEA received one anonymous comment expressing general opposition to the "war on drugs" and to the addition of more substances to the list

³ DEA proposed to control the same set of chemicals specified by the CND. However, DEA used more precise terms that relate to the specific chemical and variations that can actually exist.

⁴ Precursors and Chemicals Frequently Used in the Illicit Manufacture of Narcotic Drugs and Psychotropic Substances: Report of the International Narcotics Control Board for 2018 on the Implementation of Article 12 of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988 (E/INCB/2018/4, Released March 5, 2019) and Report of the International Narcotics Control Board for 2019 on the Implementation of Article 12 of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988 (E/INCB/2019/1, Released February 27, 2020)

and under CSA control. DEA considers the general comment about the war on drugs to be outside the scope of this rulemaking.

Regarding the general opposition to listing more substances, DEA notes that it proposed to designate and add these three specific chemicals to the list as they met the statutory and regulatory definition of a list I chemical, and DEA is using its legal authority to so designate these chemicals as list I chemicals.

Therefore, for the reasons discussed in the NPRM, and reiterated in the above background section, the Acting Administrator of DEA finds that PMK glycidate, PMK glycidic acid, and APAA are used in the manufacture of controlled substances in violation of the CSA, and are important to the manufacture of these controlled substances. Therefore, the Acting Administrator designates PMK glycidate, PMK glycidic acid, and APAA as list I chemicals.

Chemical Mixtures of PMK Glycidate, PMK Glycidic Acid or APAA

Pursuant to this final rulemaking, chemical mixtures containing any of these three chemicals are subject to regulatory requirements at any concentration unless a manufacturer submits to DEA an application for exemption of a chemical mixture, DEA accepts the application for filing, and DEA exempts the chemical mixture in accordance with 21 CFR 1310.13 (Exemption of chemical mixtures; application). Since even a small amount of these three chemicals can potentially yield a significant amount of controlled substances, DEA believes that regulation of chemical mixtures containing any amount of these three chemicals is necessary to prevent their illicit extraction, isolation, and use. This rule modifies the "Table of Concentration Limits" in 21 CFR 1310.12(c) to reflect the fact that chemical mixtures containing any amount of these three chemicals are subject to CSA chemical control provisions, including 21 CFR parts 1309, 1310, 1313, and 1316.

Application Process for Exemption of Chemical Mixtures

DEA has implemented an application process to exempt certain chemical mixtures from the requirements of the CSA and its implementing regulations.⁵ Manufacturers may submit an

¹ 21 U.S.C. 802(34) and 871(b) and 21 CFR 1310.02(c).

² 21 U.S.C. 802(34) and 21 CFR 1300.02(b).

⁵ 21 CFR 1310.13 specifies that this chemical mixture is a chemical mixture consisting of two or more chemical components, at least one of which is not a list I or list II chemical, and the mixture and its listed chemical(s) must meet certain other conditions.

application for exemption for those mixtures that do not meet the category criteria set forth in 21 CFR 1310.12(d) for an automatic exemption. DEA may grant an exemption of a chemical mixture if the Administrator determines that the mixture is formulated in such a way that it cannot be easily used in the illicit production of a controlled substance, and the listed chemical or chemicals contained in the chemical mixture cannot be readily recovered (*i.e.*, the chemical mixture meets the conditions set forth in 21 U.S.C. 802(39)(A)(vi) and 21 CFR 1310.13(a)(1)–(2)).

Requirements for Handling List I Chemicals

The designation of these three chemicals as list I chemicals subjects handlers (manufacturers, distributors, importers, and exporters) and proposed handlers to all of the regulatory controls and administrative, civil, and criminal actions applicable to the manufacture, distribution, importation, and exportation of a list I chemical. Upon the effective date of this final rulemaking, persons potentially handling these three chemicals, including regulated chemical mixtures containing any of these three chemicals, are required to comply with the following list I chemical regulations:

1. *Registration.* Any person who handles (manufactures, distributes, imports, or exports), or proposes to engage in such handling of any of these three chemicals must obtain a registration pursuant to 21 U.S.C. 822, 823, 957, and 958. Regulations describing registration for list I chemical handlers are set forth in 21 CFR part 1309. DEA regulations require separate registrations for manufacturing, distributing, importing, and exporting of any of these three chemicals.⁶ Further, a separate registration is required for each principal place of business at one general physical location where list I chemicals are manufactured, distributed, imported, or exported by a person.⁷

DEA notes that under the CSA, a “warehouseman” is not required to register and may lawfully possess a list I chemical, if the possession of the chemical is in the usual course of business or employment.⁸ Under DEA implementing regulations, the warehouse in question must receive the list I chemical from a DEA registrant,

and shall only distribute the list I chemical back to the DEA registrant and registered location from which it was received.⁹ A warehouse that distributes list I chemicals to persons other than the registrant and registered location from which they were obtained is conducting distribution activities and is required to register as such.

Upon the effective date of this final rulemaking, any person manufacturing, distributing, importing, or exporting any of these three chemicals will become subject to the registration requirement under the CSA. DEA recognizes, however, that it is not possible for persons subject to the registration requirement to immediately complete and submit an application for registration and for DEA to immediately issue registrations for those activities. Therefore, to allow continued legitimate commerce in these three chemicals, DEA is establishing in 21 CFR 1310.09 a temporary exemption from the registration requirement for persons desiring to engage in activities with any of these three chemicals, provided that DEA receives a properly completed application for registration or application for exemption of chemical mixtures on or before June 9, 2021. The temporary exemption for such persons will remain in effect until DEA takes final action on their application for registration or application for exemption of a chemical mixture.

The temporary exemption applies solely to the registration requirement; all other chemical control requirements, including recordkeeping and reporting, will become effective on the effective date of the final rule. Therefore, all transactions of these three chemicals and chemical mixtures containing any of these three chemicals will be regulated while an application for registration or exemption is pending. This is necessary because failing to regulate these transactions could result in increased diversion of chemicals desirable to drug traffickers.

Additionally, the temporary exemption does not suspend applicable federal criminal laws relating to these three chemicals, nor does it supersede State or local laws or regulations. All handlers of any of these three chemicals must comply with applicable State and local requirements in addition to the CSA regulatory controls.

2. *Records and Reports.* Every DEA registrant must maintain records and submit reports to DEA with respect to these three chemicals pursuant to 21 U.S.C. 830(a) and (b)(1) and (2) and in accordance with 21 CFR 1310.04 and

1310.05. Pursuant to 21 CFR 1310.04(a), a record must be made and maintained for two years after the date of a transaction involving a listed chemical, provided the transaction is a regulated transaction.

Each regulated bulk manufacturer of a listed chemical must submit to DEA manufacturing, inventory, and use data on an annual basis.¹⁰ Existing standard industry reports containing the required information are acceptable, provided the information is separate or readily retrievable from the report.

The CSA and its implementing regulations require that each regulated person must report to DEA any regulated transaction involving an extraordinary quantity of a listed chemical, an uncommon method of payment or delivery, or any other circumstance that the regulated person believes may indicate that the listed chemical will be used in violation of subchapter I of the CSA or 21 CFR part 1310. In addition, regulated persons must report any proposed regulated transaction with a person whose description or other identifying characteristics DEA has previously furnished to the regulated person, any unusual or excessive loss or disappearance of a listed chemical under the control of the regulated person, and any in-transit loss in which the regulated person is the supplier.¹¹

3. *Importation and Exportation.* All importation and exportation of these three chemicals must be done in compliance with 21 U.S.C. 957, 958, and 971 and in accordance with 21 CFR part 1313.

4. *Security.* All applicants and registrants must provide effective controls against theft and diversion in accordance with 21 CFR 1309.71–1309.73.

5. *Administrative Inspection.* Places, including factories, warehouses, or other establishments and conveyances, where registrants or other regulated persons may lawfully hold, manufacture, distribute, or otherwise dispose of a list I chemical or where records relating to those activities are maintained, are controlled premises as defined in 21 U.S.C. 880(a) and 21 CFR 1316.02(c). The CSA allows for administrative inspections of these controlled premises as provided in 21 CFR part 1316, subpart A. 21 U.S.C. 880(b).

⁶ 21 CFR 1309.21.

⁷ 21 CFR 1309.23(a). See also 21 U.S.C. 822(e)(1) with separate registration requirements pertaining to manufacturing or distributing a list I chemical.

⁸ 21 U.S.C. 822(c)(2) and 21 U.S.C. 957(b)(1)(B).

⁹ See 21 CFR 1309.23(b)(1).

¹⁰ 21 CFR 1310.05(d). See also 21 U.S.C. 830(b)(2).

¹¹ 21 U.S.C. 830(b)(1)(A)–(C) and 21 CFR 1310.05(a) and (b)(1).

6. *Liability.* Any activity involving these three chemicals not authorized by, or in violation of, the CSA is unlawful, and may subject the person to administrative, civil, and/or criminal action.

Regulatory Analyses

Executive Orders 12866 and 13563, Regulatory Planning and Review and Improving Regulation and Regulatory Review

This rule was developed in accordance with the principles of Executive Orders (E.O.) 12866 and 13563. E.O. 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). E.O. 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in E.O. 12866.

E.O. 12866 classifies a “significant regulatory action,” requiring review by the Office of Management and Budget (OMB), as any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the E.O. DEA has determined that this rule is not a “significant regulatory action” under E.O. 12866, section 3(f).

As finalized, PMK glycidate, PMK glycidic acid, and APAA are subject to all of the regulatory controls and administrative, civil, and criminal sanctions applicable to the manufacture, distribution, importing, and exporting of list I chemicals. The first two chemicals, PMK glycidate and PMK glycidic acid, are closely related in chemical structure to precursors of MDMA and other “ecstasy”-type substances, as discussed in the above background section. APAA is a precursor of amphetamine and methamphetamine. All three chemicals are highly suitable for the illicit manufacture of precursors listed in

Table I of the 1988 Convention (3,4-methylenedioxyphenyl-2-propanone (3,4-MDP-2-P) and 1-phenyl-2-propanone (P-2-P)). As noted earlier, incidents of illicit manufacture and tracking of these three chemicals have been reported for many years to the INCB, with an increase in the frequency and amounts reported in 2018 and 2019.

In making its assessment pursuant to Article 12, paragraph 4 of the 1988 Convention, the CND found that there was no known legitimate manufacture of and trade in any of the three chemicals and that their use was limited, in small amounts, to research, development, laboratory, and analytical purposes. DEA also searched information in the public domain for legitimate uses of these three chemicals, and likewise, did not identify any known legitimate use for any of these chemicals, other than possibly for research purposes. DEA evaluated the costs and benefits of this action.

DEA cannot rule out the possibility that minimal quantities of PMK glycidate, PMK glycidic, or APAA are used for the manufacturing of legitimate pharmaceutical substances. However, DEA did not receive any public comments to that effect in response to the NPRM.

Costs

As stated above, the only use for PMK glycidate and PMK glycidic acid is as intermediaries for the manufacturing of MDMA and other “ecstasy”-type substances. Similarly, the only use for APAA is as a precursor for amphetamine and methamphetamine. Any manufacturer, distributor, importer, or exporter of any of these three chemicals for legitimate pharmaceutical commerce, if they exist at all, will incur costs if they are not already registered for handling List I chemicals. The primary costs associated with this rule are the annual registration fees (\$3,047 for manufacturers and \$1,523 for distributors, importers, and exporters). Moreover, any manufacturer that uses any of these three chemicals for legitimate pharmaceutical purposes is likely to already be registered with DEA and have all security and other handling processes in place, resulting in minimal cost.

DEA has identified ten domestic suppliers of one or more of these chemicals, PMK glycidate, PMK glycidic acid, and APAA; nine of these suppliers are not currently registered with DEA to handle list I chemicals. The amount of these three chemicals distributed by these suppliers is unknown. It is common for chemical distributors to have items on their catalog while not

actually having any material level of sales. Based on the discussion above, DEA believes any quantity of sales from these distributors for legitimate pharmaceutical purposes is minimal. As finalized, suppliers for the legitimate use of PMK glycidate, PMK glycidic acid, and APAA are expected to choose the least-cost option, which in many cases may lead them to stop selling the minimal quantities, if any, of PMK glycidate, PMK glycidic acid, and APAA, rather than incur the registration cost. Therefore, DEA estimates that the cost of foregone sales is minimal; and thus, the cost of this rule is minimal.

This analysis excludes consideration of any economic impact to those businesses that facilitate the manufacturing and distribution of PMK glycidate, PMK glycidic acid, or APAA for the illicit production of amphetamine, methamphetamine, MDMA, or other “ecstasy”-type substances.

Benefits

Controlling PMK glycidate, PMK glycidic acid, and APAA is expected to prevent, curtail, and limit the unlawful manufacture and distribution of amphetamine, methamphetamine, and MDMA and other “ecstasy”-type substances. This action is also expected to assist in the prevention of possible theft or diversion of PMK glycidate, PMK glycidic acid, and APAA from any legitimate firms. DEA also believes control is necessary to prevent unscrupulous chemists from synthesizing PMK glycidate, PMK glycidic acid, and APAA and selling them (as an unregulated material) through the internet and other channels to individuals who may wish to acquire unregulated intermediary chemicals for the purpose of manufacturing illicit amphetamine, methamphetamine, or MDMA or other “ecstasy”-type substances.

In summary, DEA conducted a qualitative analysis of costs and benefits. DEA believes this action will minimize the diversion of PMK glycidate, PMK glycidic acid, and APAA. DEA believes the legitimate market for PMK glycidate, PMK glycidic acid, and APAA for legitimate pharmaceutical purposes is minimal. Thus, any potential cost resulting from this regulation is minimal.

Executive Order 12988, Civil Justice Reform

This regulation meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988 to eliminate drafting errors and ambiguity, minimize litigation, provide a clear legal standard

for affected conduct, and promote simplification and burden reduction.

Executive Order 13132, Federalism

This rulemaking does not have federalism implications warranting the application of E.O. 13132. The rule does not have substantial direct effects on the states, on the relationship between the national government and the states, or the distribution of power and responsibilities among the various levels of government.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

This rule does not have tribal implications warranting the application of E.O. 13175. It does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.

Regulatory Flexibility Act (RFA)

The Acting Administrator, in accordance with the RFA,¹² has reviewed this rule, and by approving, it certifies that it will not have a significant economic impact on a substantial number of small entities.

As discussed above, PMK glycidate, PMK glycidic acid, and APAA will now become subject to all of the regulatory controls and administrative, civil, and criminal sanctions applicable to the manufacture, distribution, importation, and exportation of list I chemicals. PMK glycidate and PMK glycidic acid are closely related in chemical structure to precursors of MDMA and other “ecstasy”-type substances. APAA is a precursor of amphetamine and methamphetamine. All three chemicals are highly suitable for the illicit manufacture of precursors listed in Table I of the 1988 Convention (3,4-methylenedioxyphenyl-2-propanone (3,4-MDP-2-P) and 1-phenyl-2-propanone (P-2-P)). DEA has not identified any legitimate industrial use for PMK glycidate, PMK glycidic acid, or APAA, other than as intermediary chemicals in the production of amphetamine, methamphetamine, and MDMA or other “ecstasy”-type substances. Therefore, DEA believes the vast majority, if not all, of PMK glycidate, PMK glycidic acid, and APAA is used for the illicit manufacturing of amphetamine, methamphetamine, and MDMA or other “ecstasy”-type substances. The primary costs associated with this rule are the annual

registration fees (\$3,047 for manufacturers and \$1,523 for distributors, importers, and exporters), but only if they are not already registered to handle any list I chemicals.

DEA has identified ten domestic suppliers of one or more of the chemicals, PMK glycidate, PMK glycidic acid, and APAA; nine of these suppliers are currently not registered with DEA to handle list I chemicals. All nine non-registered domestic suppliers are affected, and all nine (94.5 percent, based on Small Business Administration size standard for chemical distributors and Statistics of U.S. Businesses data) are estimated to be small entities. The quantity of these three chemicals distributed by these suppliers is unknown. It is common for chemical distributors to have items on their catalog while not actually having any material level of sales. Based on the discussion above, DEA believes any quantity of sales from these distributors for legitimate pharmaceutical purposes is minimal. DEA did not receive any comments to the contrary in response to the NPRM. DEA estimates that this rule will not have a significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995 (UMRA)

In accordance with the UMRA, 2 U.S.C. 1501 *et seq.*, DEA has determined and certifies that this rule will not result in any Federal mandate that may result “in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any 1 year. . . .” Therefore, neither a Small Government Agency Plan nor any other action is required under the UMRA.

Paperwork Reduction Act

The action does not impose a new collection of information requirement under the Paperwork Reduction Act, 44 U.S.C. 3501–3521. This action will not impose recordkeeping or reporting requirements on State or local governments, individuals, businesses, or organizations. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Congressional Review Act

This final rule is not a major rule as defined by the Congressional Review Act (CRA), 5 U.S.C. 804. However, pursuant to the CRA, DEA is submitting a copy of this final rule to both Houses

of Congress and to the Comptroller General.

List of Subjects 21 CFR Part 1310

Administrative practice and procedure, Drug traffic control, Exports, Imports, Reporting and recordkeeping requirements.

Accordingly, for the reasons set forth in the preamble, DEA amends 21 CFR part 1310 as follows:

PART 1310—RECORDS AND REPORTS OF LISTED CHEMICALS AND CERTAIN MACHINES; IMPORTATION AND EXPORTATION OF CERTAIN MACHINES

■ 1. The authority citation for part 1310 continues to read as follows:

Authority: 21 U.S.C. 802, 827(h), 830, 871(b), 890.

■ 2. In § 1310.02, add paragraphs (a)(34) through (36) to read as follows:

§ 1310.02 Substances covered.

* * * * *

(a) * * *

(34) 3,4-MDP-2-P methyl glycidate (PMK glycidate) and its optical and geometric isomers 8535

(35) 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid) and its salts, optical and geometric isomers, and salts of isomers 8525

(36) Alpha-phenylacetoacetamide (APAA) and its optical isomers 8515

* * * * *

■ 3. In § 1310.04:

■ a. Redesignate paragraphs (g)(1)(vii) through (xiii) as paragraphs (g)(1)(x) through (xvi), respectively;

■ b. Redesignate paragraphs (g)(1)(i) through (vi) as paragraphs (g)(1)(ii) through (vii), respectively; and

■ c. Add new paragraphs (g)(1)(i), (viii), and (ix).

The additions read as follows:

§ 1310.04 Maintenance of records.

* * * * *

(g) * * *

(1) * * *

(i) Alpha-phenylacetoacetamide (APAA) and its optical isomers

* * * * *

(viii) 3,4-MDP-2-P methyl glycidate (PMK glycidate) and its optical and geometric isomers

(ix) 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid) and its salts, optical and geometric isomers, and salts of isomers

* * * * *

■ 4. In § 1310.09, add paragraph (q) to read as follows:

¹² 5 U.S.C. 601–612.

§ 1310.09 Temporary exemption from registration.

(q)(1) Each person required under 21 U.S.C. 822 and 957 to obtain a registration to manufacture, distribute, import, or export regulated forms of 3,4-MDP-2-P methyl glycidate (PMK glycidate), 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid), and *alpha*-phenylacetoacetamide (APAA), including regulated chemical mixtures pursuant to § 1310.12, is temporarily exempted from the registration requirement, provided that DEA receives a properly completed application for registration or application for exemption for a chemical mixture containing regulated forms of 3,4-MDP-2-P methyl glycidate (PMK glycidate), 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid), or *alpha*-phenylacetoacetamide (APAA) pursuant to § 1310.13 on or before (30

days after publication of a rule implementing regulations regarding these three chemicals). The exemption will remain in effect for each person who has made such application until the Administration has approved or denied that application. This exemption applies only to registration; all other chemical control requirements set forth in the Act and parts 1309, 1310, 1313, and 1316 of this chapter remain in full force and effect.

(2) Any person who manufactures, distributes, imports or exports a chemical mixture containing regulated forms of 3,4-MDP-2-P methyl glycidate (PMK glycidate), 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid), or *alpha*-phenylacetoacetamide (APAA) whose application for exemption is subsequently denied by DEA must obtain a registration with DEA. A temporary exemption from the registration requirement will also be

provided for those persons whose applications for exemption are denied, provided that DEA receives a properly completed application for registration on or before 30 days following the date of official DEA notification that the application for exemption has been denied. The temporary exemption for such persons will remain in effect until DEA takes final action on their registration application.

■ 5. In § 1310.12, in paragraph (c), add in alphanumerical order entries for 3,4-MDP-2-P methyl glycidate (PMK glycidate), 3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid), and *alpha*-phenylacetoacetamide (APAA) in the table "Table of Concentration Limits" to read as follows:

§ 1310.12 Exempt chemical mixtures.

(c) * * *

TABLE OF CONCENTRATION LIMITS

	DEA chemical code no.	Concentration	Special conditions
3,4-MDP-2-P methyl glycidate (PMK glycidate) and its optical and geometric isomers.	8535	Not exempt at any concentration.	Chemical mixtures containing any amount of this chemical are not exempt.
3,4-MDP-2-P methyl glycidic acid (PMK glycidic acid) and its salts, optical and geometric isomers, and salts of isomers.	8525	Not exempt at any concentration.	Chemical mixtures containing any amount of this chemical are not exempt.
Alpha-phenylacetoacetamide (APAA) and its optical isomers.	8515	Not exempt at any concentration.	Chemical mixtures containing any amount of this chemical are not exempt.

D. Christopher Evans,

Acting Administrator.

BILLING CODE 4410-09-P

AGENCY FOR INTERNATIONAL DEVELOPMENT**22 CFR Part 228**

[AID-2020-0004]

RIN 0412-AB09

Procurement of Certain Essential Medical Supplies To Address the COVID-19 Pandemic

AGENCY: Agency for International Development.

ACTION: Final rule; technical amendments.

SUMMARY: On October 23, 2020, the United States Agency for International

Development (USAID) issued a Temporary Final Rule (TFR) amending our regulations to allow USAID to waive "Source and Nationality" rules to provide for increased flexibility, targeting, and speed of procurement of Essential Medical Supplies required to address the COVID-19 pandemic worldwide. The TFR was effective through April 30, 2021. This document reverts the amended sections to the text of those sections as they existed prior to the issuance of the TFR, with minor technical updates. This reversion to the original text is applicable upon the expiration of the TFR.

DATES: This rule is effective May 10, 2021. As stated in the October 23, 2020, final rule, the TFR was effective from October 23, 2020, through April 30, 2021. The amendments in this rule are applicable beginning May 1, 2021, after the expiration of the TFR.

ADDRESSES: You may review the docket by searching for Docket ID [AID-2020-

0004], via the Federal eRulemaking Portal: <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Greg Marchand, Assistant General Counsel, Office of the General Counsel, USAID, 1300 Pennsylvania Ave. NW, Washington, DC 20523, 202-215-3409, GCFEDREGMailbox@usaid.gov.

SUPPLEMENTARY INFORMATION: This document affects 22 CFR 228.01, which was amended by the TFR published in the **Federal Register** on October 23, 2020 (85 FR 67443) and subsequently corrected on December 16, 2020 (85 FR 81390). The TFR and its subsequent correction revised the definitions in § 228.01 by adding a new definition for "Essential medical supplies." This document reinstates the definitions in § 228.01 exactly as they existed prior to the issuance of the TFR. This document also reverts 22 CFR 228.11 and 228.30, which were also amended by the TFR published in the **Federal Register** on October 23, 2020 (85 FR 67443). The TFR amended these sections to create a

new approval requirement and basis for waivers for the source and nationality of essential medical supplies. This document reverts the language of both sections to the text as it existed prior to the issuance of the TFR, with minor technical updates.

List of Subjects in 22 CFR Part 228

Government procurement.

The Deputy General Counsel of USAID, Suk J. Jin, having reviewed and approved this document, is delegating the authority to electronically sign this document to Gregory A. Marchand, Assistant General Counsel for USAID, for purposes of publication in the **Federal Register**.

Gregory A. Marchand,

Assistant General Counsel, U.S. Agency for International Development.

For reasons stated in the preamble, USAID amends 22 CFR part 228 as follows:

PART 228—RULES FOR PROCUREMENT OF COMMODITIES AND SERVICES FINANCED BY USAID

■ 1. The authority citation for 22 CFR part 228 continues to read as follows:

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended, E.O. 12163, Sept. 29, 1979, 44 FR 56673; 3 CFR 1979 Comp., p. 435.

■ 2. Revise § 228.01 to read as follows:

§ 228.01 Definitions.

As used in this part, the following terms shall have the following meanings:

Advanced developing countries mean those countries that are categorized by the World Bank as upper middle income countries according to their gross national income per capita, except for those countries in which USAID provides assistance. USAID will maintain a list of advanced developing countries primarily based on the most recent World Bank determinations, and will make the list available in USAID's Automated Directives System, ADS 310. This list will include determinations made under § 228.17.

Available for purchase means for commodities, that the commodity is offered for sale in a country in the authorized principal geographic code at the time of purchase from the supplier, irrespective of the place of manufacture or production, unless it is a prohibited source country. If applicable, the commodity must also be able to be serviced, and, if warrantied, have a valid warranty. For services, available for purchase means the service is offered from a vendor which has

complied with nationality and foreign government-owned organization requirements of this regulation, and is otherwise organized in a country in the authorized principal geographic code designated in an implementing instrument. This definition does not apply to procurements under the geographic Code 935, see § 228.03, because that geographic code is for any country or area except for prohibited source countries.

Commission means any payment or allowance by a supplier to any person for the contribution which that person has made to secure the sale or contract for the supplier or which that person makes to securing on a continuing basis similar sales or contracts for the supplier.

Commodities or goods means any material, article, supply, good, or equipment.

Commodity-related services means delivery services and/or incidental services.

Cooperating country or recipient country means the country receiving the USAID assistance subject to this part, and includes all the countries receiving assistance under a regional program or project.

Delivery means the transfer to, or for the account of, an importer of the right to possession of a commodity, or, with respect to a commodity-related service, the rendering to, or for the account of, an importer of any such service.

Delivery service means any service customarily performed in a commercial export or import transaction which is necessary to affect a physical transfer of commodities to the cooperating/recipient country. Examples of such services are the following: export packing, local drayage in the source country (including waiting time at the dock), ocean and other freight, loading, heavy lift, wharfage, tollage, switching, dumping and trimming, lighterage, insurance, commodity inspection services, and services of a freight forwarder. "Delivery service" may also include work and materials necessary to meet USAID marking requirements.

Developing countries means those countries that are categorized by the World Bank as low or lower middle income economies according to their gross national income per capita, and also includes all countries to which USAID provides assistance. USAID will maintain a list of developing countries primarily based on the most recent World Bank determinations, and will make the list available in USAID's Automated Directives System, ADS 310.

Free Port or Bonded Warehouse is a special customs area with favorable

customs regulations (or no customs duties and controls for transshipment).

Implementing instrument means a binding relationship established between USAID and an outside party or parties to carry out USAID programs, by authorizing the use of USAID funds and/or nonfinancial resources for the procurement of services or commodities and/or commodity related services. Implementing instruments include specific conditions that apply to each such procurement. Examples of such instruments include contracts, grants, cooperating agreements, and interagency agreements.

Incidental services means services such as installation, erection, maintenance, or upgrading of USAID-financed equipment, or the training of personnel in the maintenance, operation and use of such equipment, or similar services provided for the authorized disposition of such commodities.

Long term lease means, for purposes of subpart B of this part, a single lease of more than 180 calendar days; or repetitive or intermittent leases under a single award within a one-year period, which cumulatively total more than 180 calendar days. A single lease may consist of lease of one or more of the same type of commodity within the same lease term.

Motor vehicles means self-propelled vehicles with passenger carriage capacity, such as highway trucks, passenger cars and buses, motorcycles, scooters, motorized bicycles, ATVs, and utility vehicles. Excluded from this definition are ambulances, snowmobiles, industrial vehicles for materials handling and earthmoving, such as lift trucks, tractors, graders, scrapers, off-the-highway trucks (such as off-road dump trucks), boats, and other vehicles that are not designed for travel at normal road speeds (40 kilometers per hour and above).

Mission means the USAID Mission, office or representative in a cooperating/recipient country.

Nationality refers to the place of legal organization, ownership, citizenship, or lawful permanent residence (or equivalent immigration status to live and work on a continuing basis) of suppliers of commodities and services.

Pharmaceutical means any substance intended for use in the diagnosis, cure, mitigation, treatment, or prevention of diseases in humans or animals; any substances (other than food) intended to affect the structure or any function of the body of humans or animals; and, any substance intended for use as a component in the above. The term includes drugs, vitamins, oral rehydration salts, biologicals, and some

in-vitro diagnostic reagents/test kits; but does not include devices or their components, parts, or accessories. Contraceptives, including condoms, are not included in this definition.

Prohibited sources means countries to which assistance is prohibited by the annual appropriations acts of Congress or other statutes, or those subject to other executive branch restrictions, such as applicable sanctions administered by the U.S. Treasury Department's Office of Foreign Assets Control. USAID maintains a list of prohibited sources, available in USAID's Automated Directives System, ADS 310.

Recipients and contractors. *Recipient* has the same meaning as defined in 22 CFR 226.02, except that it shall include non-U.S. individuals, entities and organizations, as well as subrecipients. *Contractors* mean those entities which enter into a contract, as the term is defined in 48 CFR part 2, with the U.S. Government, and includes subcontractors.

Services means the performance of identifiable tasks, rather than the delivery of an end item of supply.

Source means the country from which a commodity is shipped to the cooperating/recipient country or the cooperating/recipient country itself if the commodity is located therein at the time of the purchase, irrespective of the place of manufacture or production, unless it is a prohibited source country. Where, however, a commodity is shipped from a free port or bonded warehouse in the form in which received therein, "source" means the country from which the commodity was shipped to the free port or bonded warehouse.

Supplier means any person or organization, governmental or otherwise, who furnishes services, commodities, and/or commodity related services, including delivery or incidental services, financed by USAID.

United States means the United States of America, any State(s) of the United States, the District of Columbia, and areas of U.S. associated sovereignty, including commonwealths, territories, and possessions.

USAID means the United States Agency for International Development or any successor agency, including when applicable, each USAID Mission or office abroad.

USAID Principal Geographic Code means a USAID code which designates a country, a group of countries, or an otherwise defined area. The USAID principal geographic codes for purposes of procurement are described in § 228.03.

■ 3. Revise § 228.11 to read as follows:

§ 228.11 Source of commodities.

The source of all commodities financed with Federal program funds appropriated under the Foreign Assistance Act of 1961, as amended, shall be Code 937 (unless Code 935 or 110 are designated in the implementing instrument). Procurements of agricultural commodities, motor vehicles, and pharmaceuticals must also comply with the special procurement rules in § 228.19. Recipients and contractors are prohibited from engaging suppliers of commodities in an authorized country to import commodities from a country outside of the authorized principal geographic codes for the purposes of circumventing the requirements of this section. Any violation of the prohibition in the preceding sentence will result in the disallowance by USAID of the cost of the procurement of the subject commodity.

■ 4. Revise § 228.30 to read as follows:

§ 228.30 General.

USAID may waive the rules contained in subparts A, B, and C of this part (except for prohibited sources as defined in § 228.01, and §§ 228.21 and 228.22), in order to accomplish project or program objectives. For any waivers authorized, the principal geographic code shall be Code 935, any area or country but excluding prohibited sources. All waivers must be in writing, and where applicable, are limited to the term established by the waiver. All waiver decisions will be made solely on the basis of the following criteria:

(a) Waivers to permit procurement outside of Code 937 or 110 must be based on a case by case determination that:

(1) The provision of assistance requires commodities or services of the type that are not produced in and available for purchase in Code 937 or 110;

(2) It is important to permit procurement from a country not specified in Code 937 or 110 to meet unforeseen circumstances; or

(3) To promote efficiency in the use of United States foreign assistance resources, including to avoid impairment of foreign assistance objectives.

(b) Case by case waivers under paragraph (a) of this section may be made on the basis of a commodity or service type or category, rather than processing repeat, individual waivers for an identical or substantially similar commodity or service. Such waivers may be approved on a regional, country, or program basis. For purposes of paragraph (a)(1) of this section,

"produced in and available for purchase in" shall have the same meaning as the definition of "available for purchase" in § 228.01. A waiver under paragraph (a)(1) of this section may also be based on the fact that a commodity is not available for purchase in Code 937 or 110 in sufficient, reasonable, and available quantities or sufficient and reasonable quality that is fit for the intended purpose.

(c) A waiver to authorize procurement from outside the United States of agricultural commodities, motor vehicles, and pharmaceuticals must meet the requirements of § 228.19.

(d) Any individual transaction not exceeding \$25,000 (excluding those covered by special procurement rules in § 228.19, and excluding procurements from prohibited sources) does not require a waiver and is hereby authorized.

BILLING CODE 6116-02-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG-2021-0287]

RIN 1625-AA00

Safety Zone; Lower Mississippi River, Mile Marker 770, Randolph Bluff, TN

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for all navigable waters of the Lower Mississippi River (LMR), Mile Marker 762 through 782. The safety zone is needed to protect persons, property, and the marine environment from the potential safety hazards associated with a rock replacement project in the vicinity of Randolph Bluff, TN. Entry of persons or vessels into this zone is prohibited unless authorized by the Captain of the Port Sector Lower Mississippi River or a designated representative.

DATES: This rule is effective without actual notice from May 10, 2021 until May 31, 2021. For the purposes of enforcement, actual notice will be used from April 27, 2021, until May 10, 2021.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov>, type USCG-2021-0287 in the "SEARCH" box and click

“SEARCH.” Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email MSTC Lindsey Swindle, U.S. Coast Guard; telephone 901–521–4813, email Lindsey.M.Swindle@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port Sector Lower Mississippi River
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. Immediate action is needed to protect persons and property from the potential safety hazards associated with the rock replacement project. The NPRM process would delay the establishment of the safety zone until after the date of the event and compromise public safety. We must establish this temporary safety zone immediately and lack sufficient time to provide a reasonable comment period and then consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to the public interest because immediate action is needed to respond to the potential safety hazards associated with the rock replacement project in the vicinity of Randolph Bluff, TN.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034 (previously 33 U.S.C. 1231). The Captain of the Port Sector Lower Mississippi River (COTP) has

determined that potential hazards associated with the rock replacement project, would be a safety concern for all persons and vessels on the Lower Mississippi River between Mile Marker (MM) 762 and MM 782 in the vicinity of Randolph Bluff, TN. This rule is needed to protect persons, property, infrastructure, and the marine environment in all waters of the LMR within the safety zone while the rock replacement project are being conducted.

IV. Discussion of the Rule

This rule establishes a temporary safety zone from April 27, 2021 through May 31, 2021. The safety zone will cover all navigable waters of the LMR from MM 762 through MM 782 in the vicinity of Randolph Bluff, TN. The duration of this safety zone is intended to ensure the safety of waterway users on these navigable waters during the rock replacement project.

Entry of persons or vessels into this safety zone is prohibited unless authorized by the COTP or a designated representative. A designated representative is a commissioned, warrant, or petty officer of the U.S. Coast Guard assigned to units under the operational control of USCG Sector Lower Mississippi River. Persons or vessels seeking to enter the safety zones must request permission from the COTP or a designated representative on VHF–FM channel 16 or by telephone at 901–521–4822. If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative. The COTP or a designated representative will inform the public of the enforcement times and date for this safety zone through Broadcast Notices to Mariners (BNMs), Local Notices to Mariners (LNMs), and/or Marine Safety Information Bulletins (MSIBs), as appropriate.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly,

this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, and duration of the safety zone. This emergency safety zone will temporarily restrict navigation on the LMR at MM 762 through 782 in the vicinity of Randolph Bluff, TN., from April 27, 2021 through May 31, 2021. Moreover, The Coast Guard will issue Broadcast Notices to Mariners (BNMs), Local Notices to Mariners (LNMs), and/or Marine Safety Information Bulletins (MSIBs), as appropriate. The rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the temporary safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against

small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a temporary safety zone on the LMR at MM 762 through 782 in the vicinity of

Randolph Bluff, TN, that will prohibit entry into this zone. The safety zone will only be enforced while operations preclude the safe navigation of the established channel. It is categorically excluded from further review under paragraph L60 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS.

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T08–0287 to read as follows:

§ 165.T08–0287 Safety Zone; Lower Mississippi River, Mile Marker 770, Randolph Bluff, TN.

(a) *Location.* The following area is a safety zone: All navigable waters of the Lower Mississippi River at Mile Marker (MM) 762 through 782 in the vicinity of Randolph Bluff, TN.

(b) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the Captain of the Port Sector Lower Mississippi River (COTP) or the COTP's designated representative. A designated representative is a commissioned, warrant, or petty officer of the U.S. Coast Guard assigned to units under the operational control of USCG Sector Lower Mississippi River.

(2) To seek permission to enter, contact the COTP or the COTP's representative via VHF–FM channel 16 or by telephone at 901–521–4822. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(c) *Effective period.* This section is effective from April 27, 2021 until May 31, 2021.

(d) *Information broadcasts.* The COTP or a designated representative will inform the public of the enforcement times and date for this safety zone through Broadcast Notices to Mariners, Local Notices to Mariners, and/or Safety Marine Information Broadcasts, as appropriate.

Dated: April 22, 2021.

R.S. Rhodes,

Captain, U.S. Coast Guard, Captain of the Port Sector Lower Mississippi River.

BILLING CODE 9110–04–P

POSTAL SERVICE

39 CFR Parts 3 and 10

Bylaws of the Board of Governors of the United States Postal Service

AGENCY: Postal Service™.

ACTION: Final rule; technical amendments.

SUMMARY: This document includes several technical edits to the Bylaws of the Board of Governors to follow recent amendments to these regulations. This document also updates the provisions concerning financial reporting.

DATES: Effective May 10, 2021.

FOR FURTHER INFORMATION CONTACT: Michael J. Elston, Secretary of the Board of Governors, michael.j.elston@usps.gov, 202–268–4800.

SUPPLEMENTARY INFORMATION: On November 13, 2020, the Board of Governors approved amendments to its Bylaws to address a variety of issues. The Postal Service published the revised Bylaws in the **Federal Register** on February 18, 2021, and the changes were effective as of this same date. The Postal Service is now making several technical corrections following these changes. In addition, the Postal Service is updating the Bylaw provisions that concern financial reporting for the Board of Governors.

List of Subjects

39 CFR Part 3

Board of Governors.

39 CFR Part 10

Rules of Conduct for Postal Service Governors.

For the reasons stated in the preamble, the Postal Service amends 39 CFR chapter I as follows:

PART 3—BOARD OF GOVERNORS

- 1. The authority citation for part 3 continues to read as follows:

Authority: 39 U.S.C. 202, 203, 205, 401 (2), (10), 402, 404(b), 414, 416, 1003, 2005, 2011, 2802–2804, 3013, 3622, 3632, 3642, 3652, 3654, 3691; 5 U.S.C. 552b(g), (j); 5 U.S.C. App.; Pub. L. 107–67, 115 Stat. 514 (2001).

§ 3.3 [Amended]

- 2. Amend § 3.3 by removing the erroneous paragraph (3) following paragraph (b) and removing paragraphs (o), (p), (q), and (r).

§ 3.6 [Amended]

- 3. Amend § 3.6 by removing the semicolon at the end of paragraph (a)(5) and adding a period in its place and by removing paragraph (a)(6).

- 4. In § 3.7, revise paragraph (b) to read as follows:

§ 3.7 Information furnished to Board—program review.

* * * * *

(b) To enable the Board to review the effectiveness of the Postal Service's equal employment opportunity program, performance data relating to this program shall be furnished to the Board at least annually. These data shall be categorized in such manner as the Board, from time to time, specifies.

* * * * *

PART 10—RULES OF CONDUCT FOR POSTAL SERVICE GOVERNORS

- 5. The authority citation for part 10 continues to read as follows:

Authority: 39 U.S.C. 401(2), (10).

- 6. Revise § 10.4 to read as follows:

§ 10.4 Financial disclosure reports.

(a) *Requirement of submission of reports*—(1) *Upon nomination*. At the time of their nomination, Governors complete a financial disclosure report which, under the practice of the Senate Homeland Security and Governmental Affairs Committee, is kept confidential.

(2) *After confirmation*. Because the Director of the Office of Government Ethics has concluded that Governors who do not perform the duties of their office for more than 60 days in any calendar year are not required to file financial disclosure reports that are open to the public, Governors file non-

public reports annually, in accordance with this section. A Governor who performs the duties of his or her office for more than 60 days in a particular calendar year is required to file a public report in accordance with 5 CFR 2634.204(c).

(b) *Person with whom reports should be filed and time for filing*. (1) A Governor shall file a financial disclosure report with the Associate General Counsel on or before May 15 of each year when the Governor has been in office for more than 60 consecutive calendar days during the previous year.

(2) The Associate General Counsel may, for good cause shown, grant to a Governor one or more extensions totaling not more than 90 days.

(c) *Information required to be reported*. Each report shall be a full and complete statement, on the form prescribed by the Associate General Counsel and the Office of Government Ethics and in accordance with instructions issued by him or her.

(d) *Reviewing reports*. (1) Financial disclosure reports filed in accordance with the provisions of this section shall, within 60 days after the date of filing, be reviewed by the Associate General Counsel who shall either approve the report, or make an initial determination that a conflict or appearance thereof exists. If the Associate General Counsel determines initially that a conflict or the appearance of a conflict exists, he or she shall inform the Governor of his or her determination.

(2) If the Associate General Counsel considers that additional information is needed to complete the report or to allow an adequate review to be conducted, he or she shall request the reporting Governor to furnish that information by a specified date.

(3) The Associate General Counsel shall refer to the Chairman of the Board of Governors or the Vice Chairman the name of any Governor he or she has reasonable cause to believe has wrongfully failed to file a report or has falsified or wrongfully failed to report required information.

(e) *Custody of and public access to reports*—(1) *Retention of reports*. Each report filed with the Associate General Counsel shall be retained by him or her for a period of six years. After the six-year period, the report shall be destroyed unless needed in connection with an investigation then pending.

(2) *Confidentiality of reports*. Unless a public report is required by this section,

the financial disclosure reports filed by Governors shall not be made public.

Michael J. Elston,

Secretary of the Board of Governors.

BILLING CODE 7710–12–P

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 52**

[EPA–R08–OAR–2020–0739; FRL–10023–50–Region 8]

Approval and Promulgation of Implementation Plans; South Dakota; Revisions to Air Rules of South Dakota

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the State of South Dakota on January 3, 2020 that revises the Administrative Rules of South Dakota (ARSD), Air Pollution Control Program, updating the chapter pertaining to definitions. The EPA is taking this action pursuant to the Clean Air Act (CAA).

DATES: This rule is effective on June 9, 2021.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R08–OAR–2020–0739. All documents in the docket are listed on the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <http://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Kate Gregory, (303) 312–6175, gregory.kate@epa.gov. Mail can be directed to the Air and Radiation Division, U.S. EPA, Region 8, Mail-code 8ARD–QP, 1595 Wynkoop Street, Denver, Colorado 80202–1129.

SUPPLEMENTARY INFORMATION:

Throughout this document “we,” “us,” and “our” means the EPA.

I. Background

On January 3, 2020 the State of South Dakota submitted revisions and additions to the ARSD. In this action, we are approving the additions to the ARSD pertaining to the definitions section. The subject of this action is described in detail in our notice of proposed rulemaking (NPRM) published on February 24, 2021 (86 FR 11211).

II. Final Action

In this rulemaking, the EPA is approving the revisions to the ARSD submitted by the State of South Dakota on January 3, 2020, specifically the additions of 74:36:01:01(71) and 74:36:01:01(72) in the definitions section of the ARSD.^{1 2} The subsections of the ARSD definitions section we are approving, 74:36:01:01(71) and 74:36:01:01(72), contain the definitions of ‘closed landfill’ and ‘closed landfill subcategory,’ respectively. In this action, we are approving the addition of the abovementioned subsections to the definitions section of the ARSD. Additional revisions and additions to the ARSD, related to content that includes ‘closed landfill’ and ‘closed landfill subcategory’ have been approved in a separate action [(85 FR 16538) Approval and Promulgation of State Plans for Designated Facilities and Pollutants; South Dakota; Control of Emissions From Existing Municipal Solid Waste Landfills].

In the table below, the key is as follows:

A—Approve.

D—Disapprove.

TABLE 1—ARSD ADDITIONS THAT THE EPA IS APPROVING

Additions the Administrative Rules of South Dakota (ARSD)	
74:36:01:01(71)	A
74:36:01:01(72)	A

¹ The additional revisions and additions to the ARSD as they relate to the SIP referenced in the January 3, 2020 ARSD rule revision submission by the State of South Dakota were approved in a prior rule: Air Quality State Implementation Plans; Approval and Promulgation of Implementation Plans; South Dakota; Infrastructure Requirements for the 2015 Ozone National Ambient Air Quality Standards; Revisions to Administrative Rules (85 FR 67653).

² ARSD numbering in the notice of proposed rulemaking for this action (86 FR 11211) was listed as 74:36:01:01(74) and 74:36:01:01(75). The correct numbering of the ARSD we are acting on is listed in this notice of final rulemaking as 74:36:01:01(71) and 74:36:01:01(72). The definitions we are approving of ‘closed landfill’ and ‘closed landfill subcategory’ remain unchanged in both the proposal and final action.

III. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of ARSD, Air Pollution Control Program, updating the ARSD chapters pertaining to definitions as is described in the preamble. The EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 8 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA’s approval, and will be incorporated by reference in the next update to the SIP compilation.³

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely

affect small governments, described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 9, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed,

³ 62 FR 27968 (May 22, 1997).

and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Greenhouse gases, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and

recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: May 4, 2021.

Debra H. Thomas,

Acting Regional Administrator, Region 8.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart QQ—South Dakota

■ 2. In § 52.2170, the table in paragraph (c) is amended by revising the entry for “74:36:01:01” to read as follows:

§ 52.2170 Identification of plan.

* * * * *

(c) * * *

Rule No.	Rule title	State effective date	EPA effective date	Final rule citation, date	Comments
74:36:01:01	Definitions	11/25/2019	6/9/2021	[insert Federal Register citation], 5/10/2021.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R06–OAR–2021–0604; FRL–10023–14–Region 6]

Air Plan Approval; Louisiana; Infrastructure State Implementation Plan Requirements for the National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Clean Air Act (CAA or the Act), the Environmental Protection Agency (EPA) is approving the State Implementation Plan (SIP) submittal from Louisiana submitted on November 4, 2020 for the 2015 ozone, as well as the 2006 PM_{2.5}, 2008 ozone, 2010 nitrogen dioxide, 2010 sulfur dioxide and the 2012 PM_{2.5} National Ambient Air Quality Standards. This submittal addresses how the existing SIP contains adequate provisions prohibiting emissions which interfere with required measures in any other State to protect visibility with respect to the 2015 ozone NAAQS as well as the 2006 PM_{2.5}, 2008 ozone, 2010 nitrogen dioxide, 2010 sulfur dioxide and the 2012 PM_{2.5} NAAQS.

DATES: This rule is effective on June 9, 2021.

ADDRESSES: The EPA has established a docket for this action under Docket ID

No. EPA–R06–OAR–2020–0604. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet. Publicly available docket materials are available electronically through <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Jennifer Huser, EPA Region 6 Office, Air and Radiation Division—State Planning and Implementation Branch, 214–665–7347, huser.jennifer@epa.gov. Out of an abundance of caution for members of the public and our staff, the EPA Region 6 office will be closed to the public to reduce the risk of transmitting COVID–19. Please call or email the contact listed above if you need alternative access to material indexed but not provided in the docket.

SUPPLEMENTARY INFORMATION:

Throughout this document “we,” “us,” and “our” means the EPA.

I. Background

The background for this action is discussed in detail in our February 22, 2021 proposal (86 FR 10509). In that document we proposed to approve the State Implementation Plan (SIP) submittal from Louisiana submitted on November 4, 2020 for the 2015 ozone (O₃), 2006 PM_{2.5}, 2008 ozone, 2010 nitrogen dioxide, 2010 sulfur dioxide and the 2012 PM_{2.5} National Ambient Air Quality Standards (NAAQS). This submittal addresses Prong 4 of the CAA

(also referred to as visibility transport) that requires states to demonstrate that their SIP contains adequate measures that prohibit emissions from any source within a state from interfering with the visibility protection measures of other states. The submittal addresses how the existing SIP contains adequate provisions to meet the requirements with respect to the 2015 ozone NAAQS as well as the 2006 PM_{2.5}, 2008 ozone, 2010 nitrogen dioxide, 2010 sulfur dioxide and the 2012 PM_{2.5} NAAQS, as Louisiana now has a fully approved Regional Haze SIP. We did not receive any comments regarding our proposal.

II. Final Action

We are approving the SIP revision submitted on November 4, 2020 which addresses the Prong 4 requirements for the following NAAQS: 2015 Ozone, 2006 PM_{2.5}, 2008 Ozone, 2010 Nitrogen dioxide, 2010 Sulfur Dioxide, and the 2012 PM_{2.5}. This action is being taken under section 110 of the Act.

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 9, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness

of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Visibility transport.

Dated: April 30, 2021.

David Gray,

Acting Regional Administrator, Region 6.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart T—Louisiana

■ 2. Amend § 52.970(e) by adding the entry “Visibility Transport SIP for the 2015 ozone, 2012 PM_{2.5}, 2010 NO₂, 2010 SO₂, 2008 ozone and 2006 PM_{2.5} NAAQS” at the end of the second table titled “EPA Approved Louisiana Nonregulatory Provisions and Quasi-Regulatory Measures” to read as follows:

§ 52.970 Identification of plan.

* * * * *

(e) * * *

EPA APPROVED LOUISIANA NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date/effective date	EPA approval date	Explanation
* Visibility Transport SIP for the 2015 ozone, 2012 PM _{2.5} , 2010 NO ₂ , 2010 SO ₂ , 2008 ozone and 2006 PM _{2.5} NAAQS.	* Statewide	* 11/4/2020	* 5/10/2021, [Insert Federal Register citation].	* Adequate provisions prohibiting emissions which interfere with visibility protection measures in any other State with respect to the 2015 ozone, 2012 PM _{2.5} , 2010 NO ₂ , 2010 SO ₂ , 2008 ozone and 2006 PM _{2.5} NAAQS.

§ 52.996 [Amended]

■ 3. Remove and reserve § 52.996(b).

BILLING CODE 6560–50–P

**ENVIRONMENTAL PROTECTION
AGENCY****40 CFR Part 52**

[EPA–R06–OAR–2020–0300; FRL–10019–
45–Region 6]

**Air Plan Approval; Texas; Reasonable
Further Progress Plan for the Houston-
Galveston-Brazoria Ozone
Nonattainment Area**

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Clean Air Act (CAA or the Act), the Environmental Protection Agency (EPA) is approving revisions to the Texas State Implementation Plan (SIP) to meet the Reasonable Further Progress (RFP) requirements for the Houston-Galveston-Brazoria (HGB) serious ozone nonattainment area for the 2008 ozone National Ambient Air Quality Standard (NAAQS). Specifically, EPA is approving the RFP demonstration and associated Motor Vehicle Emission Budgets (MVEBs), and a revised 2011 base year emissions inventory (EI) for the HGB area. EPA is also notifying the public of the status of EPA's adequacy determination for the MVEBs for the HGB area. EPA is not finalizing the proposed approval of revisions to the SIP to address contingency measure requirements in the HGB area for the 2008 Ozone NAAQS at this time.

DATES: This rule is effective on June 9, 2021.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R06–OAR–2020–0300. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet. Publicly available docket materials are available electronically through <https://www.regulations.gov>.

Carrie Paige, EPA Region 6 Office, Infrastructure & Ozone Section, 214–665–6521, paige.carrie@epa.gov. Out of an abundance of caution for members of the public and our staff, the EPA Region 6 office may be closed to the public to reduce the risk of transmitting COVID–19. Please call or email the contact listed above if you need alternative

access to material indexed but not provided in the docket.

SUPPLEMENTARY INFORMATION:

Throughout this document “we,” “us,” and “our” means the EPA.

I. Background

The background for this action is discussed in detail in our September 29, 2020 proposal (85 FR 60928). In that action we proposed to approve only the HGB portion of the May 13, 2020, Texas SIP submittal that addressed RFP requirements for the 2008 8-hour ozone NAAQS for the two serious ozone nonattainment areas in Texas (“the TCEQ submittal”). These two areas are the HGB and the Dallas-Fort Worth (DFW) areas. The TCEQ submittal also establishes MVEBs for the year 2020 and includes contingency measures for each of the HGB and DFW areas, should the areas fail to make reasonable further progress, or to attain the NAAQS by the applicable attainment date. The portion of the TCEQ submittal that refers to the DFW area will be addressed in a separate rulemaking action.¹

Our September 29, 2020 proposal provided a detailed description of the revisions and the rationale for EPA's proposed actions, together with a discussion of the opportunity to comment. The public comment period for these actions closed on October 29, 2020. We did not receive comments regarding our proposal. Therefore, with one exception, we are finalizing our action as proposed.

On January 29, 2021, the U.S. Court of Appeals for the District of Columbia Circuit (“D.C. Circuit”) issued a decision in response to challenges to EPA's 2015 and 2018 rules implementing the NAAQS for ozone, (80 FR 12264 (March 6, 2015) and 83 FR 62998 (December 6, 2018)). *Sierra Club, et al. v. EPA*, 985 F.3d 1055 (D.C. Cir. 2021). Among the rulings in this decision, the D.C. Circuit vacated EPA's interpretation of the CAA to allow states to rely on already implemented control measures to meet the statutory requirements of section 172(c)(9) or 182(c)(9) for contingency measures in nonattainment plans for the ozone NAAQS (see 83 FR 62998, 63026–27). The EPA is reexamining the contingency measures portion of the TCEQ submission for the HGB area in light of the D.C. Circuit decision. Therefore, we are not taking final action at this time on the contingency

¹ Our proposal to approve the RFP plan for the DFW area was published on October 9, 2020 (85 FR 64084). We have not issued a final rule for the DFW area.

measures submitted as part of the May 13, 2020, TCEQ SIP submission for the HGB area included in the proposed action. EPA expects to address the contingency measures in a separate future action.

II. Final Action

We are approving revisions to the Texas SIP that address the RFP requirements for the HGB serious ozone nonattainment area for the 2008 ozone NAAQS. Specifically, we are approving the RFP demonstration and associated MVEBs, and the revised 2011 base year EI for the HGB area.

We are also notifying the public that EPA finds the newly established MVEBs for Nitrogen Oxides (NO_x) and Volatile Organic Compounds (VOC) for the HGB area adequate for the purpose of transportation conformity. Within 24 months from this final rule, the transportation partners will need to demonstrate conformity to the new NO_x and VOC MVEBs pursuant to 40 CFR 93.104(e)(3).

**III. Statutory and Executive Order
Reviews**

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive

Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides

that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 9, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by

reference, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: April 30, 2021.

David Gray,

Acting Regional Administrator, Region 6.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart SS—Texas

■ 2. In § 52.2270(e), the table titled “EPA Approved Nonregulatory Provisions and Quasi-Regulatory Measures in the Texas SIP” is amended by adding the entry “Reasonable Further Progress Plan (RFP), RFP Motor Vehicle Emission Budgets for 2020, and Revised 2011 Base Year Emissions Inventory” at the end of the table to read as follows:

§ 52.2270 Identification of plan.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R10-OAR-2020-0650; FRL-10022-48-Region 10]

Air Plan Approval; Washington; Spokane Regional Clean Air Agency

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a revision to the Washington State Implementation Plan (SIP) that was submitted by the Department of Ecology (Ecology) in coordination with the Spokane Regional Clean Air Agency (SRCAA). This revision updates the SIP with local SRCAA regulations that apply in lieu of, or in supplement to, Ecology’s statewide general air quality regulations for SRCAA’s jurisdiction. We are also approving SRCAA’s adoption by reference of certain Ecology general air quality regulations, which do not have

local agency replacement corollaries, to apply in SRCAA’s jurisdiction.

DATES: This final rule is effective June 9, 2021.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R10-OAR-2020-0650. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *e.g.*, Confidential Business Information or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly

available only in hard copy form. Publicly available docket materials are available at <https://www.regulations.gov>, or please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Jeff Hunt, EPA Region 10, 1200 Sixth Avenue—Suite 155, Seattle, WA 98101, at (206) 553-0256, or hunt.jeff@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, wherever “we,” “us,” or “our” is used, it means the EPA.

I. Background

On February 24, 2021, we proposed to approve an update to the SRCAA regulations in the SIP, remove obsolete regulations, and approve a subset of Ecology’s general air quality regulations adopted by reference to apply in SRCAA’s jurisdiction (86 FR 11204). The reasons for our proposed approval were stated in the proposed rulemaking and will not be re-stated here. The public comment period for our proposed action ended on March 26, 2021. We received no comments. Therefore, we are finalizing our action as proposed.

II. Final Action

A. Regulations Approved and Incorporated by Reference Into the SIP

The EPA is approving and incorporating by reference into the Washington SIP at 40 CFR 52.2470(c)—*Table 9—Additional Regulations Approved for the Spokane Regional Clean Air Agency (SRCAA) Jurisdiction*, the following SRCAA regulatory sections effective September 1, 2020:

- 1.01, 1.02, 1.03, 1.04, 1.05, 2.08, 2.09, 2.13, 2.14, 4.03, 4.04, 4.05, 5.02, 5.03, 5.04, 5.05, 5.06, 5.07, 5.08, 5.09, 5.10, 5.11, 5.12, 5.13, 5.14, 5.15, 6.04, 6.05, 6.07, 6.14, and 6.15.

The EPA is also approving and incorporating by reference the following Chapter 173-400 Washington Administrative Code (WAC) sections adopted by reference in *Regulation I*, subsection 2.14(A)(1) that SRCAA and Ecology submitted to apply within SRCAA’s jurisdiction (effective date):

- 173-400-020 (12/29/2012), 173-400-030 (9/16/2018), 173-400-040 (9/16/2018), 173-400-050 (9/16/2018), 173-400-060 (11/25/2018), 173-400-091 (4/1/2011), 173-400-105 (11/25/2018), 173-400-112 (12/29/2012), 173-400-113 (12/29/2012), 173-400-117 (12/29/2012), 173-400-118 (12/29/2012), 173-400-131 (4/1/2011), 173-400-136 (12/29/2012), 173-400-151 (2/10/2005), 173-400-175 (2/10/2005),

173-400-200 (2/10/2005), 173-400-560 (12/29/2012), 173-400-800 (4/1/2011), 173-400-810 (7/1/2016), 173-400-820 (12/29/2012), 173-400-830 (7/1/2016), 173-400-840 (7/1/2016), 173-400-850 (7/1/2016), and 173-400-860 (4/1/2011).

Please see the amendatory text for more detailed information about the provisions submitted and approved in this action, including local agency corollaries which replace certain Chapter 173-400 WAC provisions and exclusions to our approval.

B. Approved but Not Incorporated by Reference Regulations

In addition to the regulations approved and incorporated by reference described in section II.A. of this preamble, the EPA reviews and approves state and local clean air agency submissions to ensure they provide adequate enforcement authority and other general authority to implement and enforce the SIP. However, regulations describing such agency enforcement and other general authority are generally not incorporated by reference so as to avoid potential conflict with the EPA’s independent authorities. Therefore, we are approving the following updates to SRCAA’s general provisions for inclusion in 40 CFR 52.2470(e), *Table 1—Approved but Not Incorporated by Reference Regulations*: 2.01, 2.02, 2.03, 2.04, 2.05, 2.06, 2.10, 2.11, and 2.12. We also note that SRCAA adopts by reference WAC 173-400-220, 173-400-230, 173-400-240, 173-400-250, and 173-400-260 to apply within its jurisdiction in the approved but not incorporated by reference section of the SIP. Please see the amendatory text for more detailed information about the provisions submitted and approved in this action, including local agency corollaries which replace certain Chapter 173-400 WAC provisions and exclusions to our approval.

C. Regulations to Remove From the SIP

As discussed in the proposal for this action, we are removing from the SIP for SRCAA’s jurisdiction any formerly approved Chapter 173-400 WAC provisions which are replaced by local agency corollaries. We are also removing WAC 173-400-100 *Registration* from the SIP for SRCAA’s jurisdiction because it is not a required SIP element. Lastly, we are removing the outdated and subsequently repealed Regulation II, section 4.01 because these requirements were replaced by SRCAA’s adoption by reference of WAC 173-400-050 and WAC 173-400-060.

D. Scope of Proposed Action

This revision to the SIP applies specifically to the SRCAA jurisdiction incorporated into the SIP at 40 CFR 52.2470(c), Table 9. As discussed in our proposal, local air agency jurisdiction in Washington is generally defined on a geographic basis; however, there are exceptions. By statute, SRCAA does not have authority for sources under the jurisdiction of the Energy Facilities Site Evaluation Council (EFSEC). See Revised Code of Washington Chapter 80.50. Under the applicability provisions of WAC 173-405-012, 173-410-012, and 173-415-012, SRCAA also does not have jurisdiction for kraft pulp mills, sulfite pulping mills, and primary aluminum plants. For these sources, Ecology retains statewide, direct jurisdiction. Ecology and EFSEC also retain statewide, direct jurisdiction for issuing Prevention of Significant Deterioration (PSD) permits. Therefore, the EPA is not approving into 40 CFR 52.2470(c), Table 9 those provisions of Chapter 173-400 WAC related to the PSD program. Specifically, these provisions are WAC 173-400-116 and WAC 173-400-700 through 173-400-750, which the EPA has already approved as applying state-wide under 40 CFR 52.2470(c), Tables 2 and 3.

Also, as described in our proposal for this action, jurisdiction to implement the visibility permitting program contained in WAC 173-400-117 varies depending on the situation. Ecology and EFSEC retain authority to implement WAC 173-400-117 as it relates to PSD permits. However, for facilities subject to major nonattainment new source review (NSR) under the applicability provisions of WAC 173-400-800, we are approving SRCAA’s implementation of those parts of WAC 173-400-117 as they relate to major nonattainment NSR permits. Therefore, we are modifying the visibility protection Federal Implementation Plan contained in 40 CFR 52.2498 to reflect the approval of WAC 173-400-117 as it applies to implementation of the major nonattainment NSR program in SRCAA’s jurisdiction.

Lastly, this SIP revision is not approved to apply on any Indian reservation land within Spokane County and is also not approved to apply in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.

III. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR

51.5, we are finalizing the incorporation by reference of certain provisions as described in section II.A. and removing provisions from the SIP as described in section II.C. of this preamble. The EPA has made, and will continue to make, materials incorporated by reference generally available through <https://www.regulations.gov> and at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are fully federally-enforceable under sections 110 and 113 of the CAA as of the effective date of the final rule of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.¹

IV. Statutory and Executive Order Review

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because it does not address technical standards; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

This SIP revision is not approved to apply on any Indian reservation land within Spokane County and is also not approved to apply in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to

publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 9, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: April 28, 2021.

Michelle L. Pirzadeh,

Acting Regional Administrator, Region 10.

For the reasons set forth in the preamble, 40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart WW—Washington

- 2. Amend § 52.2470 by revising Table 9 of paragraph (c) and Table 1 of paragraph (e) to read as follows:

§ 52.2470 Identification of plan.

* * * * *

(c) * * *

¹ 62 FR 27968 (May 22, 1997).

TABLE 9—ADDITIONAL REGULATIONS APPROVED FOR THE SPOKANE REGIONAL CLEAN AIR AGENCY (SRCAA) JURISDICTION

[Applicable in Spokane county, excluding facilities subject to Energy Facilities Site Evaluation Council (EFSEC) jurisdiction; facilities subject to the Washington Department of Ecology's direct jurisdiction under Chapters 173–405, 173–410, and 173–415 Washington Administrative Code (WAC); Indian reservations; any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction; and the Prevention of Significant Deterioration (PSD) permitting of facilities subject to the applicability sections of WAC 173–400–700.]

5.08	Portable Sources	09/01/20	5/10/21, [Insert Federal Register citation].	Except subsection (A)(6). Section 5.08 replaces WAC 173–400–036.

TABLE 9—ADDITIONAL REGULATIONS APPROVED FOR THE SPOKANE REGIONAL CLEAN AIR AGENCY (SRCAA)
JURISDICTION—Continued

[Applicable in Spokane county, excluding facilities subject to Energy Facilities Site Evaluation Council (EFSEC) jurisdiction; facilities subject to the Washington Department of Ecology's direct jurisdiction under Chapters 173–405, 173–410, and 173–415 Washington Administrative Code (WAC); Indian reservations; any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction; and the Prevention of Significant Deterioration (PSD) permitting of facilities subject to the applicability sections of WAC 173–400–700.]

State/local citation	Title/subject	State/local effective date	EPA approval date	Explanations
5.09	Operating Requirements for Order of Approval and Permission to Operate.	09/01/20	5/10/21, [Insert Federal Register citation].	Except subsection (C).
5.10	Changes to an Order of Approval or Permission to Operate.	09/01/20	5/10/21, [Insert Federal Register citation].	Collectively, sections 5.04, 5.06, 5.07, 5.10, 5.13, and 5.14 replace the permitting procedures in WAC 173–400–111.
5.11	Notice of Startup of a Stationary Source or a Portable Source.	09/01/20	5/10/21, [Insert Federal Register citation].	
5.12	Work Done Without an Approval.	09/01/20	5/10/21, [Insert Federal Register citation].	
5.13	Order of Approval Construction Time Limits.	09/01/20	5/10/21, [Insert Federal Register citation].	Collectively, sections 5.04, 5.06, 5.07, 5.10, 5.13, and 5.14 replace the permitting procedures in WAC 173–400–111.
5.14	Appeals	09/01/20	5/10/21, [Insert Federal Register citation].	Collectively, sections 5.04, 5.06, 5.07, 5.10, 5.13, and 5.14 replace the permitting procedures in WAC 173–400–111.
5.15	Obligation to Comply	09/01/20	5/10/21, [Insert Federal Register citation].	

Article VI—Emissions Prohibited

6.04	Emission of Air Contaminant: Detriment to Person or Property.	09/01/20	5/10/21, [Insert Federal Register citation].	Subsections (A), (B), (C), and (H) only and excepting provisions in RCW 70.94.640 (incorporated by reference) that relate to odor. Subsection (C) replaces WAC 173–400–040(6).
6.05	Particulate Matter & Preventing Particulate Matter from Becoming Airborne.	09/01/20	5/10/21, [Insert Federal Register citation].	Except subsection (A). Section 6.05 supplements but does not replace WAC 173–400–040(4) and (9).
6.07	Emission of Air Contaminant Concealment and Masking Restricted.	09/01/20	5/10/21, [Insert Federal Register citation].	Section 6.07 replaces WAC 173–400–040(8).
6.14	Standards for Control of Particulate Matter on Paved Surfaces.	09/01/20	5/10/21, [Insert Federal Register citation].	Section 6.14 supplements but does not replace WAC 173–400–040(9).
6.15	Standards for Control of Particulate Matter on Unpaved Roads.	09/01/20	5/10/21, [Insert Federal Register citation].	Section 6.15 supplements but does not replace WAC 173–400–040(9).

Article VIII—Solid Fuel Burning Device Standards

8.01	Purpose	9/02/14	9/28/15, 80 FR 58216.	Except the incorporation by reference of WAC 173–433–130, 173–433–170, and 173–433–200.
8.02	Applicability	9/02/14	9/28/15, 80 FR 58216.	
8.03	Definitions	9/02/14	9/28/15, 80 FR 58216.	
8.04	Emission Performance Standards.	9/02/14	9/28/15, 80 FR 58216	
8.05	Opacity Standards	9/02/14	9/28/15, 80 FR 58216.	
8.06	Prohibited Fuel Types	9/02/14	9/28/15, 80 FR 58216.	
8.07	Curtailement	9/02/14	9/28/15, 80 FR 58216.	
8.08	Exemptions	9/02/14	9/28/15, 80 FR 58216.	
8.09	Procedure to Geographically Limit Solid Fuel Burning Devices.	9/02/14	9/28/15, 80 FR 58216.	
8.10	Restrictions on Installation of Solid Fuel Burning Devices.	9/02/14	9/28/15, 80 FR 58216.	

Washington Administrative Code, Chapter 173–400—General Regulations for Air Pollution Sources: Adopted by Reference in SRCAA Regulation I, Subsection 2.14(A)(1)

173–400–020	Applicability	12/29/12	5/10/21, [Insert Federal Register citation].	
------------------	---------------------	----------	---	--

TABLE 9—ADDITIONAL REGULATIONS APPROVED FOR THE SPOKANE REGIONAL CLEAN AIR AGENCY (SRCAA)
JURISDICTION—Continued

[Applicable in Spokane county, excluding facilities subject to Energy Facilities Site Evaluation Council (EFSEC) jurisdiction; facilities subject to the Washington Department of Ecology's direct jurisdiction under Chapters 173–405, 173–410, and 173–415 Washington Administrative Code (WAC); Indian reservations; any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction; and the Prevention of Significant Deterioration (PSD) permitting of facilities subject to the applicability sections of WAC 173–400–700.]

State/local citation	Title/subject	State/local effective date	EPA approval date	Explanations
173–400–030(24).	Definitions	3/22/91	6/2/95, 60 FR 28726.	
173–400–030	Definitions	9/16/18	5/10/21, [Insert Federal Register citation].	Only the following definitions: Adverse Impact on Visibility; Capacity Factor; Class I Area; Dispersion Technique; Emission Threshold; Excess Stack Height; Existing Stationary Facility; Federal Class I Area; Federal Land Manager; Fossil Fuel-fired Steam Generator; General Process Unit; Greenhouse Gases; Industrial Furnace; Mandatory Class I Federal Area; Natural Conditions; Projected Width; Reasonably Attributable; Sulfuric Acid Plant; and Wood Waste.
173–400–040(1)(a) & (b).	General Standards for Maximum Emissions.	3/22/91	6/2/95, 60 FR 28726.	
173–400–040	General Standards for Maximum Emissions.	9/16/18	5/10/21, [Insert Federal Register citation].	Except: 173–400–040(2); 173–400–040(3); 173–400–040(5); 173–400–040(6); 173–400–040(8).
173–400–050	Emission Standards for Combustion and Incineration Units.	9/16/18	5/10/21, [Insert Federal Register citation].	Except: 173–400–050(2); 173–400–050(4); 173–400–050(5); 173–400–050(6).
173–400–060	Emission Standards for General Process Units.	11/25/18	5/10/21, [Insert Federal Register citation].	
173–400–070	Emission Standards for Certain Source Categories.	3/22/91	6/2/95, 60 FR 28726	Except (7).
173–400–081	Startup and Shutdown	9/20/93	6/2/95, 60 FR 28726.	
173–400–091	Voluntary Limits on Emissions.	4/1/11	5/10/21, [Insert Federal Register citation].	9/20/93 version continues to be approved under the authority of CAA Section 112(l) with respect to Section 112 hazardous air pollutants. See 60 FR 28726 (June 2, 1995).
173–400–105	Records, Monitoring and Reporting.	11/25/18	5/10/21, [Insert Federal Register citation].	Except: 173–400–105(3); 173–400–105(4); 173–400–105(6); 173–400–105(8).
173–400–107	Excess Emissions	9/20/93	6/2/95, 60 FR 28726.	
173–400–112	Requirements for New Sources in Nonattainment Areas.	12/29/12	5/10/21, [Insert Federal Register citation].	Except (8).
173–400–113	Requirements for New Sources in Attainment or Unclassifiable Areas.	12/29/12	5/10/21, [Insert Federal Register citation].	Except: 173–400–113(3), second sentence.
173–400–117	Special Protection Requirements for Federal Class I Areas.	12/29/12	5/10/21, [Insert Federal Register citation].	
173–400–118	Designation of Class I, II, and III Areas.	12/29/12	5/10/21, [Insert Federal Register citation].	
173–400–131	Issuance of Emission Reduction Credits.	4/1/11	5/10/21, [Insert Federal Register citation].	
173–400–136	Use of Emission Reduction Credits (ERC).	12/29/12	5/10/21, [Insert Federal Register citation].

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2020–0735; FRL–10022–52–Region 9]

Air Plan Approval; Arizona; Miami Copper Smelter Sulfur Dioxide Control Measures

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve a revision to the Arizona State Implementation Plan (SIP). This revision concerns emissions of sulfur dioxide (SO₂) from the copper smelter in Miami, Arizona. We are approving the rescission of two Arizona Department of Environmental Quality (ADEQ) Arizona Administrative Code (A.A.C.) provisions from the Arizona SIP that are no longer needed to regulate this emission source under the Clean Air Act (CAA or the “Act”).

DATES: This rule is effective on June 9, 2021.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2020–0735. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are

available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT:

Kevin Gong, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 972–3073 or by email at gong.kevin@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, “we,” “us” and “our” refer to the EPA.

Table of Contents

- I. Proposed Action
- II. Public Comments and EPA Responses
- III. EPA Action
- IV. Incorporation by Reference
- V. Statutory and Executive Order Reviews

I. Proposed Action

On March 3, 2021 (86 FR 12310), the EPA proposed to approve the following revision into the Arizona SIP.

TABLE 1—RULE FOR WHICH RESCISSION FROM THE SIP IS REQUESTED

Local agency	Citation	Rule title	Adopted	SIP approval date
ADEQ	A.A.C. R18–2–715(F)(2) and (H).	Standards of Performance for Existing Primary Copper Smelters; Site-specific Requirements.	March 7, 2009	September 23, 2014.

We proposed to approve this revision because we determined that it complies with the relevant CAA requirements. Our proposed action contains more

information on the revision and our evaluation.

II. Public Comments and EPA Responses

The EPA’s proposed action provided a 30-day public comment period. During

this period, we received one comment (with four duplicates) that were supportive of our action.

III. EPA Action

No comments were submitted that change our assessment of the revision as described in our proposed action. Therefore, as authorized in section 110(k)(3) of the Act, the EPA is fully approving the rescission of A.A.C. R18–2–715, sections (F)(2) and (H) from the Arizona SIP.

IV. Incorporation by Reference

In this rule, the EPA is amending regulatory text that includes incorporation by reference. The EPA is removing A.A.C. R18–2–715(F)(2) and (H), as described in Table 1 of this preamble, from the Arizona SIP, which is incorporated by reference in accordance with the requirements of 1 CFR part 51.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal**

Register. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 9, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: April 30, 2021.

Deborah Jordan,

Acting Regional Administrator, Region IX.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart D—Arizona

■ 2. In § 52.120, amend table 2 in paragraph (c), under the heading “Article 7 (Existing Stationary Source Performance Standards),” by removing the entry reading “R18–2–715, sections F, G, and H” and adding in its place the entry “R18–2–715, section F, excluding (F)(2), and section G” to read as follows:

§ 52.120 Identification of plan.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 52****[EPA–R08–OAR–2020–0541; FRL–10022–97–Region 8]****Approval and Promulgation of Implementation Plans; Utah; R307–204 Emission Standards: Smoke Management****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving state implementation plan (SIP) revisions submitted by State of Utah on November 5, 2019. The revisions amend R307–204 to meet the requirements set forth in Utah’s 2019 House Bill (H.B.) 155. This action is being taken under section 110 of the Clean Air Act (CAA).

DATES: This rule is effective on June 9, 2021.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R08–OAR–2020–0541. All documents in the docket are listed on the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <http://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER**

INFORMATION CONTACT section for additional availability information.

FOR FURTHER INFORMATION CONTACT:

Amrita Singh, Air and Radiation Division, EPA, Region 8, Mailcode 8ARD–QP, 1595 Wynkoop Street, Denver, Colorado 80202–1129, (303) 312–6103, singh.amrita@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document wherever “we,” “us” or “our” is used, we mean the EPA.

I. Background

On February 25, 2021 (86 FR 11687), the EPA proposed approval of the revisions to the Utah Division of Administrative Rules, specifically: R307–204–1. Purpose and Goals; R307–204–2. Applicability; R307–204–3. Definitions; R307–204–4. General Requirements; R307–204–5. Burn Schedule; R307–204–6. Small Prescribed Fires (de minimis); R307–204–7. Small Prescribed Pile Fires (de minimis); R307–204–8. Large Prescribed Fires; R307–204–9. Large Prescribed Pile Fires; and R307–204–10. Requirements for Wildland Fire Use events that were submitted by the State on November 5, 2019.

The rule revisions for R307–204 were submitted to align with the recent 2019 H.B. 155 which removes outdated terminology and language regarding adjusting fire emission factors and combines sections R307–204–6. Small Prescribed Fires (de minimis), R307–204–7. Small Prescribed Pile Fires (de minimis), R307–204–8. Large Prescribed Fires, and R307–204–9. Large Prescribed Pile Fires to reduce redundancies.

II. Response to Comments

The comment period for our February 25, 2021 (86 FR 11687) proposed rule was open for 30 days. The EPA did not receive any comments.

III. Final Action

For the reasons stated in our February 25, 2021 proposed rule, the EPA is finalizing approval of SIP revisions submitted by the State of Utah on November 5, 2019. EPA is approving:

- Revisions to sections: R307–204–1. Purpose and Goals; R307–204–2. Applicability; R307–204–3. Definitions; R307–204–4. General Requirements; and R307–204–5. Burn Schedule.
- Revisions to combine R307–204–6. Small Prescribed Fires (de minimis) and R307–204–7. Small Prescribed Pile Fires (de minimis), under R307–204–6. Small Prescribed Fires (de minimis) to streamline and reduce redundancies.
- Revisions to combine R307–204–8. Large Prescribed Fires and R307–204–9. Large Prescribed Pile Fires, under R307–204–7, and to retitle R307–204–7 to “Large Prescribed Fires,” which will streamline and reduce redundancies.
- Removal of R307–204–10. Requirements for Wildland Fire Use events. This deletion is removing outdated smoke policy terminology, such as, wildland fire use.

The revisions for R307–204 meet the applicable CAA requirements and contains smoke management requirements for land managers within the State of Utah as required by 40 CFR 51.309(d)(6).

IV. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is incorporating by reference R307–204–1; R307–204–2; R307–204–3; R307–204–4; R307–204–5; combination of R307–204–6 and R307–204–7, under R307–204–6 for streamlining; combination of R307–204–8 and R307–204–9, under R307–204–7; and the removal of R307–204–10 due to outdated information. The EPA has

made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 8 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.¹

V. Statutory and Executive Orders Review

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described

in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 9, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: April 28, 2021.

Debra H. Thomas,

Acting Regional Administrator, Region 8.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart TT—Utah

- 2. In § 52.2320, the table in paragraph (c) is amended by:

■ a. Revising the entries for "R307-204-01", "R307-204-02", "R307-204-03", "R307-204-04", "R307-204-05", "R307-204-06", and "R307-204-07".

■ b. Removing the entries for "R307-204-08", "R307-204-09", and "R307-204-10".

The revisions read as follows:

§ 52.2320 Identification of plan.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[EPA–R05–OAR–2020–0518; FRL–10023–60–Region 5]

Air Plan Approval; Wisconsin; Large Municipal Waste Combustors Negative Declaration Withdrawal for Designated Facilities and Pollutants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving Wisconsin's request for withdrawal of the previously approved Large Municipal Waste Combustors (LMWC) Negative Declaration. The Wisconsin Department of Natural Resources (WDNR) submitted its LMWC Negative Declaration withdrawal on September 25, 2020, certifying that the State of Wisconsin has only one LMWC unit currently operating and requesting that the Federal Plan continue to apply to the single source in the State.

DATES: This final rule is effective on June 9, 2021.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2020–0518. All documents in the docket are listed on the www.regulations.gov website. Although listed in the index, some information is not publicly available, *i.e.*, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through www.regulations.gov or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77

West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays and facility closures due to COVID–19. We recommend that you telephone Margaret Sieffert, Environmental Engineer, at (312) 353–1151 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT:

Margaret Sieffert, Environmental Engineer, Environmental Protection Agency, Region 5, 77 West Jackson Boulevard (AT–18)), Chicago, Illinois 60604, (312) 353–1151, sieffert.margaret@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

I. Background

On September 25, 2020, WDNR submitted its LMWC negative declaration withdrawal, in which it certifies that there is one LMWC unit currently operating in Wisconsin. The only LMWC unit is at Xcel French Island, located in La Crosse, WI. Because there is only one source, WDNR is requesting that the previously approved negative declaration be withdrawn and that the Federal Plan continue to apply to the source.

On March 1, 2021 (86 FR 11916), EPA published a notice of proposed rulemaking (NPRM) proposing approval of Wisconsin's LMWC Negative Declaration withdrawal. The specific details of Wisconsin's request and the rationale for EPA's approval are discussed in the NPRM and will not be restated here. EPA did not receive any comments on the proposed action.

II. What action is EPA taking?

EPA is approving Wisconsin's request for withdrawal of a previously approved Negative Declaration and its request to amend 40 CFR part 62 to reflect WDNR's withdrawal. WDNR submitted its LMWC Negative Declaration withdrawal on September 25, 2020, certifying that there is only one LMWC unit, as defined under 40 CFR 60.31b,

currently operating in the State of Wisconsin, and requested that the Federal Plan apply to the single source in the State. EPA understands that the extensive work that would be required by WDNR to prepare an approved State Plan would be disproportionate to the single affected source in Wisconsin, and proposed to approve the withdrawal and have the Federal Plan continue to apply to the known affected source.

In this action, EPA is finalizing its approval. EPA is also revising 40 CFR 62.12360 to reflect this withdrawal.

III. Statutory and Executive Order Reviews

In reviewing section 111(d)/129 plan submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act (CAA). With regard to withdrawals for designated facilities received by EPA from states, EPA's role is to notify the public of the approval of the State's withdrawal and revise 40 CFR part 62 accordingly. Accordingly, this action merely notifies the public of EPA's approval for a withdrawal of a previously approved LMWC negative declaration and does not impose additional requirements. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive

Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 9, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 62

Environmental protection, Air pollution control, Administrative practice and procedure, Intergovernmental relations, Large municipal waste combustors, Reporting and recordkeeping requirements.

Dated: May 4, 2021.

Cheryl Newton,

Acting Regional Administrator, Region 5.

For the reasons stated in the preamble, EPA amends 40 CFR part 62 as follows:

PART 62—APPROVAL AND PROMULGATION OF STATE PLANS FOR DESIGNATED FACILITIES AND POLLUTANTS

- 1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

- 2. Section 62.12360 is revised to read as follows:

§ 62.12360 Identification of plan.

On September 25, 2020, the Wisconsin Department of Natural Resources submitted a withdrawal letter to EPA certifying that there is only one Large Municipal Waste Combustor unit in the State of Wisconsin subject to the emissions guidelines at 40 CFR part 60, subpart Eb, and requested that the Federal Plan at subpart FFF of this part, apply.

[FR Doc. 2021–09808 Filed 5–7–21; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2019–0607; FRL–10022–79]

Poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of Poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt when used as an inert ingredient (colorant) in pesticide formulations applied to seed treatment slurries for raw agricultural commodities and not to exceed 20%

weight/weight (wt/wt). Milliken Chemical submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA) requesting establishment of an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of Poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt.

DATES: This regulation is effective May 10, 2021. Objections and requests for hearings must be received on or before July 9, 2021, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2019–0607, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805.

Due to the public health concerns related to COVID–19, the EPA Docket Center (EPA/DC) and Reading Room is closed to visitors with limited exceptions. The staff continues to provide remote customer service via email, phone, and webform. For the latest status information on EPA/DC services and docket access, visit <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Marietta Echeverria, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: RDFFRNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather

provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Publishing Office's e-CFR site at http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2019-0607 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing and must be received by the Hearing Clerk on or before July 9, 2021. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2019-0607, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

II. Petition for Exemption

In the **Federal Register** of February 11, 2020 (85 FR 7708) (FRL-10005-02), EPA issued a document pursuant to FFDCA section 408, 21 U.S.C. 346a, announcing the filing of a pesticide petition (PP IN-11359) by Milliken Chemical, 920 Milliken Rd., M-209 Spartanburg, SC 29303. The petition requested that 40 CFR 180.920 be amended by establishing an exemption from the requirement of a tolerance for residues of Poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt (CAS Reg. No. N/A) when used as an inert ingredient (colorant) in pesticide formulations applied to seed treatment slurries for raw agricultural commodities not to exceed 20% (wt/wt). That document referenced a summary of the petition prepared by Milliken Chemical, the petitioner, which is available in the docket, <http://www.regulations.gov>. There were no comments received in response to the notice of filing.

III. Inert Ingredient Definition

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125 and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): Solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active. Generally, EPA has exempted inert ingredients from the requirement of a tolerance based on the low toxicity of the individual inert ingredients.

IV. Aggregate Risk Assessment and Determination of Safety

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption

from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(c)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings but does not include occupational exposure. Section 408(b)(2)(C) and (c)(2)(B) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance or exemption and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ."

EPA establishes exemptions from the requirement of a tolerance only in those cases where it can be clearly demonstrated that the risks from aggregate exposure to pesticide chemical residues under reasonably foreseeable circumstances will pose no appreciable risks to human health. In order to determine the risks from aggregate exposure to pesticide inert ingredients, the Agency considers the toxicity of the inert in conjunction with possible exposure to residues of the inert ingredient through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings. If EPA is able to determine that a finite tolerance is not necessary to ensure that there is a reasonable certainty that no harm will result from aggregate exposure to the inert ingredient, an exemption from the requirement of a tolerance may be established.

Consistent with FFDCA section 408(c)(2)(A), and the factors specified in FFDCA section 408(c)(2)(B), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for Poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt including exposure resulting from the exemption established by this action. EPA's assessment of exposures and risks associated with Poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-

ethanediyl}bis[ω-hydroxy-, monosodium salt follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered their validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the adverse effects caused by Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies are discussed in this unit.

In acute studies, exposure to Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt resulted in no observable or minimal toxicity. The acute oral median lethal dose (LD₅₀) in rats is >2,000 mg/kg. Minimal dermal irritation was observed in an acute dermal study with rabbits. No indications of sensitization have been observed in local lymph node assay.

Two reverse mutation assays (OECD 471), a mouse lymphoma assay (OECD 476) and an in vitro micronucleus test (OECD 487) found Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt to not be mutagenic.

In a combined repeat dose developmental/reproduction study (OECD 422), there were no adverse effects from oral administration of Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt up to 1000 mg/kg/day on any parameter measured, including gonadal function, mating performance, conception, development of the conceptus or parturition. The NOAEL for these parameters was 1000 mg/kg/day for males and females. The NOAEL for reproductive performance and fetal/developmental toxicity was also considered to be 1,000 mg/kg/day.

B. Toxicological Points of Departure/Levels of Concern

Based on available studies provided for Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt, no toxicological

endpoint of concern was identified, and a quantitative risk assessment is not required for this compound.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt, EPA considered exposure under the proposed exemption from the requirement of a tolerance. EPA assessed dietary exposures from Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt in food as follows:

Dietary exposure (food and drinking water) to Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt is not expected to occur due to its intended use as a colorant for seed treatment. Seed treatment formulas containing Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt will be applied directly to seeds and if released into the environment, the colorant would not be taken up by the germinating seedling and translocated within the plant vascular system to result in crop residues and dietary exposures.

2. *Dietary exposure from drinking water.* Since a hazard endpoint of concern was not identified for the acute and chronic dietary assessment, a quantitative dietary exposure risk assessment for drinking water was not conducted.

3. *From non-dietary exposure.* The term "residential exposure" is used in this document to refer to non-occupational, non-dietary exposure (e.g., textiles (clothing and diapers), carpets, swimming pools, and hard surface disinfection on walls, floors, tables).

Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt may be used in pesticide products and non-pesticide products used in and around the home that would have residential exposures. However, because no toxicological endpoint of concern was identified, a quantitative residential exposure assessment for Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt was not conducted.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance or exemption, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity." EPA has not found Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt to share a common mechanism of toxicity with any other substances, and Poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt does not appear to produce a toxic metabolite produced by other substances. For the purposes of this action, therefore, EPA has assumed that poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's website at <http://www.epa.gov/pesticides/cumulative>.

D. Safety Factor for Infants and Children

Based on the lack of threshold effects, EPA has not identified any toxicological endpoints of concern and is conducting a qualitative assessment of poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt. That qualitative assessment does not use safety factors for assessing risk, and no additional safety factor is needed for assessing risk to infants and children. Based on an assessment of poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt, EPA has concluded that there are no toxicological endpoints of concern for the U.S. population, including infants and children.

E. Aggregate Risks and Determination of Safety

Taking into consideration all available information on poly(oxy-1,2-ethanediyl), α, α'-{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω-hydroxy-, monosodium salt when used as an inert

ingredient (colorant) in pesticide formulations applied to seed treatment slurries for raw agricultural commodities and not to exceed 20% (wt/wt), EPA has determined that there is a reasonable certainty that no harm to the general population or any population subgroup, including infants and children, will result from aggregate exposure to poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt. Therefore, the establishment of an exemption from tolerance under 40 CFR 180.920 for residues of poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt when used as an inert ingredient (colorant) in pesticide formulations applied to seed treatment slurries for raw agricultural commodities and not to exceed 20% (wt/wt), is safe under FFDCA section 408.

V. Other Considerations

A. Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes since the Agency is establishing an exemption from the requirement of a tolerance without any numerical limitation.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). Codex is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established a MRL for poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt.

VI. Conclusions

Therefore, an exemption from the requirement of a tolerance is established

under 40 CFR 180.920 for poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt (CAS Reg. No. N/A) when used as an inert ingredient (colorant) in pesticide formulations applied to seed treatment slurries for raw agricultural commodities and not to exceed 20% (wt/wt).

VII. Statutory and Executive Order Reviews

This action establishes an exemption from the requirement of a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the exemption in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the National Government and the States or Tribal Governments, or on the distribution of power and responsibilities among the various levels of government or between

the Federal Government and Indian Tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 4, 2021.

Marietta Echeverria,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR chapter I as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.920, amend the table by adding in alphabetical order the inert ingredient "Poly(oxy-1,2-ethanediyl), α , α' -{[[4-[(3-sulfophenyl)azo]phenyl]imino]di-2,1-ethanediyl}bis[ω -hydroxy-, monosodium salt" to read as follows:

§ 180.920 Inert ingredients used pre-harvest; exemptions from the requirement of a tolerance.

* * * * *

Inert ingredients	Limits	Uses
<p style="text-align: center;">* * * *</p> <p>Poly(oxy-1,2-ethanediyl), α, α'-[[[4-[(3-sulphophenyl)azo]phenyl]imino]di-2,1-ethanediyl]bis[ω-hydroxy-, monosodium salt.</p> <p style="text-align: center;">* * * *</p>	<p style="text-align: center;">* * *</p> <p>Not to exceed 20% by weight of pesticide formulation.</p> <p style="text-align: center;">* * *</p>	<p style="text-align: center;">* * *</p> <p>Colorant.</p> <p style="text-align: center;">* * *</p>

BILLING CODE 6560-50-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Part 412

[CMS-1762-IFC]

RIN 0938-AU56

Medicare Program; Modification of Limitations on Redesignation by the Medicare Geographic Classification Review Board (MGCRB)

AGENCY: Centers for Medicare & Medicaid Services (CMS), Health and Human Services, (HHS).

ACTION: Interim final rule with comment period.

SUMMARY: This interim final rule with comment period (IFC) amends our current regulations to allow hospitals with a rural redesignation under the Social Security Act (the Act) to reclassify through the Medicare Geographic Classification Review Board (MGCRB) using the rural reclassified area as the geographic area in which the hospital is located. These regulatory changes align our policy with the decision in *Bates County Memorial Hospital v. Azar*, effective with reclassifications beginning with fiscal year (FY) 2023. We would also apply the policy in this IFC when deciding timely appeals before the Administrator of applications for reclassifications beginning with FY 2022 that were denied by the MGCRB due to the current policy, which does not permit hospitals with rural redesignations to use the rural area's wage data for purposes of reclassifying under the MGCRB.

DATES:

Effective date: These regulations are effective on May 10, 2021.

Comment date: To be assured consideration, comments must be received at one of the addresses provided below by June 28, 2021.

ADDRESSES: In commenting, please refer to file code CMS-1762-IFC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. Electronically. You may (and we encourage you to) submit electronic comments on this regulation to <http://www.regulations.gov>. Follow the instructions under the "submit a comment" tab.

2. By regular mail. You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1762-IFC, P.O. Box 8013, Baltimore, MD 21244-1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. By express or overnight mail. You may send written comments via express or overnight mail to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1762-IFC, Mail Stop C4-26-05, 7500 Security Boulevard, Baltimore, MD 21244-1850.

For information on viewing public comments, we refer readers to the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Tehila Lipschutz, (410) 786-1344 or Dan Schroder, (410) 786-7452.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: <http://www.regulations.gov>. Follow the search instructions on that website to view public comments.

Comments received timely will be also available for public inspection as they are received, generally beginning

approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1-800-743-3951.

I. Background

A. Wage Index for Acute Care Hospitals Paid Under the Hospital Inpatient Prospective Payment System (IPPS)

Under section 1886(d) of the Social Security Act (the Act), hospitals are paid based on prospectively set rates. To account for geographic area wage level differences, section 1886(d)(3)(E) of the Act requires that the Secretary of the Department of Health and Human Services (the Secretary) adjust the standardized amounts by a factor (established by the Secretary) reflecting the relative hospital wage level in the geographic area of the hospital, as compared to the national average hospital wage level. We currently define hospital labor market areas based on the delineations of statistical areas established by the Office of Management and Budget (OMB). The current statistical areas (which were implemented beginning with FY 2015) are based on revised OMB delineations issued on February 28, 2013, in OMB Bulletin No. 13-01, with updates as reflected in OMB Bulletins Nos. 15-01, 17-01, and 18-04. We refer readers to the FY 2015 IPPS/LTCH PPS final rule (79 FR 49951 through 49963) for a full discussion of our implementation of the new OMB labor market area delineations beginning with the FY 2015 wage index, and to the FY 2021 IPPS/LTCH PPS final rule (85 FR 58743 through 58755) for a discussion of the latest updates to these delineations.

Section 1886(d)(3)(E) of the Act requires the Secretary to update the wage index of hospitals annually, and to base the update on a survey of wages and wage-related costs of short-term, acute care hospitals. Under section 1886(d)(8)(D) of the Act, the Secretary is required to adjust the standardized amounts so as to ensure that aggregate payments under the IPPS, after

implementation of the provisions of sections 1886(d)(8)(B), 1886(d)(8)(C), and 1886(d)(10) of the Act, regarding geographic reclassification of hospitals, are equal to the aggregate prospective payments that would have been made absent these provisions.

B. Hospital Reclassifications Under Sections 1886(d)(8)(E) and 1886(d)(10) of the Act

Hospitals may seek to have their geographic designation reclassified. Under section 1886(d)(8)(E) of the Act, a qualifying prospective payment hospital located in an urban area may apply for rural status. Specifically, section 1886(d)(8)(E) of the Act states that “[f]or purposes of this subsection, not later than 60 days after the receipt of an application (in a form and manner determined by the Secretary) from a subsection (d) hospital described in clause (ii), the Secretary shall treat the hospital as being located in the rural area (as defined in paragraph (2)(D)) of the state in which the hospital is located.” The regulations governing these geographic redesignations are codified in § 412.103, and such hospitals are commonly referred to as “§ 412.103 hospitals”.

In a separate process, hospitals may also reclassify for purposes of the wage index under the IPPS under section 1886(d)(10) of the Act by applying to the Medicare Geographic Classification Review Board (MGCRB). Hospitals must apply to the MGCRB to reclassify not later than 13 months prior to the start of the fiscal year for which reclassification is sought, generally by September 1. (However, we note that this deadline has been extended for applications for FY 2022 reclassifications to 15 days after the public display date of the FY 2021 IPPS/LTCH final rule at the Office of the Federal Register, using our authority under section 1135(b)(5) the Act due to the COVID-19 Public Health Emergency.) Generally, hospitals must be proximate to the labor market area to which they are seeking reclassification and must demonstrate characteristics similar to hospitals located in that area. The MGCRB issues its decisions by the end of February for reclassifications that become effective for the following fiscal year (beginning October 1). The regulations applicable to reclassifications by the MGCRB are located in §§ 412.230 through 412.280.

Prior to a court decision in *Geisinger Community Medical v. Secretary, United States Department of Health and Human Services*, 794 F.3d 383 (3d Cir. 2015) (“*Geisinger*”), hospitals were only able to hold one reclassification at a

time: either under § 412.103 or through the MGCRB under section 1886(d)(10) of the Act. The Court of Appeals in *Geisinger* ruled that CMS’s prohibition of dual § 412.103 and MGCRB reclassifications was unlawful, since section 1886(d)(8)(E)(i) of the Act requires that “the Secretary shall treat the hospital as being located in the rural area,” inclusive of MGCRB reclassification purposes. Therefore, on April 21, 2016, we published an interim final rule with comment period (the April 21, 2016 IFC) in the **Federal Register** (81 FR 23428 through 23438) that included provisions amending our regulations to allow hospitals nationwide to have simultaneous § 412.103 and MGCRB reclassifications.

II. Provisions of the Interim Final Rule With Comment Period

Pursuant to our April 21, 2016 IFC, for reclassifications effective beginning FY 2018, a hospital may acquire rural status under § 412.103 and subsequently apply for a reclassification under the MGCRB using the distance and average hourly wage criteria designated for rural hospitals. Hospitals with a § 412.103 redesignation seeking additional reclassification under the MGCRB use the rural distance and average hourly wage criteria under § 412.230(b)(1), (d)(1)(iii)(C), and (d)(1)(iv)(E). For example, under our current policy, a § 412.103 hospital geographically located in the urban CBSA of Buffalo-Cheektowaga, NY seeking to reclassify under the MGCRB would demonstrate that their wages are at least 106 percent (and not 108 percent, as urban hospitals must demonstrate) of the average hourly wage of Buffalo-Cheektowaga, NY, to meet the criteria at § 412.230(d)(1)(iii)(C).

However, our current policy compares the average hourly wage of a § 412.103 hospital to its geographic urban location, rather than the rural reclassified area, for purposes of satisfying certain wage comparison criteria. In response to a comment on our April 21, 2016 IFC (81 FR 56925), we stated: “The commenter is correct that the rural distance and average hourly wage criteria will be used for hospitals with a § 412.103 redesignation. However, the commenter’s statement that the average hourly wage of a hospital with a § 412.103 redesignation is compared to the average hourly wage of hospitals in the State’s rural area under § 412.230(d)(1)(iii)(C) is incorrect. Instead, the hospital’s average hourly wage would be compared to the average hourly wage of all other hospitals in its urban geographic location using the

rural distance and average hourly wage criteria.”

On May 14, 2020, the United States District Court for the District of Columbia issued a decision in *Bates County Memorial Hospital v. Azar*, 464 F. Supp. 3d 43 (D.D.C. 2020) (*Bates*). *Bates County Memorial Hospital* and five other geographically urban hospitals were reclassified to rural under § 412.103. They also applied for reclassification under the MGCRB, but were denied because their wages were not at least 106 percent of the geographic urban area in which the hospitals were located. Each of the hospitals’ average hourly wages were at least 106 percent of the 3-year average hourly wage of all other hospitals in the rural area of the state in which the hospitals are located.

The Court agreed with the Plaintiffs that the statute at section 1886(d)(8)(E)(i) of Act requires that CMS treat qualifying hospitals as being located in the rural area for purposes of section 1886(d) of the Act, including MGCRB reclassification. The *Bates* decision requires that CMS consider the rural area to be the area in which the hospital is located for the wage comparisons required for MGCRB reclassifications. For example, pursuant to *Bates*, a § 412.103 hospital geographically located in the urban CBSA of Buffalo-Cheektowaga, NY seeking to reclassify under the MGCRB would demonstrate that their wages are at least 106 percent of the average hourly wage of rural NY, rather than that of Buffalo-Cheektowaga.

As a result of the *Bates* court’s decision, we are revising our policy so that the redesignated rural area, and not the hospital’s geographic urban area, will be considered the area a § 412.103 hospital is located in for purposes of meeting MGCRB reclassification criteria. Similarly, we are revising the regulations to consider the redesignated rural area, and not the geographic urban area, as the area a § 412.103 hospital is located in for the prohibition at § 412.230(a)(5)(i) on reclassifying to an area with a pre-reclassified average hourly wage lower than the pre-reclassified average hourly wage for the area in which the hospital is located.

Specifically, to align our policy with the court’s decision in *Bates*, we are amending the regulations at § 412.230(a)(1) by adding (a)(1)(iii) to state that an urban hospital that has been granted redesignation as rural under § 412.103 is considered to be located in the rural area of the state for the purposes of this section. We are also making conforming changes to the regulation at § 412.230(a)(5)(i) because

§ 412.230(a)(1) except paragraph (a)(5). Because § 412.230(a)(1) excepts paragraph (a)(5), we believe it is necessary to make a specific conforming revision to § 412.230(a)(5)(i), in addition to the general rule at § 412.230(a)(1)(iii), to clarify that the general rule at § 412.230(a)(1)(iii) applies to § 412.230(a)(5)(i) as well. That is, we are amending the regulation at § 412.230(a)(5)(i) to add language stating that an urban hospital that has been granted redesignation as rural under § 412.103 is considered to be located in the rural area of the state for the purposes of paragraph (a)(5)(i).

These changes implement the *Bates* court's interpretation of the requirement at section 1886(d)(8)(E)(i) of the Act that "the Secretary shall treat the hospital as being located in the rural area." That is, a § 412.103 hospital would be considered to be located in the rural area of the state for all purposes of MGCRB reclassification, including the average hourly wage comparisons required by § 412.230(a)(5)(i) and (d)(1)(iii)(C). For example, for purposes of § 412.230(d)(1)(iii)(C), the § 412.103 hospital would compare its average hourly wage to the average hourly wage of all other hospitals in the state's rural area. In addition, for purposes of § 412.230(a)(5)(i), a § 412.103 hospital may not be redesignated to another area if the pre-classified average hourly wage for that area is lower than the pre-reclassified average hourly wage of the rural area of the state in which the hospital is located (thus, a § 412.103 hospital could potentially reclassify to any area with a pre-reclassified average hourly wage that is higher than the pre-reclassified average hourly wage for the rural area of the state, if it meets all other applicable reclassification criteria).

Therefore, effective for reclassification applications due to the MGCRB on September 1, 2021, for reclassification first effective for FY 2023, a § 412.103 hospital could apply for a reclassification under the MGCRB using the state's rural area as the area in which the hospital is located. We would also apply the policy in this IFC when deciding timely appeals before the Administrator under § 412.278 for reclassifications beginning in FY 2022 that were denied by the MGCRB due to existing policy, which did not permit § 412.103 hospitals to be considered located in the state's rural area.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment on

the proposed rule before the provisions of the rule are finalized, either as proposed or as amended, in response to public comments and take effect, in accordance with the Administrative Procedure Act (APA) (Pub. L. 79–404), 5 U.S.C. 553 and, where applicable, section 1871 of the Act. Specifically, 5 U.S.C. 553 requires the agency to publish a notice of proposed rulemaking in the **Federal Register** that includes a reference to the legal authority under which the rule is proposed, and the terms and substances of the proposed rule or a description of the subjects and issues involved. Section 553(c) of the APA further requires the agency to give interested parties the opportunity to participate in the rulemaking through public comment before the provisions of the rule take effect. Similarly, section 1871(b)(1) of the Act requires the Secretary to provide for notice of the proposed rule in the **Federal Register** and a period of not less than 60 days for public comment for rulemaking carrying out the administration of the insurance programs under Title XVIII of the Act. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act authorize the agency to waive these procedures, however, if the agency finds good cause that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest and incorporates a statement of the finding and its reasons in the rule issued.

Section 553(d) of the APA ordinarily requires a 30-day delay in the effective date of a final rule from the date of its publication in the **Federal Register**. This 30-day delay in effective date can be waived, however, if an agency finds good cause to support an earlier effective date. Section 1871(e)(1)(B)(i) of the Act also prohibits a substantive rule from taking effect before the end of the 30-day period beginning on the date the rule is issued or published. However, section 1871(e)(1)(B)(ii) of the Act permits a substantive rule to take effect before 30 days if the Secretary finds that a waiver of the 30-day period is necessary to comply with statutory requirements or that the 30-day delay would be contrary to the public interest. Finally, the Congressional Review Act (CRA) (Pub. L. 104–121, Title II) requires a 60-day delay in the effective date for major rules unless an agency finds good cause that notice and public procedure are impracticable, unnecessary, or contrary to the public interest, in which case the rule shall take effect at such time as the agency determines 5 U.S.C. 801(a)(3) and 808(2).

We find good cause for waiving notice-and comment rulemaking and a delay in effective date given the decision of the district court and the public interest in expeditious implementation of the court's interpretation of the statute. Revising the regulation text by adding § 412.230(a)(1)(iii) and revising the regulation at § 412.230(a)(5)(i) through an IFC rather than through the normal notice-and comment rulemaking cycle and waiving the delay of effective date will ensure an expeditious implementation of the court's interpretation by allowing this policy to be applied to FY 2023 MGCRB reclassification decisions and cases before the Administrator for reclassifications effective beginning FY 2022. Absent this IFC, the earliest effective date of this revision to the regulations would be October 1, 2021 (FY 2022) following the normal IPPS/LTCH PPS notice-and comment rulemaking cycle. An effective date of FY 2022 would only allow the MGCRB to approve hospitals' applications qualifying under this policy for applications due September 1, 2022 for reclassifications effective beginning FY 2024 (applications are due to the MGCRB 13 months prior to the start of the fiscal year). Additionally, implementing the court's interpretation via an IFC allows this policy to be applied to cases before the Administrator for reclassifications effective beginning in FY 2022, which supports an expeditious implementation of this policy. Therefore, we find good cause to waive the notice of proposed rulemaking as well as the delay of effective date and to issue this final rule on an interim basis. Even though we are waiving notice of proposed rulemaking requirements and are issuing these provisions on an interim basis, we are providing a 60-day public comment period.

IV. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

V. Regulatory Impact Statement

We have examined the impact of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation

and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A Regulatory Impact Analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). This rule does not reach the economic threshold and thus is not considered a major rule.

The RFA requires agencies to analyze options for regulatory relief of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of less than \$8.0 million to \$41.5 million in any 1 year. Individuals and states are not included in the definition of a small entity. We are not preparing an analysis for the RFA because we have determined, and the Secretary certifies, that this IFC would not have a significant economic impact on a substantial number of small entities. Also, our revision to the regulatory text is a consequence of a court decision. We are amending the regulations to align our policy with the court's decision in *Bates* and implement the *Bates* court's interpretation of the requirement at section 1886(d)(8)(E)(i) of the Act that “the Secretary shall treat the hospital as being located in the rural area.”

In addition, section 1102(b) of the Act requires us to prepare an RIA if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital for Medicare payment regulations as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 100 beds. We are not preparing an analysis for section 1102(b) of the Act because we have determined, and the Secretary certifies, that this IFC would not have a

significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. In 2021, that threshold is approximately \$158 million. This rule will have no consequential effect on state, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on state and local governments, preempts state law, or otherwise has Federalism implications. Since this regulation does not impose any costs on state or local governments, the requirements of Executive Order 13132 are not applicable.

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule: (1) Having an annual effect on the economy of \$100 million or more in any 1 year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as “economically significant”); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

We estimate that this rule is “significant” but not “economically significant,” as measured by the \$100 million threshold. However, we have prepared an impact analysis that presents our best estimate of the costs and benefits of this rule for FY 2022 since section 3(f) of Executive Order 12866 defines a “significant regulatory

action” as a rule that raises novel legal or policy issues arising out of legal mandates.

With regard to our impact analysis, as a result of this IFC, for FY 2022, there are approximately 22 hospitals that may qualify for a reclassification to a new or different urban area with a higher wage index than they might otherwise have received based on the information currently available to us (for example, applications submitted to the MGCRB.) For FY 2022, if these hospitals qualify for and accept reclassification to a new or different urban area with a higher wage index than they might otherwise have received, we estimate a total increase in payments to these hospitals of approximately \$50 million in aggregate. However, wage index adjustments such as these are made in a manner that ensures that aggregate payments to hospitals are unaffected. This is accomplished through the application of a wage index budget neutrality adjustment as described more fully in the FY 2022 IPPS/LTCH proposed rule. Therefore, as a consequence of the court's decision in *Bates*, even though an urban hospital may be able to qualify for a reclassification to a new or different urban area with a higher wage index, this would not increase aggregate hospital payments. We estimate that in FY 2022 the wage index budget neutrality adjustment could increase by one-half of a percentage point as a result of an increase in the wage index to these 22 hospitals.

We do not know as a result of this IFC: (1) How many additional hospitals will elect to apply to the MGCRB by September 1, 2021 for reclassification beginning FY 2023 that would not otherwise have applied; (2) how many hospitals that apply will qualify for a wage index higher than they otherwise would have received; (3) for those that qualify for a higher wage index how much higher that wage index will be; and, (4) how many hospitals may elect to retain or acquire § 412.103 urban-to-rural reclassification that would not otherwise have done so. The MGCRB makes determinations on reclassification requests, and hospitals make final decisions whether to accept reclassifications approved by the MGCRB.

We also note that OMB requested public comment on the recommendations it received from the Metropolitan and Micropolitan Statistical Area Standards Review Committee for changes to OMB's metropolitan and micropolitan statistical area standards (86 FR 5263). These standards determine the

procedures for delineating and updating the statistical areas as new data become available. If changes to the standards are adopted by OMB and if those changes would affect the OMB delineations used for the IPPS wage index, we would address any such changes and impacts in future rulemaking.

In accordance with the provisions of Executive Order 12866, this IFC was reviewed by the Office of Management and Budget.

VI. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

I, Elizabeth Richter, Acting Administrator of the Centers for Medicare & Medicaid Services, approved this document on April 16, 2021.

List of Subjects in 42 CFR Part 412

Administrative practice and procedure, Health facilities, Medicare, Puerto Rico, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV, part 412, as follows:

PART 412—PROSPECTIVE PAYMENT SYSTEMS FOR INPATIENT HOSPITAL SERVICES

- 1. The authority for part 412 continues to read as follows:

Authority: 42 U.S.C. 1302 and 1395hh.

- 2. Section 412.230 is amended by adding paragraph (a)(1)(iii) and revising paragraph (a)(5)(i) to read as follows:

§ 412.230 Criteria for an individual hospital seeking redesignation to another rural area or an urban area.

(a) * * *

(1) * * *

(iii) An urban hospital that has been granted redesignation as rural under § 412.103 is considered to be located in the rural area of the state for the purposes of this section.

* * * * *

(5) * * *

(i) An individual hospital may not be redesignated to another area for purposes of the wage index if the pre-reclassified average hourly wage for that area is lower than the pre-reclassified

average hourly wage for the area in which the hospital is located. An urban hospital that has been granted redesignation as rural under § 412.103 is considered to be located in the rural area of the state for the purposes of this paragraph (a)(5)(i).

* * * * *

Dated: April 23, 2021.

Xavier Becerra,

Secretary, Department of Health and Human Services.

[FR Doc. 2021-08889 Filed 4-27-21; 4:45 pm]

BILLING CODE 4120-01-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 64

[Docket ID FEMA-2021-0003; Internal Agency Docket No. FEMA-8679]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: This rule identifies communities where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP) that are scheduled for suspension on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will not occur. Information identifying the current participation status of a community can be obtained from FEMA's CSB available at www.fema.gov/flood-insurance/work-with-nfip/community-status-book. Please note that per Revisions to Publication Requirements for Community Eligibility Status Information Under the National Flood Insurance Program, notices such as this one for scheduled suspension will no longer be published in the **Federal Register** as of June 2021 but will be available at National Flood Insurance Community Status and Public Notification | FEMA.gov. Individuals without internet access will be able to contact their local floodplain management official and/or State NFIP

Coordinating Office directly for assistance.

DATES: The effective date of each community's scheduled suspension is the third date ("Susp.") listed in the third column of the following tables.

FOR FURTHER INFORMATION CONTACT: If you want to determine whether a particular community was suspended on the suspension date or for further information, contact Adrienne L. Sheldon, PE, CFM, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 400 C Street SW, Washington, DC 20472, (202) 674-1087. Details regarding updated publication requirements of community eligibility status information under the NFIP can be found on the CSB section at www.fema.gov.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase Federal flood insurance that is not otherwise generally available from private insurers. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives, new and substantially improved construction, and development in general from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits the sale of NFIP flood insurance unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with NFIP regulations, 44 CFR part 59. Accordingly, the communities will be suspended on the effective date listed in the third column. As of that date, flood insurance will no longer be available in the community. FEMA recognizes communities may adopt and submit the required documentation after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue to be eligible for the sale of NFIP flood insurance. Their current NFIP participation status can be verified at anytime on the CSB section at fema.gov.

In addition, FEMA publishes a Flood Insurance Rate Map (FIRM) that identifies the Special Flood Hazard Areas (SFHAs) in these communities. The date of the published FIRM is indicated in the fourth column of the table. No direct federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may be provided for construction or acquisition of buildings in identified SFHAs for

communities not participating in the NFIP and identified for more than a year on FEMA's initial FIRM for the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of federal assistance becomes effective for the communities listed on the date shown in the last column. The Administrator finds that notice and public comment procedures under 5 U.S.C. 553(b), are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives 6-month, 90-day, and 30-day notification letters addressed to the Chief Executive Officer stating that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications were made, this final rule may take effect within less than 30 days.

National Environmental Policy Act. FEMA has determined that the community suspension(s) included in

this rule is a non-discretionary action and therefore the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) does not apply.

Regulatory Flexibility Act. The Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, Section 1315, 42 U.S.C. 4022, prohibits flood insurance coverage unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless remedial action takes place.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This rule involves no policies that have

federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This rule meets the applicable standards of Executive Order 12988.

Paperwork Reduction Act. This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

Accordingly, 44 CFR part 64 is amended as follows:

PART 64—[AMENDED]

■ 1. The authority citation for Part 64 continues to read as follows:

BILLING CODE 9110-12-P

FEDERAL COMMUNICATIONS COMMISSION**47 CFR Part 73****[MB Docket No. 21-57; RM-11882; DA 21-480; FR ID 24753]****Television Broadcasting Services Savannah, Georgia****AGENCY:** Federal Communications Commission.**ACTION:** Final rule.

SUMMARY: On February 22, 2021, the Media Bureau, Video Division (Bureau) issued a *Notice of Proposed Rulemaking* in response to a petition for rulemaking filed by Gray Television Licensee, LLC (Gray), the licensee of WTOG-TV, channel 11 (CBS), Savannah, Georgia,

requesting the substitution of channel 23 for channel 11 at Savannah in the DTV Table of Allotments. For the reasons set forth in the *Report and Order* referenced below, the Bureau amends FCC regulations to substitute channel 23 for channel 11 at Savannah.

DATES: Effective May 10, 2021.

FOR FURTHER INFORMATION CONTACT: Andrew Manley, Media Bureau, at (202) 418-0596 or AndrewManley@fcc.gov.

SUPPLEMENTARY INFORMATION: The proposed rule was published at 86 FR 12898 on March 5, 2021. Gray filed comments in support of the petition reaffirming its commitment to applying for channel 23. No other comments were received. In support, Gray states that the Commission has recognized that VHF channels have certain propagation

characteristics which may cause reception issues for some viewers, and that many of its viewers experience significant difficulty receiving WTOC's signal. Gray also demonstrated that all of the terrain-limited service area of WTOC's licensed channel 11 will receive terrain-limited service from the proposed channel 23, and that operation on channel 23 will not result in any predicted loss of service. The Bureau believes the public interest would be served by the channel substitution because it will result in improved service.

This is a synopsis of the Commission's *Report and Order*, MB Docket No. 21–61; RM–11885; DA 21–477, adopted April 26, 2021, and released April 26, 2021. The full text of this document is available for download at <https://www.fcc.gov/edocs>. To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

This document does not contain information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden “for small business concerns with fewer than 25 employees,” pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4). Provisions of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, do not apply to this proceeding.

The Commission will send a copy of this *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

50 CFR Part 622

[Docket No. 210504–0099]

RIN 0648–BK22

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Dolphin and Wahoo Fishery of the Atlantic; Amendment 12

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to implement Amendment 12 to the Fishery Management Plan (FMP) for the Dolphin and Wahoo Fishery of the Atlantic (Dolphin Wahoo FMP), as prepared and submitted by the South Atlantic Fishery Management Council (Council). This final rule adds bullet mackerel and frigate mackerel to the Dolphin Wahoo FMP and designates them as ecosystem component (EC) species. The purpose of this final rule and Amendment 12 is to acknowledge the ecological role of bullet mackerel and frigate mackerel as forage fish and to achieve the ecosystem management objectives in the Dolphin Wahoo FMP. **DATES:** This final rule is effective June 9, 2021.

ADDRESSES: Electronic copies of Amendment 12, which includes a fishery impact statement and a regulatory impact review, may be

obtained from the Southeast Regional Office website at <https://www.fisheries.noaa.gov/action/amendment-12-add-bullet-mackerel-and-frigate-mackerel-ecosystem-component-species>.

FOR FURTHER INFORMATION CONTACT:

Nikhil Mehta, telephone: 727–824–5305, or email: nikhil.mehta@noaa.gov.

SUPPLEMENTARY INFORMATION: The dolphin and wahoo fishery of the Atlantic is managed under the FMP. The FMP was prepared by the Council and implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On January 29, 2021, NMFS published a notice of availability for Amendment 12 and requested public comment (86 FR 7524). NMFS approved Amendment 12 on April 26, 2021. On March 2, 2021, NMFS published a proposed rule for Amendment 12 and requested public comment (86 FR 12166). The proposed rule and Amendment 12 outline the rationale for the actions contained in this final rule. A summary of the management measures described in Amendment 12 and implemented by this final rule is described below.

Background

The Council manages dolphin and wahoo under the Dolphin Wahoo FMP in Federal waters off the Atlantic states from Maine south to the Florida Keys in the Atlantic. In the western North Atlantic, bullet mackerel are found from Cape Cod to the Gulf of Mexico, and frigate mackerel are found mostly from North Carolina to Florida. As described in Amendment 12, both bullet mackerel and frigate mackerel are found in the diets of dolphin and wahoo in the North Atlantic. In particular, wahoo has been demonstrated to have a strong dietary reliance on bullet mackerel and frigate mackerel, indicating that these mackerel species are the most dominant forage species observed in the diets of wahoo. Dolphin tend to have more diverse diets than wahoo and have a lower reliance on these mackerel species as prey. Additionally, bullet mackerel and frigate mackerel have been identified as important forage species for other offshore pelagic predatory species in the Atlantic such as blue marlin and yellowfin tuna. Bullet mackerel feed on a variety of prey, especially clupeoids (*i.e.*, herrings and sardines), crustaceans, and squids. Frigate mackerel feed on a variety of fish, squid, and small crustaceans. Therefore, given their presence as a common forage fish and

prey food source, bullet mackerel and frigate mackerel are an important component of the marine environment in the Atlantic. There is no stock assessment for dolphin, wahoo, bullet mackerel, or frigate mackerel. In Atlantic Federal waters, dolphin and wahoo are targeted both commercially and recreationally. Annual reported commercial and recreational landings of bullet mackerel and frigate mackerel are low along the entire Atlantic coastline.

Regulations implemented under the Magnuson-Stevens Act define EC species as “stocks that a Council or the Secretary has determined do not require conservation and management, but desire to list in a FMP in order to achieve ecosystem management objectives” (50 CFR 600.305(d)(13)). National Standards (NS) General guidelines state that a Council should consider a non-exhaustive list of 10 factors when deciding whether additional stocks require Federal conservation and management (50 CFR 600.305(c)(1)). The EC designation for bullet mackerel and frigate mackerel was recommended to the Council by the Council’s Scientific and Statistical Committee (SSC), their Dolphin Wahoo Advisory Panel (AP), and the Habitat Protection and Ecosystem-Based Management (Habitat) AP, and received extensive positive comments from the public during scoping of Amendment 12. The Dolphin Wahoo AP and Habitat AP members acknowledged that wahoo, in particular, target these mackerel species as prey. The AP members also stated that the Council should consider a conservative approach to ensure there are no major increases in the harvest of bullet mackerel and frigate mackerel in the foreseeable future as a result of any EC designation. This designation addresses the Council’s growing emphasis on developing ecosystem management approaches to fisheries management and advancing ecosystem management objectives in the Dolphin Wahoo FMP.

The extent to which the low landings of bullet mackerel and frigate mackerel occur within the dolphin and wahoo fishery is unknown; however, it is unlikely that these species are often harvested in conjunction with efforts to target dolphin and wahoo, especially in the commercial sector. Bullet and frigate mackerel have largely been landed commercially in the Mid-Atlantic region using gill net, pound net, float trap, and otter trawl gear, none of which are allowable gear types in the dolphin and wahoo fishery. Recreational landings of bullet and frigate mackerel have largely occurred in the South Atlantic Region, with some limited catches reported from

the Mid-Atlantic Region. Furthermore, recreational fishermen have also noted that these species are used as bait for tuna and billfish, such as blue marlin. NMFS and the Council have determined that bullet mackerel and frigate mackerel are currently not in need of conservation and management, making them eligible for consideration as EC species. This eligibility determination was done after consideration of the provisions within the NS Guidelines and requirements of the Magnuson-Stevens Act. Furthermore, adding bullet mackerel and frigate mackerel to the Dolphin Wahoo FMP as EC species meets the FMP’s ecosystem management objectives (50 CFR 600.305(c)(5) and 600.310(d)(1)).

Management Measures Contained in This Final Rule

This final rule adds bullet mackerel and frigate mackerel to the Dolphin Wahoo FMP and designates them as EC species. This final rule adds no additional management measures to the Dolphin Wahoo FMP as a result of this EC species designation, either for bullet mackerel and frigate mackerel, or for dolphin and wahoo.

The final rule is expected to result in potential indirect benefits such as increased awareness among the fishermen, fishing communities, data collecting agencies, and regulatory entities managing dolphin, wahoo, bullet mackerel, and frigate mackerel. If landings for these two mackerel species were to greatly increase in the future to unsustainable levels, fisheries managers could be made aware of the changing stock status before the stocks are depleted, which may have subsequent beneficial effects on populations of several economically important predatory fish species, including dolphin, wahoo, blue marlin, and yellowfin tuna.

Comments and Responses

NMFS received 24 comments during the public comment period on the notice of availability and proposed rule for Amendment 12. Comment submissions were from the general public, sport-fishing associations, and non-governmental organizations. The majority of the comments were in support of adding bullet mackerel and frigate mackerel to the Dolphin Wahoo FMP as EC species. NMFS acknowledges the comments in favor of the action in the notice of availability and proposed rule and agrees with them. One comment was outside the scope of Amendment 12 and is not responded to in this final rule. Comments in opposition and that

requested additional information about the action contained in the notice of availability and proposed rule are summarized below, along with NMFS’ responses.

Comment 1: NMFS and the Council should consider more proactive methods of monitoring the conditions of bullet and frigate mackerel and collect more data to study abundance and population trends.

Response: NMFS agrees that more data would aid in obtaining a better understanding of abundance and population trends for bullet mackerel and frigate mackerel. However, these species are not directly targeted by commercial and recreational fishers in the Atlantic. Commercial landings of bullet mackerel and frigate mackerel have been variable, but typically are relatively low, averaging 4,395 lb (1,994 kg), round weight, annually over the past 20 years of available data (1999 through 2018), 1,569 lb, (712 kg), round weight, annually over the past 10 years (2009 through 2018), and 1,939 lb (880 kg), round weight, over the past 5 years (2014 through 2018). Recreational landings have been variable and sporadic, averaging 1,189 lb (539 kg), round weight, for bullet mackerel, and 3,569 lb (1,619 kg), round weight, for frigate mackerel annually over the past 20 years of available data (1999 through 2018).

In terms of data collection, vessels with Federal commercial dolphin wahoo permits already report all landings that are sold to a federally permitted dealer, including species that are not federally managed. Beginning January 4, 2020, the final rule for the South Atlantic for-hire electronic reporting program requires that federally permitted for-hire snapper-grouper, dolphin wahoo, and coastal migratory pelagic vessels in the Atlantic report all landings including species that are not subject to Federal management (85 FR 47917; August 7, 2020). The Marine Recreational Information Program captures information on all species caught by recreational fishers. Furthermore, North Carolina has introduced fish identification codes in its state trip ticket forms for these mackerel species since 2018. Public education and awareness of the EC designation may encourage fishers to report landings of these two mackerel species more than before, thereby providing more data. If landings for bullet mackerel and frigate mackerel were to increase in the future, further proactive and active measures within the Council’s jurisdiction could be explored in a future amendment.

Comment 2: The proposed rule does not achieve the stated purpose of Amendment 12 to provide awareness regarding bullet mackerel and frigate mackerel, and is a waste of taxpayer dollars. If there are no benefits for the dolphin and wahoo fishery from this action, then it would make sense that there should be no cost, or at least minimal cost, for this proposed rule. However, NMFS calculates an estimated cost of \$34,499.00 for an action that will have no benefits.

Response: NMFS disagrees that there are no benefits to the action. The purpose of Amendment 12 and its rulemaking is to acknowledge the ecological role of bullet mackerel and frigate mackerel as forage fish by adding them to the Dolphin Wahoo FMP as EC species. Peer-reviewed scientific studies have found scombrids such as bullet mackerel and frigate mackerel are the dominant prey (43.7 percent frequency of occurrence and 41.7 percent by mass) in wahoo diets, showing that a wahoo have a high reliance on scombrids and suggesting that wahoo specialize on this prey group, just as they do in other regions throughout their range. Bullet and frigate mackerel are also important in the diets of dolphin, blue marlin, and yellowfin tuna. The action in Amendment 12 brings awareness among the fishers, fishing communities, data collecting agencies, and regulatory entities managing dolphin, wahoo, bullet mackerel, and frigate mackerel. As noted in the response to *Comment 1*, there is very little interest among fishers in these two mackerel species at present, but, if they were to be targeted in the future, adding them in the FMP as EC species will aid in considering other measures in a future action, if warranted. Indeed, the Mid-Atlantic Fishery Management Council has discussed plans to establish possession limits for bullet mackerel and frigate mackerel. In the western Atlantic, bullet mackerel are found from Cape Cod to the Gulf of Mexico and feed on a variety of prey, especially clupeoids (*i.e.*, herrings and sardines), crustaceans, and squids. Frigate mackerel are mostly found from North Carolina to Florida and feed on a variety of fish, squids, and small crustaceans. By acknowledging the role of bullet mackerel and frigate mackerel in the ecosystem as forage fish, implementation of Amendment 12 will increase ecosystem-wide awareness. NMFS and the Council determined that bullet mackerel and frigate mackerel are currently not in need of conservation and management, and, as such, are eligible for consideration as EC species under provisions found within the NS

Guidelines (50 CFR 600.305(c)(1)), in compliance with the requirements of the Magnuson-Stevens Act and other applicable laws.

There are no expected notable effects for the dolphin and wahoo fishery from this action, because bullet mackerel and frigate mackerel are not targeted in this fishery, and are not caught by the gear authorized in the dolphin and wahoo fishery. Landings for these species have been very low over the last 20 years (see response to *Comment 1*). Bullet mackerel and frigate mackerel have largely been landed commercially in the Mid-Atlantic region using gill net, pound net, float trap, and otter trawl gear, none of which are allowable gear types in the dolphin and wahoo fishery. Recreational catches of bullet mackerel and frigate mackerel have largely occurred in the South Atlantic Region, with some limited catches reported from the Mid-Atlantic Region. Also, recreational fishers have noted that these species are used as bait.

NMFS conducted an economic analysis for Amendment 12 to comply with Executive Order (E.O.) 12866. The analysis estimated costs resulting from this action in the amount of \$34,499.00 (2018 dollars), which are considered minimal. This estimate represents the administrative costs to the Council and NMFS associated with Amendment 12 and this rulemaking as there are no direct costs to the private sector.

In addition, while this final rule is not expected to result in any direct benefits, it is expected to result in indirect benefits. Consistent with Circular A–4 from the Office of Management and Budget, which provides guidance on how to conduct analyses to comply with E.O. 12866, the analysis should consider favorable effects from the rule that are typically unrelated or secondary to the purpose of the rulemaking. If it is not feasible to monetize or quantify such effects, they should at least be considered qualitatively. As discussed in Amendment 12, indirect economic benefits are expected to arise from designating bullet and frigate mackerel as EC species by enhancing public education and awareness of these species, which in turn is expected to improve data reporting and monitoring of landings. If landings for the two mackerel species greatly increase in the future to unsustainable levels, fisheries managers could be made aware before the stocks are depleted. The ability to preclude such stock depletions is expected to indirectly benefit fisheries for several economically important predatory fish species in the future, including dolphin and wahoo. These indirect benefits were determined to

outweigh the minimal administrative costs that have already been largely incurred by the Council and NMFS, and therefore this regulatory action is expected to increase net benefits to the Nation.

Comment 3: Lower landing rates for both bullet mackerel and frigate mackerel are not just because of less interest in fishing for these species. Rather, the population of these species has decreased drastically.

Response: NMFS disagrees. There is no stock assessment available for bullet mackerel or frigate mackerel. Therefore, it is not possible to determine if the populations have decreased or increased in a manner that would negatively or positively affect their stock status. As mentioned in responses to *Comments 1* and *2*, these species are typically caught incidentally to other species and are not the targets of a directed fishery, which is consistent with the low levels of landings. Adding bullet mackerel and frigate mackerel to the Dolphin Wahoo FMP does meet ecosystem management objectives (50 CFR 600.305(d)(13)). The EC designation recognizes the ecosystem role of these mackerel species as prey for many economically important species such as wahoo and other billfish. Increased awareness of the importance of these species could aid in more data reporting and collection, which would help towards any possible future stock assessment, if necessary.

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this final rule is consistent with Amendment 12, the Dolphin Wahoo FMP, other provisions of the Magnuson-Stevens Act, and other applicable laws.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Magnuson-Stevens Act provides the legal basis for this final rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting and record-keeping requirements are introduced by this final rule. This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995. A description of this final rule, why it is being considered, and the purposes of this final rule are contained in the preamble and in the **SUMMARY** section of this final rule. The objective of this final rule is to acknowledge the ecological role of bullet mackerel and frigate mackerel as forage fish in general and specifically as prey for wahoo.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) during the proposed rule stage that this rule would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. NMFS did not receive any comments from SBA's Office of Advocacy or the public regarding the certification in the proposed rule. NMFS received one public comment on the economic analysis in Amendment 12; see *Comment #2* in the preamble. No changes to this final rule were made in response to public comments. As a result, a final regulatory flexibility analysis was not required and none was prepared.

List of Subjects in 50 CFR Part 622

Atlantic, Dolphin, Ecosystem species, Fisheries, Fishing, Wahoo.

Dated: May 5, 2021.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. Add Table 6 to appendix A to part 622 to read as follows:

Appendix A to Part 622—Species Tables

* * * * *

Table 6 of Appendix A to Part 622—Atlantic Dolphin and Wahoo

Dolphin, *Coryphaena equiselis* or
Coryphaena hippurus Wahoo,
Acanthocybium solandri

The following species are designated as ecosystem component species:

Bullet mackerel, *Auxis rochei*
Frigate mackerel, *Auxis thazard*

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 200325–0088; RTID 0648–XB071]

Fisheries of the Northeastern United States; Atlantic Sea Scallop Fishery; 2021 Closure of the Northern Gulf of Maine Scallop Management Area to the Limited Access General Category Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS announces the closure of the Northern Gulf of Maine Scallop Management Area for the remainder of the 2021 fishing year for Limited Access General Category vessels. Regulations require this action once NMFS projects that 100 percent of the Limited Access General Category total allowable catch for the Northern Gulf of Maine Scallop Management Area will be harvested. This action is intended to prevent the overharvest of the 2021 total allowable catch allocated to the Limited Access General Category Fishery.

DATES: Effective 0001 hr local time, May 6, 2021, through March 31, 2022.

FOR FURTHER INFORMATION CONTACT: Louis Forristall, Fishery Management Specialist, (978) 281–9321.

SUPPLEMENTARY INFORMATION: The regulations governing fishing activity in the Northern Gulf of Maine (NGOM) Scallop Management Area are located in 50 CFR 648.54 and 648.62. These regulations authorize vessels issued a valid Federal scallop permit to fish in the NGOM Scallop Management Area under specific conditions, including a default total allowable catch (TAC) of 167,500 lb (75,976 kg) for the Limited Access General Category (LAGC) fleet for the 2021 fishing year, and a State Waters Exemption Program for the State of Maine and Commonwealth of Massachusetts. Section 648.62(b)(2) requires the NGOM Scallop Management Area to be closed to scallop vessels issued Federal LAGC scallop permits, except as provided below, for the remainder of the fishing year once the NMFS Greater Atlantic Regional Administrator determines that 100 percent of the LAGC TAC for the fishing year is projected to be harvested. Any vessel that holds a Federal NGOM (LAGC B) or Individual Fishing Quota

(IFQ) (LAGC A) permit may continue to fish in the Maine or Massachusetts state waters portion of the NGOM Scallop Management Area under the State Waters Exemption Program found in § 648.54 provided it has a valid Maine or Massachusetts state scallop permit and fishes only in that state's respective waters.

Based on trip declarations by federally permitted LAGC scallop vessels fishing in the NGOM Scallop Management Area and analysis of fishing effort, we project that the 2021 LAGC TAC will be harvested as of May 6, 2021. Therefore, in accordance with § 648.62(b)(2), the NGOM Scallop Management Area is closed to all federally permitted LAGC scallop vessels as of May 6, 2021. As of this date, no vessel issued a Federal LAGC scallop permit may fish for, possess, or land scallops in or from the NGOM Scallop Management Area after 0001 local time, May 6, 2021, unless the vessel is fishing exclusively in state waters and is participating in an approved state waters exemption program as specified in § 648.54. Any federally permitted LAGC scallop vessel that has declared into the NGOM Scallop Management Area, complied with all trip notification and observer requirements, and crossed the vessel monitoring system demarcation line on the way to the area before 0001, May 6, 2021, may complete its trip and land scallops. This closure is in effect until the end of the 2021 scallop fishing year, through March 31, 2022. This closure does not apply to the Limited Access (LA) scallop fleet, which was allocated a separate TAC of 97,500 lb (44,225 kg) for the 2021 fishing year under Framework Adjustment 32 to the Atlantic Sea Scallop Fishery Management Plan. Vessels that are participating in the 2021 scallop Research Set-Aside Program and have been issued letters of authorization to conduct compensation fishing activities will harvest the 2021 LA TAC.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for fisheries, NOAA, finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be contrary to the public interest and impracticable. NMFS also finds, pursuant to 5 U.S.C. 553(d)(3), good cause to waive the 30-day delayed effectiveness period for the reasons noted below. The NGOM Scallop Management Area opened for the 2021

fishing year on April 1, 2021. The regulations at § 648.60(b)(2) require this closure to ensure that federally permitted scallop vessels do not harvest more than the allocated LAGC TAC for the NGOM Scallop Management Area. NMFS can only make projections for the NGOM closure date as trips into the area occur on a real-time basis and as activity trends appear. As a result, NMFS can typically make an accurate projection only shortly before the TAC is harvested. The rapid harvest rate that has occurred in the last 2 weeks makes it more difficult to project a closure well in advance. To allow federally permitted LAGC scallop vessels to continue taking trips in the NGOM Scallop Management Area during the period necessary to publish and receive comments on a proposed rule would result in vessels harvesting more than the 2021 LAGC TAC for the NGOM Scallop Management Area. This would result in excessive fishing effort in the area thereby undermining conservation objectives of the Atlantic Sea Scallop Fishery Management Plan and requiring more restrictive future management measures to make up for the excessive harvest. Also, the public had prior notice and full opportunity to comment on this closure process when we put the final NGOM management provisions in place for the 2021 fishing year on March 31, 2020 (85 FR 17754).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 5, 2021.

Jennifer M. Wallace,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

50 CFR Part 679

[Docket No. 210504-0098]

RIN 0648-BK18

Fisheries of the Exclusive Economic Zone Off Alaska; Removing the Processing Restrictions on Incidentally Caught Squid and Sculpin Species in the Gulf of Alaska and Bering Sea and Aleutian Islands Groundfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to remove the regulatory restriction that limits processing of squids and sculpins to fishmeal only. This final rule is necessary to allow the processing and sale of squids and sculpins as products other than fishmeal and thereby to help prevent waste of the incidental catch of these ecosystem component (EC) species. This final rule is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the Fishery Management Plans (FMP) for Groundfish of the Gulf of Alaska (GOA) and Bering Sea and Aleutian Islands Management Area (BSAI) (Groundfish FMPs), and other applicable laws.

DATES: Effective June 9, 2021.

ADDRESSES: Electronic copies of the Regulatory Impact Review (referred to as the “Analysis”) and the National Environmental Policy Act Categorical Exclusion prepared for this final rule may be obtained from www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Megan Mackey, 907-586-7228.

SUPPLEMENTARY INFORMATION:

Authority for Action

NMFS manages the groundfish fisheries in the exclusive economic zone (EEZ) of the BSAI and GOA under the Groundfish FMPs. The North Pacific Fishery Management Council (Council) prepared the Groundfish FMPs under the authority of the Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.* Regulations governing U.S. fisheries and implementing the Groundfish FMPs appear at 50 CFR parts 600 and 679.

The proposed rule to implement this action was published in the **Federal Register** on February 26, 2021, with comments invited through March 29, 2021 (86 FR 11716). NMFS received 5 comment letters containing a total of 3 unique comments. The comments are summarized and responded to under the heading Comments and Responses below.

A detailed review of the provisions and rationale for this action is provided in the preamble to the proposed rule (86 FR 11716, February 26, 2021) and is briefly summarized in this final rule.

Background

Squids and sculpins are defined in the EC category of the Groundfish FMPs. Directed fishing for EC species is prohibited. Incidental catch of squid species is retained in some groundfish fisheries and often utilized to prevent waste. Typically, sculpins are not

retained but can be in some circumstances.

The Council's 2017 and 2019 actions to reclassify squids and sculpins, respectively, into the EC category of the Groundfish FMPs were based on the best available scientific information and were consistent with the National Standard (NS) guidelines. The Federal rulemakings to implement the Council's actions prohibited the use or sale of incidentally caught squids and sculpins unless processed into fishmeal, in accordance with the regulations governing other EC species (85 FR 41427, July 10, 2020 (sculpin); 83 FR 31460, July 6, 2018 (squid)). The purpose of this action is to provide flexibility for the use of incidentally caught squids and sculpins, thereby reducing the waste of these EC species, and aligning the regulations with the long-standing use of incidentally caught squid species as bait.

The following sections of this preamble provide:

- A brief history of the restriction on processing and sale of squids and sculpins,
- The expected effects of and need for this action, and
- A description of the regulatory change made by this final rule.

Brief History of the Restriction on Processing and Sale of Squids and Sculpins

EC species are stocks that a fishery management council (council) or the Secretary of Commerce (Secretary) has determined do not require conservation and management, but desire to list in an FMP in order to achieve ecosystem management objectives (50 CFR 600.305(c)(5) and (d)(13) and 50 CFR 600.310(d)(1)). Retention and personal use of some EC species in the Groundfish FMPs (forage fish, grenadiers, squids, and sculpins) is allowed up to the applicable maximum retainable amount (MRA), which is the proportion or percentage of retained catch of a species closed for directed fishing (incidental catch species) to the retained catch of a species open for directed fishing (basis species) (50 CFR 679.20(e) and (i)). Current Federal regulations at 50 CFR 679.20(i)(4) and (5) prohibit the processing, barter, trade, and sale of EC species in Alaska (forage fish, grenadiers, squids, and sculpins) unless they are processed as fishmeal.

Amendment 96 to the BSAI FMP and Amendment 87 to the GOA FMP (Amendments 96/87) (75 FR 61639, October 6, 2010) established the EC category and designated prohibited species (defined in Table 2b to 50 CFR part 679, to include salmon, steelhead

trout, crab, halibut, and herring) and forage fish (defined in Table 2c to 50 CFR part 679 and § 679.20(i)) as EC species in both the Groundfish FMPs.

When Amendments 96/87 were recommended by the Council in 2010, the Council's stated intention was that prohibited species and forage fish would be in the new EC category. Because the retention, processing, and sale of prohibited species and forage fish was not permitted before their placement in the EC category, those restrictions remained in place and unchanged under Amendments 96/87. The Council did not indicate whether it intended that species added to the EC category at a later date would be subject to those same restrictions.

When the Council took action to recommend reclassifying squids in the EC category in 2017, harvesters and processors expected that incidentally caught squids in the groundfish fisheries could be processed and sold as bait, consistent with long-standing and common practice. Similarly, when the Council recommended reclassifying sculpins in the EC category in 2019, there was some interest in exploring food fish markets for incidentally caught sculpins, which have rarely been retained or processed. However, once squids and sculpins were reclassified in the EC category, existing Federal regulations at 50 CFR 679.20(i) applied to all EC species and prohibited the processing, barter, trade, and sale of squids and sculpins as anything other than fishmeal.

In October 2019, the Council initiated an analysis to reconsider the processing and sale restrictions on squids and sculpins in the EC category. No other species in the EC category were considered in this analysis. As a result, processing and sale restrictions will remain in place for prohibited species, forage fish, and grenadiers under this action.

The Expected Effects of and Need for This Action

Pursuant to this action, NMFS continues to manage squids and sculpins as EC species in the Groundfish FMPs. Directed fishing of squids and sculpins continues to be prohibited, and retention of squids and sculpins up to the MRA of 20 percent continues to be permitted. Recordkeeping and reporting requirements are maintained. The only change to current regulations is to remove the processing restrictions limiting processing and sale of squids and sculpins to fishmeal and include new regulations on allowable fish products for squids and sculpins.

Specifically, the regulations provide that retained catch of squids and sculpins not exceeding the MRA may be sold to a processor or processed into any product form—including (but not limited to) fishmeal, bait, and whole fish/food fish—for sale, barter, or trade. All other regulations pertaining to EC species remain in place.

The Council determined, and NMFS agrees, that this action will provide groundfish harvesters and processors with additional flexibility to conduct their business in an efficient manner by providing them with more options for the processing and sale of incidentally caught squids and sculpins up to the MRA, and will help reduce waste of these incidentally caught species.

Final Rule

This final rule removes the regulatory restriction that limits processing of incidentally caught squids and sculpins to fishmeal only and allows retained catch of squids and sculpins not exceeding the MRA to be sold to a processor or to be processed into any product form. This final rule is necessary to allow the processing and sale of squids and sculpins as products other than fishmeal and to help prevent waste of the incidental catch of these species. To make that change, this final rule revises language in 50 CFR 679.20(i).

Comments and Responses

NMFS received 5 comment letters containing a total of 3 unique comments.

Comment 1: Three commenters expressed support for this action.

Response: NMFS acknowledges these comments.

Comment 2: One commenter expressed support while also noting a concern that this action could encourage the fishing industry to push the limits of the MRA for squids and sculpins to obtain profit.

Response: Based on the Analysis, there is limited profit reason to expect the MRA to be pushed to its limits given that squids are low value and there is no current market for sculpins. The primary use of incidentally caught squids would be bait, however squids do not represent a significant portion of production for any processing community in the BSAI or GOA. In addition, the existing MRA for squids and sculpins of 20 percent is an appropriate and effective way to restrict retention while still allowing flexibility in operations. The MRA of 20 percent for squids and sculpins has been in place even before these species were moved to the EC category when there

were no processing restrictions. At that time the instances of exceeding the 20 percent MRA were very rare. Finally, catch monitoring is in place to monitor whether the MRA is exceeded. If there are overages, that would be a regulatory violation that could result in enforcement action.

Comment 3: One commenter stated that the classification of squids and sculpins as EC species is illegal and asserted that removing processing restrictions on squids and sculpins is inconsistent with the Magnuson-Stevens Act and NMFS's regulatory guidance. Specifically, the commenter stated that EC species do not have conservation and management measures and that NMFS is not able to prevent overfishing consistent with NS 1 without such measures. The commenter also stated that classifying species as EC species does not address NS 9's requirements to reduce bycatch to the extent practicable. Finally, the commenter asserts that the classification of squids and sculpins in the EC category is not consistent with the NS guidelines, and that the EC category is not authorized by, or consistent with, the Magnuson-Stevens Act.

Response: This general issue of the classification of EC species is outside the scope of this narrow rulemaking. However, we note that, when NMFS revised the NS guidelines in 2016 (81 FR 71858, October 18, 2016), NMFS included a new regulatory section addressing stocks in need of conservation and management (50 CFR 600.305(c)). The concept of EC species had been introduced in an even earlier 2009 rulemaking to revise the NS guidelines, and the 2016 rule was clear that it intended to provide further guidance on the question of what stocks require conservation and management without changing the previous 2009 guidance on the optional usage of EC species. NMFS addressed this in the 2016 final rule, and also responded to comments regarding whether 50 CFR 600.305(c) was consistent with the Magnuson-Stevens Act and its definition of "conservation and management" at 16 U.S.C. 1802(5) (81 FR 71858, see Comments and Responses Five, Seven, and Eleven). Those responses and the explanations regarding the 2009 and 2016 rulemakings are not repeated here.

While the commenter also argues that the classification of squids and sculpins as EC species was not consistent with the NS and NS guidelines, that issue is likewise outside the scope of this specific rulemaking. The classification of squids and sculpins as EC species occurred in previous rulemakings (85

FR 41427, July 10, 2020 (sculpin); 83 FR 31460, July 6, 2018 (squid)). A detailed review of the provisions and rationale for those actions is provided in their accompanying rulemakings. This action does not change the EC status of squids and sculpins, MRAs for squids and sculpins, or recordkeeping and reporting requirements. The only change to current regulations is to remove the processing restrictions limiting processing and sale of squids and sculpins to fishmeal, and include new regulations on allowable fish products for squids and sculpins. As noted in Section 4.6 of the Analysis, this action would not be expected to increase the amount of squids and sculpins caught incidentally, as this action addresses only whether that incidental harvest could be processed and sold.

In the prior actions classifying squids and sculpins as EC species, the Council and NMFS considered the Magnuson-Stevens Act's requirements, including the NS, and the NS guidelines. Regarding the EC status of squids and sculpins, if conservation and management is determined to be not necessary for a species, a council may recommend moving that species to the EC category of the FMP and adopting management measures for that species. Any recommendation by a council as to whether conservation and management is required for a species needs to be consistent with the NS of the Magnuson-Stevens Act. The NS general guidelines at 50 CFR 600.305(c) lay out a non-exhaustive list of 10 factors a council should consider when deciding whether stocks require conservation and management. The Council and NMFS considered these 10 factors for both squids and sculpins and determined in those prior actions that, because there is no directed fishing for these species and because there are few economic or ecological benefits to be gained by managing squids and sculpins as target stocks, moving these species to the EC category of the Groundfish FMPs was consistent with 50 CFR 600.305(c) and was consistent with the Magnuson-Stevens Act's NS. Both analyses for moving squids and sculpins to the EC category indicated that neither species was experiencing overfishing, and, in the absence of a directed fishery, squids and sculpins are very unlikely to become overfished. The 20 percent MRA for both species, which remains in place as it was before both species were moved to the EC, along with the retention of recordkeeping and reporting requirements, will ensure that there is no overfishing in accordance with NS 1.

In addition, the Council and NMFS considered measures to minimize incidental catch and mortality of EC species, consistent with NS 9, and to protect their role in the ecosystem, consistent with 50 CFR 600.305(c)(5). EC species do not require specification of biological reference points, but will be monitored as new, pertinent scientific information becomes available to determine changes in their status or their vulnerability to groundfish fisheries. By prohibiting directed fishing, maintaining the MRA, and maintaining recordkeeping and reporting requirements, the Council and NMFS recognized in those prior actions that the status quo is effectively being maintained while precluding any significant increase in bycatch. Retention of recordkeeping and reporting requirements provides information necessary should bycatch increase to levels such that conservation and management become necessary.

The Council has multiple tools to manage incidental catch, including maintaining a MRA to meet Council objectives. Contrary to the commenter's assertion that EC species do not have conservation and management measures, there are management measures in place for all EC species, consistent with 50 CFR 600.305(c)(5), and EC species continue to be listed and managed under the Groundfish FMPs. This includes a prohibition on directed fishing, a limit on retention (the 20 percent MRA for squids and sculpins), and recordkeeping and reporting requirements to track retention of EC species. As stated above, this rulemaking does not change any of these management measures for squids and sculpins (or any other EC species).

With regard to this specific action (removing processing restrictions on squids and sculpins), these species would continue to be managed as EC species in the Groundfish FMPs. Targeting of squids and sculpins would continue to be prohibited, but retention of squids and sculpins up to the MRA of 20 percent would be permitted. Recordkeeping and reporting requirements would be maintained. The purpose of this action is to help prevent waste of the incidental catch of these species up to the 20 percent MRA and to align regulations with the longstanding use of squid bycatch as bait. Preventing waste of incidentally caught species increases net benefits to the nation. In sum, as Section 5 of the Analysis for this action indicates, this action is consistent with the Magnuson-Stevens Act, the NS, and NMFS regulatory guidance. Specifically, the removal of processing restrictions on

squids and sculpins mitigates the waste of these incidentally caught species, while management measures remain in place as tools to minimize and monitor bycatch of these species, to protect the roles of these species in the ecosystem, and to determine if later changes are necessary to their EC status.

Changes From the Proposed Rule

No changes were made from the proposed rule.

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this final rule is consistent with the Council's regulatory amendment, the Groundfish FMPs, other provisions of the Magnuson-Stevens Act, and other applicable laws.

This final rule has been determined to be not significant for the purposes of Executive Order 12866.

Certification Under the Regulatory Flexibility Act

The Chief Counsel for Regulation for the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

This final rule contains no information collection requirements under the

Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Dated: May 5, 2021.

Samuel D. Rauch, III

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For reasons set out in the preamble, NMFS amends 50 CFR part 679 as follows:

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

■ 1. The authority citation for part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.*; 1801 *et seq.*; 3631 *et seq.*; Pub. L. 108–447; Pub. L. 111–281.

■ 2. In § 679.20, revise paragraph (i) to read as follows:

§ 679.20 General limitations.

* * * * *

(i) *Forage fish, grenadiers, squids, and sculpins*—(1) *Definition*. See Table 2c to this part.

(2) *Applicability*. The provisions of this paragraph (i) apply to all vessels fishing for groundfish in the BSAI or GOA, and to all vessels processing groundfish harvested in the BSAI or GOA.

(3) *Closure to directed fishing*. Directed fishing for forage fish, grenadiers, squids, and sculpins is prohibited at all times in the BSAI and GOA.

(4) *Limits on sale, barter, trade, and processing of forage fish and grenadiers*. The sale, barter, trade, or processing of forage fish and grenadiers is prohibited, except as provided in paragraph (i)(5) of this section.

(5) *Allowable fishmeal production of forage fish and grenadiers*. Retained catch of forage fish or grenadiers not

exceeding the maximum retainable amount may be processed into fishmeal for sale, barter, or trade.

(6) *Allowable fish products for squids and sculpins*. Retained catch of squids and sculpins not exceeding the maximum retainable amount may be sold to a processor or processed into any product form, including (but not limited to) fishmeal, bait, and whole fish/food fish, for sale, barter, or trade.

RIN 1615–AC14

Collection and Use of Biometrics by U.S. Citizenship and Immigration Services; Withdrawal

AGENCY: U.S. Citizenship and Immigration Services, DHS.

ACTION: Proposed rule; withdrawal.

SUMMARY: The U.S. Department of Homeland Security (DHS) is withdrawing a proposed rule that published on September 11, 2020. The notice of proposed rulemaking proposed to amend DHS regulations concerning the use and collection of biometrics in the enforcement and administration of immigration laws by U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and U.S. Immigration and Customs Enforcement.

DATES: DHS withdraws the proposed rule as of May 10, 2021.

ADDRESSES: The docket for this withdrawn proposed rule is available at <http://www.regulations.gov>. Please search for docket number USCIS–2019–0007.

FOR FURTHER INFORMATION CONTACT: Steven Kvortek, Security and Public Safety Division Acting Chief, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, DHS, 5900 Capital Gateway Drive, Camp Springs, MD 20746; telephone 240–721–3000 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone numbers above via TTY by calling the toll-free Federal Information Relay Service at 1–877–889–5627 (TTY/TDD).

SUPPLEMENTARY INFORMATION: On September 11, 2020, DHS published a notice of proposed rulemaking (NPRM or proposed rule) titled “Collection and Use of Biometrics by U.S. Citizenship and Immigration Services” in the **Federal Register** (85 FR 56338). This rule proposed to amend DHS regulations concerning the use and collection of biometrics in the enforcement and administration of immigration laws by U.S. Citizenship and Immigration Services (USCIS), U.S. Customs and Border Protection (CBP), and U.S. Immigration and Customs Enforcement (ICE). DHS is withdrawing the September 11, 2020, NPRM for a number of reasons.

In response to the NPRM, DHS received 5,147 comments during the 30-day public comment period, and 192 comments on the rule’s information collection requirements before the comment period ended. Commenters consisted of individuals, advocacy groups, legal service providers, professional associations, State or local governments, and social organizations. The majority of commenters expressed general opposition to the rule, mentioning immigration policy concerns, general privacy concerns, and economic concerns (both to individuals and communities). Many commenters wrote that the rule was unnecessary, offensive, an invasion of privacy, would infringe on freedoms, and violate the respect, privacy rights, and civil liberties of U.S. citizens, legal immigrants, noncitizens, victims of domestic violence, other vulnerable parties, and children. Many commenters stated that the rule was overly broad, highly invasive, and would impose excessive monetary costs on applicants and result in administrative delays in adjudicating immigration benefit requests that are already subjected to backlogs and long waits.

Executive Order 14012, “Restoring Faith in Our Legal Immigration Systems and Strengthening Integration and Inclusion Efforts for New Americans,” in section 3(a)(i), instructs the Secretary of Homeland Security to identify barriers that impede access to immigration benefits. 86 FR 8277, (Feb. 5, 2021) (“E.O. 14012”). Having reviewed the public comments received in response to the NPRM in light of Executive Order 14012, DHS has decided to withdraw the NPRM. The

proposed rule was intended to provide DHS with the flexibility to change its biometrics collection practices and policies to ensure that necessary adjustments can be made to meet emerging needs, enhance the use of biometrics beyond background checks and document production to include identity verification and management in the immigration lifecycle, enhance vetting to lessen the dependence on paper documents to prove identity and familial relationships, preclude imposters, and improve the consistency in biometrics terminology within DHS. DHS still supports the goals of the NPRM to have flexibility in its immigration benefit administration biometrics collection practices and policies and enhance the use of biometrics for identity verification and management but not in a way that conflicts with Executive Order 14012. DHS, USCIS, CBP, and ICE remain committed to national security, identity management, fraud prevention and program integrity, and will continue to require the submission of biometrics where appropriate. *See, e.g.*, INA section 333 and 335 (requiring submission of photographs and a personal investigation before an application for naturalization may be approved); INA section 264(a) (directing the collection of fingerprints for the purpose of registering aliens); 8 U.S.C. 1732(b)(1) (requiring that alien visas and other travel and entry documents use biometric identifiers); 8 U.S.C. 1365a–1365b (requiring creation of a biometric data system for national security purposes). DHS may engage in a future rulemaking to enhance our biometrics requirements while not hindering access to the immigration system and protecting privacy and civil liberties.

However, commenters suggested that the breadth of the biometrics submission requirements that were proposed in the proposed rule are more than what is necessary to meet the requirements of the adjudication of immigration and naturalization benefits. DHS has considered the commenters concerns, and believe some of them may be justified and require additional deliberation. Accordingly, DHS is withdrawing the NPRM and will analyze the entirety of the NPRM in the context of the directive in E.O. 14012 and what changes may be appropriate and consistent with DHS’s needs,

policies, and applicable law. In the meantime, DHS' current biometrics collection practices and policies are sufficient to meet the statutory and regulatory requirements for document production and the vetting of any applicant, petitioner, sponsor, beneficiary, or individual filing or associated with an immigration benefit or request, including United States citizens.

Authority

As stated in the NPRM, DHS has general and specific statutory authority to collect or require submission of biometrics from applicants, co-applicants, petitioners requestors, derivatives, beneficiaries and others directly associated with a request for immigration benefits; and for purposes incident to apprehending, arresting, processing, and care and custody of aliens. 85 FR 56347. DHS is withdrawing the NPRM using those same authorities.

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

Employment Authorization for Certain Classes of Aliens With Final Orders of Removal; Withdrawal

AGENCY: U.S. Citizenship and Immigration Services, DHS.

ACTION: Proposed rule; withdrawal.

SUMMARY: The U.S. Department of Homeland Security (DHS) is withdrawing a notice of proposed rulemaking (NPRM) that published on November 19, 2020. The NPRM proposed to revise DHS regulations governing employment authorization for individuals who have a final order of removal and are released from DHS custody on an order of supervision. The NPRM also proposed to amend DHS regulations to clearly indicate the employment eligibility of individuals who have been granted deferral of removal based on the United States' obligations under the Convention

Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (CAT).

DATES: DHS withdraws the NPRM as of May 10, 2021.

ADDRESSES: The docket for this withdrawn proposed rule is available at <http://www.regulations.gov>. Please search for docket number USCIS-2019-0024.

FOR FURTHER INFORMATION CONTACT:

Steven P. Kvortek, Acting Chief, Security and Public Safety Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, DHS, 5900 Capital Gateway Drive, Camp Springs, MD 20746; telephone 240-721-3000 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone numbers above via TTY by calling the toll-free Federal Information Relay Service at 1-877-889-5627 (TTY/TDD).

SUPPLEMENTARY INFORMATION: On November 19, 2020, DHS published an NPRM titled "Employment Authorization for Certain Classes of Aliens With Final Orders of Removal." (85 FR 74196). This NPRM proposed to eliminate employment authorization under 8 CFR 274a.12(c)(18) for individuals who have a final order of removal and are released on an order of supervision with a narrow exception. DHS also proposed to amend its regulations to clearly indicate that individuals who have been granted CAT deferral of removal would be employment authorized based on their grant of CAT deferral of removal.

In response to the NPRM, DHS received more than 302 comments during the 30-day public comment period. Nearly 98 percent of commenters opposed the proposed rule with several commenters specifically requesting that DHS withdraw the NPRM.¹ Less than 2 percent expressed support for the rule with such commenters generally supporting the rule because they believed it would deter illegal immigration and protect U.S. workers. The commenters who opposed the NPRM argued that it would significantly limit the ability of individuals who have a final order of removal and are released on an order of supervision to legally work, be self-sufficient, and support their families, which may include U.S. citizen children and lawful permanent resident spouses or partners. Several commenters also noted the proposed rule would impose exorbitant costs and burdens on U.S.

employers related to labor turnover and the proposed E-Verify requirement. Various state and local agencies, including Attorneys General from 15 states, also opposed the rule on the basis it would decrease tax revenue, deny states various revenue streams, and increase costs related to state-funded public benefit programs. Many commenters also disagreed with the NPRM's assertion that the proposed changes would incentivize individuals with final orders of removal to leave the United States. They argued that the majority of individuals who have a final order of removal and are released on an order of supervision are in the United States with DHS's acknowledgment, as reflected by their release on an order of supervision, and that DHS's inability to remove them primarily stems not from inaction on the individual's part but due to the unwillingness of foreign governments to issue them travel documents and cooperate in their repatriation.

The NPRM stemmed from two executive orders issued by President Trump, which have been revoked since the publication of the NPRM. DHS initiated the regulatory action pursuant to Executive Order 13768, "Enhancing Public Safety in the Interior of the United States" (Jan. 24, 2017) and Executive Order 13788, "Buy American and Hire American" (Apr. 18, 2017). These executive orders directed DHS to revise or rescind any regulations inconsistent with these orders. DHS issued the NPRM after determining that the current regulations at 8 CFR 274a.12(c)(18) could be inconsistent with the above-mentioned executive orders.

On January 20, 2021, President Biden issued Executive Order 13993, "Revision of Civil Immigration Enforcement Policies and Priorities," which revoked Executive Order 13768. Further, on January 25, 2021, President Biden issued Executive Order 14005, "Ensuring the Future Is Made in All of America by All of America's Workers," which revoked Executive Order 13788. Executive Orders 13993 and 14005 directed agencies to review, revise, or rescind any agency actions or guidance inconsistent with the executive orders.

Having reviewed the NPRM and the public comments in light of Executive Orders 13993 and 14005, DHS has decided to withdraw the NPRM. The original bases and rationale for promulgating the NPRM no longer align with the current Administration's immigration enforcement priorities. This Administration is focused on protecting the interests of American workers by ensuring the "[Federal

¹ Comments may be viewed at the Federal Docket Management System (FDMS) at <http://www.regulations.gov>, docket number USCIS-2019-0024.

Government] . . . procure[s] goods, products, materials, and services from sources that will help American businesses compete in strategic industries and help America's workers thrive." By withdrawing the proposed rule, the Administration will allow individuals with final orders of removal who are released from DHS custody on an order of supervision, and are in a position to work, to continue to work for American businesses that provide services in key industries and to supplement the existing U.S. workforce.

As noted in Executive Order 13933, which articulates the Administration's overarching values and priorities on civil immigration enforcement, "the task of enforcing the immigration laws is complex and requires setting priorities to best serve the national interest."² DHS has been directed to focus its limited resources on national and border security, addressing the humanitarian challenges at the southern border, and ensuring public health and safety.³ In doing so, DHS must develop enforcement priorities and use its limited resources to pursue those priorities. Additionally, the limited resources of the agency and the significant operational challenges caused by the COVID-19 pandemic do not allow DHS to respond to all immigration violations or remove all individuals with a final order of removal.⁴ DHS's enforcement priorities, including removals, are to be focused on national security, public safety, and border security.⁵

DHS believes that continuing to provide employment authorization to individuals who have a final order of removal and are released from DHS custody on an order of supervision is consistent with this Administration's values and priorities on immigration enforcement. It will allow individuals who do not fall within the Administration's enforcement priorities and who are still in the United States to continue to qualify for employment authorization, to legally work, remain self-sufficient, and support their families, which in many instances include U.S. citizen children.

This withdrawal notice does not affect the continued employment eligibility of individuals who have been granted CAT

deferral of removal. Such individuals currently qualify for employment authorization under 8 CFR 274a.12(c)(18) and will continue to do so. The primary purpose behind the proposed regulatory amendments related to individuals with CAT deferral of removal was to clearly indicate in the regulations that individuals with CAT deferral of removal are eligible for employment authorization. Even though DHS is not pursuing the proposed regulatory amendments at this time, individuals who are granted CAT deferral of removal will continue to qualify for employment authorization under 8 CFR 274a.12(c)(18). DHS plans to consider similar regulatory amendments clarifying eligibility for employment authorization for individuals with CAT deferral of removal as part of future rulemaking efforts consistent with DHS's priorities, policies, and applicable law.

For all the reasons discussed above, DHS is withdrawing the NPRM.

Authority

As stated in the NPRM, DHS has general and specific statutory authority to detain individuals with final orders of removal, release such individuals from custody on an order of supervision, and grant them employment authorization. 85 FR 74211. DHS is withdrawing the NPRM using those same authorities. Executive Order 13993, "Revision of Civil Immigration Enforcement Policies and Priorities;" Executive Order 14005, "Ensuring the Future Is Made in All of America by All of America's Workers;" 8 U.S.C. 1324a(h)(3); and 8 U.S.C. 1231(a)(7).

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

BILLING CODE 9111-97-P

DEPARTMENT OF ENERGY

10 CFR Part 431

[EERE-2011-BT-DET-0045]

RIN 1904-AC55

Energy Conservation Program: Coverage Determination for Commercial and Industrial Fans

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Request for information.

SUMMARY: The U.S. Department of Energy ("DOE") requests comment on a

potential definition of "commercial and industrial fan" for consideration in determining whether such equipment should be classified as covered equipment under Part C of Title III of the Energy Policy and Conservation Act, as amended. DOE welcomes written comments from the public on any subject within the scope of this document (including topics not raised in this RFI), as well as the submission of data and other relevant information.

DATES: Written comments and information are requested and will be accepted on or before May 25, 2021.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at <http://www.regulations.gov>. Follow the instructions for submitting comments. Alternatively, interested persons may submit comments, identified by docket number EERE-2011-BT-DET-0045, by any of the following methods:

1. *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

2. *Email:* to commercialindustrialfansDET0045@ee.doe.gov. Include docket number EERE-2011-BT-DET-0045 in the subject line of the message.

No telefacsimiles ("faxes") will be accepted. For detailed instructions on submitting comments and additional information on this process, see section III of this document.

Although DOE has routinely accepted public comment submissions through a variety of mechanisms, including postal mail and hand delivery/courier, the Department has found it necessary to make temporary modifications to the comment submission process in light of the ongoing Covid-19 pandemic. DOE is currently suspending receipt of public comments via postal mail and hand delivery/courier. If a commenter finds that this change poses an undue hardship, please contact Appliance Standards Program staff at (202) 586-1445 to discuss the need for alternative arrangements. Once the Covid-19 pandemic health emergency is resolved, DOE anticipates resuming all of its regular options for public comment submission, including postal mail and hand delivery/courier.

Docket: The docket for this activity, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at <http://www.regulations.gov>. All documents in the docket are listed in the <http://www.regulations.gov> index. However, some documents listed in the index, such as those containing information

Mr. Pete Cochran, U.S. Department of Energy, Office of the General Counsel, GC-33, 1000 Independence Avenue SW, Washington, DC, 20585-0121. Telephone: (202) 586-9496. Email: peter.cochran@hq.doe.gov.

For further information on how to submit a comment or review other public comments and the docket, contact the Appliance and Equipment Standards Program staff at (202) 287-1445 or by email: ApplianceStandardsQuestions@ee.doe.gov.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
 - A. Authority
 - B. Background
- II. Request for Information
- III. Submission of Comments

I. Introduction

The following section briefly discusses the statutory authority underlying this request for information, as well as some of the historical background relevant to the potential inclusion of commercial and industrial fans as covered equipment under the Energy Policy and Conservation Act, as amended (“EPCA”).¹

A. Authority

EPCA authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. (42 U.S.C. 6291–6317) Title III, Part C² of EPCA established the Energy Conservation Program for Certain Industrial

Equipment, which sets forth a variety of provisions designed to improve energy efficiency of certain commercial and industrial equipment (hereafter referred to as “covered equipment”).

EPCA specifies a list of equipment that constitutes covered equipment. (42 U.S.C. 6311(1)) EPCA also provides that “covered equipment” includes any other type of industrial equipment for which the Secretary of Energy (“Secretary”) determines inclusion is necessary to carry out the purpose of this part. (42 U.S.C. 6311(1)(L); 42 U.S.C. 6312(b)) EPCA specifies the types of industrial equipment that can be classified as covered equipment. This industrial equipment includes fans and blowers. (42 U.S.C. 6311(2)(B)(ii) and (iii)) Additionally, in order to be classified as covered equipment, the industrial equipment must be of a type that: (1) Consumes, or is designed to consume, energy in operation; (2) is distributed in commerce for industrial or commercial use; and (3) is not a covered product as defined in 42 U.S.C. 6291(a)(2). (42 U.S.C. 6311(2)(A))

B. Background

On June 28, 2011, DOE published a notice of proposed determination of coverage that fans, blowers, and fume hoods qualify as covered equipment. 76 FR 37678 (“June 2011 NOPD”). DOE also proposed definitions for the terms “fan,” “blower,” and “fume hood.”

In the June 2011 NOPD, DOE preliminarily determined that coverage of fans, blowers, and fume hoods is necessary to carry out the purposes of Part A–1 because coverage will promote the conservation of energy supplies. 76 FR 37678, 37680. DOE estimated that technologies exist which can reduce the electricity consumption of fans and blowers by as much as 20 percent and that there are technologies and design strategies for fume hoods that could reduce energy by 50 percent. *Id.* DOE requested comment on the proposed definitions and its preliminary determination that coverage of fans, blower, and fume hoods is necessary to carry out the purposes of Part A–1. 76 FR 37678, 37682.

In parallel with the proposed determination rulemaking process, DOE published notice of a framework document that detailed an analytical approach for developing potential energy conservation standards for commercial and industrial fans and blowers should the Secretary classify such industrial equipment as covered equipment.³ 78 FR 7306 (February 1,

2013). The January 2013 Framework Document included revised definitions for “fan” and “blower.”

DOE also established a negotiated rulemaking working group under the Appliance Standards and Rulemaking Federal Advisory Committee to negotiate proposed definitions, test procedures and energy conservation standards for commercial and industrial fans and blowers. The Working Group held 16 meetings and three webinars and concluded its negotiations on September 3, 2015, with the approval of a term sheet containing recommendations for DOE.⁴

On January 10, 2020, DOE received a petition from the Air Movement and Control Association (AMCA), International, Air Conditioning Contractors of America, and Sheet Metal & Air Conditioning Contractors of America requesting that DOE establish a Federal test procedure for certain categories of fans based on an upcoming industry test method, AMCA 214, Test Procedure for Calculating Fan Energy Index (FEI) for Commercial and Industrial Fans and Blowers. DOE published a notice of petition and request for public comment. 85 FR 22677 (April 23, 2020) (“April 2020 Notice of Petition”).

To date DOE has not classified commercial and industrial fans as covered equipment and has not proposed test procedures or energy conservation standards for this equipment.

II. Request for Information

Although EPCA lists fans and blowers as types of industrial equipment, these terms are not defined. As noted, DOE proposed definitions for “fan” and “blower” in the June 2011 NOPD. Specifically, DOE proposed the following definitions:

A *fan* is an electrically powered device used in commercial or industrial systems to provide a continuous flow of a gas, typically air, for ventilation, circulation, or other industrial process requirements. Fans are classified as axial or centrifugal. Axial fans move an airstream along the axis of the fan. Centrifugal fans generate airflow by accelerating the airstream radially. A fan may include some or all of the following components: motor and motor controls, rotor or fan blades, and transmission and housing.

A *blower* is a type of centrifugal fan.

June 2011 NOPD, 76 FR 37678, 37679. Taking into consideration the comments

¹ All references to EPCA in this document refer to the statute as amended through the Energy Act of 2020, Public Law 116–260 (Dec. 27, 2020).

² For editorial reasons, upon codification in the U.S. Code, Part C was redesignated Part A–1.

³ The framework document is available at [https://www.regulations.gov/document?D=EERE-2013-BT-](https://www.regulations.gov/document?D=EERE-2013-BT-STD-0006-0001)

STD-0006-0001 (“January 2013 Framework Document”).

⁴ All Working Group documents, including the term sheet, are available at: <https://www.regulations.gov/docket/EERE-2013-BT-STD-0006>.

received to the June 2011 NOPD, DOE considered the following definitions for “fan” and “blower” in the January 2013 Framework Document:

Commercial/Industrial Fan: A device used in commercial or industrial systems to provide a continuous flow of a gas, typically air, by an impeller fit to a shaft and bearing(s). A fan may be manufactured with or without a housing component.

Blower: An axial or centrifugal fan with a specific ratio between 1.11 and 1.20.

(January 2013 Framework Document at pp. 7 and 9) DOE also acknowledged that the terms “fan” and “blower” are used interchangeably by the industry. *Id.* at p. 7.

The industry test procedure referenced in AMCA’s petition for a federal test procedure has since been finalized as ANSI/AMCA Standard 214–21, Test Procedure for Calculating Fan Energy Index (FEI) for Commercial and Industrial Fans and Blowers (“ANSI/AMCA Standard 214–21”).⁵ The newly finalized industry test procedure contains the following definition for a fan: “a rotary-bladed machine used to convert electrical or mechanical power to air power, with an energy output limited to 25 kJ/kg of air. It consists of an impeller, shaft and bearings and/or driver to support the impeller as well as a structure or housing. A fan may include a transmission, driver and/or motor controller.”⁶

DOE is considering establishing a definition of “commercial and industrial fan” that is identical to the definition of “fan” in ANSI/AMCA Standard 214–21. As discussed, DOE has initially determined that the terms “fan” and “blower” are used interchangeably. DOE is considering including the descriptor “commercial and industrial” with the term to clarify that the subject fans are industrial equipment and that the term excludes ceiling fans and furnace fans, both covered products defined at 10 CFR 430.2.

DOE notes that the maximum energy limit of 25 kJ/kg of air is equivalent to a pressure ratio of 1.3.⁷ The current definition of a compressor at 10 CFR 431.342 states that, among other things, a compressor has a pressure ratio at full-load operating pressure greater than 1.3. As a result, DOE initially concludes that the maximum fan energy limit of 25 kJ/kg is appropriate to distinguish

commercial and industrial fans from compressors.

With regard to the criterion that a commercial and industrial fan must convert “electrical and mechanical power into air power,” fans that are powered by an engine or any other driver would meet this criterion as the engine or other driver would be providing mechanical power that is converted into air power.

DOE requests comment on the definition of commercial and industrial fans as considered in this RFI. The definition being considered is identical to the definition of “fan” in ANSI/AMCA Standard 214–21. Specifically, DOE is requesting comment on whether this definition would accurately describe equipment generally understood as commercial and industrial fans.

III. Submission of Comments

DOE invites all interested parties to submit in writing by the date specified under the **DATES** heading, comments and information on matters addressed in this RFI for commercial and industrial fans. These comments and information will aid in the development of a final determination for commercial and industrial fans if DOE determines that a final determination is appropriate for this equipment.

Submitting comments via <http://www.regulations.gov>. The <http://www.regulations.gov> web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Following this instruction, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to <http://www.regulations.gov> information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (“CBI”)). Comments submitted through <http://www.regulations.gov> cannot be claimed as CBI. Comments received through the website will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through <http://www.regulations.gov> before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that <http://www.regulations.gov> provides after you have successfully uploaded your comment.

Submitting comments via email. Comments and documents submitted via email also will be posted to <http://www.regulations.gov>. If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information on a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. Faxes will not be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English and free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters’ names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. According to 10 CFR 1004.11, any

⁵ ANSI/AMCA Standard 214–21 is available at: <https://www.amca.org/assets/resources/public/pdf/Publications/AMCA-214-21.pdf>.

⁶ ANSI/AMCA Standard 214–21 at p. 3.

⁷ For an air density of 1.2 kg/m³, the fan pressure is 1.2 kg/m³ × 25 kJ/kg, i.e., 30 kPa, and the pressure ratio is calculated as (100+30)/100 = 1.30 (where atmospheric pressure = 100 kPa).

person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: one copy of the document marked confidential including all the information believed to be confidential, and one copy of the document marked “non-confidential” with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

It is DOE’s policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

DOE considers public participation to be a very important part of the process for developing test procedures and energy conservation standards. DOE actively encourages the participation and interaction of the public during the comment period in each stage of this process. Interactions with and between members of the public provide a balanced discussion of the issues and assist DOE in the process. Anyone who wishes to be added to the DOE mailing list to receive future notices and information about this process should contact Appliance and Equipment Standards Program staff at (202) 287–1445 or via email at ApplianceStandardsQuestions@ee.doe.gov.

Signing Authority

This document of the Department of Energy was signed on April 25, 2021 by Kelly Speakes-Backman, Principal Deputy Assistant Secretary and Acting Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on May 4, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

Tax Allocation Agreements

AGENCY: Office of the Comptroller of the Currency, Treasury; Board of Governors of the Federal Reserve System; and Federal Deposit Insurance Corporation.

ACTION: Notice of proposed rulemaking and comment request.

SUMMARY: The Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation (collectively, the agencies) are inviting comment on a proposed rule (proposal) under section 39 of the Federal Deposit Insurance Act that would establish requirements for tax allocation agreements between institutions and their holding companies in a consolidated tax filing group. The proposal would promote safety and soundness by preserving depository institutions’ ownership rights in tax refunds and ensuring equitable allocation of tax liabilities among entities in a holding company structure. Under the proposal, national banks, state banks, and savings associations that file tax returns as part of a consolidated tax filing group would be required to enter into tax allocation agreements with their holding companies and other members of the consolidated group that join in the filing of a consolidated group tax return. The proposal also would describe specific

mandatory provisions in these tax allocation agreements, including provisions addressing the ownership of tax refunds received. If the agencies were to adopt the proposal as a final rule, the agencies would rescind the interagency policy statement on tax allocation agreements that was issued in 1998 and supplemented in 2014.

DATES: Comments must be received by July 9, 2021.

ADDRESSES: Comments should be directed to:

OCC: Commenters are encouraged to submit comments through the Federal eRulemaking Portal. Please use the title “Tax Allocation Agreements” to facilitate the organization and distribution of the comments. You may submit comments by any of the following methods:

- **Federal eRulemaking Portal—Regulations.gov:** Go to <https://regulations.gov/>. Enter “Docket ID OCC–2020–0043” in the Search Box and click “Search.” Public comments can be submitted via the “Comment” box below the displayed document information or by clicking on the document title and then clicking the “Comment” box on the top-left side of the screen. For help with submitting effective comments please click on “Commenter’s Checklist.” For assistance with the *Regulations.gov* site, please call (877) 378–5457 (toll free) or (703) 454–9859 Monday–Friday, 9 a.m.–5 p.m. ET or email erulemakinghelpdesk.com.

- **Mail:** Chief Counsel’s Office, Attention: Comment Processing, Office of the Comptroller of the Currency, 400 7th Street SW, Suite 3E–218, Washington, DC 20219.

- **Hand Delivery/Courier:** 400 7th Street SW, Suite 3E–218, Washington, DC 20219.

Instructions: You must include “OCC” as the agency name and “Docket ID OCC–2020–0043” in your comment. In general, the OCC will enter all comments received into the docket and publish the comments on the *Regulations.gov* website without change, including any business or personal information provided such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

You may review comments and other related materials that pertain to this action by the following method:

• *Viewing Comments Electronically—Regulations.gov:* Go to <https://regulations.gov/>. Enter “Docket ID OCC–2020–0043” in the Search Box and click “Search.” Click on the “Documents” tab and then the document’s title. After clicking the document’s title, click the “Browse Comments” tab. Comments can be viewed and filtered by clicking on the “Sort By” drop-down on the right side of the screen or the “Refine Results” options on the left side of the screen. Supporting materials can be viewed by clicking on the “Documents” tab and filtered by clicking on the “Sort By” drop-down on the right side of the screen or the “Refine Documents Results” options on the left side of the screen.” For assistance with the *Regulations.gov* site, please call (877) 378–5457 (toll free) or (703) 454–9859 Monday–Friday, 9 a.m.–5 p.m. ET or email regulations@erulemakinghelpdesk.com.

The docket may be viewed after the close of the comment period in the same manner as during the comment period.

Board: When submitting comments, please consider submitting your comments by email or fax because paper mail in the Washington, DC, area and at the Board may be subject to delay.

You may submit comments, identified by Docket No. R–1746; RIN 7100–AG 14, by any of the following method:

• *Agency Website:* <http://www.federalreserve.gov>. Follow the instructions for submitting comments at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm>.

• *Email:* regs.comments@federalreserve.gov. Include docket and RIN numbers in the subject line of the message.

• *Fax:* (202) 452–3819 or (202) 452–3102.

• *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments will be made available on the Board’s website at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm> as submitted, unless modified for technical reasons. Accordingly, comments will not be edited to remove any identifying or contact information unless specifically requested by the commenter. Public comments may also be viewed in paper in Room 146, 1709 New York Avenue NW, Washington, DC 20006, between 9:00 a.m. and 5:00 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684.

FDIC: You may submit comments, identified by FDIC RIN 3064–AF62, by any of the following methods:

• *Agency Website:* <https://www.fdic.gov/regulations/laws/federal/>. Follow instructions for submitting comments on the Agency website.

• *Mail:* James P. Sheesley, Assistant Executive Secretary, Attention: Comments—RIN 3064–AF62/Legal ESS, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

• *Hand Delivery/Courier:* Comments may be hand-delivered to the guard station at the rear of the 550 17th Street NW building (located on F Street) on business days between 7:00 a.m. and 5:00 p.m.

• *Email:* comments@FDIC.gov. Comments submitted must include “FDIC RIN 3064–AF62” on the subject line of the message.

• *Public Inspection:* All comments received must include “FDIC RIN 3064–AF62” for this rulemaking. All comments received will be posted without change to <https://www.fdic.gov/regulations/laws/federal/>, including any personal information provided. Paper copies of public comments may be requested from the FDIC Public Information Center, or by telephone at (877) 275–3342 or (703) 562–2200.

I. Introduction

A. Summary of Proposal

The Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (Board), and the Federal Deposit Insurance Corporation (FDIC) (collectively, the agencies) are inviting comment on a proposed rule (proposal) that would prescribe requirements for tax allocation agreements that involve insured depository institutions and OCC chartered uninsured institutions supervised by the agencies (collectively, institutions).¹ Under the proposal, institutions in a consolidated tax filing group (consolidated group²) would be required to enter into tax allocation agreements with their holding companies and other members of the consolidated group that join in the filing of a consolidated group tax return. The proposal would establish a methodology for tax payment obligations between an institution and its parent holding company within a consolidated group

¹ National banks and Federal savings associations, (OCC); state member banks (Board); and state nonmember banks and state savings associations (FDIC).

² A consolidated group refers to an institution, its parent, and any affiliates of the institution that join in the filing of a tax return as a single consolidated, combined, or unitary group.

and would address how the institution should be compensated for the use of its tax assets (such as net operating losses and tax credits). The proposal would be adopted primarily under Section 39 of the Federal Deposit Insurance Act (FDI Act)³ and codified within the agencies' safety and soundness regulations.⁴

The proposal would require institutions to include certain provisions in all tax allocation agreements, such as: The timing and amounts of any payments for taxes due to taxing authorities; the acknowledgment of an agency relationship between institutions and their holding companies in a consolidated group with respect to tax refunds received; and a provision stating that documents, including returns, relating to consolidated or combined federal, state, or local income tax filings must be made available to an institution or any successor during regular business hours. The proposal further addresses the regulatory reporting treatment of an institution's deferred tax assets (DTAs).

B. Background

In 1998, the agencies and the Office of Thrift Supervision⁵ adopted the Interagency Policy Statement on Income Tax Allocation in a Holding Company Structure⁶ (Interagency Policy Statement) to provide guidance to insured depository institutions, their holding companies, and other affiliates regarding the allocation and payment of taxes when these entities file income tax returns on a consolidated basis. One of the principal goals of the Interagency Policy Statement is to clarify insured depository institutions' ownership rights in tax refunds when the consolidated group elects to file a consolidated tax return. The Interagency Policy Statement states that tax settlements between an insured depository institution and its holding company should be conducted in a manner that is no less favorable to the insured depository institution than if it were a separate taxpayer, and that whenever a holding company receives a tax refund from any taxing authority, and the refund is one that is attributable to its subsidiary insured depository institution, the holding company is

acting purely as an agent for the insured depository institution.

In 2014, the agencies issued an addendum to the Interagency Policy Statement to emphasize that tax allocation agreements should expressly acknowledge an agency relationship between a holding company and its subsidiary insured depository institution to protect the insured depository institution's ownership rights in tax refunds (2014 Addendum).⁷ The 2014 Addendum also clarifies that all tax allocation agreements are subject to section 23B of the Federal Reserve Act (section 23B).⁸ In addition, the 2014 Addendum provides that tax allocation agreements that do not clearly acknowledge the presence of an agency relationship between the holding company and the subsidiary insured depository institution may be subject to requirements under section 23A of the Federal Reserve Act (section 23A).⁹ Moreover, the 2014 Addendum clarifies that section 23B requires a holding company to transmit promptly to its subsidiary insured depository institution any tax refunds received from a taxing authority that are attributable to the insured depository institution. Sections 23A and 23B apply to institutions supervised by the agencies.¹⁰

In their supervision of institutions, the agencies have observed that some

institutions in consolidated groups either lack tax allocation agreements with their holding companies or have agreements that do not have language conforming with section 23A or 23B. In particular, the agencies have reviewed tax allocation agreements that do not require a holding company in a consolidated group to transmit promptly the appropriate portion of a consolidated group's tax refund to its subsidiary institution, resulting in the holding company failing to do so in some instances. Such inaction could adversely affect the safety and soundness of the subsidiary institutions because delayed access to funds could weaken an institution's liquidity profile. Further, in its capacity as receiver for failed insured depository institutions, the FDIC has engaged in legal disputes regarding the ownership of tax refunds claimed by holding companies based on losses incurred by insured depository institutions in a consolidated group because the tax allocation agreements did not clearly acknowledge an agency relationship between an insured depository institution and its holding company. These disputes can reduce or prevent recoveries by the FDIC on behalf of failed insured depository institutions, consequently increase costs to the Deposit Insurance Fund, and thus could lead to higher FDIC deposit insurance premiums charged to solvent insured depository institutions.

II. Description of the Proposal

A. Scope of Application

The proposal would apply to all institutions that file federal and state income taxes in a consolidated group in which one or more of the institutions in the consolidated group is supervised by any of the agencies. A consolidated group refers to an institution, its parent, and any affiliates of the institution that join in the filing of a tax return as a single consolidated, combined, or unitary group. While the Interagency Policy Statement and 2014 Addendum only apply to insured depository institutions, the OCC has observed similar problematic tax practices at uninsured institutions it supervises. Therefore, the OCC proposes to apply relevant provisions of the proposal to uninsured institutions as well.

In contrast, institutions that do not file federal and state income taxes as members of a consolidated group file separately and account for taxes on a separate entity basis. Therefore, an institution that files on a separate entity basis or in a group consisting solely of the institution and its subsidiaries would not be subject to the proposal.

⁴ 12 CFR part 30 (OCC); 12 CFR part 208 (Board); 12 CFR part 364 (FDIC).

⁵ The functions of the Office of Thrift Supervision were transferred to the OCC and FDIC in accordance with Title III of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111-203, enacted July 21, 2010.

⁶ 63 FR 64757 (Nov. 23, 1998).

⁷ 79 FR 35228 (June 19, 2014).

⁸ 12 U.S.C. 371c-1.

⁹ 12 U.S.C. 371c. Section 23A requires, among other things, that loans and other extensions of credit from an insured depository institution to its affiliate be collateralized properly by a specified amount and subject to certain quantitative limits. Issues concerning compliance with section 23A could arise from instances whereby a tax allocation agreement does not (i) acknowledge that a holding company in a consolidated group serves as agent for its subsidiary insured depository institution with respect to tax refunds generated by the subsidiary insured depository institution, or (ii) require a holding company in a consolidated group to transmit promptly the appropriate portion of a consolidated group's tax refund to the subsidiary insured depository institution. In such circumstances, the failure of a holding company to acknowledge an agency relationship with respect to tax refunds or to pay promptly the subsidiary insured depository institution its appropriate portion of tax refunds could result in an extension of credit from the insured depository institution to its affiliated holding company in the consolidated group that would be subject to the requirements of section 23A.

¹⁰ Sections 23A and 23B and 12 CFR part 223 apply by their terms to "member banks", that is, any national bank, State bank, trust company, or other institution that is a member of the Federal Reserve System. In addition, the Federal Deposit Insurance Act (12 U.S.C. 1828(j)) applies sections 23A and 23B to insured State nonmember banks in the same manner and to the same extent as if they were member banks. The Home Owners' Loan Act (12 U.S.C. 1468(a)) also applies sections 23A and 23B to insured savings associations in the same manner and to the same extent as if they were member banks.

The proposal also would not apply to an institution if the institution or its holding company is not subject to corporate income taxes at either the federal or state level, such as those that have elected S-Corporation status and do not have an obligation to pay corporate income taxes.¹¹

Question [1]: Is the scope of application of the proposal appropriate, and what are the advantages and disadvantages of this scope?

B. Tax Allocation in a Holding Company Structure

As noted, a holding company and its bank subsidiaries have the ability to file a consolidated group income tax return. However, each depository institution is viewed as, and reports as, a separate legal and accounting entity for certain regulatory purposes, including for regulatory capital requirements. When a depository institution has subsidiaries of its own, the institution's applicable income taxes on a separate entity basis include the taxes of the subsidiaries of the institution itself that are included with the institution in the consolidated group return. Accordingly, each depository institution's applicable income taxes, reflecting either an expense or benefit, should be recorded in its books and records and reflected in the institution's regulatory reports as if the institution had filed on a separate entity basis. Throughout this notice, the terms "separate entity" and "separate taxpayer" are used synonymously. Furthermore, the amount and timing of payments or refunds should not be in any case less favorable to the institution than if the institution were a separate taxpayer. Any practice that is not consistent with this principle may be viewed as an unsafe or unsound practice.

C. Tax Allocation Agreements and Key Terms

The proposal would require that all institutions that are subject to Federal or State tax and file tax returns as part of a consolidated group execute a tax allocation agreement that applies to and binds each member of the consolidated group. The proposal also would require that the tax allocation agreement be approved by the boards of directors of an institution subject to that tax allocation agreement and its holding company to ensure the agreement's enforceability by and among the institutions in the consolidated group.

Section 23A and 23B generally govern extensions of credit and certain other transactions between institutions and their affiliates, which include their holding companies. Section 23A places quantitative limits on covered transactions between an institution and its affiliates and imposes collateral requirements on certain covered transactions. Section 23B requires that transactions between an institution and its affiliates be made on terms and under circumstances that are substantially the same, or at least as favorable to the institution, as comparable transactions involving nonaffiliated companies or, in the absence of the comparable transactions, on terms and circumstances that would in good faith be offered to nonaffiliated companies. The tax allocation agreement requirements in the proposal are intended to be consistent with sections 23A and 23B.

As mentioned above, one of the principles of the Interagency Policy Statement is that a tax allocation agreement cannot result in terms less favorable to an institution than if the institution filed its income tax return on a separate entity basis (that is, not as part of a consolidated group). To achieve this result, tax allocation agreements subject to the proposal would be required to establish certain rights and obligations among institutions in the consolidated group. Adjustments for statutory tax considerations that may arise on a consolidated tax return are permitted as long as the adjustments are made on a basis that is equitable and consistently applied among the holding company and other affiliates. Certain proposed key terms that would be required under the proposal for tax allocation agreements are explained below.

The proposal clarifies that, in terms of timing, an institution must be compensated for the use of its tax assets by the parent or other members of the consolidated group at the time the relevant tax asset is absorbed by the consolidated group. The proposal also clarifies that an institution must be promptly remitted any tax refund received (by the holding company) from a taxing authority that is based on the institution's tax attributes.¹² This is a common approach taken in tax sharing agreements, would promote safety and soundness by ensuring that an institution receives the benefit of its tax attributes, and is the approach least

likely to create an extension of credit under section 23A.

Question [2]: While the agencies expect refunds would be transmitted to the institution as soon as possible, what are the advantages and disadvantages of the agencies requiring that an institution receive any tax refund based on its tax attributes within a specific timeframe from the date received? What would be an appropriate timeframe, and why?

Question [3]: What are the advantages and disadvantages of requiring that a parent or other members of a consolidated group compensate an institution for the use of its tax assets if and when the relevant tax asset is absorbed or used? How do these advantages and disadvantages compare to the advantages and disadvantages of other approaches including, for example, requiring that a parent or other members of the consolidated group compensate an institution for use of its tax assets if and when the institution would have been able to use the tax asset on a stand-alone basis?

Agency Relationship

As discussed in the preamble to the 2014 Addendum, there have been many legal disputes between holding companies and the FDIC, as receiver for failed insured depository institutions, regarding the ownership of tax refunds generated by the insured depository institutions. In reported decisions, some courts have found that tax refunds generated by an insured depository institution were the property of its holding company based on certain language contained in their tax allocation agreements that the courts have interpreted as creating a debtor-creditor relationship.¹³ As a result, the FDIC's Deposit Insurance Fund has a material stake in the outcome of these legal disputes because they may lead to significant losses to creditors of the receiverships and, ultimately, the Deposit Insurance Fund.¹⁴ Therefore, the agencies are proposing that holding companies receive refunds due to institutions (if attributable to the tax attributes of an institution) in trust and promptly remit them to the institutions for two reasons. First, an institution's prompt receipt of refunds that are based on the tax attributes created by that institution would allow management to

¹¹ S-corporations are corporations that elect to pass corporate income, losses, deductions, and credits through to their shareholders for federal tax purposes under Subchapter S of the Internal Revenue Code. See 26 U.S.C. 1361 *et seq.*

¹² If an overpayment of tax is applied as a credit toward estimated tax or other payments due, the tax refund would be considered received by the holding company when it files the return electing to apply the refund as a credit.

¹³ See, e.g., *In re IndyMac Bancorp, Inc.*, 2012 WL 1037481 (Bankr. C.D. Cal. Mar. 29, 2012); *In re Downey Financial Corp.*, 593 F. App'x 123 (3d Cir. 2015).

¹⁴ The Deposit Insurance Fund is funded primarily from deposit insurance assessments collected by the FDIC from insured depository institutions.

direct those funds for the immediate benefit of the institution that owns them, rather than allowing them to be retained for the benefit of the holding company. Second, receipt of the refund by the institution strengthens the institution's liquidity profile as compared to a receivable from the holding company, and reduces the risk that a refund paid by the taxing authority to the holding company based on use of the institution's tax attributes would be diverted to the holding company's creditors or other affiliates.

Under the proposal, a group's tax allocation agreement must specify that an agency relationship exists between the institution and its holding company, including an affiliate of the institution that submits tax returns for the consolidated group with respect to tax refunds. The proposal would clarify that the subsidiary institution must enter into a tax allocation agreement that specifies that the institution owns any tax refund that is created from or results from its tax attributes. A group tax allocation agreement must state that the holding company receives any portion of the tax refund related to the subsidiary institution's tax attributes in trust for the benefit of the subsidiary institution, including, for example, when a holding company receives a tax refund for a consolidated group, and some or all of the tax refund is due to tax attributes¹⁵ of a subsidiary institution. Further, under the proposal, the tax allocation agreement must provide that the holding company will remit the refund promptly to the subsidiary institution. Finally, to avoid any transactions that would prevent institutions from receiving tax refunds attributable to their tax attributes, the tax allocation agreement must provide that, notwithstanding any other transactions or agreements to the contrary, the institution must receive any tax refund attributable to its tax attributes.¹⁶

Tax Payments to a Holding Company

The proposal also would address the timing and amount of tax payments¹⁷ made to a holding company by an institution in a consolidated group. Specifically, the proposal would require an institution to be a party to a tax

allocation agreement that prohibits tax payments by the institution to its affiliates in excess of the current period tax obligation of the institution calculated on a separate entity basis. This requirement would reduce the risk that the holding company would use the institution's funds to pay expenses or offset tax liabilities owed by the holding company or its other affiliates (other than the institution).

Remitting a current period tax expense payment to a holding company significantly in advance of when the payment would be due to the taxing authority if the institution filed on a stand-alone basis may treat the institution less favorably than if it were a separate taxpayer and, further, may be subject to section 23B. As a result, under the proposal, an institution must not remit its current period tax expense (or reasonably calculated estimated tax payment) earlier than when the institution would have been obligated to pay the taxing authority had it filed as a separate entity, based on the timeframes established by the taxing authority. Furthermore, the tax allocation agreement may permit the holding company to collect less than what the institution's current period income tax obligation would have been, calculated on a separate entity basis. Provided the parent will not later require the institution to pay the remainder of the current tax liability, the amount of this unremitted liability should be accounted for as having been paid with a simultaneous capital contribution by the parent to the subsidiary. With respect to deferred tax liabilities (DTLs), however, a parent cannot forgive some or all of the institution's DTL because the parent cannot legally relieve the subsidiary of a potential future obligation to the taxing authorities, especially if the subsidiary were to become a stand-alone entity. Furthermore, taxing authorities can collect some or all of a group's liability from any of the group members if tax payments are not made when due.

Payments and Hypothetical Tax Refunds From a Holding Company to an Institution

The proposal would address the timing and amount of tax payments and hypothetical refunds to be received by an institution in a consolidated group from its holding company. For example, in a situation whereby the institution, as a separate entity, has a net operating loss (NOL) and other members of the group have taxable income, the consolidated group must utilize the institution's tax loss to reduce the consolidated group's current tax

liability because consolidated tax return rules require the holding company to utilize the NOLs of members of the group to reduce the group's taxable income and thus its current tax liability.¹⁸ As a result, in this situation, the holding company must reimburse the institution for the current use of its tax losses at the time the NOL is used. The institution must reflect the tax benefit of the loss in the current portion of its applicable income taxes in the period the loss is incurred.

Separately, the proposal would require that an institution must receive from its holding company no less than the tax refund amount it would have received had it filed tax returns on a separate entity basis. For example, this would apply if the institution has a tax loss and would have been able to carry back that loss to a previous year and obtain a tax refund from a taxing authority had it filed income tax returns on a separate entity basis, but there is no ability to obtain an actual refund because other members in the consolidated group had losses that offset the institution's separate tax liability for the previous year(s). Similarly, if the institution makes quarterly tax payments, on an aggregate basis, in excess of its annual tax liability at year end and would obtain a tax refund had it filed on a separate entity basis, the proposal would require that the institution receive from the holding company no less than the tax refund amount the institution would have received as a separate entity from the taxing authority. Consistent with the principle that the amount and timing of tax payments within the consolidated group should be no less favorable to the institution than if it were a separate taxpayer, this proposed requirement would ensure that an institution receives the full benefit of its tax assets, such as any tax losses or tax credits it generates as a separate entity, instead of allowing those benefits to subsidize the activities of other affiliates, even if other affiliates in the consolidated group generate offsetting tax liabilities that reduce or eliminate a refund to the consolidated group. In this situation, the holding company would be required to remit the amount due to the institution within a reasonable period following the date the institution would have filed its own return on a separate entity basis. The prompt transmittal of funds from the holding company to the institution would permit management to use those funds for the benefit of the institution rather than of the holding company.

¹⁵ For example, if a refund is based on losses generated by or tax credits due to activities occurring at the subsidiary insured depository institution.

¹⁶ For example, this would preclude an institution entering into any side agreements purporting to allocate a tax refund attributable to its tax attributes to an affiliate.

¹⁷ Tax payments include both annual statutory tax payments and interim estimated payments required within an annual period.

¹⁸ 26 CFR 1.1502-11 and 1.1502-12.

If a holding company were to fail to remit amounts or refunds owed to its subsidiary institution promptly, that inaction may be considered an extension of credit under section 23A. A holding company's failure to remit amounts or refunds owed to its subsidiary institution also could be viewed as a constructive dividend from the institution to the holding company, which would be subject to other requirements under applicable regulations of the agencies.¹⁹

Consolidated Tax Group Filings

Under the proposal, a tax allocation agreement must require that all materials including, but not limited to, returns, supporting schedules, workpapers, correspondence, and other documents relating to the consolidated federal income tax return and any consolidated, combined, or unitary group state or local return, which return includes the institution, be made available on demand to the institution or any successor during regular business hours and that this requirement must survive any termination of the tax allocation agreement. Access to this information would permit the institution, as well as agency examiners, to evaluate compliance with the proposal, including whether the institution and holding company are appropriately calculating the institution's share of any tax liability and the institution's refund for use of its tax attributes. This proposed approach also is consistent with how the Internal Revenue Service views the relationship of members in a consolidated group with respect to tax documentation.²⁰

With respect to insured depository institutions that enter receivership, the FDIC as receiver would be successor to any rights or interests of the insured depository institution with respect to various agreements, including any tax allocation agreement and the ability to obtain tax return information for the consolidated group of which the insured depository institution is a member.²¹ Requiring the holding company to provide access to tax returns to the consolidated group, including the insured depository institution, would benefit the FDIC as receiver by improving its ability to meet its tax obligations and obtain tax refunds that are due and owed to the failed insured depository institution in a timely manner.

Question [4]: What are the advantages and disadvantages of the proposed requirements for a tax allocation agreement between an institution and its affiliates? Are there other requirements that the agencies should consider prescribing?

Question [5]: To what extent is the proposal consistent with current industry practices? To the extent that the proposal differs from current practice, what are the advantages and disadvantages of the proposal, relative to current industry practices?

D. Regulatory Reporting

Regardless of whether an institution files as part of a consolidated group or as a separate entity, the institution must prepare its regulatory reports²² on a separate entity basis, as specified in the current instructions for those reports.²³ The current instructions for the Consolidated Reports of Condition and Income (Call Reports) issued by the Federal Financial Institutions Examination Council require an institution that is a subsidiary of a holding company to calculate and report its current and deferred taxes on a separate entity basis. This existing reporting requirement would be unaffected by the proposal, which would establish a similar principle. The proposal would address transactions involving the purported purchase or sale of, or advancement of funds with respect to, an institution's DTAs and DTLs (collectively, "deferred tax items"). A DTA or DTL is an estimate of an expected future tax benefit more likely than not to be realized or an expected future tax obligation to be paid, respectively. Deferred tax items are generated by and are intrinsically, and often legally, tied to the activities, assets, and liabilities of the institution. DTAs and DTLs represent the future effects on income taxes that result from temporary differences and carryforwards that exist at the end of a period.²⁴ The agencies would propose to revise the Call Report instructions to incorporate the treatment for deferred tax items under the proposal, as described in the *Paperwork Reduction*

Act section of the SUPPLEMENTARY INFORMATION.

Temporary Difference Deferred Tax Items

Consistent with the separate entity basis reporting requirement, separating DTAs and DTLs from the associated assets or liabilities that gave rise to the deferred tax items would depart from one of the primary objectives related to accounting for income taxes, which is to recognize deferred tax items for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns.²⁵ The relevant accounting standards specifically state that a temporary difference refers to a difference between the tax basis of an asset or liability and its reported amount in the financial statements that will result in taxable or deductible amounts in future years when the reported amount of the asset or liability is recovered or settled, respectively.²⁶ More specifically, DTAs are the deferred tax consequences attributable to deductible temporary differences and carryforwards, while DTLs are the deferred tax consequences attributable to taxable temporary differences.²⁷

Based on the description of deferred tax items in ASC paragraph 740-10-05-7 and the uncertainty over the actual amounts at which deferred tax items will be settled or realized in future periods, temporary difference deferred tax items should remain on the balance sheet as long as the associated assets or liabilities that give rise to those deferred tax items remain on the balance sheet. Accordingly, an institution's purchase, sale, or other transfer of deferred tax items arising from temporary differences is not acceptable under U.S. generally accepted accounting principles (GAAP) unless these items are transferred in connection with the transfer of the associated assets or liabilities. In the case of timing differences, it may be appropriate to transfer DTAs or DTLs resulting from a timing difference when the underlying asset or liability that created the future tax benefit or obligation is being purchased, sold, or transferred within the consolidated group.²⁸ In addition, when the DTA or DTL can be realized or is absorbed by the consolidated group in the current

¹⁹ See 12 CFR part 5, subpart E, and 5.55 (OCC); 12 CFR 303.241 (FDIC).

²⁰ See, e.g., Internal Revenue Manual 11.3.2.4.4 (09-17-2020).

²¹ See 26 U.S.C. 6103(e).

²² The Consolidated Reports of Condition and Income (Call Reports) (FFIEC 031, FFIEC 041, and FFIEC 051; OMB No. 1557-0081 (OCC), 7100-0036 (Board), and 3064-0052 (FDIC)).

²³ The separate entity method of accounting for income taxes of depository institution subsidiaries of holding companies is discussed in the glossary entry for "Income Taxes" in the Call Report instructions, available at: www.ffiec.gov/ffiec_report_forms.htm.

²⁴ See Acct. Standards Codification (ASC) Topic 740 ¶ 740-10-05-7 (Fin. Acct. Standards Bd. 2019).

²⁵ *Id.* ¶ 740-10-10-1.

²⁶ *Id.* ¶ 740-10-05-7.

²⁷ *Id.* ¶ 740-10-20.

²⁸ When an asset or liability is transferred outside the consolidated group, the institution would no longer recognize the associated DTA or DTL. The institution would include the tax consequences of the transaction in the calculation of its current period tax expense or benefit.

period tax return, it would be appropriate to settle or recover the DTA or DTL, respectively.²⁹ Therefore, as described in the *Paperwork Reduction Act* section of the **SUPPLEMENTARY INFORMATION**, the agencies plan to revise the Call Report instructions to clarify that transfers of temporary difference deferred tax items as described above are not consistent with GAAP.

Operating Loss and Tax Credit Carryforward DTAs

Carryforwards are deductions or credits that cannot be utilized on the tax return during a year that may be carried forward to reduce taxable income or taxes payable in a future year.³⁰ Thus, in contrast to temporary differences, carryforwards do not arise directly from book-tax basis differences associated with particular assets or liabilities.

GAAP does not require a single allocation method for income taxes when members of a consolidated group issue separate financial statements.³¹ The commonly applied “separate-return” method, which would reflect DTAs for NOLs and tax credit carryforwards on a separate return basis, would meet the relevant criteria.³² Other systematic and rational methods that are consistent with the broad principles established by ASC 740 are also acceptable.

The FDI Act provides that the accounting principles applicable to reports or statements required to be filed with the agencies by insured depository institutions should result in reports of condition that accurately reflect the capital of such institutions, facilitate effective supervision of the institutions, and facilitate prompt corrective action to resolve the institutions at the least cost to the Deposit Insurance Fund.³³ The FDI Act also provides that, in general, the accounting principles applicable to Call Reports must be uniform and consistent with GAAP.³⁴ However, this section permits the agencies to adopt alternate accounting principles for regulatory reporting that are no less stringent than GAAP, if the agencies find that application of GAAP fails to meet any of the objectives stated above.³⁵

The agencies are aware of instances in which institutions have engaged in transactions with affiliates in a consolidated group to purchase, sell, or otherwise transfer deferred tax items, specifically DTAs, other than current period tax losses useable in the consolidated group’s tax return for the current period, which would otherwise be NOL carryforward DTAs for the institution. The agencies’ regulatory capital rule requires the deduction from common equity tier 1 capital of NOLs and tax credit carryforward DTAs, net of any related valuation allowances and net of DTLs.³⁶ Because of this treatment, an institution may attempt to derecognize its DTAs for NOLs or tax credit carryforwards on its separate-entity regulatory reports prior to the time when the carryforward benefits are absorbed by the consolidated group by selling or otherwise transferring these DTAs to affiliates, particularly affiliates not subject to the agencies’ regulatory capital rule, potentially overstating capital. While an institution may receive cash from affiliates in exchange for these transfers, the transfer may be reversible and not provide the same quality of regulatory capital as cash in the form of a capital contribution from a holding company.

Second, there are significant valuation uncertainties associated with deferred tax items, particularly DTAs for NOLs or tax credit carryforwards, when the underlying tax attributes cannot be used or absorbed by the group in the current period. Even though deferred tax items are measured in accordance with the enacted tax rates expected to apply when these items are settled or realized, the actual amounts at which these items will be settled or realized will be determined using the tax rates in effect in the future periods when settlement or realization occurs. In cases where such transactions have been observed, the cash settlement for the deferred tax assets is based on tax rates at the time of the settlement between the entities. However, the actual tax benefit realized by the consolidated group may ultimately differ from that amount, depending upon tax rates at the time the relevant deferred tax asset is absorbed by the consolidated group. As a result, an institution that sells or purchases DTAs for NOLs or tax credit carryforwards may receive significantly less than, or overpay for, these DTAs in relation to the amounts at which these DTAs ultimately would have been realized had they not been transferred, which also raises concerns under

section 23B to the extent that the insured depository institution is placed in a position less favorable than if it filed its income tax return on a separate entity basis.³⁷ For example, changes in federal tax laws, such as a change in the corporate income tax rate or provisions related to NOL carryback periods, can significantly affect the value of associated DTAs.³⁸

For these reasons, the agencies have concluded that the derecognition by insured depository institutions of DTAs for NOL or tax credit carryforwards on their separate-entity regulatory reports before the period in which they are absorbed by the consolidated group raises significant concerns and would not meet the objectives described in 12 U.S.C. 1831n(a)(1).³⁹ Specifically, the agencies find that derecognizing DTAs for NOLs or tax credit carryforwards in the Call Report in such circumstances may not accurately reflect an institution’s capital and may increase the cost to the Deposit Insurance Fund if insured depository institutions that have engaged in these transactions subsequently fail after the DTAs were sold for less than their value, and the FDIC as receiver is unable to fully recover the value of these DTAs under applicable tax laws.

Consistent with this finding, as described in the *Paperwork Reduction Act* section of the **SUPPLEMENTARY INFORMATION**, the agencies expect to propose to revise the Call Report instructions to clarify that an institution must not derecognize DTAs for NOLs or tax credit carryforwards on its separate-entity regulatory reports prior to the time when such carryforwards are absorbed by the consolidated group.

III. Incorporation of the Proposal as an Appendix to the Agencies’ Safety and Soundness Rules

The agencies would adopt the proposal under the procedures described in section 39 of the FDI Act.⁴⁰

³⁷ This circumstance also may raise concerns under section 23A, to the extent that monies owed to the insured depository institution from an affiliate as a result of these changed amounts are not paid promptly to the insured depository institution and may be viewed as extensions of credit subject to the requirements of section 23A.

³⁸ See, e.g., NOL carryback provisions in the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) and the Worker, Homeownership, and Business Assistance Act of 2009, and NOL and corporate tax rate changes in the Tax Cuts and Jobs Act. Public Law 116–136, 134 Stat. 281 (2020); Public Law 111–92, 123 Stat. 2984 (2009); Public Law 115–97, 131 Stat. 2054 (2017).

³⁹ The establishment of valuation allowances for DTAs for NOL and tax credit carryforwards when required in accordance with U.S. GAAP is not a derecognition event.

⁴⁰ 12 U.S.C. 1831p–1.

²⁹ Under GAAP, a deferred tax item generally becomes a current tax item when it is expected to be used to calculate estimated taxes payable or receivable on tax returns for current and prior years. ASC Topic 740 ¶ 740–10–25–2(a) (Fin. Acct. Standards Bd. 2019).

³⁴ 12 U.S.C. 1831n(a)(2)(A).

³⁵ 12 U.S.C. 1831n(a)(2)(B).

³⁶ See 12 CFR 3.22(a)(3) (OCC); 12 CFR 217.22(a)(3) (Board); 12 CFR 324.22(a)(3) (FDIC).

The OCC would also adopt the proposal for uninsured institutions under its general rulemaking authority.⁴¹ Guidelines or standards adopted under section 39 through a rulemaking are accorded special enforcement treatment under that statute. The agencies each have procedural rules that implement the enforcement remedies for guidelines prescribed by section 39. Under procedural provisions in these rules, each agency would be authorized to require an institution that intends to participate in a consolidated tax filing group and does not have an acceptable tax allocation agreement to develop a plan to implement an acceptable agreement consistent with the proposal or to be subject to enforcement actions.

Each agency proposes to incorporate the proposal as an appendix to its relevant safety and soundness rule (located in 12 CFR part 30 (OCC), 12 CFR part 208 (Board) and part 364 (FDIC)).

IV. Impact Analysis

Scope of Application

As of the most recent data, the agencies estimate that 2,604 supervised institutions (including 2,581 insured institutions and 23 uninsured OCC-chartered institutions) would be subject to the proposal.⁴² Covered institutions must be part of a consolidated group and obligated to pay federal and state income taxes. These covered institutions represent 51 percent of all institutions supervised by the agencies, and they hold over 93 percent of total assets of all institutions supervised by the agencies.⁴³

The agencies do not have, nor are they aware of, data that indicates whether any particular institution files taxes as part of a consolidated group, whether the institutions have tax allocation agreements with their holding companies, or whether the institutions have agreements that would conform with the proposal. Therefore, it is difficult to accurately estimate the number of institutions that would be potentially affected by the proposal. However, in their supervision of

institutions, the agencies have observed that only a small number of institutions in consolidated groups lack tax allocation agreements with their holding companies, have agreements that do not have language conforming with section 23A or 23B, or engage in transfers of DTAs or DTLs that are inconsistent with the separate entity basis reporting requirement. Overall, due to the fact that the agencies expect most covered institutions to already be in compliance with the proposal, the expected costs of the proposal are likely to be small.

The potential benefits and costs discussed below generally apply to the supervised institutions, their affiliates, and holding companies that are not already implementing principles from the existing non-codified guidance.

Benefits

There are three key benefits of the proposal. First, in some situations, the proposal would strengthen the safety and soundness of covered insured and uninsured institutions by ensuring that consolidated tax filing arrangements and practices are not adverse to their interests. Second, in some circumstances, the proposal would reduce the FDIC's resolution-related costs for covered insured institutions. Third, under some circumstances, the proposal would result in institutions more accurately reflecting their common equity tier 1 capital. These issues are discussed in more detail below.

The proposal could strengthen the safety and soundness of covered institutions. In particular, to the extent that covered institutions, their affiliates, and holding companies are not already implementing principles from the existing non-codified guidance, it may be possible to transfer tax credits out of the institution to a parent or affiliate. In this situation, the transfer weakens the safety and soundness of the institution. The proposal would limit such transfers, increasing the safety and soundness of the covered institution.

The effect of the proposal on safety and soundness of all members of a consolidated group can be more nuanced. For example, when the parent or affiliate entity retains the transfers of tax credits out of the covered institution, the potential reduction of the safety and soundness of the covered institution may be accompanied by a corresponding increase in safety and soundness at the holding company or other affiliates.

To the extent there are covered institutions that currently engage in transactions involving NOL and tax credit carryforward DTAs within a consolidated group, the proposal could

result in fewer transfers of such deferred tax items and the covered institutions may be more likely to receive equitable treatment. Furthermore, if the proposal were adopted, the covered institutions would retain access to the appropriate share of funds as they avoid being underpaid, or overpaying, in the course of the transactions related to deferred tax items.

By requiring a tax allocation agreement, and clear language in such agreements about an agency relationship, the proposal could reduce the cost of resolving failed insured depository institutions. In particular, to the extent that covered institutions, their affiliates, and holding companies are not already implementing principles from the existing non-codified guidance, it is possible to transfer tax credits out of the insured depository institution and into a parent or affiliate thereby reducing the value of the assets of the insured depository institution and raising the cost of resolving failed banks. Prompt receipt of tax refunds and appropriate timing and payment of tax obligations based on terms and provisions in a tax allocation agreement would, in some situations, result in the insured depository institution being better capitalized when entering receivership, and allow the FDIC to avoid litigation over the consolidated group's tax refunds and reduce uncertainties over any tax liabilities. By reducing the insured depository institution's failure resolution costs, including the related litigation and other procedural costs of resolution, the proposal would allow the FDIC to more efficiently resolve failed insured depository institutions, carry out its mission in a more cost-effective manner, and reduce future costs to the Deposit Insurance Fund.

As described in the *Operating Loss and Tax Credit Carryforward DTAs* section of the **SUPPLEMENTARY INFORMATION**, the agencies are aware of instances in which institutions have engaged in transactions with affiliates in a consolidated group to purchase, sell, or otherwise transfer deferred tax items, specifically DTAs, other than current period tax losses useable in the consolidated group's tax return for the current period, which would otherwise be NOL and tax credit carryforward DTAs for the covered institution. The proposal clarifies regulatory reporting requirements to help ensure that an institution recognizes all its individual deferred tax items, including those arising from temporary timing

⁴¹ 12 U.S.C. 93a.

⁴² Call Report data, September 30, 2020. The agencies estimate the covered institutions by subtracting the 1,537 insured institutions and 3 uninsured OCC-chartered institutions supervised by the agencies that are subsidiaries of bank or thrift holding companies supervised by the Board, are registered as Subchapter S corporations, and would not be affected by the adoption of the proposal; from the 4,118 insured institutions and 26 uninsured OCC-chartered institutions supervised by the agencies that are subsidiaries of bank or thrift holding companies supervised by the Board, respectively.

⁴³ Id.

differences, in its regulatory reports.⁴⁴ An institution cannot report such items on its Call Reports separately from the asset or liability that gave rise to it, except under certain circumstances that are appropriate under GAAP.⁴⁵ The proposal also addresses accounting principles for regulatory reporting for institutions' transactions involving the purported purchase or sale of, or advancement of funds with respect to its NOLs and tax credit carryforward DTAs⁴⁶ to other affiliates in the consolidated group or the holding company. The agencies' regulatory capital rule requires the deduction from common equity tier 1 capital of NOL and tax credit carryforward DTAs, net of any related valuation allowances and net of DTLs.⁴⁷ Thus, by clarifying the regulatory reporting requirements, the proposal would more accurately reflect institutions' common equity tier 1 capital.

Costs

To the extent the supervised institutions, their affiliates, and holding companies are not already implementing principles from the existing non-codified guidance, there are two primary costs of the proposal. First, parent companies and affiliates of covered institutions could lose some discretion over the timing, magnitude, and direction of cash flows between members of the group. Second, there would be regulatory costs associated with preparing agreements as well as ongoing compliance or reporting expenses. These issues are discussed in more detail below.

Under the proposal, holding companies would be required to remit tax refunds to their subsidiary institutions, if the relevant subsidiary's tax assets such as net operating losses or tax credits generate the refund. Similarly, if the institution's tax assets allow the group to make smaller payments to a tax authority, the institution must be compensated at such

time as when the consolidated group has benefitted from the use of its assets. The proposal would also enable institutions to avoid scenarios whereby they are required to submit tax payments to their holding company either materially before the holding company must remit taxes to the tax authority or greater than their actual obligations. The proposal could also result in certain holding companies ceasing to retain tax refunds and transmitting refunds to their subsidiary institutions, or no longer receiving funds well in advance of the obligated payment date.

Mandatory tax allocation agreements with terms outlined in the proposal would reduce discretion over the timing, magnitude, or direction of certain cash flows between members of the group. This may reduce the flexibility of the holding company to allocate funds between members of the consolidated group, potentially resulting in reduced growth or profitability.

To the extent the supervised institutions, their affiliates, and holding companies are not already implementing principles from the existing non-codified guidance, they could incur regulatory costs in order to enter into tax allocation agreements that comply with the requirements in the proposal. While these costs are uncertain, they are likely to be relatively small given that in the agencies' experience only a small number of institutions do not have a tax allocation agreement or, have a tax allocation agreement that does not conform with the proposal. Further, the *Paperwork Reduction Act* section of the **SUPPLEMENTARY INFORMATION** describes relatively small recordkeeping, reporting and disclosure costs associated with the proposal for covered entities.

Overall, due to the fact that the agencies expect most covered institutions to already be in compliance with the proposal, the expected costs are likely to be small. The proposal would increase the safety and soundness of institutions not implementing the principles in the Interagency Policy Statement and the 2014 Addendum and reduce litigation costs to the Deposit Insurance Fund.

V. Administrative Law Matters

A. Paperwork Reduction Act

Certain provisions of the proposal contain "collection of information" requirements within the meaning of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA). In accordance

with the requirements of the PRA, the agencies may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The agencies will request new control numbers for this information collection. The information collection requirements contained in this proposal have been submitted to OMB for review and approval by the OCC and FDIC under section 3507(d) of the PRA (44 U.S.C. 3507(d)) and § 1320.11 of the OMB's implementing regulations (5 CFR part 1320). The Board reviewed the proposal under the authority delegated to the Board by OMB.

Comments are invited on:

a. Whether the collections of information are necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

b. The accuracy or the estimate of the burden of the information collections, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

All comments will become a matter of public record. Comments on aspects of this notice that may affect reporting, recordkeeping, or disclosure requirements and burden estimates should be sent to the addresses listed in the **ADDRESSES** section of this document. A copy of the comments may also be submitted to the OMB desk officer for the agencies by mail to U.S. Office of Management and Budget, 725 17th Street NW, #10235, Washington, DC 20503; facsimile to (202) 395–6974; or email to oira_submission@omb.eop.gov, Attention, Federal Banking Agency Desk Officer.

Current Actions: The proposal prescribes PRA recordkeeping requirements for tax allocation agreements that involve institutions supervised by the agencies. Each institution that is part of a consolidated group must enter into a written tax allocation agreement with its holding company. The respective boards of directors of each institution and its parent holding company must approve the tax allocation agreement.

(2) FFIEC 031, FFIEC 041, and FFIEC 051

Current Actions

In addition, the proposal would require changes to the instructions for the Call Reports (OMB No. 1557–0081 (OCC), 7100–0036 (Board), and 3064–0052 (FDIC)), which will be addressed in a separate **Federal Register** notice.

B. Regulatory Flexibility Act Analysis

OCC: In general, the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.*, requires an agency, in connection with a proposed rule, to prepare and make available for public comment an Initial Regulatory Flexibility Analysis describing the impact of the rule on small entities (defined by the Small Business Administration (SBA) for purposes of the RFA to include commercial banks and savings institutions with total assets of \$600 million or less and trust companies with total assets of \$41.5 million or less) or to certify that the proposed rule would not have a significant economic impact on a substantial number of small entities. The OCC currently supervises approximately 745 small entities, of which 281 may be within the scope of the proposed rule. The OCC classifies the economic impact on an individual small entity as significant if the total estimated impact in one year is greater than 5 percent of the small entity's total annual salaries and benefits or greater than 2.5 percent of the small entity's total non-interest expense. The OCC estimates the cost of implementing or revising the tax allocation agreements under the proposal would be less than \$1,000 per institution and not result in a significant economic impact to these entities. Therefore, the OCC certifies that the proposal, if adopted as final, would not have a significant economic impact on a substantial number of small entities.

Board: The Board is providing an initial regulatory flexibility analysis with respect to this proposal. The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA), requires an agency to consider whether the rules it proposes will have a significant economic impact on a substantial number of small entities. In connection with a proposed rule, the RFA requires an agency to prepare an Initial Regulatory Flexibility Analysis describing the impact of the rule on small entities or to certify that the proposed rule would not have a significant economic impact on a substantial number of small entities. An initial regulatory flexibility analysis must contain (1) a description of the reasons why action by the agency is

being considered; (2) a succinct statement of the objectives of, and legal basis for, the proposed rule; (3) a description of, and, where feasible, an estimate of the number of small entities to which the proposed rule will apply; (4) a description of the projected reporting, recordkeeping, and other compliance requirements of the proposed rule, including an estimate of the classes of small entities that will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; (5) an identification, to the extent practicable, of all relevant Federal rules which may duplicate, overlap with, or conflict with the proposed rule; and (6) a description of any significant alternatives to the proposed rule which accomplish its stated objectives.

The Board has considered the potential impact of the proposal on small entities in accordance with the RFA. Based on its analysis and for the reasons stated below, the proposal is not expected to have a significant economic impact on a substantial number of small entities. Nevertheless, the Board is publishing and inviting comment on this initial regulatory flexibility analysis. The Board will consider whether to conduct a final regulatory flexibility analysis after any comments received during the public comment period have been considered.

Reasons Why Action Is Being Considered by the Board

In their supervision of institutions, the agencies have observed that certain institutions in consolidated groups either lack tax allocation agreements with their holding companies or have agreements that fail to ensure that the institutions receive the benefit of their tax attributes, which could negatively impact the safety and soundness of these institutions. Although there is existing interagency guidance relating to tax allocation agreements, this guidance is nonbinding.

The Objectives of, and Legal Basis for, the Proposal

The proposal would codify and make enforceable (with certain modifications) earlier guidance documents relating to tax allocation agreements. The proposal is intended to (1) ensure that state member banks that file taxes as part of a consolidated group have tax allocation agreements in place, and (2) specify certain mandatory terms for such agreements. The proposal would also clarify that an institution must not derecognize DTAs for NOLs or tax credit carryforwards on its separate-entity regulatory reports prior to the time

when such carryforwards are absorbed by the consolidated group.

The Board proposes to adopt the proposal pursuant to sections 39 and 37 of the FDI Act.⁴⁸ Section 39 of the FDI Act authorizes the Board to prescribe standards for safety and soundness by regulation or guideline. Section 37 of the FDI Act permits the Board to prescribe an accounting principle applicable to insured depository institutions that is no less stringent than generally accepted accounting principles. The guidelines promulgated under the proposal would be incorporated as an appendix to the Interagency Guidelines Establishing Standards for Safety and Soundness contained in 12 CFR part 208.

Estimate of the Number of Small Entities

The proposal would apply to state member banks. According to Call Reports, there are approximately 455 state member banks that are small entities for purposes of the RFA.⁴⁹ 213 of these entities are registered as Subchapter S corporations, would pay no tax at the business level, and therefore would not be impacted by the proposal. Additionally, the majority of potentially impacted small entities are likely already party to a tax allocation agreement, as discussed in existing guidance, and thus the number of small entities impacted by the proposal's requirements is likely to be considerably smaller.

Description of the Compliance Requirements of the Proposal

The proposal would require state member banks to enter into tax allocation agreements containing certain specified terms. To the extent that institutions are not already party to compliant tax allocation agreements, they could incur administrative costs to enter into tax allocation agreements that comply with this proposal, or to modify existing tax allocation agreements to be compliant, which would require legal and accounting skills. It is likely that the majority of potentially impacted small entities are already party to a tax allocation agreement, as discussed in

existing guidance. The majority of these agreements are likely either compliant with the proposal or could be made compliant with relatively minor modifications. Board staff estimates that impacted Board-supervised small entities will spend 20 hours establishing or modifying a tax allocation agreement, at an hourly cost of \$115.00.⁵⁰ The estimated aggregate initial administrative costs of the proposal to Board-supervised small entities amount to \$556,600.00,⁵¹ and ongoing costs are expected to be small when measured by small banks' annual expenses. In addition, the proposal may also reduce existing flexibility around the timing of compensation from holding companies to state member banks for the use of their tax attributes. The Board does not anticipate any material impact on the overall tax liability of consolidated groups as a result of the proposal.

Consideration of Duplicative, Overlapping, or Conflicting Rules and Significant Alternatives to the Proposal

The Board has not identified any federal statutes or regulations that would duplicate, overlap, or conflict with the proposal. The Board has considered the alternative of maintaining or amending existing interagency guidance but considers the proposal to be a more appropriate alternative.

FDIC:

The RFA generally requires that, in connection with a proposed rulemaking, an agency prepare and make available for public comment an initial regulatory flexibility analysis describing the impact of the proposed rule on small entities.⁵² However, a regulatory flexibility analysis is not required if the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The SBA has defined "small entities" to include banking organizations with total

assets of less than or equal to \$600 million that are independently owned and operated or owned by a holding company with less than or equal to \$600 million in total assets.⁵³ Generally, the FDIC considers a significant effect to be a quantified effect in excess of 5 percent of total annual salaries and benefits per institution, or 2.5 percent of total non-interest expenses. The FDIC believes that effects in excess of these thresholds typically represent significant effects for FDIC-supervised institutions. The FDIC does not believe that the proposed rule, if adopted, will have a significant economic effect on a substantial number of small entities. However, some expected effects of the proposed rule are difficult to assess or accurately quantify given current information, therefore the FDIC has included an Initial Regulatory Flexibility Act Analysis in this section.

Reasons Why This Action Is Being Considered

As previously discussed, in its supervision of institutions, the FDIC has observed that some institutions and affiliated entities in consolidated groups lack tax allocation agreements with their holding companies, have agreements that do not have language conforming with section 23A or 23B, or engage in the sale or transfer of DTAs or DTLs with other entities in a consolidated tax filing group that is inconsistent with the separate entity basis reporting requirement. In particular, the FDIC has reviewed tax allocation agreements that do not require holding companies in a consolidated group to promptly transmit the appropriate portion of a consolidated group's tax refund to their subsidiary institutions, resulting in some holding companies failing to do so in some instances. The FDIC believes that such inaction could adversely affect the safety and soundness of the subsidiary institutions. Further, in its capacity as receiver for failed insured depository institutions, the FDIC has engaged in legal disputes regarding the ownership of tax refunds claimed by the holding company based on losses incurred by insured depository institutions in a consolidated group due

⁵⁰ To estimate average hourly wages, we review data from September 2020 for wages (by industry and occupation) from the U.S. Bureau of Labor Statistics (BLS) for depository credit intermediation (NAICS 522100). To estimate compensation costs associated with the rule, we use \$115 per hour, which is based on the weighted average of the 75th percentile for four occupations adjusted for inflation, plus an additional 33.9 percent to cover private sector benefits.

⁵¹ This estimate is based on the assumption that all 242 Board-supervised small entities that are not Subchapter S corporations would need to spend 20 hours establishing or modifying a tax allocation agreement, at a cost of \$115.00 per hour. As discussed above, because the proposal largely codifies existing guidance and likely reflects existing industry practice, the number of small entities impacted by the rule's requirements and the initial aggregate administrative cost of the proposal is likely to be considerably smaller.

⁵² 5 U.S.C. 601 *et seq.*

⁵³ The SBA defines a small banking organization as having \$600 million or less in assets, where "a financial institution's assets are determined by averaging the assets reported on its four quarterly financial statements for the preceding year." See 13 CFR 121.201 (as amended, effective August 19, 2019). In its determination, the "SBA counts the receipts, employees, or other measure of size of the concern whose size is at issue and all of its domestic and foreign affiliates." See 13 CFR 121.103. Following these regulations, the FDIC uses a covered entity's affiliated and acquired assets, averaged over the preceding four quarters, to determine whether the covered entity is "small" for the purposes of RFA.

⁴⁸ 12 U.S.C. 1831p-1 and 12 U.S.C. 1831(a)(2).

⁴⁹ Under regulations issued by the Small Business Administration, a small entity includes a depository institution, bank holding company, or savings and loan holding company with total assets of \$600 million or less. See 84 FR 34261 (July 18, 2019). Consistent with the General Principles of Affiliation in 13 CFR 121.103, the Board counts the assets of all domestic and foreign affiliates when determining if the Board should classify a Board-supervised institution as a small entity. The small entity information is based on Call Report data as of September 30, 2020.

to tax allocation agreements that did not clearly acknowledge an agency relationship between the insured depository institution and its holding company. These disputes can reduce or prevent recoveries by the FDIC on behalf of failed insured depository institutions, which increases the cost to the Deposit Insurance Fund and thus leads to higher FDIC deposit insurance premiums charged to solvent insured depository institutions.

Policy Objectives

The primary objective of the proposal is to further clarify the relationship between institutions supervised by the agencies (including insured depository institutions and uninsured institutions) and affiliates or parent holding companies who are in a consolidated tax filing group with respect to the treatment of tax obligations, tax refunds and related intra-group transactions. Tax allocation agreements between institutions and their holding companies and other affiliates are important safeguards to ensure compliance by institutions with sections 23A and 23B and certain other agency regulations that ensure that holding companies in a consolidated group promptly transmit the appropriate portion of a consolidated group's tax refund to their subsidiary institutions.

Legal Basis

The FDIC proposes to adopt the guidelines pursuant to sections 39 and 37 of the FDI Act.⁵⁴ Section 39 prescribes different consequences depending on whether the agency issues regulations or guidelines. Under these provisions, an agency may require an institution that intends to participate in a consolidated tax filing group and does not have an acceptable tax allocation agreement to develop a plan to implement an acceptable agreement consistent with the proposal or to be subject to enforcement actions. Section 37(a) of the FDI Act states that the accounting principles applicable to reports or statements required to be filed with the agencies by institutions should result in reports of condition that accurately reflect the capital of such institutions, facilitate effective supervision of the institutions, and facilitate prompt corrective action to

resolve the institutions at the least cost to the Deposit Insurance Fund.⁵⁵ For a more detailed discussion of the proposal's legal basis please refer to Section III entitled "Incorporation of the Guidelines as an Appendix to the Agencies' Safety and Soundness Rules".

The Proposed Rule

The FDIC proposes to incorporate the guidelines as an appendix to its safety and soundness rule in part 364. The FDIC has procedural rules in part 364 that implement the enforcement remedies prescribed by section 39. Under these provisions, the FDIC may require an institution that does not have an acceptable tax allocation agreement to develop a plan to implement an acceptable agreement consistent with the proposal or be subject to enforcement actions.⁵⁶ For a more detailed discussion of the proposal please refer to Section II entitled "Description of the Proposal" and Section III entitled "Incorporation of the Guidelines as an Appendix to the Agencies' Safety and Soundness Rules".

Small Entities Affected

As of the most recent data, the FDIC supervises 3,245 depository institutions of which 2,434 are "small" entities according to the terms of the RFA. Covered institutions must be part of a consolidated group, and subject to and obligated to pay federal and state income tax. The FDIC estimates that 1,008 small, FDIC-supervised institutions will be subject to the proposal.⁵⁷ These covered institutions represent 41 percent of all small institutions supervised by the FDIC, and they hold over 47 percent of total assets of all small institutions supervised by the FDIC.⁵⁸

As described in the *Impact Analysis* section of the **SUPPLEMENTARY INFORMATION**, it is difficult to accurately

⁵⁵ See 12 U.S.C. 1831n(a)(1).

⁵⁶ See 12 U.S.C. 1831n(a)(1).

⁵⁷ Call Report data, September 30, 2020. The FDIC estimates small covered institutions by subtracting the 906 small insured institutions supervised by the FDIC that are subsidiaries of bank or thrift holding companies supervised by the Board, are registered as Subchapter S corporations, and would not be affected by the adoption of the proposed rule; from the 1,914 small insured institutions supervised by the FDIC that are subsidiaries of bank or thrift holding companies supervised by the Board, respectively.

⁵⁸ *Id.*

estimate the number of small FDIC-supervised institutions that would be potentially affected by the proposal. Specifically, the FDIC does not have data that indicates whether or not any particular small FDIC-supervised institution files taxes as a consolidated group, whether the small FDIC-supervised institutions have tax allocation agreements with their holding companies, or whether the institutions have agreements that do not have language conforming with section 23A or 23B. However, the FDIC believes that the number of small, FDIC-supervised depository institutions that will be directly affected by the proposal is likely to be small, given that in the agencies' supervisory experience only a small number of institutions do not currently have tax allocation agreements, have existing tax allocation agreements that do not have language conforming with section 23A or 23B, or engage in the sale or transfer of DTAs or DTLs with other entities in a consolidated tax filing group that is not consistent with the separate entity basis reporting requirement, notwithstanding the existing non-codified guidance.

Expected Effects

The potential benefits and costs summarized below generally apply to the small FDIC-supervised institutions, their affiliates, and holding companies that are not already implementing principles from the existing non-codified guidance.

Benefits

There are three key benefits of the proposal. First, in some situations, the proposal would strengthen the safety-and-soundness of covered small FDIC-supervised institutions by ensuring that consolidated tax filing arrangements and practices are not adverse to their interests. Second, in some circumstances, the proposal would reduce the FDIC's resolution-related costs. Third, under some circumstances, the proposal would result in small FDIC-supervised institutions more accurately reflecting their common equity tier 1 capital. These benefits are discussed in more detail in the *Impact Analysis* section of the **SUPPLEMENTARY INFORMATION**.

Costs

⁵⁴ 12 U.S.C. 1831p-1.

To the extent the small, FDIC-supervised institutions, their affiliates, and holding companies are not already implementing principles from the existing non-codified guidance, there are two primary costs of the proposal. First, covered small FDIC-supervised institutions, their parent companies, and affiliates could lose some discretion over the timing, magnitude, and direction of cash flows between members of the group. Second, there would be regulatory costs associated with preparing agreements as well as ongoing compliance or reporting expenses. These costs are discussed in more detail in the *Impact Analysis* section of the **SUPPLEMENTARY INFORMATION**.

Overall, due to the fact that the FDIC expects most small FDIC-supervised institutions to already be in compliance with the proposal, the expected effects are likely to be small.

Alternatives Considered

The FDIC considered the status quo alternative to maintain or amend the existing guidance and not include the guidance as a new codified appendix to the agencies' safety and soundness rules. However, for reasons previously stated in the *Background* section of the **SUPPLEMENTARY INFORMATION**, the FDIC considers the proposal to be a more appropriate alternative.

Other Statutes and Federal Rules

The FDIC has not identified any likely duplication, overlap, and/or potential conflict between this proposal and any other federal rule.

The FDIC invites comments on all aspects of the supporting information provided in this RFA section. In particular, would the proposal have any significant effects on small entities that the FDIC has not identified?

C. Plain Language

Section 722 of the Gramm-Leach-Bliley Act requires the Federal banking agencies to use plain language in all proposed and final rules published after January 1, 2000.⁵⁹ The agencies have sought to present the proposal as a new appendix to certain codified safety and soundness rules in a simple and straightforward manner and invite comment on the use of plain language. For example:

- Have the agencies organized the material to suit your needs? If not, how could they present the proposal more clearly?
- Are the requirements in the proposal clearly stated? If not, how

could the proposal be more clearly stated?

- Does the proposal contain technical language or jargon that is not clear? If so, which language requires clarification?

- Would a different format (grouping and order of sections, use of headings, paragraphing) make the proposal easier to understand? If so, what changes would achieve that?

- Is the section format adequate? If not, which of the sections should be changed and how?

- What other changes can the agencies incorporate to make the proposal easier to understand?

D. Riegle Community Development and Regulatory Improvement Act of 1994

Pursuant to section 302(a) of the Riegle Community Development and Regulatory Improvement Act of 1994 (RCDRIA),⁶⁰ in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on insured depository institutions, each Federal banking agency must consider, consistent with principles of safety and soundness and the public interest, any administrative burdens that such regulations would place on depository institutions, including small depository institutions, and customers of depository institutions, as well as the benefits of such regulations. In addition, section 302(b) of RCDRIA requires new regulations and amendments to regulations that impose additional reporting, disclosures, or other new requirements on insured depository institutions generally to take effect on the first day of a calendar quarter that begins on or after the date on which the regulations are published in final form.⁶¹

The agencies invite comments that will further inform their consideration of RCDRIA.

E. OCC Unfunded Mandates Reform Act of 1995

The OCC analyzed the proposal under the factors set forth in the Unfunded Mandates Reform Act of 1995 (UMRA).⁶² Under this analysis, the OCC considered whether the proposal includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of \$157 million or more in any one year (as adjusted for inflation). The OCC has

determined that the proposal, if implemented, could result in total costs of approximately \$1 million for OCC institutions. Therefore, the OCC believes the proposal, if adopted as final, will not result in a Federal mandate imposing costs of \$157 million or more.

Text of Common Proposed Guidelines on Tax Allocation Agreements (All Agencies)

Appendix []

Interagency Guidelines on Safety and Soundness Standards for Tax Allocation Agreements

I. Introduction

The Guidelines establish standards under section 39 of the Federal Deposit Insurance Act (12 U.S.C. 1831p–1) for intercorporate tax allocation agreements between a [BANK] and its parent holding company and other affiliates.

A. Scope

These Guidelines apply to a [BANK] that is part of a consolidated or combined group for federal or state income tax purposes. These Guidelines apply only if the [BANK] is subject to corporate income tax obligations at the federal or state level and files income taxes as part of a consolidated group.

B. Preservation of Existing Authority

Neither section 39 of the Federal Deposit Insurance Act (12 U.S.C. 1831p–1) nor these Guidelines in any way limits the authority of the [AGENCY] to address unsafe or unsound practices or conditions or other violations of law or regulation. The [AGENCY] may take action under section 39 of the FDI Act and these Guidelines independently of or in addition to any other supervisory or enforcement authority available to the [AGENCY].

C. Definitions

Consolidated group means one or more [BANKS], any parent holding company, and any other affiliate that file federal or state income tax returns on a consolidated basis.

Deferred tax items mean deferred tax assets and deferred tax liabilities.

Separate entity basis refers to a situation where each [BANK] is viewed, and reports its applicable income taxes and its deferred tax items, as if it were a stand-alone legal and accounting entity for regulatory reporting purposes, notwithstanding its membership in a consolidated group. For purposes of this definition, when a [BANK] has subsidiaries that are included with the [BANK] in the consolidated group return, the [BANK's] applicable income

⁵⁹ Public Law 106–102, sec. 722, 113 Stat. 1338 (codified at 12 U.S.C. 4809).

⁶⁰ 12 U.S.C. 4802(a).

⁶¹ 12 U.S.C. 4802.

⁶² 2 U.S.C. 1532.

taxes and deferred tax items on a *separate entity basis* include the applicable income taxes and deferred tax items of its subsidiaries, unless eliminated in consolidation for regulatory reporting purposes.

II. General Provisions

A. Purpose. A [BANK] must ensure that its inclusion in a consolidated or combined group tax return does not prejudice the interests of any [BANK] that is a member of the consolidated group. For purposes of this standard, intercorporate tax settlements between a [BANK] and its parent company do not prejudice the interests of a [BANK] provided that the settlements are conducted in a manner that is no less favorable to the [BANK] than if it were a separate taxpayer.

B. Measurement of Current and Deferred Income Taxes. U.S. generally accepted accounting principles and instructions for the preparation of Reports of Condition and Income require [BANKS] to provide for their current tax liability or benefit as well as for deferred income taxes resulting from any temporary differences and tax carryforwards.

1. When the [BANKS] in a consolidated group prepare separate regulatory reports, each [BANK] must record current and deferred taxes as if it filed its tax returns on a separate entity basis, regardless of the consolidated group's tax paying or refund status. Adjustments for statutory tax considerations that arise in a consolidated return may be made to the [BANK's] liability as calculated on a separate entity basis, as long as they are made on a consistent and equitable basis among all members of the consolidated group.

2. A [BANK] must recognize all of its deferred tax items, including those based on or attributable to temporary differences or net operating loss or tax credit carryforwards on its separate-entity regulatory reports, and these items cannot be presented separate from the entity that reports the asset or liability that gave rise to them. A [BANK] is prohibited from derecognizing any of its deferred tax items unless those items are reversed, are settled through payment to the [BANK] because the items are absorbed in a current tax period by the consolidated tax group, or are transferred in connection with the transfer of the associated assets or liabilities that gave rise to the deferred tax items.

C. Tax Refunds.

1. A [BANK] that files tax returns as part of a consolidated group must enter

into a tax allocation agreement that specifies that a parent company that receives a tax refund from a taxing authority obtains these funds as agent for the [BANK] member whose tax attributes created the tax refund. This refund could be the result of a current year tax loss carried back to years with taxable income or quarterly payments made in excess of the current tax liability owed by the [BANK]. The agreement must specify that the parent hold such funds in trust for the exclusive benefit of the member [BANK] that owns the funds and must promptly remit the funds held in trust to such member [BANK]. The agreement must also specify that the parent company does not obtain any ownership interest in any tax refund because it receives a tax refund from a taxing authority.

2. If a [BANK's] loss or credit is used to reduce the consolidated group's overall tax liability, the [BANK] must reflect the tax benefit of the loss or credit in the current portion of its applicable income taxes in the period the loss or credit is incurred, and the [BANK] must obtain compensation for the use of its loss or credit at the time that it is used. If a [BANK's] loss or credit is not absorbed in the current period by the consolidated group, the [BANK] must not recognize the tax benefit in the current portion of its applicable income taxes in the loss year. Rather, the tax loss or credit represents a loss carryforward, the benefit of which is recognized as a deferred tax asset, net of any valuation allowance.

3. If a [BANK] would have received a refund from the taxing authority if it had filed on a separate entity basis, but there is no ability to obtain an actual refund because other members in the consolidated group had losses that offset the [BANK's] separate tax liability for the previous year, the [BANK] must obtain no less than its stand-alone refund amount from the parent company on or before the date the [BANK] would have filed its own return if it had filed on a separate entity basis. To the extent the group has previously made a payment to the [BANK] for the use of its loss by the group, such amount can offset the amount due.

D. Income Tax Forgiveness Transaction. A tax allocation agreement may allow a subsidiary [BANK] to pay a parent company less than the full amount of the current income tax liability that the [BANK] would have owed if calculated on a separate entity basis. Provided the parent will not later require the [BANK] to pay the remainder of such stand-alone current tax liability, the [BANK] must account for this unremitted liability as having

been paid with a simultaneous capital contribution by the parent to the [BANK]. In contrast, because a parent cannot relieve a [BANK] of future tax liability to a taxing authority, a [BANK] may not enter into a transaction in which a parent purports to forgive some or all of the [BANK's] deferred tax liability, through a capital contribution or otherwise.

III. Intercompany Tax Allocation Agreements

A. Intercompany Tax Allocation Agreement. Each [BANK] that is part of a consolidated group must enter into a written tax allocation agreement with its holding company that protects the tax position of the [BANK] and is consistent with the principles in Section II and the terms described below, as well as the requirements of sections 23A and 23B of the Federal Reserve Act (12 U.S.C. 371c and 371c-1). The board of directors, or a duly authorized committee thereof, of each [BANK] and each holding company must approve the tax allocation agreement.

B. Terms. The tax allocation agreement must:

1. Expressly state and not contain language to suggest a contrary intent:
 - a. That an agency relationship exists between the [BANK] and its holding company with respect to tax refunds and that the [BANK] owns the tax assets that were created from its tax attributes;
 - b. That any refund received from the taxing authority and due to the [BANK] is held in trust by the holding company; and

c. That, notwithstanding any other transactions to the contrary, the [BANK] must receive promptly any tax refund attributable to the [BANK's] tax attributes.

2. Include the following paragraph or substantially similar language:

"The [name of holding company] is an agent for the [name of institution] (the "Institution") with respect to all matters related to consolidated tax returns and refund claims, and nothing in this agreement shall be construed to alter or modify this agency relationship. If the [name of holding company] receives a tax refund [attributable to income earned, taxes paid, or losses incurred by the Institution] from a taxing authority, these funds are obtained as agent for the Institution. Any tax refund attributable to income earned, taxes paid, or losses incurred by the Institution is the property of and owned by the Institution, and must be held in trust by the [name of holding company] for the benefit of the Institution. The [name of holding company] must forward promptly the

amounts held in trust to the Institution. Nothing in this agreement is intended to be or should be construed to provide the [name of holding company] with an ownership interest in a tax refund that is attributable to income earned, taxes paid, or losses incurred by the Institution. The [name of holding company] hereby agrees that this tax sharing agreement does not give it an ownership interest in a tax refund generated by the tax attributes of the Institution.”

3. With respect to tax payments from the [BANK] to its affiliates:

a. Prohibit payments in excess of the current period tax expense or reasonably calculated estimated tax expense of the [BANK] on a separate entity basis;

b. Prohibit payment for the settlement of any deferred tax liabilities of the [BANK]; and

c. Prohibit payment from occurring earlier than when the [BANK] would have been obligated to pay the taxing authority had it filed as a separate entity.

d. Provide that if, on the basis of payments previously made during the year for estimated tax owed, the [BANK] would have been entitled to a refund if it had filed on a separate entity basis, the affiliate must repay such excess in an amount equal to the refund the institution would have been entitled to.

4. State that if a [BANK's] loss or credit is used to reduce the consolidated group's overall tax liability, the [BANK] must reflect the tax benefit of the loss or credit in the current portion of its applicable income taxes in the period the loss or credit is incurred, and the parent company must compensate the [BANK] for the use of its loss or credit at the time that it is used.

5. State that all materials, including, but not limited to, returns, supporting schedules, workpapers, correspondence, and other documents relating to the consolidated federal income tax return and any consolidated, combined, or unitary group state or local returns must be made available on demand to the [BANK] or any successor during regular business hours. The tax allocation agreement must provide that this obligation will survive any termination of the tax allocation agreement.

Adoption of Proposed Common Guidelines

The adoption of the proposed common guidelines by the agencies, as modified by the agency-specific text, is set forth below:

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Chapter I

Authority and Issuance

For the reasons stated in the **SUPPLEMENTARY INFORMATION**, the Office of the Comptroller of the Currency proposes to amend part 30 of chapter I of Title 12, Code of Federal Regulations as follows:

PART 30—SAFETY AND SOUNDNESS STANDARDS

■ 1. The authority citation for part 30 continues to read as follows:

Authority: 12 U.S.C. 1, 93a, 371, 1462a, 1463, 1464, 1467a, 1818, 1828, 1831p–1, 1881–1884, 3102(b) and 5412(b)(2)(B); 15 U.S.C. 1681s, 1681w, 6801, and 6805(b)(1).

Appendix F [Added]

■ 2. Amend part 30 by adding Appendix F as set forth at the end of the common preamble.

Appendix F [Amended]

■ 3. Amend Appendix F of part 30 by:

- a. Removing “[BANK]” and adding in its place “national bank or Federal savings association”, removing “[BANKS]” and adding in its place “national banks and Federal savings associations”, and removing “[BANK's]” and adding in its place “national bank's or Federal savings association's” whenever they appear.
- b. Removing “[AGENCY]” and adding in its place “OCC”, whenever it appears.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

12 CFR Chapter II

Authority and Issuance

For the reasons stated in the **SUPPLEMENTARY INFORMATION**, the Board

proposes to amend chapter II of Title 12, Code of Federal Regulations as follows:

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM (REGULATION H)

■ 4. The authority citation for part 208 continues to read as follows:

Authority: 12 U.S.C. 24, 36, 92a, 93a, 248(a), 248(c), 321–338a, 371d, 461, 481–486, 601, 611, 1814, 1816, 1817(a)(3), 1817(a)(12), 1818, 1820(d)(9), 1833(j), 1828(o), 1831, 1831o, 1831p–1, 1831r–1, 1831w, 1831x, 1835a, 1882, 2901–2907, 3105, 3310, 3331–3351, 3905–3909, 5371, and 5371 note; 15 U.S.C. 78b, 78I(b), 78I(i), 780–4(c)(5), 78q, 78q–1, 78w, 1681s, 1681w, 6801, and 6805; 31 U.S.C. 5318; 42 U.S.C. 4012a, 4104a, 4104b, 4106, and 4128.

Appendix D–3 [Added]

■ 5. Amend part 208 by adding Appendix D–3 as set forth at the end of the common preamble:

Appendix D–3 [Amended]

■ 6. Amend Appendix D–3 of part 208 by:

- a. Removing “[BANK]” and adding in its place “state member bank”, removing “[BANK]” and adding in its place “state member banks”, and removing “[BANK's]” and adding in its place “state member bank's”, whenever it appears.
- b. Removing “[AGENCY]” and adding in its place “Board” whenever it appears.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Chapter III

Authority and Issuance

For the reasons set forth in the common preamble, the Federal Deposit Insurance Corporation proposes to amend part 364 of chapter III of title 12 of the Code of Federal Regulations as follows:

PART 364—STANDARDS FOR SAFETY AND SOUNDNESS

■ 7. The authority citation for part 364 continues to read as follows:

Authority: 12 U.S.C. 1818 and 1819 (Tenth), 1831p–1; 15 U.S.C. 1681b, 1681s, 1681w, 6801(b), 6805(b)(1).

Appendix C [Added]

■ 8. Amend part 364 by adding Appendix C as set forth at the end of the common preamble.

Appendix C [Amended]

■ 9. Amend Appendix C of part 364 by:

- a. Removing “[BANK]” and adding in its place “FDIC-supervised institution”,

removing “[BANKS]” and adding in its place “FDIC-supervised institutions”, and removing “[BANK’s]” and adding in its place “FDIC-supervised institution’s”, whenever it appears.

■ b. Removing “[AGENCY]” and adding in its place “FDIC” whenever it appears.

Blake J. Paulson,

Acting Comptroller of the Currency.

By order of the Board of Governors of the Federal Reserve System.

Ann E. Misback,

Secretary of the Board.

Federal Deposit Insurance Corporation.

By order of the Board of Directors.

Dated at Washington, DC, on April 21, 2021.

James P. Sheesley,

Assistant Executive Secretary.

BILLING CODE 4810-33-P; 6210-01-P; 6714-01-P

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 328

RIN 3064-AF71

False Advertising, Misrepresentation of Insured Status, and Misuse of the FDIC’s Name or Logo

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of proposed rulemaking and request for information.

SUMMARY: The Federal Deposit Insurance Corporation is seeking comment on a proposed rule to implement section 18(a)(4) of the Federal Deposit Insurance Act. Section 18(a)(4) of the Federal Deposit Insurance Act prohibits any person from making false or misleading representations about deposit insurance or from using the Federal Deposit Insurance Corporation’s name or logo in a manner that would imply that an uninsured financial product is insured or guaranteed by the Federal Deposit Insurance Corporation. The proposed rule would describe: The process by which the Federal Deposit Insurance Corporation will identify and investigate conduct that may violate section 18(a)(4) of the Federal Deposit Insurance Act; the standards under which such conduct will be evaluated; and the procedures which the Federal Deposit Insurance Corporation will follow when formally and informally enforcing the provisions of section 18(a)(4) of the Federal Deposit Insurance Corporation Act.

DATES: Comments are due on or before July 9, 2021. Comments on the Paperwork Reduction Act burden estimates are due on or before July 9, 2021.

ADDRESSES: You may submit comments, identified by RIN 3064-AF71, by any of the following methods:

- **FDIC website:** <https://www.fdic.gov/regulations/laws/federal/>. Follow instructions for submitting comments on the agency website.

- **FDIC Email:** Comments@fdic.gov. Include RIN 3064-AF71 on the subject line of the message.

- **Mail:** James P. Sheesley, Assistant Executive Secretary, Legal-ESS, Attention: Comments—RIN 3064-AF71, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

- **Hand Delivery/Courier:** Comments may be hand-delivered to the guard station at the rear of the 550 17th Street NW building (located on F Street) on business days between 7 a.m. and 5 p.m.

Please include your name, affiliation, address, email address, and telephone number(s) in your comment. All statements received, including attachments and other supporting materials, are part of the public record and are subject to public disclosure. You should submit only information that you wish to make publicly available.

Please note: All comments received will be posted generally without change to <https://www.fdic.gov/regulations/laws/federal/>, including any personal information provided.

FOR FURTHER INFORMATION CONTACT:

Richard M. Schwartz, Counsel, Legal Division, (202) 898-7424; Michael P. Farrell, Counsel, Legal Division, (202) 898-3853, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

I. Policy Objectives

Section 18(a)(4) of the Federal Deposit Insurance Act, 12 U.S.C. 1828(a)(4), (Section 18(a)(4)) prohibits any person from misusing the name or logo of the Federal Deposit Insurance Corporation (FDIC) or from engaging in false advertising or making knowing misrepresentations about deposit insurance. The FDIC has observed an increasing number of instances where financial services providers or other entities or individuals have misused the FDIC’s name or logo or have made false or misleading representations that would suggest to the public that these providers’ products are FDIC-insured. To provide transparency into how the

FDIC will address these and similar concerns, the FDIC is proposing to adopt regulations to further clarify its procedures for identifying, investigating, and where necessary taking formal and informal action to address potential violations of Section 18(a)(4). The regulations would also establish a point-of-contact for receiving complaints about potentially false or misleading representations regarding deposit insurance and would direct depositors and prospective depositors to where they could obtain information or verification about deposit insurance claims. Although the FDIC is not required to promulgate regulations to implement section 18(a)(4), the FDIC nonetheless believes that the proposed rule, if adopted, would establish a more transparent process that will benefit all parties and would promote stability and confidence in FDIC deposit insurance and the nation’s financial system.

II. Background

The FDIC has steadfastly and proactively sought to protect depositors and prospective depositors by limiting use of the FDIC’s name, seal, and logo to insured depository institutions (IDIs) and preventing false and misleading representations about the manner and extent of FDIC deposit insurance (deposit insurance). Under Federal law, it is a criminal offense to misuse the FDIC name or make false representations regarding deposit insurance.¹ Moreover, the FDIC has independent authority to investigate and take administrative enforcement actions, including the power to issue cease and desist orders and impose civil money penalties, against any person who: (1) Falsely represents or implies that any deposit liability, obligation, certificate, or share is insured by the FDIC; or (2) otherwise knowingly misrepresents: (a) That any deposit liability, obligation, certificate, or share is insured, or (b) the extent or manner

¹ See 18 U.S.C. 709 (“Whoever, except as expressly authorized by Federal law, uses the words ‘Federal Deposit’, ‘Federal Deposit Insurance’, or ‘Federal Deposit Insurance Corporation’ or a combination of any three of these words, as the name or a part thereof under which he or it does business, or advertises or otherwise represents falsely by any device whatsoever that his or its deposit liabilities, obligations, certificates, or shares are insured or guaranteed by the Federal Deposit Insurance Corporation, or by the United States or by any instrumentality thereof, or whoever advertises that his or its deposits, shares, or accounts are federally insured, or falsely advertises or otherwise represents by any device whatsoever the extent to which or the manner in which the deposit liabilities of an insured bank or banks are insured by the Federal Deposit Insurance Corporation . . . Shall be punished . . . by a fine under this title or imprisonment for not more than one year . . .”).

in which any deposit liability, obligation, certificate, or share is insured.²

Although the FDIC has broad statutory authority in this area, the FDIC has never issued specific regulations regarding false representations related to FDIC insurance or the misuse of the FDIC's name or logo.

On February 26, 2020, the FDIC published in the **Federal Register** a Request for Information (RFI) related to potential modernization of its signage and advertising rules set out in part 328 of the FDIC regulations.³ This RFI included the questions tied to the deposit insurance misrepresentation issues discussed in this Notice of Proposed Rulemaking.⁴ On March 13, 2020, the FDIC published an extension of the comment period in the **Federal Register**.⁵ However, on April 16, 2020, in light of COVID-19, the FDIC announced that it was temporarily postponing its efforts to modify the rules under part 328 of the FDIC regulations.

In light of the increasing number of instances where financial services providers or other entities or individuals have misused the FDIC's name or logo, the FDIC has elected to address false or misleading representation and misuse issues through this Notice of Proposed Rulemaking. Because the FDIC is committed to obtaining input on these issues from the industry and the public, we have included relevant questions in this document.

Separately, on April 9, 2021, the FDIC re-issued its RFI regarding the FDIC Sign and Official Advertising Requirements.⁶ The 2021 RFI focuses on soliciting information on the modernization of the FDIC's advertising requirements applicable to IDIs, and related topics. While questions related to misrepresentation and misuse have been removed from that document, there remains a degree of overlap between the RFI and the proposed rule and responses to the RFI may provide information that is relevant to consideration of the proposed rule. For example, the RFI asks about how to deal with parties that may be fraudulently

impersonating insured depository institutions, which necessarily overlaps with the proposed rule. Therefore, the FDIC will consider relevant comments submitted in response to the RFI, together with comments submitted in response to the proposed rule, in adopting the final rule.

III. Summary of Proposed Regulation

The proposed regulation establishes a new subpart B to part 328, entitled "False Advertising, Misrepresentation of Insured Status, and Misuse of the FDIC's Name or Logo." The proposed subpart sets forth the process by which the FDIC will identify and investigate conduct that may violate Section 18(a)(4), the standards under which such conduct will be evaluated, and the procedures which the FDIC will follow when formally and informally enforcing the provisions of Section 18(a)(4).

Section 328.100—Scope

Section 328.100 notes that, unlike many FDIC regulations, which are binding upon IDIs and institution-affiliated parties (IAPs), this regulation, consistent with the authority set forth in Section 18(a)(4), will apply to any person who violates Section 18(a)(4) or who aids another in such a violation.

Section 328.101—Definitions

Section 328.101 sets forth certain definitions that will be used throughout the subpart. Such definitions include, but are not limited to the terms or phrases "non-deposit product," "uninsured financial product," "FDIC-associated images," and "FDIC-associated terms."

Section 328.102—Prohibition

Section 328.102 sets forth the conduct that is prohibited by Section 18(a)(4). It further provides transparency by setting forth the FDIC's interpretation of the scope of prohibited conduct, including specific examples of conduct that the FDIC deems to violate Section 18(a)(4). The identified practices include instances where false statements are made regarding the existence or extent of deposit insurance associated with a product, as well as instances where material information is omitted from a representation (e.g., where a non-bank third party represents that its products are FDIC-insured without identifying the name or the names of the IDIs where customer deposits will be placed and through whom such insurance is derived.) These examples are not meant to be an exhaustive list, but rather specific examples of the type of conduct that the FDIC has observed that violate the prohibitions in Section 18(a)(4).

This list is not intended to be an exhaustive list, and the FDIC may modify the list based on responses to this notice or the RFI.

The section further sets forth certain standards that the FDIC will use to determine if a statement violates Section 18(a)(4). The standards laid out in § 328.102 are adapted from the standards that Federal Trade Commission developed decades ago to determine if acts or practices are deceptive in violation of Section 5 of the Federal Trade Commission Act, 15 U.S.C. 45 (Section 5).⁷ While Section 18(a)(4) is separate from Section 5, it prohibits similar conduct—deception in connection with commerce. The standards governing deception under Section 5 have been consistently accepted by courts,⁸ and used by the FTC and other agencies, including the FDIC, which enforces prohibitions of Section 5 against the institutions it supervises and IAPs of those institutions.⁹ In light of the long-term use and acceptance of these standards, the FDIC believes it is appropriate to use similar standards to determine if a representation about deposit insurance violates Section 18(a)(4).

Section 328.102 also sets forth a bright-line rule for when the FDIC will presume a misrepresentation to have been knowingly made (i.e., when a respondent continues to make representations about deposit insurance after having been advised by a governmental or regulatory authority that such representations are false or misleading). This bright-line rule is not, however, intended to be the exclusive manner in which the FDIC can establish that any misrepresentation was knowingly made, and the agency reserves the right to establish this statutory element by introducing other evidence.

Section 328.103—Inquiries and Complaints

Section 328.103 provides a process by which members of the public may submit complaints to the FDIC regarding suspected false or misleading representations about deposit insurance. It also directs members of the public to the agency's existing resources to submit inquiries about representations

² See 12 U.S.C. 1828(a)(4)(C)–(D). With regard to an insured depository institution under the supervision of another Federal banking agency, the FDIC shall first write to that agency to take enforcement action under section 18(a)(4) against any entity for which the agency is the appropriate Federal banking agency or any institution-affiliated party of such entity; if that agency takes no action within 30 days, the FDIC may take action.

³ 85 FR 10997 (Feb. 26, 2020).

⁵ 85 FR 14678 (Mar. 13, 2020).

⁶ 86 FR 18528 (Apr. 9, 2021).

⁷ See generally, FTC Policy Statement on Deception, October 14, 1983.

⁸ See, e.g., *FTC v. Stefanchik*, 559 F.3d 924 (9th Cir. 2009).

⁹ See, *FIL–57–2002 Unfair or Deceptive Acts—Applicability of the Federal Trade Commission Act* (May 30, 2002) and *FIL–26–2004, Unfair or Deceptive Acts or Practices under Section 5 of the Federal Trade Commission Act* (March 11, 2004).

regarding deposit insurance to the FDIC's Information and Support Center.

The FDIC believes that having a specified point-of-contact for depositors and prospective depositors who may have questions about deposit insurance coverage will be of particular value to the public given the increasing volume of communication and advertising relating to financial products that members of the public receive over various media, including social media and electronic communication. This process represents a continuation of the Information and Support Center's role of aiding the FDIC's mission of ensuring and promoting the stability and confidence of the banking system by responding to inquiries from the public.

Section 328.104—Investigation

Section 328.104 sets forth procedures for formal investigations into potential violations of Section 18(a)(4). Among other things, the section delegates authority to the FDIC's General Counsel to investigate potential violations and provides that such investigations will be conducted in accordance with section 10(c) of the Federal Deposit Insurance Act¹⁰ and the FDIC's rules governing investigations, which are found in subpart K of the FDIC's Rules of Practice and Procedure.¹¹ Section 328.104 further provides that, notwithstanding the longstanding confidentiality provisions found in 12 CFR 308.147, in those limited circumstances where there is risk of imminent harm to consumers or depositors, the FDIC may disclose the existence of an investigation under this part that does not involve a bank or a known IAP of a bank. This disclosure authorization, which is a departure from the general practice of maintaining the confidentiality of investigations, is intended to further the FDIC's mission of promoting confidence and stability in the banking system by allowing it to disclose investigations into potentially false or misleading representations about deposit insurance where there is a risk of imminent harm to consumers or depositors.

Section 328.105—Referral to Appropriate Authority

Section 328.105 sets forth circumstances under which the FDIC may notify other authorities of potential violations of law that it becomes aware of in connection with a complaint, inquiry, investigation or action under this subpart.

Section 328.105 provides that the FDIC may recommend that another

appropriate Federal banking agency take action to enforce Section 18(a)(4) against an IDI that is subject to the authority of that appropriate Federal banking agency or an IAP of such an institution. Such recommendations are authorized by Section 18(a)(4), which also provides that if the appropriate Federal banking agency fails to take action within 30 days, the FDIC may take enforcement action.

Section 328.105 further provides that, in the event the FDIC becomes aware of conduct that potentially violates laws or regulations within the jurisdiction of another regulatory authority, the FDIC may take steps to notify the appropriate authority.

Section 328.105 also provides that, in the event the FDIC becomes aware of conduct that potentially constitutes a criminal violation of 18 U.S.C. 709, the FDIC may, in appropriate circumstances, notify the FDIC Office of the Inspector General or the appropriate criminal law authority.

Finally, § 328.105 contains provisions governing the provision of any records to other regulatory or criminal authorities in connection with notice under the section.

Section 328.106—Informal Resolution

Historically, the FDIC has generally resolved apparent violations of Section 18(a)(4) informally by notifying the party responsible and requesting that the apparent false or misleading representation be withdrawn and corrected. Section 328.106 sets forth the process the FDIC will follow when pursuing an informal resolution. Under this process, the FDIC will generally send any person that appears to be making a false or misleading representation, or any person aiding or abetting such a representation, an advisory letter notifying the person of the basis for the FDIC's concerns and requesting corrective action. Such letters will also provide the recipient the opportunity to provide the FDIC with supplemental information if the recipient contends that the representations made are true and not misleading and/or that any use of the FDIC's name or logo is authorized.

Examples of the general form such advisory letters may take may be found on the FDIC's public website at <https://www.fdic.gov/regulations/laws/federal/2021/template-advisory-letters.pdf>. Form A-1 provides a template advisory letter for communicating directly with a person that is believed to be misusing the FDIC's name or logo or making false or misleading representations about deposit insurance. Form A-2 provides a template advisory letter for

communications directed to a third-party publisher that may be disseminating potentially false or misleading representations regarding deposit insurance. Form A-3 provides a template for communications with internet service providers (ISPs), alerting them that a website hosted by the ISP may be making false representations in violation of Section 18(a)(4).

Generally, the FDIC will only send such advisory letters to an ISP if the website in question contains one or more indicia of fraud. Such indicia would include, among other things, evidence that: (1) The website purports to belong to or be associated with an IDI when the IDI disclaims any ownership or association with the website; (2) the website appears to mirror or look like a valid website maintained by an IDI by spoofing or copying photos or pages from the IDI's website in an attempt to deceive depositors into believing that the website belongs to or is associated with the IDI; (3) the website purports to belong to an IDI, when no such IDI exists; or (4) there are geographic or other inconsistencies on the site (e.g., the website is hosted abroad or the contact information reflected on the site does not match those on file with the FDIC).

Section 328.106 further provides that if the recipient of such a letter takes the requested corrective action within the time requested, the FDIC will generally take no further action. However, if the recipient fails to timely take corrective action, the FDIC may pursue all remedies available to it. Additionally, pursuant to § 328.106, the FDIC may commence formal enforcement action at any time if the FDIC has reason to believe that depositors or IDIs may suffer harm as a result of continued conduct or if the person making the false or misleading representation has been previously advised of the agency's concerns.

Section 328.107—Formal Enforcement Action

Section 328.107 sets forth the procedures that will govern any formal enforcement action brought by the FDIC to enforce the provisions of Section 18(a)(4). Under § 328.107, and as authorized by Section 18(a)(4), the FDIC may bring formal actions to enforce Section 18(a)(4) under section 8 of the Federal Deposit Insurance Act (Section 8)¹² against any person in the same

¹⁰ 12 U.S.C. 1820(c).

¹¹ 12 CFR 308.144–150.

¹² 12 U.S.C. 1818. Specifically, the FDIC is authorized to pursue actions under Section 8(b), (c), (d), or (i) to enforce the provisions of Section 18(a)(4).

manner and to the same extent that it can bring such actions against insured state nonmember banks and their IAPs.

Section 328.107 authorizes the FDIC General Counsel to bring an action against any person to enforce the provisions of Section 18(a)(4); however, it provides that in the case of an IDI for which another Federal banking agency is the appropriate Federal banking agency, the General Counsel can only commence an action if the appropriate Federal banking agency fails to take action after receiving a recommendation pursuant to § 328.105. It further provides that administrative proceedings brought to enforce Section 18(a)(4) will be governed by the FDIC's Rules of Practice and Procedure set forth in Part 308 of the FDIC's Regulations.

Section 328.107 also sets forth the venue for formal enforcement actions. In the case of actions against IDIs or IAPs, venue will be in the federal judicial district where the home office of the IDI is located. This is consistent with the venue provisions of Section 8. In actions that do not involve IDIs or IAPs, venue will be based on the residence of the respondent, similar to the manner in which venue is determined for general civil actions under 29 U.S.C 1391. The FDIC believes these venue provisions are consistent with existing law and due process.

Section 328.108—Appeals Process

Section 328.108 clarifies that any order issued after hearings conducted pursuant to this subpart is subject to judicial review to the same extent as any other order issued under Section 8. While Section 18(a)(4) does not expressly provide for judicial review, it does authorize enforcement actions under Section 8, which provides for such review. The FDIC believes that this grant of authority includes the right to seek judicial review and further believes such right is necessary and appropriate. Section 328.108 also provides that any petitions for judicial review may be filed in the court of appeals for the federal circuit where the hearing was held or the United States Court of Appeals for the District of Columbia Circuit. This venue provision is consistent with the venue provisions of Section 8 and provides respondents with the same choice of venue provided after any other FDIC enforcement hearing.

IV. Expected Effects

The proposed rule, if adopted, would primarily affect non-bank entities and individuals who are potentially misusing the FDIC's name or logo or are making false or misleading

representations about deposit insurance. The FDIC currently insures 5,042 depository institutions¹³ that could also be affected; however in practice, the proposed rule would primarily affect non-bank entities and private individuals. Since the adoption of Section 18(a)(4) in 2008, the FDIC has issued only one formal enforcement order against a non-bank entity for misuse of the FDIC's name or logo or for misrepresentations or false advertising in relation to deposit insurance. However, as previously noted the FDIC has observed a recent increase in the number of instances where financial services providers or other entities or individuals have misused the FDIC's name or logo or have made misrepresentations that would falsely suggest to the public that these providers' products are FDIC-insured and been subject to an informal resolution. Between January 1, 2019, and December 31, 2020, the FDIC has worked with non-bank entities to reach informal resolutions regarding the potential misuse of the FDIC's name or logo and/or misrepresentations relation to deposit insurance in at least 165 instances.¹⁴ Based on this experience, the FDIC estimates that the proposed rule, if adopted, would apply to relatively few formal enforcement actions and conservatively estimates that it would affect fewer than 165 informal resolutions with non-bank entities and individuals each year.

As discussed previously, the proposed rule, if adopted, would clarify the FDIC's procedures for evaluating potential violations of Section 18(a)(4). The proposed rule would generally be consistent with existing practices used by the FDIC with respect to these matters. Further the proposed rule, if adopted, would not affect the application of related criminal prohibitions under 18 U.S.C. 709. Therefore, the FDIC believes that the proposed rule, if adopted, would be unlikely to have any significant effect on formal and informal enforcement of the Section 18(a)(4) prohibitions.

The FDIC believes that the proposed rule, if adopted, would benefit FDIC-insured institutions and members of the public by further clarifying what constitutes a violation of Section 18(a)(4), by creating a process by which institutions and members of the public can report suspected instances of false advertising, misuse, or misrepresentation regarding deposit insurance, and by establishing clear

procedures by which the FDIC will investigate and, where necessary, formally and informally resolve potential violations of Section 18(a)(4). Specifically, the added transparency on the FDIC's processes for investigating potential instances of misuse or misrepresentation and, if needed, resolution are expected to benefit the parties involved by establishing a common understanding of those processes.

V. Alternatives

The FDIC has considered alternatives to the rule but believes that adopting subpart B to part 328 represents the most appropriate option. As discussed previously, Section 18(a)(4) establishes prohibitions against the misuse of the FDIC's name or logo and prohibits misrepresentations and false advertising in relation to deposit insurance. The FDIC considered the status quo alternative of not adopting a regulation that further clarifies what constitutes misuse of FDIC name or logo or false or misleading representation with respect to FDIC insurance, how the FDIC will identify and investigate suspected instances of misuse or misrepresentation, and the process by which the FDIC will pursue formal or informal resolution of instances of misuse or misrepresentation. However, based on the FDIC's recent experience addressing instances of potential and actual misuse, misrepresentation, and false advertising in relation to the FDIC name and logo, the FDIC believes that the proposed rule is the most appropriate action.

VI. Request for Comments

The FDIC invites comments on all aspects of this proposed rulemaking. In particular, the FDIC seeks feedback on the scope of the proposed rule and the procedures described therein, including the following specific questions:

False Advertising, Misuse of Logo, and Misrepresentations

1. Please describe the extent to which the proposed rule sufficiently identifies situations that present potential risks related to false or misleading representations regarding deposit insurance coverage and the misuse of the FDIC's name or logo, including those related to specific products and advertising channels. If there are additional types of false or misleading representations about deposit insurance coverage that may not be effectively captured by the rule, please describe them.

2. Please describe the extent to which the proposed rule sufficiently addresses

¹³ FDIC Call Report data, September 30, 2020.

¹⁴ See *FDIC 2019 Annual Report*, p. 38; *FDIC 2020 Annual Report*, p. 47.

false or misleading representations regarding deposit insurance and the misuse of the FDIC's name and logo. If there are additional or alternative ways to more effectively or efficiently address such misrepresentations and/or misuse, please describe them.

3. Please describe any suggested additions to the proposed rule for preventing and addressing the risks of false or misleading representations regarding deposit insurance and/or the misuse of the FDIC's name and logo.

Procedures for Investigations, Informal Resolution, and Formal Enforcement Actions

4. Are the proposed complaint and inquiry procedures sufficiently clear about how business entities and members of the public may contact the FDIC if they have questions or concerns relating to potentially false or misleading representations regarding deposit insurance or misuse of the FDIC's name and logo? Are there other types of procedures the FDIC should consider? If so, please describe them.

5. Are there other alternative, effective, and efficient methods by which a customer can ensure that a third-party's representations regarding deposit insurance are true and accurate? If so, please describe them.

6. Is the proposed informal resolution process an adequate means of addressing, in the first instance in most circumstances, potentially false or misleading representations regarding deposit insurance or misuse of the FDIC's name and logo? Should the FDIC consider other or additional procedures? If so, please describe them.

7. The proposed rule contains a provision that would permit the FDIC, in those limited circumstances where there is risk of imminent harm to consumers or depositors, to confirm the existence of a formal investigation, so long as the target of the investigation was not an IDI or a known IAP thereof. This provision would be an exception to the longstanding confidentiality provisions found in 12 CFR 308.147. Is such an exception appropriate? Does the proposed rule strike an appropriate balance between the need to maintain the confidentiality of investigations involving IDIs and known IAPs, versus the potential value in identifying the existence of investigations into non-bank persons and entities whose conduct may result in risk of imminent harm to consumers and depositors? Are there alternatives the FDIC should consider? If so, please describe them.

8. Is the formal enforcement action process sufficiently clear, given that Section 18(a)(4) expressly references the

use of established enforcement mechanisms set forth in Section 8 of the FDI Act? Should other provisions be added? If so, please describe them.

9. Do the investigation, informal resolution, and formal enforcement action processes described in the proposed rule strike the appropriate balance between addressing in a timely manner potentially false or misleading representations regarding deposit insurance and allowing the parties identified as potentially participating in the false or misleading representations an opportunity to present additional facts or provide a legal defense?

Other Areas of Concern

10. Upon entering into a relationship or arrangement with a third-party non-bank entity, as part of FDIC-insured institutions' due diligence, do such institutions currently take steps to ensure: (a) That the non-bank is aware of existing laws and regulations related to the use of the FDIC's name and logo, and (b) that representations made by the non-bank regarding the insured status of bank products are accurate and comply with existing laws and regulations? If not, are there practices that FDIC-insured institutions could adopt to spread awareness of and compliance with these laws and regulations by non-banks?

11. Are there other topics or issues relating to false or misleading representations regarding deposit insurance or the misuse of the FDIC's name and logo that the FDIC should consider? If so, please describe them and how you think the FDIC should address those topics and issues.

Written comments must be received by the FDIC no later than July 9, 2021.

VII. Administrative Law Matters

A. The Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), requires that, in connection with a notice of proposed rulemaking, an agency prepare and make available for public comment an initial regulatory flexibility analysis that describes the impact of the proposed rule on small entities.¹⁵ However, a regulatory flexibility analysis is not required if the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities, and publishes its certification and a short explanatory statement in the **Federal Register** together with the rule. The Small Business Administration (SBA) has defined "small entities" to include banking organizations with total

assets of less than or equal to \$600 million.¹⁶ Generally, the FDIC considers a significant effect to be a quantified effect in excess of 5 percent of total annual salaries and benefits per institution, or 2.5 percent of total noninterest expenses. The FDIC believes that effects in excess of these thresholds typically represent significant effects for FDIC-supervised institutions. For the reasons provided below, the FDIC certifies that the proposed rule, if adopted in final form, would not have a significant economic impact on a substantial number of small banking organizations. Accordingly, a regulatory flexibility analysis is not required.

As of September 30, 2020, the FDIC insured 5,042 depository institutions, of which 3,585 are considered small banking organizations for the purposes of RFA.¹⁷ Potential instances of misuse or misrepresentation of the FDIC name or logo by IDIs are usually addressed under the normal supervisory authority of the appropriate federal financial regulator, therefore although the proposed rule could affect IDIs, in practice the proposed rule would primarily affect non-bank entities and private individuals. Private individuals are not considered "small entities" by the terms of the RFA.¹⁸

Based on the information above, the FDIC certifies that the proposed rule would not have a significant economic impact on a substantial number of small entities.

The FDIC invites comments on all aspects of the supporting information provided in this RFA section. In particular, would this rule have any significant effects on small entities that the FDIC has not identified?

B. Plain Language

Section 722 of the Gramm-Leach-Bliley Act¹⁹ requires the federal banking agencies to use plain language in all proposed and final rules

¹⁶ The SBA defines a small banking organization as having \$600 million or less in assets, where an organization's "assets are determined by averaging the assets reported on its four quarterly financial statements for the preceding year." See 13 CFR 121.201 (as amended, by 84 FR 34261, effective August 19, 2019). "SBA counts the receipts, employees, or other measure of size of the concern whose size is at issue and all of its domestic and foreign affiliates." See 13 CFR 121.103. Following these regulations, the FDIC uses a covered entity's affiliated and acquired assets, averaged over the preceding four quarters, to determine whether the covered entity is "small" for the purposes of RFA.

¹⁸ How to Comply with the Regulatory Flexibility Act, August 2017, The U.S. Small Business Administration, Office of Advocacy, <https://cdn.advocacy.sba.gov/wp-content/uploads/2019/06/21110349/How-to-Comply-with-the-RFA.pdf>.

¹⁹ Public Law 106–102, section 722, 113 Stat. 1338, 1471 (1999).

¹⁵ 5 U.S.C. 601, *et seq.*

published after January 1, 2000. The FDIC has sought to present the proposed rule in a simple and straightforward manner. The FDIC invites comments on whether the proposal is clearly stated and effectively organized, and how the FDIC might make the proposal easier to understand.

C. The Economic Growth and Regulatory Paperwork Reduction Act

Under section 2222 of the Economic Growth and Regulatory Paperwork Reduction Act of 1996 (EGRPRA), the FDIC is required to review all of its regulations, at least once every 10 years, in order to identify any outdated or otherwise unnecessary regulations imposed on insured institutions.²⁰

D. Riegle Community Development and Regulatory Improvement Act of 1994

Pursuant to section 302(a) of the Riegle Community Development and Regulatory Improvement Act (RCDRIA),²¹ in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on IDIs, each Federal banking agency must consider, consistent with principles of safety and soundness and the public interest, any administrative burdens that the regulations would place on depository institutions, including small depository institutions, and customers of depository institutions, as well as the benefits of the regulations. In addition, section 302(b) of RCDRIA requires new regulations and amendments to regulations that impose additional reporting, disclosures, or other new requirements on IDIs generally to take effect on the first day of a calendar quarter that begins on or after the date on which the regulations are published in final form.²² The FDIC invites comments that further will inform its consideration of RCDRIA.

List of Subjects in 12 CFR Part 328

Advertising, Bank deposit insurance, Savings associations, Signs and symbols.

Authority and Issuance

For the reasons stated in the preamble, the Federal Deposit Insurance Corporation proposes to amend 12 CFR part 328 as follows:

- 1. Revise the heading for part 328 to read as follows:

PART 328—ADVERTISEMENT OF MEMBERSHIP, FALSE ADVERTISING, MISREPRESENTATION OF INSURED STATUS, AND MISUSE OF THE FDIC'S NAME OR LOGO

- 2. Revise the authority citation for part 328 to read as follows:

Authority: 12 U.S.C. 1818, 1819 (Tenth), 1820(c), 1828(a).

- 3. Add new subpart A of part 328 entitled "Subpart A—Advertisement of Membership."

- 4. Redesignate §§ 328.0 through 328.4 as subpart A of part 328.

- 5. Reserve §§ 328.5 through 328.99.

- 6. Add a new part 328, subpart B to read as follows:

Subpart B—False Advertising, Misrepresentation of Insured Status, and Misuse of the FDIC's Name or Logo.

Sec.

328.100	Scope
328.101	Definitions
328.102	Prohibition
328.103	Inquiries and Complaints
328.104	Investigations of Potential Violations
328.105	Referral to Appropriate Authority
328.106	Informal Resolution
328.107	Formal Enforcement Actions
328.108	Appeals Process

Subpart B—False Advertising, Misrepresentation of Insured Status, and Misuse of the FDIC's Name or Logo

§ 328.100 Scope.

This Subpart applies to any person who: (1) Falsely represents, expressly or by implication, that any deposit liability, obligation, certificate, or share is FDIC-insured by using the FDIC's name or logo; (2) knowingly misrepresents, expressly or by implication, that any deposit liability, obligation, certificate, or share is insured by the FDIC if such an item is not so insured; (3) knowingly misrepresents, expressly or by implication, the extent to which or the manner in which any deposit liability, obligation, certificate, or share is insured by the FDIC, if such an item is not insured to the extent or manner represented; or (4) aid or abets another in any of the foregoing.

§ 328.101 Definitions.

For purposes of this subpart:

(a) *Advertisement* means a commercial message, in any medium, that is designed to attract public attention or patronage to a product, business, or service.

(b) *Appropriate Federal Banking Agency* has the meaning set forth in

section 3(q) of the FDIC (12 U.S.C. 1813(q)).

(c) *FDIA* means the Federal Deposit Insurance Act, 12 U.S.C. 1811 *et seq.*

(d) *FDIC* means the Federal Deposit Insurance Corporation.

(e) *FDIC-Associated Images* means the Seal of the FDIC, alone or within the letter C of the term FDIC; the Official Sign and Symbol of the FDIC, as set forth in 12 CFR 328.1; the Official Advertising Statement, as set forth in 12 CFR 328.3(b); any similar images; and any other signs and symbols that may represent or imply that any deposit, liability, obligation certificate, or share is insured or guaranteed by the FDIC.

(f) *FDIC-Associated Terms* means the abbreviation, "FDIC," and the following words or phrases: "Federal Deposit Insurance Corporation," "Federal Deposit," "Federal Deposit Insurance," "FDIC-insured," "FDIC insurance," "insured by FDIC," "member FDIC;" any similar words or phrases; or any other terms that may represent or imply that any deposit, liability, obligation certificate, or share is insured or guaranteed by the FDIC.

(g) *Federal Banking Agency* has the meaning set forth in section 3(z) of the FDIC (12 U.S.C. 1813(z)).

(h) *General Counsel* means the General Counsel of the FDIC or his or her designee.

(i) *Hybrid Product* has the same meaning as set forth under 12 CFR 328.3(e)(1)(ii).

(j) *Institution-Affiliated Party (IAP)* has the same meaning as set forth under section 3(u) of the FDIA, 12 U.S.C. 1813(u).

(k) *Insured Deposit* has the same meaning as set forth under section 3(m) of the FDIA, 12 U.S.C. 1813(m).

(l) *Insured Depository Institution* has the same meaning as set forth under section 3(c)(2) of the FDIA, 12 U.S.C. 1813(c)(2).

(m) *Non-Deposit Product* has the same meaning as set forth under 12 CFR 328.3(e)(1)(i).

(n) *Person* means a natural person, sole proprietor, partnership, corporation, unincorporated association, trust, joint venture, pool, syndicate, agency or other entity, association, or organization, including a Regulated Institution as defined in paragraph (o) of this section.

(o) *Regulated Institution* means any institution for which the FDIC, the Office of the Comptroller of the Currency, or the Board of Governors of the Federal Reserve System is the "appropriate Federal banking agency" under section 3(q) of the FDIA, 12 U.S.C. 1813(q).

²⁰ Public Law 104–208, 110 Stat. 3009 (1996).

²¹ 12 U.S.C. 4802(a).

²² *Id.*

(p) *Third-Party Publisher* means any party that publishes, places, distributes, or circulates advertising or marketing materials, regardless of the platform or media used for distribution, containing FDIC-Associated Images, FDIC-Associated Terms, or other claims regarding FDIC insurance or guarantees. Third-Party Publishers shall include, but not be limited to: Publishers and distributors of written, visual, or print advertising; broadcasters of video or audio advertisements; telemarketers; internet or web-based distributors, including internet service providers, and email marketers; and direct mail marketers and distributors.

(q) *Uninsured Financial Product* means any Non-Deposit Product, Hybrid-Product, investment, security, obligation, certificate, share, or financial product other than an "Insured Deposit" as defined in paragraph (k) of this section.

§ 328.102 Prohibition.

(a) *Use of the FDIC Name or Logo.*

(1) No person may represent or imply that any Uninsured Financial Product is insured or guaranteed by the FDIC by using FDIC-Associated Terms as part of any business name or firm name of any person;

(2) No person may represent or imply that any Uninsured Financial Product is insured or guaranteed by the FDIC by using FDIC-Associated Terms or by using FDIC-Associated Images as part of an Advertisement, solicitation, or other publication or dissemination.

(3) This subsection applies, but is not limited, to:

(i) An Advertisement for any Uninsured Financial Product which feature or include one or more FDIC-Associated Terms or FDIC-Associated Images, without a clear, conspicuous, and prominent disclaimer that the products being offered are not FDIC insured or guaranteed;

(ii) An Advertisement for any Uninsured Financial Product which may be backed or guaranteed by an entity other than the FDIC, but which feature or include one or more FDIC-Associated Terms or FDIC-Associated Images, without a clear, conspicuous, prominent, and accurate explanation as to the actual nature and source of the guarantee;

(iii) An Advertisement for any Non-Deposit Product or Hybrid Product by a Regulated Institution which include any statement or symbol which implies or suggests the existence of Federal deposit insurance relating to the Non-Deposit product or Hybrid Product;

(iv) Publication or dissemination of information, regardless of the media or

platform, that suggests or implies that the party making the representation is an FDIC-insured institution if this is not in fact true.

(v) Publication or dissemination of information, regardless of the media or platform, that suggests or implies that the party making the representation is associated with an FDIC-insured institution if the nature of the association is not clearly, conspicuously, prominently, and accurately described.

(vi) Publication or dissemination of information, regardless of the media or platform, that suggests or implies that the party making the representation is the FDIC or any office, division, or subdivision thereof, if this is not in fact true.

(vii) Publication or dissemination of information, regardless of the media or platform, that suggests or implies that the party making the representation is associated with the FDIC or any office, division, or subdivision thereof, if the nature of the association is not clearly, conspicuously, prominently, and accurately described.

(b) *False or Misleading Representations regarding FDIC Insurance.*

(1) No person may knowingly make false or misleading representations about deposit insurance, including:

(i) That any deposit liability, obligation, certificate, or share is insured, under this subpart, if such a deposit is not so insured;

(ii) the extent to which any deposit liability, obligation, certificate, or share is insured under this subpart, if such item is not insured to the extent represented; or

(iii) the manner in which any deposit liability, obligation, certificate, or share is insured under this subpart, if such item is not insured in the manner represented.

(2) For the purposes of this subsection, a statement is deemed to be a statement regarding deposit insurance, if it:

(i) Includes any FDIC-Associated Images or FDIC-Associated Terms;

(ii) makes any representation, suggestion, or implication about the existence of FDIC insurance or the extent or manner of coverage; or

(iii) makes any representation, suggestion, or implication about the existence, extent, or effectiveness of any guarantee by FDIC in the event of financial distress by Insured Depository Institutions, whether a specific Insured Depository Institution or Insured Depository Institutions generally, including but not limited to bank

failure, insolvency, or receivership of such institutions.

(3) For the purposes of this subsection, a statement regarding deposit insurance violates this section, if:

(i) The statement contains any material representations which would have the tendency or capacity to mislead a reasonable consumer, regardless of whether any such consumer was actually misled; or

(ii) the statement omits material information which would be necessary to prevent a reasonable consumer from being misled, regardless of whether any such consumer was actually misled. Where such a statement is made by a person other than an Insured Depository Institution, failure to identify the name(s) of the Insured Depository Institution(s) that will be receiving the deposits is deemed a material omission.

(4) Without limitation, a false or misleading representation is deemed to be material if it states, suggests or implies that:

(i) Uninsured Financial Products are insured or guaranteed by the FDIC;

(ii) Insured Deposits (whether generally or at a particular Regulated Institution) are not insured or guaranteed by the FDIC;

(iii) the amount of deposit insurance coverage is different (whether greater or less) than actually provided under the FDIA;

(iv) the circumstances under which deposit insurance may be paid are different than actually provided under the FDIA;

(v) the requirements to qualify for deposit insurance, or the process by which deposit insurance would be paid, are different from what is provided under the FDIA and its implementing regulations, including false or misleading claims related to actions required of depositors to qualify for or obtain such insurance; or

(vi) Regulated Institutions may convert Insured Deposits into another form of liability that is not insured, such as unsecured debt or equity.

(5) Without limitation, a representation is deemed to have been knowingly made if the person making the representation:

(i) Has made false or misleading representations regarding deposit insurance;

(ii) has been advised by the FDIC in an advisory letter, as provided in § 328.106(a) or has been advised by another governmental or regulatory authority, including, but not limited to, another Federal banking agency, the Federal Trade Commission, the U.S. Department of Justice, or a state bank

supervisor, that such representations are false or misleading; and

(iii) thereafter, continues to make these, or substantially-similar, representations.

§ 328.103 Inquiries and Complaints.

Should any person have reason to believe that anyone is or may be acting in violation of section 18(a) of the FDIA (12 U.S.C. 1828(a)) or this subpart, or have questions regarding the accuracy of deposit-related representations, such individuals may contact the FDIC at the FDIC Information and Support Center, <https://ask.fdic.gov/fdicinformationandsupportcenter/s/>, or by telephone at: 1-877-275-3342 (1-877-ASK-FDIC).

§ 328.104 Investigations of Potential Violations.

(a) The General Counsel shall have delegated authority to investigate potential violations of section 18(a) of the FDIA (12 U.S.C. 1828(a)) and this subpart.

(b) Such investigations will be conducted as prescribed under section 10(c) of the FDIA (12 U.S.C. 1820(c)) and subpart K of part 308 of the FDIC's Rules of Practice and Procedure (12 CFR 308.144–150). Notwithstanding the general confidentiality provisions of 12 CFR 308.147, in cases which may pose a risk of imminent harm to consumers or depositors, the FDIC may disclose or confirm the existence of an investigation that does not involve an Insured Depository Institution or a known IAP thereof. Such disclosure shall not disclose any information obtained or uncovered during the course of the investigation.

§ 328.105 Referral to Appropriate Authority.

(a) If, in connection with the receipt of an inquiry or complaint, or during the course of an investigation, informal resolution, or formal enforcement under this subpart:

(1) The FDIC becomes aware of conduct by a Regulated Institution for which another Federal banking agency is the appropriate Federal banking agency or an Institution-Affiliated Party of such an institution, that appears to violate section 18(a) of the FDIA (12 U.S.C. 1828(a)), the FDIC may recommend that the appropriate Federal banking agency take appropriate enforcement action. If the appropriate Federal banking agency does not take the recommended action within 30 days, the FDIC may pursue any and all remedies available under section 18(a) or the FDIA (12 U.S.C. 1828(a)) and this subpart;

(2) the FDIC becomes aware of conduct that the FDIC has reason to

believe violates a civil law or regulations within the jurisdiction of another regulatory authority, the FDIC may take steps to notify the appropriate authority; and

(3) the FDIC becomes aware of conduct that the FDIC has reason to believe violates 18 U.S.C. 709, the FDIC may notify FDIC's Office of Inspector General for referral to the appropriate criminal law enforcement authority.

(b) To the extent that any records are provided to a regulatory or criminal law enforcement authority, as set forth in paragraph (a), of this section, the provision of such records will be made in accordance with the requirements of part 309. Where such records were obtained during the course of an investigation, informal resolution, or formal enforcement action, the General Counsel shall be considered the Director of the Corporation's Division having primary authority over records so obtained.

§ 328.106 Informal Resolution.

(a) If the FDIC has reason to believe that any person may be misusing an FDIC-associated image or FDIC-associated term or otherwise violating § 328.102(a), or may be making false or misleading representations regarding deposit insurance in violation of § 328.102(b), the FDIC may issue an advisory letter to such a person and/or any person who aids or abets another in such conduct, including any Third-Party Publisher. Generally, such an advisory letter will:

(1) Alert the recipient of advisory letter of the basis for the FDIC's concerns;

(2) Request that the person and/or Third-Party Publisher:

(i) Take reasonable steps to prevent any violations of section 18(a) of the FDIA (12 U.S.C. 1828(a)) and this subpart;

(ii) commit in writing to refrain from such violations in the future; and

(iii) notify the FDIC in writing that the identified concerns have been fully addressed and remediated; and

(3) Offer the person or Third-Party Publisher the opportunity to provide additional information, documentation, or justifications to substantiate the representations made or otherwise refute the FDIC's expressed concerns.

(b) Except in cases where the FDIC has reason to believe that consumers or Insured Depository Institutions may suffer harm arising from continued violations, recipients of advisory letters described in paragraph (a) of this section, shall be provided not less than fifteen (15) days to provide the

requested commitment, explanation, or justification.

(c) Where a recipient of an advisory letter described in paragraph (a) of this section, provides the FDIC with the requested written commitments within the timeframe specified in the letter, and where any required remediation has been verified by FDIC staff, the FDIC will generally take no further administrative enforcement against such a party under § 328.107.

(d) Where a recipient of an advisory letter described in paragraph (a) of this section, fails to respond to the letter; fails to make the requested commitments; or fails to provide additional information, documentation, or justifications that the FDIC, in its discretion, finds adequate to substantiate the representations made or otherwise refute the concerns set forth in the advisory letter, the FDIC may pursue all remedies set forth in this subpart.

(e) Nothing in this section shall prevent the FDIC from commencing a formal enforcement action under § 328.107 at any time before or after the issuance of an advisory letter under this section if:

(1) The FDIC has reason to believe that consumers or Insured Depository Institutions may suffer harm arising from continued violations; or

(2) the person to whom such an advisory letter would be sent has previously received a similar advisory letter from the FDIC under § 328.106(a).

§ 328.107 Formal Enforcement Actions.

(a) *Enforcement Authority*—For the purpose of enforcing the requirements of Section 18(a)(4) of the FDIA (12 U.S.C. 1818(a)(4)), the General Counsel is authorized to bring administrative enforcement actions against any person under sections 8(b), (c), (d), and (i) of the FDIA (12 U.S.C. 1818(b), 1818(c), 1818(d), and 1818(i)), in the same manner and to the same extent as with respect to a state nonmember insured bank. In the case of conduct by a Regulated Institution for which another Federal banking agency is the appropriate Federal banking agency or an institution-affiliated party of such an institution, the General Counsel may not bring an enforcement action under this subpart unless the FDIC has provided the appropriate Federal banking agency with notice as set forth in section 105(a)(1) of this subpart and the appropriate Federal banking agency failed to take the recommended action.

(b) *Venue*—Unless the person who is the subject of the enforcement action consents to a different location, the venue for an administrative action

commenced under Section 18(a)(4) of the FDIA (12 U.S.C. 1818(a)(4)), shall be as follows:

(1) In a case where the person who is the subject of the action is an Insured Depository Institution or an IAP of an Insured Depository Institution, in the federal judicial district or territory in which the home office of the Insured Depository Institution is located;

(2) In a case where the person who is the subject of the action is not an Insured Depository Institution or an IAP of an Insured Depository Institution, the federal judicial district or territory where the person who is the subject of the action resides, if the subject resides in the United States. If the subject of the action does not reside in the United States, the venue shall be where the subject of the action conducts business or the federal judicial district for the District of Columbia.

(3) For the purposes of paragraph (1) of this section, a natural person is deemed to reside in the federal judicial district where the natural person is domiciled. A person other than a natural person is deemed to reside in the federal judicial district where it is headquartered or has its principal place of business.

(c) *Rules of Practice and Procedure.* All actions brought and maintained under this section will be subject to the FDIC's Rules of Practice and Procedure, Subparts A–C of Part 308 (12 CFR 308.1–308.109).

§ 328.108 Appeals Process.

(a) A person who is the subject of a final order issued after an administrative action commenced pursuant to this subpart may obtain judicial review of such order in accordance with the procedures set forth in section 8(h)(2) of the FDIA (12 U.S.C. 1818(h)(2)).

(b) Petitions for review under this section may be filed in the court of appeals for the circuit where the hearing was held or the United States Court of Appeals for the District of Columbia Circuit.

Federal Deposit Insurance Corporation.

By order of the Board of Directors.

Dated at Washington, DC, on April 21, 2021.

James P. Sheesley,

Assistant Executive Secretary.

BILLING CODE 6714-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–0338; Project Identifier AD–2020–01423–T]

RIN 2120-AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 787–8 and 787–9 airplanes. This proposed AD was prompted by reports that shimming requirements were not met during the assembly of certain structural joints, which can result in reduced fatigue thresholds and cracking of the affected structural joints. This proposed AD would require repetitive inspections for cracking of certain areas of the aft wheel well bulkhead (AWWB) body chord and AWWB side fitting and failsafe straps, and repair of any cracking found. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 24, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <https://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–

3195. It is also available on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2021–0338.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2021–0338; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Greg Rutar, Aerospace Engineer, Airframe Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3529; email: Greg.Rutar@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2021–0338; Project Identifier AD–2020–01423–T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments we receive, without change, to <https://www.regulations.gov>, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each

page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Greg Rutar, Aerospace Engineer, Airframe Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206 231 3529; email: Greg.Rutar@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has received reports indicating that shimming requirements were not met during the assembly of certain AWWB structural joints, which can result in reduced fatigue thresholds and cracking of the affected structural joints. The existing inspection program does not adequately detect this fatigue cracking. The affected locations are the forward edge of the AWWB side fitting and failsafe strap at STA 1209 on the left and right side, and the AWWB side fitting outer chord surface and failsafe strap; and the forward edge of the horizontal flange of the AWWB body chord and around all the fastener heads and vertical beam clips common to the AWWB body chord horizontal flange. Not meeting the shimming requirements during assembly of the STA 1209 AWWB side fitting and body chord structural joints results in excessive pull-up forces, fastener shanking, excessive burr heights in metallic members, and metallic chips (foreign object debris) in fastened interfaces, which all degrade fatigue performance of any affected structural joints.

Undetected fatigue cracking could weaken primary structure so it cannot

sustain limit load, which could result in reduced structural integrity of the airplane.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin B787–81205–SB530077–00 RB, Issue 001, dated September 8, 2020. The service information describes procedures for repetitive high frequency eddy current (HFEC) inspections for cracking of the forward edge of the AWWB side fitting and failsafe strap at station (STA) 1209 on the left and right side, and the AWWB side fitting outer chord surface and failsafe strap, and repair of any cracking found.

The FAA reviewed Boeing Alert Requirement Bulletin B787–81205–SB530078–00 RB, Issue 001, dated September 8, 2020. The service information describes procedures for repetitive HFEC inspections for cracking of the forward edge of the horizontal flange of the AWWB body chord and around all the fastener heads and vertical beam clips common to the AWWB body chord horizontal flange.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

FAA’s Determination

The FAA is proposing this AD because the agency evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishment of the actions

identified in Boeing Alert Requirements Bulletins B787–81205–SB530077–00 RB and B787–81205–SB530078–00 RB, both Issue 001, both dated September 8, 2020, except for any differences identified as exceptions in the regulatory text of this proposed AD.

For information on the procedures and compliance times, see this service information at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2021–0338.

Explanation of Requirements Bulletin

The FAA worked in conjunction with industry, under the Airworthiness Directive Implementation Aviation Rulemaking Committee (AD ARC), to enhance the AD system. One enhancement is a process for annotating which steps in the service information are “required for compliance” (RC) with an AD. Boeing has implemented this RC concept into Boeing service bulletins.

In an effort to further improve the quality of ADs and AD-related Boeing service information, a joint process improvement initiative was worked between the FAA and Boeing. The initiative resulted in the development of a new process in which the service information more clearly identifies the actions needed to address the unsafe condition in the “Accomplishment Instructions.” The new process results in a Boeing Requirements Bulletin, which contains only the actions needed to address the unsafe condition (*i.e.*, only the RC actions).

Costs of Compliance

The FAA estimates that this proposed AD affects 79 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Repetitive inspections	16 work-hours × \$85 per hour = \$1,360 per inspection cycle.	\$0	\$1,360 per inspection cycle.	\$107,440 per inspection cycle.

The FAA has received no definitive data on which to base the cost estimates for the on-condition repairs specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more

detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce.

This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the

States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

The Boeing Company: Docket No. FAA–2021–0338; Project Identifier AD–2020–01423–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 24, 2021.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787–8 and 787–9 airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin B787–81205–SB530077–00 RB, Issue 001, dated September 8, 2020.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports that shimming requirements were not met during the assembly of certain aft wheel well bulkhead (AWWB) structural joints, which can result in reduced fatigue thresholds and cracking of the affected structural joints. The FAA is issuing this AD to address undetected fatigue cracking, which could weaken primary structure so it cannot sustain limit

load, and could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the “Compliance” paragraph of Boeing Alert Requirements Bulletins B787–81205–SB530077–00 RB and B787–81205–SB530078–00 RB, both Issue 001, both dated September 8, 2020, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletins B787–81205–SB530077–00 RB and B787–81205–SB530078–00 RB, both Issue 001, both dated September 8, 2020.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletins B787–81205–SB530077–00 and B787–81205–SB530078–00, both Issue 001, both dated September 8, 2020, which are referred to in Boeing Alert Requirements Bulletins B787–81205–SB530077–00 RB and B787–81205–SB530078–00 RB, both Issue 001, both dated September 8, 2020.

(h) Exceptions to Service Information Specifications

(1) Where Boeing Alert Requirements Bulletin B787–81205–SB530077–00 RB, Issue 001, dated September 8, 2020, uses the phrase “the issue 001 date of the Requirements Bulletin B787–81205–SB530077–00 RB” this AD requires using “the effective date of this AD.”

(2) Where Boeing Alert Requirements Bulletin B787–81205–SB530078–00 RB, Issue 001, dated September 8, 2020, uses the phrase “the issue 001 date of the Requirements Bulletin B787–81205–SB530078–00 RB,” this AD requires using “the effective date of this AD.”

(3) Where Boeing Alert Requirements Bulletins B787–81205–SB530077–00 RB and B787–81205–SB530078–00 RB, both Issue 001, both dated September 8, 2020, specify contacting Boeing for repair instructions: This AD requires doing the repair using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

(1) For more information about this AD, contact Greg Rutar, Aerospace Engineer, Airframe Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3529; email: Greg.Rutar@faa.gov.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued on April 20, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Leonardo S.p.a. (Type Certificate Previously Held by Agusta S.p.A.) Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2011–18–52 for certain Agusta S.p.A. (now Leonardo S.p.a.) Model AB139 and AW139 helicopters. AD 2011–18–52 requires revising the life limit for certain part-numbered tail rotor (T/R) blades, updating the helicopter’s historical records, repetitively inspecting each T/R blade for a crack or damage, and depending on the results, replacing the T/R blade. Since the FAA

issued AD 2011–18–52, the manufacturer developed improved T/R blades using different materials and established life limits for each improved blade. This proposed AD would retain certain requirements from AD 2011–18–52, revise certain requirements from AD 2011–18–52, and expand the applicability to include the newly-designed T/R blades. The actions of this proposed AD are intended to address an unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 24, 2021.

ADDRESSES: You may send comments by any of the following methods:

- **Federal eRulemaking Docket:** Go to <https://www.regulations.gov>. Follow the online instructions for sending your comments electronically.

- **Fax:** (202) 493–2251.

- **Mail:** Send comments to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

- **Hand Delivery:** Deliver to the “Mail” address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Leonardo S.p.a. Helicopters, Emanuele Bufano, Head of Airworthiness, Viale G. Agusta 520, 21017 C. Costa di Samarate (Va) Italy; telephone +39–0331–225074; fax +39–0331–229046; or at <https://www.leonardocompany.com/en/home>. You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2021–0348; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the European Aviation Safety Agency (now European Union Aviation Safety Agency) (EASA) AD, any comments received and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Matt Fuller, AD Program Manager, Operational Safety Branch, Airworthiness Products Section, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort

Worth, TX 76177; telephone (817) 222–5110; email Matthew.Fuller@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2021–0348; Project Identifier 2018–SW–076–AD” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to <https://www.regulations.gov>, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposal.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to, Matt Fuller, AD Program Manager, Operational Safety Branch, Airworthiness Products Section, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email Matthew.Fuller@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued Emergency AD 2011–18–52 on August 25, 2011, which was published as a Final rule; request for

comments, on April 18, 2012 (77 FR 23109) (AD 2011–18–52). AD 2011–18–52 applies to Agusta S.p.A. (now Leonardo S.p.A.) Model AB139 and AW139 helicopters with a T/R blade part number (P/N) 3G6410A00131 or P/N 4G6410A00131 installed. AD 2011–18–52 requires, within 5 hours time-in-service (TIS), establishing a life limit of 600 hours TIS or 1,500 takeoff and landing cycles (cycles), whichever occurs first, on the affected T/R blades and updating the helicopter’s historical records. If a T/R blade’s total number of cycles is unknown, determining the T/R blade cycles by multiplying the T/R blade’s hours TIS by 4 is required. For a T/R blade that, on the effective date of the AD, has already exceeded 600 hours TIS or 1,500 cycles, the AD requires replacing the T/R blade with an airworthy T/R blade within 5 hours TIS.

AD 2011–18–52 also requires, within 25 hours TIS, and thereafter at intervals not to exceed 25 hours TIS, inspecting the T/R blade for a crack or damage that exceeds the limits of the applicable maintenance manual. The inspection must be accomplished using a mirror, magnifying glass (5X or greater), and light source; or borescope. If there is a crack, or if there is damage that exceeds the limits of the applicable maintenance manual, AD 2011–18–52 requires, before further flight, replacing the T/R blade with an airworthy T/R blade.

AD 2011–18–52 was prompted by a fatal accident involving an Agusta Model AW139 helicopter, which may have been caused by cracks in a T/R blade. EASA, which is the Technical Agent for the Member States of the European Union, issued EASA Emergency AD 2011–0156–E, dated August 25, 2011 (EASA AD 2011–0156–E) to require repetitive inspections and reducing the life limit of the T/R blades. According to EASA, this condition, if not detected and corrected, could result in failure of a T/R blade and subsequent loss of control of the helicopter.

Actions Since AD 2011–18–52 Was Issued

Since the FAA issued AD 2011–18–52, EASA issued a series of ADs as follows:

- EASA AD 2012–0030, dated February 17, 2012 (EASA AD 2012–0030), which superseded Emergency AD 2011–0156–E, advised that the manufacturer developed improved, newly-designed T/R blades P/N 3G6410A00132 and P/N 4G6410A00132, established life limits for each improved T/R blade, added repetitive inspections for the improved T/R blades, and advised that each T/R

blade P/N had its own individual life limit.

- EASA AD 2012–0076, dated May 2, 2012 (EASA AD 2012–0076), which superseded EASA AD 2012–0030 and was issued after the manufacturer developed another version of improved T/R blades P/N 3G6410A00133 and P/N 4G6410A00133 with different materials. AD 2012–0076 required interim life limits for the new improved version of the T/R blades while also retaining the inspection requirements of EASA AD 2012–0030.

- EASA AD 2012–0076R1, dated July 13, 2012 (EASA AD 2012–0076R1), which revised EASA AD 2012–0076 after a modification was developed to allow installation of certain part-numbered T/R blades under certain conditions.

- EASA AD 2012–0076R2, dated February 20, 2014 (EASA AD 2012–0076R2), which revised EASA AD 2012–0076R1, was issued after another modification was developed. EASA AD 2012–0076R2 requires removing the 25 hours TIS inspection of certain part-numbered T/R blades, extending the life limit of certain part-numbered T/R blades, retaining the repetitive inspections of certain part-numbered T/R blades and depending on the inspection results, performing certain applicable corrections.

Also, after AD 2011–18–52 was issued, the FAA issued an NPRM (78 FR 54596), which published in the **Federal Register** on September 5, 2013. The NPRM proposed to require retaining the inspection requirements for certain part-numbered blades and expand the applicability to include the newly designed blades and establish life limits for those blades. The NPRM also proposed to require replacing any cracked blade or any blade that has reached its life limit. That NPRM was prompted by improved modifications of the T/R blades. However, because the FAA determined that the NPRM does not adequately address the identified unsafe condition, the NPRM was withdrawn on February 25, 2021 (86 FR 11477).

Additional review also revealed necessary changes to address the unsafe condition. This proposed AD clarifies the repetitive inspection for T/R blade P/Ns 3G6410A00131 and P/N 4G6410A00131 from, “visually inspect the T/R blade for a crack or damage” to “visually inspect the T/R blade for a crack and damage.” This proposed AD further revises that repetitive inspection from “damage that exceeds the limits of the applicable maintenance manual” to “damage that exceeds allowable limits” to meet current publishing

requirements. This proposed AD clarifies the inspection area for that repetitive inspection by proposing to require using a figure in the related service information instead of using a figure in the body of this AD action. This proposed AD also revises the requirements by removing unnecessary information, including the special flight permits paragraph.

FAA’s Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with the European Union, EASA has notified the FAA of the unsafe condition described in its AD. The FAA is proposing this AD after evaluating all known relevant information and determining that an unsafe condition is likely to exist or develop on other helicopters of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed AgustaWestland S.p.A Mandatory Bollettino Tecnico No. 139–265, Revision B, dated February 18, 2014. This service information specifies a precautionary inspection for a crack, a life limit for the affected T/R blades, and a quarantine of T/R blades that have exceeded their life limit. This service information also provides instructions for mixed usage of the affected T/R blades and sending certain data to the manufacturer.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Proposed AD Requirements

This proposed AD would retain the inspection requirements of AD 2011–18–52 for certain part-numbered T/R blades, expand the applicability to include the improved T/R blades, require determining each T/R blade’s total hours TIS or landing cycles, and establish life limits for certain T/R blades. This proposed AD would require removing from service any T/R blade that has a crack or damage beyond allowable limits or any T/R blade that has reached its life limit.

Differences Between This Proposed AD and EASA AD

The EASA AD does not list the T/R blade life limits and instead references the Airworthiness Limitations Section of 139 AMPI Chapter 4, while this proposed AD would include the life limits in the AD. The EASA AD requires reporting information to Product

Support Engineering, whereas this proposed AD would not. The EASA AD requires contacting AgustaWestland if a crack or damage is found during the inspection, whereas this proposed AD would require removing the T/R blade from service.

Costs of Compliance

The FAA estimates that this proposed AD would affect 130 helicopters of U.S. Registry. The FAA estimates that operators may incur the following costs in order to comply with this proposed AD. Labor costs are estimated at \$85 per work-hour.

Inspecting one T/R blade for a crack would take about 1 work-hour for an estimated cost of \$85 per T/R blade per inspection cycle and up to \$44,200 for the U.S. fleet per inspection cycle.

Replacing one T/R blade would take about 8 work-hours and parts would cost about \$40,560 for an estimated cost of \$41,240 per replacement.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify this proposed regulation:

1. Is not a “significant regulatory action” under Executive Order 12866,
2. Would not affect intrastate aviation in Alaska, and

3. Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:
 ■ a. Removing Airworthiness Directive 2011–18–52, Amendment 39–17020 (77 FR 23109, April 18, 2012); and
 ■ b. Adding the following new airworthiness directive:

Leonardo S.p.a. (Type Certificate Previously Held by Agusta S.p.A.): Docket No. FAA–2021–0348; Project Identifier 2018–SW–076–AD.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) action by June 24, 2021.

(b) Affected ADs

This AD replaces AD 2011–18–52, Amendment 39–17020 (77 FR 23109, April 18, 2012) (AD 2011–18–52).

(c) Applicability

This AD applies to Leonardo S.p.a. (type certificate previously held by Agusta S.p.A.) Model AB139 and AW139 helicopters, certificated in any category, with tail rotor (T/R) blade, part number (P/N) 3G6410A00131, 3G6410A00132, 3G6410A00133, 4G6410A00131, 4G6410A00132, or 4G6410A00133, installed.

(d) Subject

Joint Aircraft Service Component (JASC) Code: 6410, Tail Rotor Blades.

(e) Unsafe Condition

This AD defines the unsafe condition as a crack in a T/R blade. This condition could result in failure of a T/R blade and subsequent loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) For T/R blade P/Ns 3G6410A00131 and 4G6410A00131, within 5 hours time-in-

service (TIS) after May 3, 2012 (the effective date of AD 2011–18–52), establish a life limit of 600 hours TIS or 1,500 takeoff and landing cycles (cycles), whichever occurs first, on the affected T/R blades and update the helicopter's historical records. If a T/R blade's total number of cycles is unknown, determine the T/R blade cycles by multiplying the T/R blade's hours TIS by 4.

(2) For T/R blade P/Ns 3G6410A00131 and 4G6410A00131, thereafter following paragraph (g)(1) of this AD, remove any T/R blade from service before accumulating 600 total hours TIS or 1,500 total cycles, whichever occurs first.

(3) For T/R blade P/Ns 3G6410A00132, 3G6410A00133, 4G6410A00132, and 4G6410A00133, within 5 hours TIS after the effective date of this AD, determine the total number of cycles. If a T/R blade's total number of cycles is unknown, determine the T/R blade cycles by multiplying the blade's hours TIS by 4. Before further flight, remove any T/R blade from service that has accumulated or exceeded its life limit as follows. Thereafter, remove any T/R blade from service before accumulating its life limit as follows:

- (i) T/R blade P/Ns 3G6410A00132 and 4G6410A00132: 1,200 total hours TIS or 3,200 total cycles, whichever occurs first.
- (ii) T/R blade P/N 3G6410A00133: 40,000 total cycles.
- (iii) T/R blade P/N 4G6410A00133: 4,033 total hours TIS or 40,000 cycles, whichever occurs first.

Note 1 to paragraph (g)(3): A combination of T/R blades having different P/Ns can be installed on the same helicopter. The eligible combinations of T/R blades P/N are listed in AgustaWestland S.p.A. Mandatory Bollettino Tecnico No. 139–265, Revision B, dated February 18, 2014 (BT No. 139–265).

(4) For T/R blade P/Ns 3G6410A00131 and P/N 4G6410A00131, within 25 hours TIS after the effective date of this AD, and thereafter at intervals not to exceed 25 hours TIS, visually inspect the T/R blade for a crack and damage that exceeds allowable limits. Inspect in the area depicted in Figure 1 of BT No. 139–265 using a mirror, a 5X or higher power magnifying glass, and a flashlight, or borescope. If there is a crack or damage that exceeds allowable limits, before further flight, remove the T/R blade from service.

(5) As of the effective date of this AD, do not install on any helicopter any T/R blade P/N 3G6410A00131 or P/N 4G6410A00131, unless the actions required by paragraphs (g)(1), (2), and (4) of this AD have been accomplished.

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (i)(1) of this AD. Information may be emailed to: email 9-AVS-AIR-730-AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(i) Related Information

(1) For more information about this AD, contact Matt Fuller, AD Program Manager, Operational Safety Branch, Airworthiness Products Section, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email matthew.fuller@faa.gov.

(2) For service information identified in this AD, contact Leonardo S.p.a. Helicopters, Emanuele Bufano, Head of Airworthiness, Viale G. Agusta 520, 21017 C. Costa di Samarate (Va) Italy; telephone +39–0331–225074; fax +39–0331–229046; or at <https://www.leonardocompany.com/en/home>. You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177.

(3) The subject of this AD is addressed in European Aviation Safety Agency (now European Union Aviation Safety Agency) (EASA) AD 2012–0076R2, dated February 20, 2014. You may view the EASA AD on the internet at <https://www.regulations.gov> in the AD Docket.

Issued on April 30, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2020–0904; Product Identifier 2019–SW–041–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (SNPRM).

SUMMARY: The FAA is revising a notice of proposed rulemaking (NPRM) that applied to certain Airbus Helicopters Model EC225LP helicopters. This action revises the NPRM by revising the required actions paragraph such that the required actions apply to all helicopter models specified in the applicability. The FAA is proposing this airworthiness directive (AD) to address the unsafe condition on these products. Since these actions would impose an additional burden over those in the NPRM, the agency is requesting comments on this SNPRM.

DATES: The FAA must receive comments on this SNPRM by June 24, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <https://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* (202) 493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this SNPRM, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone (972) 641–0000 or 800–232–0323; fax (972) 641–3775; or at <https://www.airbus.com/helicopters/services/technical-support.html>. You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

Examining the AD Docket

You may examine the AD docket at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2020–0904; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, this SNPRM, the European Union Aviation Safety Agency (EASA) AD, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: James Blyn, Aviation Safety Engineer, Strategic Policy Emerging Aircraft Section, Policy and Innovation Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email james.blyn@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2020–0904; Product Identifier 2019–SW–041–AD” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include

supporting data. The FAA will consider all comments received by the closing date and may again revise this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to <https://www.regulations.gov>, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this SNPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this SNPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this SNPRM. Submissions containing CBI should be sent to James Blyn, Aviation Safety Engineer, Strategic Policy Emerging Aircraft Section, Policy and Innovation Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email james.blyn@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued an NPRM to amend 14 CFR part 39 by adding an AD that would apply to Airbus Helicopters Model EC225LP helicopters, with left-hand side (LH) engine fuel supply (fuel supply) hose part number (P/N) 704A34416087 installed. The NPRM published in the **Federal Register** on October 7, 2020, (85 FR 63235). For helicopters delivered to the first operator before November 30, 2018, and for helicopters delivered to the first operator on or after November 30, 2018, that have had the LH fuel supply hose replaced or reinstalled before May 10, 2019, the NPRM proposed to require visually inspecting the LH fuel supply hose for twisting, and if needed,

borescope inspecting the entire length of the inside of the fuel supply hose for twisting. Depending on the inspection results, the NPRM proposed to require reinstalling or removing the fuel supply hose from service. Additionally, the NPRM proposed to prohibit installing a certain part-numbered LH fuel supply hose on any helicopter unless that LH fuel supply hose is installed by following certain procedures specified in the manufacturer’s service bulletin. The proposed requirements were intended to prevent a decrease of the LH engine power when accelerating to a power setting corresponding to One Engine Inoperative (OEI) power and subsequent reduced control of the helicopter. The NPRM was prompted by EASA AD 2019–0092, dated April 26, 2019 (EASA AD 2019–0092), issued by EASA, which is the Technical Agent for the Member States of the European Union, to correct an unsafe condition for Airbus Helicopters (formerly Eurocopter) Model EC 225 LP helicopters, all serial numbers. EASA advises that an occurrence was reported where during an in-flight single engine power check, the LH side engine experienced a power loss. EASA states that a subsequent investigation determined that the fuel flow to the affected engine was restricted by a twisted fuel supply hose. EASA states that this condition, if not detected and corrected, could lead to a decrease of the LH engine power when accelerating to the power setting corresponding to OEI power, and subsequent reduced control of the helicopter. Accordingly, the EASA AD requires a one-time visual inspection of the fuel supply hose and depending on the inspection results, removing from service or replacing the affected part. EASA also introduces re-installation requirements for a fuel supply hose that is being replaced or reinstalled.

Actions Since the NPRM Was Issued

Since the NPRM was issued, the FAA determined that operators may not have the information required to comply with the required actions proposed in the NPRM. Operators may not know the date the helicopter was delivered to the first operator. Additionally, operators may not know whether the LH fuel supply hose has been previously removed or reinstalled since the maintenance regulations do not require certain operators to maintain these records after one year. Accordingly, the FAA has determined the proposed paragraph (e)(1) of the NPRM must be revised by deleting the language referring to delivery dates and dates of LH fuel supply hose replacement or

reinstallation. As a result of these changes, all helicopters specified in the applicability paragraph would be required to comply with the required actions in this proposed AD. Also, since the NPRM was issued, the FAA has determined that a limit on special flight permits is required. This SNPRM reflects this change that special flight permits may be permitted provided that there are no passengers on board.

Comments

The FAA received no comments on the NPRM or on the determination of the cost.

FAA's Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the European Union, EASA has notified the FAA about the unsafe condition described in its AD. The FAA is proposing this AD after determining the unsafe condition described previously is likely to exist or develop in other helicopters of these same type designs. Certain changes described above expand the scope of the NPRM. As a result, it is necessary to reopen the comment period to provide additional opportunity for the public to comment on this SNPRM.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Airbus Helicopters Alert Service Bulletin No. EC225–71A019, Revision 1, dated February 28, 2019, which specifies procedures for removing the fuel supply hose from the LH power plant, visually inspecting the fuel supply hose for twisting, and depending on inspection results, performing an endoscope inspection on the inside of the hose. This service information also specifies procedures required to install a serviceable fuel supply hose.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Proposed AD Requirements in This SNPRM

For helicopters with a certain part-numbered LH fuel supply hose installed, this proposed AD would require visually inspecting the LH fuel supply hose for twisting, and if needed, borescope inspecting the entire length of the inside of the fuel supply hose for twisting. Depending on the inspection results, this proposed AD would require reinstalling or removing the fuel supply

hose from service. Additionally, this proposed AD would prohibit installing a certain part-numbered LH fuel supply hose on any helicopter unless that LH fuel supply hose is installed by following certain procedures described in the manufacturer's service bulletin.

Differences Between This SNPRM and the EASA AD

The EASA AD requires compliance within 110 flight hours or 6 months, whichever occurs first, while this proposed AD would require compliance within 110 hours time-in-service after the effective date of this AD. The EASA AD requires reporting information to Airbus Helicopters if the LH fuel supply hose is twisted on the inside, while this proposed AD would not. Additionally, the EASA AD is applicable to certain aircraft delivered to the first operator prior to 30 Nov 2018, and also to certain aircraft in which the affected part or LH engine were not replaced or reinstalled before the effective date of the EASA AD, whereas this proposed AD would apply to EC225LP helicopters with a certain LH fuel supply hose installed, because operators might not know when the helicopter was first delivered or what maintenance was previously performed.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 28 helicopters of U.S. Registry. Labor rates are estimated at \$85 per work-hour. Based on these numbers, the FAA estimates the following costs to comply with this proposed AD.

Visually inspecting the LH fuel supply hose for twisting would take about 1 work-hour for an estimated cost of \$85 per helicopter and \$2,380 for the U.S. fleet.

Replacing a LH fuel supply hose would take about 8 work-hours and parts would cost about \$2,278 for an estimated replacement cost of \$2,958 per replacement.

Borescope inspecting the LH fuel supply hose would take about 8 work-hours for an estimated cost of \$680 per helicopter.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section

44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus Helicopters: Docket No. FAA–2020–0904; Product Identifier 2019–SW–041–AD.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) action by June 24, 2021.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Helicopters Model EC225LP helicopters, certificated in any category, with a left-hand side (LH) engine fuel supply (fuel supply) hose part number (P/N) 704A34416087 installed.

(d) Subject

Joint Aircraft Service Component (JASC) Code: 2820, Aircraft Fuel Distribution System.

(e) Unsafe Condition

This AD was prompted by a report of an incorrect installation of the LH fuel supply hose P/N 704A34416087. The FAA is issuing this AD to prevent restricted fuel flow to the LH engine. The unsafe condition, if not addressed, could result in a decrease of the LH engine power when accelerating to a power setting corresponding to One Engine Inoperative power and subsequent reduced control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) Within 110 hours time-in-service (TIS) after the effective date of this AD, visually inspect the LH fuel supply hose for twisting as shown in Figures 1 and 2 of Airbus Helicopters Alert Service Bulletin No. EC225-71A019, Revision 1, dated February 28, 2019 (ASB EC225-71A019). If the LH fuel supply hose has any twisting, before further flight, borescope inspect the entire length of the inside of the fuel supply hose for twisting as shown in Figures 3 through 5 of ASB EC225-71A019.

(i) If the inside of the LH fuel supply hose has any twisting, before further flight, remove the LH fuel supply hose from service and install an airworthy LH fuel supply hose by following the Accomplishment Instructions, paragraph 3.B.3.b, of ASB EC225-71A019.

(ii) If the LH fuel supply hose does not have any twisting, reinstall the LH fuel supply hose by following the Accomplishment Instructions, paragraph 3.B.3.b, of ASB EC225-71A019.

(2) As of the effective date of this AD, do not install an LH fuel supply hose P/N 704A34416087 on any helicopter unless it is installed by following the Accomplishment Instructions, paragraph 3.B.3.b, of ASB EC225-71A019.

(h) Special Flight Permits

Special flight permits may be permitted provided that there are no passengers on board.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person

identified in paragraph (j)(1) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

(1) For more information about this AD, contact James Blyn, Aviation Safety Engineer, Strategic Policy Emerging Aircraft Section, Policy and Innovation Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222-5110; email 9-ASW-FTW-AMOC-Requests@faa.gov.

(2) For service information identified in this AD, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone (972) 641-0000 or (800) 232-0323; fax (972) 641-3775; or at <https://www.airbus.com/helicopters/services/technical-support.html>. You may view the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 7617 N-321. For information on the availability of this material at the FAA, call (817) 222-5110.

(3) The subject of this AD is addressed in European Union Aviation Safety Agency (EASA) AD 2019-0092, dated April 26, 2019. You may view the EASA AD on the internet at <https://www.regulations.gov> in the AD Docket. You may view the EASA AD on the internet at <https://www.regulations.gov> in Docket No. FAA-2020-0904.

Issued on May 3, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA-2021-0331; Project Identifier AD-2020-01703-T]

RIN 2120-AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all The Boeing Company Model 757 airplanes. This proposed AD was prompted by significant changes, including new or more restrictive requirements, made to the airworthiness limitations (AWLs) related to fuel tank ignition prevention and the nitrogen

generation system. This proposed AD would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 24, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- **Federal eRulemaking Portal:** Go to <https://www.regulations.gov>. Follow the instructions for submitting comments.

- **Fax:** 202-493-2251.

- **Mail:** U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110-SK57, Seal Beach, CA 90740-5600; telephone 562-797-1717; internet <https://www.myboeingfleet.com>. You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

Examining the AD Docket

You may examine the AD docket at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2021-0331; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Tak Kobayashi, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206-231-3553; email: takahisa.kobayashi@faa.gov.

SUPPLEMENTARY INFORMATION:**Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include "Docket No.

FAA–2021–0331; Project Identifier AD–2020–01703–T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to <https://www.regulations.gov>, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Tak Kobayashi, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3553; email: takahisa.kobayashi@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has examined the underlying safety issues involved in fuel tank explosions on several large transport airplanes, including the adequacy of existing regulations, the service history of airplanes subject to those regulations, and existing maintenance practices for fuel tank systems. As a result of those findings, the FAA issued a final rule titled “Transport Airplane Fuel Tank System Design Review, Flammability Reduction, and Maintenance and Inspection Requirements” (66 FR 23086,

May 7, 2001). In addition to new airworthiness standards for transport airplanes and new maintenance requirements that rule included Amendment 21–78, which established Special Federal Aviation Regulation No. 88 (“SFAR 88”) to 14 CFR part 21. Subsequently, SFAR 88 was amended by: Amendment 21–82 (67 FR 57490, September 10, 2002; corrected at 67 FR 70809, November 26, 2002), Amendment 21–83 (67 FR 72830, December 9, 2002; corrected at 68 FR 37735, June 25, 2003, to change “21–82” to “21–83”), and Amendment 21–101 (83 FR 9162, March 5, 2018).

Among other actions, SFAR 88 requires certain type design (*i.e.*, type certificate (TC) and supplemental type certificate (STC)) holders to substantiate that their fuel tank systems can prevent ignition sources in the fuel tanks. This requirement applies to type design holders for large turbine-powered transport airplanes and for subsequent modifications to those airplanes. It requires them to perform design reviews and to develop design changes and maintenance procedures if their designs do not meet the new fuel tank safety standards. As explained in the preamble to the final rule published on May 7, 2001, the FAA intended to adopt airworthiness directives to mandate any changes found necessary to address unsafe conditions identified as a result of these reviews.

In evaluating these design reviews, the FAA has established four criteria intended to define the unsafe conditions associated with fuel tank systems that require corrective actions. The percentage of operating time during which fuel tanks are exposed to flammable conditions is one of these criteria. The other three criteria address the failure types under evaluation: Single failures, single failures in combination with another latent condition(s), and in-service failure experience. For all four criteria, the evaluations included consideration of previous actions taken that may mitigate the need for further action.

The FAA issued AD 2012–12–15, Amendment 39–17095 (77 FR 42964, July 23, 2012) (AD 2012–12–15), which applies to all The Boeing Company Model 757 airplanes. AD 2012–12–15 requires revising the maintenance or inspection program to incorporate new limitations for fuel tank systems. AD 2012–12–15 also requires the initial inspection of certain repetitive AWL inspections to phase-in those inspections, and repair if necessary. Since the FAA issued AD 2012–12–15, the Airworthiness Limitations Section (ALS) of the Instructions for Continued

Airworthiness (Boeing document D622N001–9) has been significantly revised by the manufacturer to correct technical and editorial errors and also to add new or more restrictive requirements. Many of those changes are related to fuel tank ignition prevention and the nitrogen generation system. Incorporating the revision required by this proposed AD would terminate all the requirements of AD 2012–12–15.

The FAA also issued AD 2018–20–13, Amendment 39–19447 (83 FR 52305, October 17, 2018) (2018–20–13), which applies to all The Boeing Company Model 757 airplanes; Model 737 airplanes, excluding Model 737–100, –200, –200C, –300, –400, and –500 series airplanes; and Model 767–200, –300, –300F, and –400ER series airplanes. For Model 757 airplanes, AD 2018–20–13 requires, among other things, revising the maintenance or inspection program to incorporate AWLs No. 28–AWL–23, 28–AWL–24, and 28–AWL–25. Since the FAA issued 2018–20–13, those AWLs have been revised, therefore, this proposed AD would require the incorporation of those revised AWLs. Incorporating the revision required by this proposed AD would terminate the requirements in paragraph (i)(2) of AD 2018–20–13.

The FAA has assessed the changes, including new or more restrictive requirements, that were made to the AWLs related to fuel tank ignition prevention and the nitrogen generation system. The FAA is issuing this AD to address ignition sources inside the fuel tanks and the increased flammability exposure of the center fuel tank caused by latent failures, alterations, repairs, or maintenance actions, which could result in a fuel tank explosion and consequent loss of an airplane.

FAA’s Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Section 9, Airworthiness Limitations (AWLs) and Certification Maintenance Requirements (CMRs), of Boeing 757 Maintenance Planning Data (MPD) Document, D622N001–9, dated March 2020. This service information specifies airworthiness limitation instruction (ALI) and critical design configuration control limitation (CDCCL) tasks related to fuel tank ignition prevention and the nitrogen generation system.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Proposed AD Requirements in This NPRM

This proposed AD would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (e.g., inspections) and CDCCLs. Compliance with these actions and CDCCLs is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (k) of this proposed AD.

Differences Between This Proposed AD and the Service Information

Paragraph (g) of this proposed AD would require operators to revise their existing maintenance or inspection program by incorporating, in part, AWL No. 28-AWL-05, "Wire Separation Requirements for New Wiring Installed in Proximity to Wiring that Goes into the Fuel Tanks," of Section 9, Airworthiness Limitations (AWLs) and Certification Maintenance Requirements (CMRs), of Boeing 757 Maintenance Planning Data (MPD) Document, D622N001-9, dated March 2020.

Paragraph (h) of this proposed AD would allow certain changes to be made to the requirements specified in AWL No. 28-AWL-05 as an option. Where AWL No. 28-AWL-05 identifies certain wire types for routing and installation of any new wiring under certain conditions, paragraph (h) of this proposed AD provides acceptable alternative wire types. Where AWL No. 28-AWL-05 identifies certain wiring sleeve material for new wiring installed under certain conditions, paragraph (h) of this proposed AD provides acceptable alternative wire sleeve materials.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 493 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

The FAA has determined that revising the existing maintenance or inspection

program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the FAA estimates the average total cost per operator to be \$7,650 (90 work-hours × \$85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

The Boeing Company: Docket No. FAA-2021-0331; Project Identifier AD-2020-01703-T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 24, 2021.

(b) Affected ADs

This AD affects the ADs specified in paragraphs (b)(1) and (2) of this AD.

(1) AD 2012-12-15, Amendment 39-17095 (77 FR 42964, July 23, 2012) (AD 2012-12-15).

(2) AD 2018-20-13, Amendment 39-19447 (83 FR 52305, October 17, 2018).

(c) Applicability

This AD applies to all The Boeing Company Model 757-200, -200PF, -200CB, and -300 series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Unsafe Condition

This AD was prompted by significant changes, including new or more restrictive requirements, made to the airworthiness limitations (AWLs) related to fuel tank ignition prevention and the nitrogen generation system. The FAA is issuing this AD to address ignition sources inside the fuel tanks and the increased flammability exposure of the center fuel tank caused by latent failures, alterations, repairs, or maintenance actions, which could result in a fuel tank explosion and consequent loss of an airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Maintenance or Inspection Program Revision

Within 60 days after the effective date of this AD, revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in Section E. "Airworthiness Limitations—Systems," including Subsections E.1 and E.3, of Section 9, Airworthiness Limitations (AWLs) and Certification Maintenance

Requirements (CMRs), of Boeing 757 Maintenance Planning Data (MPD) Document, D622N001-9, dated March 2020; except as provided by paragraph (h) of this AD. The initial compliance time for doing the airworthiness limitation instruction (ALI) tasks is at the times specified in paragraphs (g)(1) through (12) of this AD.

(1) For AWL No. 28-AWL-01, "External Wires Over Center Fuel Tank": Within 120 months after the most recent inspection was performed as specified in AWL No. 28-AWL-01.

(2) For AWL No. 28-AWL-03, "Fuel Quantity Indicating System (FQIS)—Out Tank Wiring Lightning Shield to Ground Termination": Within 120 months after the most recent inspection was performed as specified in AWL No. 28-AWL-03.

(3) For AWL No. 28-AWL-14, "Main and Center Wing Tank Fueling Shutoff Valve Body and Actuator—Fault Current Bond": Within 120 months after the most recent inspection was performed as specified in AWL No. 28-AWL-14.

(4) For AWL No. 28-AWL-20, "Center Tank Fuel Override Boost Pump Automatic Shutoff System": Within 12 months after accomplishment of the actions specified in Boeing Service Bulletin 757-28A0081 or Boeing Service Bulletin 757-28A0082, as applicable; or within 12 months after the most recent inspection was performed as specified in AWL No. 28-AWL-20; whichever occurs later.

(5) For AWL No. 28-AWL-21, "Over-Current and Arcing Protection Electrical Design Features Operation—Boost Pump Ground Fault Interrupter (GFI)": Within 12 months after accomplishment of the actions specified in Boeing Service Bulletin 757-28A0078 or Boeing Service Bulletin 757-28A0079, as applicable; or within 12 months after the most recent inspection was performed as specified in AWL No. 28-AWL-21; whichever occurs later.

(6) For AWL No. 28-AWL-25, "Motor Operated Valve (MOV) Actuator—Lightning and Fault Current Protection Electrical Bond": Within 72 months after accomplishment of the actions specified in Boeing Service Bulletin 757-28A0088, or within 72 months after the most recent inspection was performed as specified in AWL No. 28-AWL-25, whichever occurs later.

(7) For AWL No. 28-AWL-26, "Center Tank Fuel Boost Pump Power Failed On Protection System": Within 12 months after accomplishment of the actions specified in Boeing Service Bulletin 757-28A0105, or within 12 months after the most recent inspection was performed as specified in AWL No. 28-AWL-26, whichever occurs later.

(8) For AWL No. 28-AWL-30, "AC Fuel Pump Fault Current Bonding Jumper Installation, Main and Center Tank": Within 24 months after the effective date of this AD, or within 72 months after the most recent inspection was performed as specified in AWL No. 28-AWL-30, whichever occurs later.

(9) For AWL No. 28-AWL-33, "Full Cushion Clamps and Teflon Sleeving

Installed on Out-of-Tank Wire Bundles Installed on Brackets that are Mounted Directly on the Fuel Tanks": Within 24 months after the effective date of this AD; or within 144 months after accomplishment of the actions specified in Boeing Service Bulletin 757-57A0064 (Part 2 through Part 10 of the Work Instructions); or within 144 months since the most recent inspection was performed as specified in AWL No. 28-AWL-33; whichever occurs later.

(10) For AWL No. 47-AWL-04, "NGS—NEA Distribution Ducting": Within 17,300 flight hours after accomplishment of the actions specified in Boeing Service Bulletin 757-47-0001 or Boeing Service Bulletin 757-47-0005, as applicable; or within 17,300 flight hours after the most recent inspection was performed as specified in AWL No. 47-AWL-04; whichever occurs later.

(11) For AWL No. 47-AWL-05, "NGS—Cross Vent Check Valve": Within 17,300 flight hours after accomplishment of the actions specified in Boeing Service Bulletin 757-47-0001 or Boeing Service Bulletin 757-47-0005, as applicable; or within 17,300 flight hours after the most recent inspection was performed as specified in AWL No. 47-AWL-05; whichever occurs later.

(12) For AWL No. 47-AWL-07, "NGS—Thermal Switch": Within 48,000 flight hours after accomplishment of the actions specified in Boeing Service Bulletin 757-47-0001 or Boeing Service Bulletin 757-47-0005, as applicable; or within 48,000 flight hours after the most recent inspection was performed as specified in AWL No. 47-AWL-07; whichever occurs later.

(h) Additional Acceptable Wire Types and Sleeving

As an option, when accomplishing the actions required by paragraph (g) of this AD, the alternatives specified in paragraphs (h)(1) and (2) of this AD are acceptable.

(1) Where AWL No. 28-AWL-05 identifies wire types BMS 13-48, BMS 13-58, and BMS 13-60, the following wire types are acceptable: MIL-W-22759/16, SAE AS22759/16 (M22759/16), MIL-W-22759/32, SAE AS22759/32 (M22759/32), MIL-W-22759/34, SAE AS22759/34 (M22759/34), MIL-W-22759/41, SAE AS22759/41 (M22759/41), MIL-W-22759/86, SAE AS22759/86 (M22759/86), MIL-W-22759/87, SAE AS22759/87 (M22759/87), MIL-W-22759/92, and SAE AS22759/92 (M22759/92); and MIL-C-27500 and NEMA WC 27500 cables constructed from these military or SAE specification wire types, as applicable.

(2) Where AWL No. 28-AWL-05 identifies TFE-2X Standard wall for wire sleeving, the following sleeving materials are acceptable: Roundit 2000NX and Varglas Type HO, HP, or HM.

(i) No Alternative Actions, Intervals, or CDCCLs

After the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (e.g., inspections), intervals, or CDCCLs may be used unless the actions, intervals, and CDCCLs are approved as an alternative method of compliance

(AMOC) in accordance with the procedures specified in paragraph (k) of this AD.

(j) Terminating Actions for Certain AD Requirements

Accomplishment of the revision required by paragraph (g) of this AD terminates the requirements specified in paragraphs (j)(1) and (2) of this AD for that airplane.

(1) All requirements of AD 2012-12-15.

(2) The requirements in paragraph (i)(2) of AD 2018-20-13.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in Related Information. Information may be emailed to: 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(l) Related Information

(1) For more information about this AD, contact Tak Kobayashi, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206-231-3553; email: takahisa.kobayashi@faa.gov.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110-SK57, Seal Beach, CA 90740-5600; telephone 562-797-1717; internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

Issued on April 15, 2021.

Lance T. Gant,
Director, Compliance & Airworthiness
Division, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA-2021-0349; Project Identifier MCAI-2021-00103-T]

RIN 2120-AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Airbus SAS Model A330-841 and -941 airplanes. This proposed AD was prompted by reports of missing or disbonded pressure seals on two thrust reverser (TR) translating cowls. This proposed AD would require a one-time inspection of each thrust reverser for damage, seal bonding rework, and replacement of translating cowl pressure seals if necessary, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 24, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- **Federal eRulemaking Portal:** Go to <https://www.regulations.gov>. Follow the instructions for submitting comments.
- **Fax:** 202-493-2251.
- **Mail:** U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material that will be incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; internet www.easa.europa.eu. You may find this IBR material on the EASA website at <https://ad.easa.europa.eu>. You may view this IBR material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195. It is also available in the AD docket on

the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2021-0349.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2021-0349; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT:

Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206-231-3229; email vladimir.ulyanov@faa.gov.

SUPPLEMENTARY INFORMATION:**Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include "Docket No. FAA-2021-0349; Project Identifier MCAI-2021-00103-T" at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to <https://www.regulations.gov>, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each

page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206-231-3229; email vladimir.ulyanov@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2021-0035, dated January 25, 2021 (EASA AD 2021-0035) (also referred to as the Mandatory Continuing Airworthiness Information, or the MCAI), to correct an unsafe condition for all Airbus SAS Model A330-841 and -941 airplanes.

This proposed AD was prompted by reports of missing or disbonded pressure seals on two TR translating cowls. An investigation determined that the issue is due to surface preparation not being properly performed during seal installation. The FAA is proposing this AD to address missing or disbonded TR translating cowl seal segments. In a case where all seal segments were missing, this condition, if not addressed, could lead to loss of thrust at maximum continuous thrust or at takeoff/go-around, possibly resulting in substantially reduced performance of the airplane. See the MCAI for additional background information.

Related Service Information Under 14 CFR Part 51

EASA AD 2021-0035 describes procedures for inspecting the each thrust reverser for damage (including tears, cracks, unwanted sealant on the contact surface, missing pieces, worn-out seals, or glass or ceramic ply that is not impacted), reworking the pressure seal bonding, and replacing damaged translating cowl pressure seals.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the

FAA's bilateral agreement with the State of Design Authority, the FAA has been notified of the unsafe condition described in the MCAI referenced above. The FAA is proposing this AD because the FAA evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in EASA AD 2021-0035 described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA initially worked with Airbus and EASA to develop a process to use certain EASA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and civil aviation authorities (CAAs) to use this process. As a result, EASA AD 2021-0035 will be incorporated by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2021-0035 in its entirety, through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in

the EASA AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to "all required actions and compliance times," compliance with this AD requirement is not limited to the section titled "Required Action(s) and Compliance Time(s)" in the EASA AD. Service information specified in EASA AD 2021-0035 that is required for compliance with EASA AD 2021-0035 will be available on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2021-0349 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this proposed AD affects 8 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
7 work-hours × \$85 per hour = \$595 (per thrust reverser)	\$0	\$595	\$4,760

The FAA estimates the following costs to do any necessary on-condition action that would be required based on

the results of any required actions. The FAA has no way of determining the

number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTION

Labor cost	Parts cost	Cost per product
22 work-hours × \$85 per hour = \$1,870 (per thrust reverser)	\$42,268	\$44,138

According to the manufacturer, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected operators. The FAA does not control warranty coverage for affected operators. As a result, the FAA has included all known costs in the cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing

regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus SAS: Docket No. FAA–2021–0349; Project Identifier MCAI–2021–00103–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 24, 2021.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Airbus SAS Model A330–841 and –941 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 78, Engine exhaust.

(e) Reason

This AD was prompted by reports of missing or disbonded pressure seals on two thrust reverser (TR) translating cowls. The FAA is issuing this AD to address missing or disbonded TR translating cowl seal segments. In a case where all seal segments were missing, this condition, if not addressed, could lead to loss of thrust at maximum continuous thrust or at takeoff/go-around, possibly resulting in substantially reduced performance of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2021–0035, dated January 25, 2021 (EASA AD 2021–0035).

(h) Exceptions to EASA AD 2021–0035

(1) Where EASA AD 2021–0035 refers to its effective date, this AD requires using the effective date of this AD.

(2) The “Remarks” section of EASA AD 2021–0035 does not apply to this AD.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2021–0035 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending

information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (k)(2) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Airbus SAS’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (j)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator’s maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(k) Related Information

(1) For information about EASA AD 2021–0035 contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; internet www.easa.europa.eu. You may find this EASA AD on the EASA website at <https://ad.easa.europa.eu>. You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2021–0349.

(2) For more information about this AD, contact Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3229; email vladimir.ulyanov@faa.gov.

Issued on May 4, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA66

Proposed Revocation of Class E Airspace; Standish, MI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to revoke the Class E airspace extending upward from 700 feet above the surface at Standish Industrial Airport, Standish, MI. The FAA is proposing this action as the result of an airspace review caused by the closing of the Standish Industrial Airport and associated instrument procedures no longer required.

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590; telephone (202) 366–9826, or (800) 647–5527. You must identify FAA Docket No. FAA–2021–0277/Airspace Docket No. 21–AGL–19, at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays.

FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at <https://www.faa.gov/air-traffic/publications/>. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT:

Rebecca Shelby, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101

Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222-5857.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would revoke the Class E airspace extending upward from 700 feet above the surface at Standish Industrial Airport, Standish, MI, due to the closure of the airport and cancellation of the instrument procedures at this airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2021-0277/Airspace Docket No. 21-AGL-19." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by revoking the Class E airspace extending upward from 700 feet above the surface to at Standish Industrial Airport, Standish, MI.

This action is the result of an airspace review due to the closing of the Standish Industrial Airport, Standish, MI, and cancellation of the instrument procedures at this airport.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established

body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL MI E5 Standish, MI [Removed]

Issued in Fort Worth, Texas, on April 29, 2021.

Martin A. Skinner,

Manager, Operations Support Group, ATO Central Service Center.

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA-2021-0324; Airspace Docket No. 21-AGL-9]

RIN 2120-AA66

Proposed Amendment of V-37 and V-270; Removal of V-43 in the Vicinity of Erie, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend two VHF Omnidirectional Range (VOR) Federal airways and remove one VOR Federal airway in the vicinity of Erie, Pennsylvania. The FAA proposes this action due to the planned decommissioning of the VOR portion of the Erie, PA, VOR/Tactical Air Navigation (VORTAC) that these airways utilize for navigation guidance. The Erie VOR is being decommissioned as part of the FAA's VOR Minimum Operational Network (MON) program.

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590; telephone: (800) 647-5527, or (202) 366-9826. You must identify FAA Docket No. FAA-2021-0324; Airspace Docket No. 21-AGL-9 at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>. FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at https://www.faa.gov/air_traffic/publications/. For further information, you can contact the Rules and Regulations Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For

information on the availability of FAA Order 7400.11E at NARA, email: fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT:

Jesse Acevedo, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA-2021-0324; Airspace Docket No. 21-AGL-9) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at <https://www.regulations.gov>.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2021-0324; Airspace Docket No. 21-AGL-9." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Operations Support Group, Central Service Center, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX, 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

The FAA is planning to decommission the VOR portion of the Erie, PA, VORTAC. This VOR was one of the candidate VORs identified for discontinuance by the FAA's VOR MON program and listed in the final policy statement notice, "Provision of Navigation Services for the Next Generation Air Transportation System (NextGen) Transition to Performance-Based Navigation (PBN) (Plan for Establishing a VOR Minimum Operational Network)," published in the

Federal Register of July 26, 2016 (81 FR 48694), Docket No. FAA–2011–1082.

Although the VOR portion of the Eric VORTAC is planned for decommissioning, the co-located DME portion of the navigational aid is being retained in support of current and future Area Navigation (RNAV) procedures. The tactical air navigation (TACAN) system is also being retained to support the Department of Defense mission requirements.

The VOR Federal airways affected by the Erie VOR are V–37, V–270, and V–43. With the planned decommissioning of the VOR portion of the Erie VORTAC, the remaining navigational aids in the area are insufficient to enable the continuity of the affected airways. As such, the proposal would result in the shortening of V–37 and V–270, and would result in the revocation of V–43. To overcome the shortening and removal of the proposed airways, pilots using RNAV could navigate point to point utilizing the fixes that would be retained or request air traffic control radar vectors through the area. Additionally, visual flight rules (VFR) pilots who elect to navigate via the affected airways could also take advantage of the air traffic control (ATC) services previously listed.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend V–37 and V–270, and revoke V–43, in the vicinity of Erie, PA. This is required due to the planned decommissioning of the VOR portion of the Erie, PA, VORTAC. The proposed airway changes are described below.

V–37: V–37 currently extends between the Craig, FL, VORTAC and the Erie, PA VORTAC. The FAA proposes to remove the airway segment between the Ellwood City, PA, VOR/DME and the Erie VORTAC. As a result, the amended airway would extend between the Craig VORTAC and the Ellwood City VOR/DME.

V–270: V–270 currently extends between the Erie, PA, VORTAC and the Jamestown, NY, VOR/DME; and between the Elmira, NY, VOR/DME and the Boston, MA, VOR/DME. The FAA proposes to remove the airway segment between the Erie VORTAC and the Jamestown VOR/DME. As a result, the amended airway would extend between the Elmira VOR/DME and the Boston VOR/DME.

V–43: V–43 currently extends between the Youngstown, OH, VORTAC and the Erie, PA, VORTAC. The FAA proposes to remove V–43 in its entirety.

All radials in the VOR Federal airway descriptions below are unchanged and stated in True degrees.

Domestic VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The VOR Federal airways listed in this document would be subsequently published in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6010(a) Domestic VOR Federal Airways.

* * * * *

V–37 [Amended]

From Craig, FL; Brunswick, GA; INT Brunswick 014° and Savannah, GA, 177° radials; Savannah; Allendale, SC; Columbia, SC; Charlotte, NC; Pulaski, VA; Elkins, WV; Clarksburg, WV; INT Clarksburg 359° and Ellwood City, PA, 185° radials; to Ellwood City.

* * * * *

V–43 [Removed]

* * * * *

V–270 [Amended]

From Elmira, NY; Binghamton, NY; DeLancey, NY; Chester, MA; INT Chester 091° and Boston, MA, 262° radials; to Boston.

* * * * *

Issued in Washington, DC, on April 30, 2021.

George Gonzalez,

Acting Manager, Rules and Regulations Group.

RIN 2120–AA66

Proposed Amendment and Establishment of Class E Airspace; York, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Class E surface airspace at York Airport, York, PA. An airspace evaluation of the area determined the additional airspace is necessary to accommodate operations at the airport. This action would also update the name of York Airport (formerly York County Airport), York, PA. This action also establishes Class E airspace extending upward from 700 feet above the surface at York Airport, and Class E airspace extending upward from 700 feet above

the surface for Wellstone York Hospital Heliport, York, PA, to accommodate new area navigation (RNAV) global positioning system (GPS) standard instrument approach procedures serving the heliport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations in the area.

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to: The U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590-0001; Telephone: (800) 647-5527, or (202) 366-9826. You must identify the Docket No. FAA-2021-0119; Airspace Docket No. 21-AEA-3, at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

FAA Order 7400.11E Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at https://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; Telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; Telephone (404) 305-6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would

amend and establish Class E airspace in York, PA, to support IFR operations in the area.

Comments Invited

Interested persons are invited to comment on this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (Docket No. FAA-2021-0119 and Airspace Docket No. 21-AEA-3) and be submitted in triplicate to DOT Docket Operations (see **ADDRESSES** section for the address and phone number). You may also submit comments through the internet at <https://www.regulations.gov>.

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2021-0119; Airspace Docket No. 21-AEA-3." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this document may be changed in light of the comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal

docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to 14 CFR part 71 to amend Class E surface airspace by increasing the radius to 6.8 miles (previously 6.5 miles) at York Airport, York, PA. This action would also update the airports name. This action would also establish Class E airspace upward from 700 feet above the surface at York Airport, York, PA, and establish Class E airspace upward from 700 feet above the surface at Wellstone York Hospital Heliport, York, PA, providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for IFR operations serving them respectively.

Class E airspace designations are published in Paragraph 6005, of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation

as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures", prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6002 Class E Surface Airspace.
* * * *

AEA PA E2 York, PA [Amend]

York Airport, PA
(Lat. 39°55'01" N, long. 76°52'23" W)

That airspace extending upward from the surface within a 6.8-mile radius of the York Airport.

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet Or More Above the Surface of the Earth.
* * * *

AEA PA E5 York, PA [New]

York Airport, PA
(Lat. 39°55'01" N, long. 76°52'23" W)
Wellstone York Hospital Heliport, PA
(Lat. 39°56'41" N, long. 76°43'06" W)

That airspace extending upward from 700 feet above the surface within a 9.3-mile radius of York Airport, and within 4.0 miles each side of the 339° bearing from the airport,

extending from the 9.3-mile radius to 11.9 miles northwest of the airport, and that airspace extending upward from 700 feet above the surface within a 6-mile radius of Wellstone York Hospital Heliport.

Issued in College Park, Georgia, on May 3, 2021.

Andree C. Davis,

Manager, Airspace & Procedures Team South, Eastern Service Center, Air Traffic Organization.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would revoke the Class E surface airspace at St. Clair County International Airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA–2021–0235/Airspace Docket No. 21–AGL–18." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments

will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by removing the Class E surface area at St. Clair County International Airport as it is no longer required.

This action is necessary due to an airspace review caused by the decommissioning of the RCO, which provided navigation information for the instrument procedures this airport.

Class E airspace designations are published in paragraph 6002 respectively, of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6002 Class E Surface Airspace.

Proposed Amendment of Area Navigation (RNAV) T–348 and Establishment of T–409; Northcentral United States

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend one RNAV route and establish one new RNAV route, in the northcentral United States. The proposal would expand the availability of RNAV routing in support of transitioning the National Airspace System (NAS) from ground-based to satellite-based navigation.

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: (800) 647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2021–0288; Airspace Docket No. 21–AGL–6 at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at https://www.faa.gov/air_traffic/publications/. For further information, you can contact the Rules and Regulations Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA

Order 7400.11E at NARA, email: fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT:

Jesse Acevedo, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA-2021-0288; Airspace Docket No. 21-AGL-6) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at <https://www.regulations.gov>.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2021-0288; Airspace Docket No. 21-AGL-6." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Operations Support Group, Central Service Center, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

In support of FAA-led modernization efforts to improve the safety, efficiency, and predictability of the national airspace, as well as transition the NAS from a ground-based to a satellite-based Performance Based Navigation (PBN) system, the FAA is proposing to amend RNAV route T-348 by extending it to provide additional PBN enroute structure, and establish RNAV route T-409. This action would reduce air traffic control (ATC) sector workload and complexity, reduce pilot-to-controller communication, and assist ATC when

non-radar procedures are required. These RNAV routes would be available for use by any aircraft equipped with Global Positioning Satellite (GPS) and/or RNAV navigation capabilities.

Additionally, both RNAV route proposals have transiting legs that pass through the Lake Andes Military Operations Areas (MOA). This would provide cost, fuel, and time saving benefits for aircraft transiting the MOA when the MOA is not in use.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend RNAV route T-348 and establish RNAV route T-409. The proposed route changes are described below.

T-348: T-348 currently extends between the BRAIN, MN, waypoint (WP) and the LUNGS, WI, WP. The FAA proposes to extend the route westward between the LESNR, SD, WP and the BRAIN, MN, WP. As a result of the addition of the proposed segment, the BRAIN WP would remain in place but would no longer be referenced in the legal description. The new proposed route would flow from the LESNR WP, through the TECUD, SD, fix and Sioux Falls, SD, VOR/Tactical Air Navigation (VORTAC), to the GRSIS, MN, WP onward. The resulting RNAV route would extend between the LESNR WP and the LUNGS WP.

T-409: T-409 is a proposed new route that would extend between the LLUKY, NE, WP and the Pierre, SD, VORTAC. This route would mitigate the loss of the V-71 airway segments removed on September 10, 2020 due to the decommissioning of the Winner, SD, VOR.

All radials in the RNAV T-route descriptions below are unchanged and stated in True degrees.

United States Area Navigation routes are published in paragraph 6011 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The RNAV routes listed in this document would be subsequently published in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive

Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6011 United States Area Navigation Routes.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2021–0278; Airspace Docket No. 21–ACE–10]

RIN 2120–AA66

Proposed Amendment of Class E Airspace; Pocahontas, IA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace extending upward from 700 feet above the surface at Pocahontas Municipal Airport, Pocahontas, IA. The FAA is proposing this action as the result of an airspace review caused by the decommissioning of the Pocahontas non-directional beacon (NDB).

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations,

West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590; telephone (202) 366–9826, or (800) 647–5527. You must identify FAA Docket No. FAA–2021–0278/Airspace Docket No. 21–ACE–10, at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays.

FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at https://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT:

Rebecca Shelby, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5857.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E airspace extending upward from 700 feet above the surface at Pocahontas Municipal Airport, IA, to support instrument flight rule operations at this airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking

by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2021-0278/Airspace Docket No. 21-ACE-10." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed

in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by amending the Class E airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Pochontas Municipal Airport, Pochontas, IA; and removes the Pochontas NDB and the associated extensions from the airspace legal description.

This action is the result of an airspace review due to the decommissioning of the Pochontas NDB which provided navigation information for the instrument procedures at this airport.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ACE IA E5 Pochontas, IA [Amended]

Pochontas Municipal Airport, IA
(Lat. 42°44'34" N, long. 94°38'50" W)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Pochontas Municipal Airport.

Issued in Fort Worth, Texas, on April 29, 2021.

Martin A. Skinner,

Manager, Operations Support Group, ATO Central Service Center.

Proposed Amendment and Removal of Air Traffic Service (ATS) Routes; Eastern United States

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend three jet routes, and remove four jet routes, in the eastern United States.

This action is in support of the Northeast Corridor Atlantic Coast Route Project to improve the efficiency of the National Airspace System (NAS) and reduce dependency on ground-based navigational systems.

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590; telephone: (800) 647-5527, or (202) 366-9826. You must identify FAA Docket No. FAA-2021-0294; Airspace Docket No. 20-ASO-31 at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as necessary to preserve the safe and efficient flow of air traffic within the NAS.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers (FAA Docket No. FAA-2021-0294; Airspace Docket No. 20-ASO-31) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at <https://www.regulations.gov>.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2021-0294; Airspace Docket No. 20-ASO-31." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air-traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

An informal docket may also be examined during normal business hours at the office of the Eastern Service

Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend three jet routes, and remove four jet routes, in the eastern United States. This action would support the Northeast Corridor Atlantic Coast Route Project by amending and removing certain jet route segments that are being replaced by RNAV routing. Additionally, the proposed jet route changes would reduce aeronautical chart clutter by removing unneeded route segments.

The proposed route changes are as follows:

J-42: J-42 currently extends between the Delicias, Mexico, VOR/DME, and the Boston, MA, VOR/DME. This action would remove the segments between Texarkana, AR, and Boston, MA. The amended route would extend between Delicias, Mexico and Texarkana, AR. The portion within Mexico is excluded.

J-55: J-55 currently extends in, two parts, between the intersection of the Flat Rock, VA 212° and the Raleigh-Durham, NC, 224° radials, and the intersection of the Hopewell, VA, 030° and the Nottingham, MD 174° radials; and between the Sea Isle, NJ and Presque Isle, ME. The FAA proposes to remove the segments between Sea Isle, NJ and Presque Isle ME. The amended route would extend from the intersection of the Flat Rock, VA 212° and the Raleigh-Durham, NC, 224° radials, and the intersection of the Hopewell, VA, 030° and the Nottingham, MD 174° radials.

J-150: J-150 extends between the Gordonsville, VA, VORTAC and the Marconi, MA, 082° and the Boston, MA, 097° radials (STOOL intersection). The FAA proposes to remove the entire route.

J-191: J-191 currently extends between the Robbinsville, NJ, VORTAC, and the Wilmington, NC, VORTAC. The FAA proposes to remove the segments between Robbinsville, NJ, and Patuxent,

MD. The amended route would extend between Hopewell, VA and Wilmington, NC.

J-193: J-193 currently extends between the Wilmington, NC, VORTAC, and the intersection of the Harcum, VA, VORTAC 006° and Hopewell, VA, VORTAC 030° radials (HUBBS intersection). The FAA proposes to remove the entire route.

J-222: J-222 currently extends between the Robbinsville, NJ, VORTAC, and the Cambridge, NY, VOR/DME. The FAA proposes to remove the entire route.

J-225: J-225 currently extends between the Cedar Lake, NJ, VOR/DME, and the Providence, RI, VOR/DME. The FAA proposes to remove the entire route.

Jet routes are published in paragraph 2004, of FAA Order 7400.11E dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The jet routes listed in this document would be subsequently amended in, or removed, respectively, from the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020 is amended as follows:

Paragraph 2004 Jet Routes.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2021–0279; Airspace Docket No. 21–AGL–13]

RIN 2120–AA66

Proposed Amendment of V–36 and V–316, and Revocation of V–180 Due to Planned Decommissioning of the Elliot Lake and Dryden Non-Directional Beacons (NDBs) Ontario, Canada

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend 2 VHF Omnidirectional Range (VOR) Federal airways and remove one VOR Federal airway in the northeastern United States. The airway amendments are necessary due to the planned decommissioning of the Elliot Lake, Ontario, NDB and the Dryden, Ontario, Canada, NDB. Both NDBs are being decommissioned as part of NAV CANADA’s navigational aid (NAVAID) Modernization Program.

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: (800) 647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2021–0279; Airspace Docket No. 21–AGL–13 at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at <https://www.faa.gov/air-traffic/publications/>. For further information, you can contact the Rules and Regulations Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email: fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT: Jesse Acevedo, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800

Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA-2021-0279; Airspace Docket No. 21-AGL-13) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at <https://www.regulations.gov>.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2021-0279; Airspace Docket No. 21-AGL-13." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the

comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Operations Support Group, Central Service Center, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

NAV CANADA, which operates Canada's civil air navigation service, is implementing changes to Canada's instrument flight rules (IFR) navigation infrastructure as part of their NAVAID Modernization Program. This program is designed to enhance the efficiency of Canada's flying operations by taking advantage of performance-based navigation and modern avionics capabilities. As such, changes implemented by NAV CANADA occasionally affect VOR Federal airways that extend across the United States/Canada border into the United States.

NAV CANADA is planning to decommission the Elliot Lake and Dryden NDBs as part of their NAVAID Modernization Program. As a result, amendments of V-36 and V-316, and the removal of V-180, are required to mirror changes that are planned to be made by NAV CANADA within

Canadian airspace. To mitigate the deletion of V-36 and V-316 airway segments affected by the NDBs being decommissioned, IFR traffic may use adjacent VOR Federal airways, V-300 and V-348, or request air traffic control (ATC) radar vectors to fly around or through the affected area. To mitigate the deletion of V-180, IFR traffic may use adjacent VOR Federal airways, V-133 and V-367, or request ATC radar vectors to fly through or circumnavigate the affected area also. Aircraft with Area Navigation (RNAV) equipment may also navigate point to point using airspace fixes that will remain in place. Visual flight rules (VFR) pilots who elect to navigate via the airways through the affected area could also take advantage of the adjacent VOR Federal airways or ATC services listed previously.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend V-36 and V-316, and remove V-180 due to the planned decommissioning of the Elliot Lake and Dryden NDBs, ON, Canada to mirror changes that are planned to be made by NAV CANADA within Canadian airspace. The proposed Federal airway amendments and removal are described below.

V-36: V-36 currently extends between the Thunder Bay, ON, Canada, VOR/DME and the intersection of the Wiarton, ON, Canada, VOR/DME 150° radial and Toronto, ON, Canada, VOR/DME 304° radial; and between the Buffalo, NY, VOR/DME and the intersection of the La Guardia, NY, VOR/DME 310° and Stillwater, NJ, VOR/DME 043° radials. The airspace within Canada is excluded. The FAA proposes to remove the airway segment between the Thunder Bay, ON, Canada, VOR/DME and Wawa, ON, Canada, VOR/DME. The FAA also proposes to remove the airway segment between the Sault Ste Marie, MI, VOR/DME and the intersection of the La Guardia, NY, VOR/DME 310° and Stillwater, NJ, VOR/DME 043° radials (NEION fix). The resulting airway would extend between the Wawa, ON, Canada, VOR/DME and the Sault Ste Marie, MI, VOR/DME; and between the Buffalo, NY, VOR/DME and the intersection of the La Guardia, NY, VOR/DME 310° and Stillwater, NJ, VOR/DME 043° radials (NEION fix). Concurrent changes to other segments of V-36 have been proposed in a separate rulemaking proposal.

V-316: V-316 currently extends between the Ironwood, MI, VOR/DME and the Sawyer, MI, VOR/DME; and between the Sault Ste Marie, MI, VOR/DME and the Sudbury, ON, Canada, VOR/DME. The airspace in Canada is

excluded. The FAA proposes to delete the airway segment between the Sault Ste Marie, MI, VOR/DME and the Sudbury, ON, Canada, VOR/DME, and the exclusionary language. The resulting airway would extend between the Ironwood, MI, VOR/DME and the Sawyer, MI, VOR/DME.

V-180: V-180 currently extends between the International Falls, MN, VOR/DME and the Dryden, ON, Canada, NDB. The airspace within Canada is excluded. The FAA proposes to remove the airway in its entirety.

All radials in the VOR Federal airway descriptions below are unchanged and stated in True degrees.

VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The VOR Federal airways listed in this document would be subsequently updated in the next edition of this Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6010(a) Domestic VOR Federal Airways.

* * * * *

V-36 [Amended]

From Wawa, ON, Canada; to Sault Ste Marie, MI. From Buffalo, NY; Elmira, NY; INT Elmira 110° and LaGuardia, NY, 310° radials; to INT LaGuardia 310° and Stillwater, NJ, 043° radials. The airspace within Canada is excluded.

* * * * *

V-180 [Removed]

* * * * *

V-316 [Amended] From Ironwood, MI; to Sawyer, MI.

* * * * *

Issued in Washington, DC, on May 4, 2021.

RIN 2120–AA66

Proposed Modification of Class E Airspace; Saratoga, WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E airspace extending

upward from 700 feet above the surface at Shively Field Airport, Saratoga, WY. This action also proposes to remove the Class E airspace extending upward from 1,200 feet above the surface, and the Saratoga NDB and the Cherokee VOR/DME from the airspace’s text header and description. Lastly, this action proposes administrative updates to the airspace’s legal description. This action would ensure the safety and management of instrument flight rules (IFR) operations at the airport.

DATES: Comments must be received on or before June 24, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: 1–800–647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2021–0274; Airspace Docket No. 20–ANM–58, at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at <https://www.faa.gov/air-traffic/publications/>. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT:

Matthew Van Der Wal, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–3695.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use

of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would modify the Class E airspace at Shively Field Airport, Saratoga, WY, to support IFR operations at the airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2021-0274; Airspace Docket No. 20-ANM-58". The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center,

Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying the Class E airspace, extending upward from 700 feet above the surface, at Shively Field Airport, Saratoga, WY. This airspace is designed to contain IFR departures to 1,200 feet above the surface and IFR arrivals descending below 1,500 feet above the surface. To properly contain arriving and departing IFR aircraft, the radius south of the airport should be reduced from 6.9 miles to 5 miles. The radius north of the airport should increase from 6.9 miles to 7.3 miles. Also, the area extending north of the airport should be increased to properly contain IFR aircraft performing a procedure turn maneuver for the NDB-A Approach.

This action also proposes to remove the Class E airspace extending upward from 1,200 feet above the surface. This airspace area is wholly contained within the Denver en route airspace and duplication is not necessary.

Further, this action proposes to remove the Saratoga NDB and the Cherokee VOR/DME from the Class E's text header and airspace description. The navigational aids (NAVAIDs) are not needed to define the airspace and removal of the NAVAIDs simplifies the airspace's description.

Lastly, the action proposes administrative updates to the airspace's text header. The city name should be removed from the second line of the text header, and the airport's geographic coordinates on the third line of the text header should be updated to "lat. 41°26'37" N, long. 106°49'39" W" to match the FAA database.

Class E5 airspace designations are published in paragraph 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

*Paragraph 6005 Class E Airspace Areas
Extending Upward From 700 Feet or More
Above the Surface of the Earth.*

* * * * *

ANM WY E5 Saratoga, WY

Shively Field Airport, WY
(Lat. 41°26'37" N, long. 106°49'39" W)

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the airport beginning at the 075° bearing from the airport clockwise to the 234° bearing from the airport, and within a 7.3-mile radius of the airport from the 234° bearing from the airport clockwise to the 075° bearing from the airport, and within 4 miles east and 8 miles west of the 341° bearing from the airport, extending from the 7.3-miles radius to 16.1 miles north of the airport.

Issued in Des Moines, Washington, on April 28, 2021.

B.G. Chew,

*Acting Group Manager, Operations Support
Group, Western Service Center.*

[Docket Number USCG-2021-0199]

RIN 1625-AA00

Safety Zones; July 4th Holiday Fireworks in the Coast Guard Captain of the Port Maryland-National Capital Region Zone

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish three temporary safety zones for navigable waters within the Captain of the Port Maryland-National Capital Region Zone. This action is necessary to provide for the safety of life on these navigable waters of the Severn River in Anne Arundel County, MD, on July 3, 2021, (with alternate date of July 5, 2021), Kent Island Narrows (North Approach) in Queen Anne's County, MD, on July 4, 2021, (with alternate date of July 5, 2021), and Susquehanna River in Harford County, MD, on July 4, 2021, (with alternate date of July 5, 2021), during fireworks displays to commemorate the July 4th holiday. This proposed rulemaking would prohibit persons and vessels from being in these safety zones unless authorized by the Captain of the Port Maryland-National Capital Region or a designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before May 25, 2021.

ADDRESSES: You may submit comments identified by docket number USCG-2021-0199 using the Federal eRulemaking Portal at <https://www.regulations.gov>. See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Mr. Ron Houck, Sector Maryland-National Capital Region Waterways Management Division, U.S. Coast Guard; telephone 410-576-2674, email Ronald.L.Houck@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

The Fifth Coast Guard District has been notified of three fireworks displays planned throughout the Maryland-National Capital Region to commemorate the July 4th holiday. Hazards from these fireworks displays include accidental discharge of fireworks, dangerous projectiles, and falling hot embers or other debris. To respond to these hazards, the Coast Guard plans to establish temporary safety zones to protect the nearby public.

1. The Sherwood Forest Club, Inc., of Sherwood Forest, MD, plans to conduct a fireworks display from 9:20 p.m. to 9:50 p.m. on July 3, 2021. The fireworks are to be launched from the end of the Sherwood Forest Club main pier, located adjacent to the Severn River, approximately 200 yards east of Brewer Pond in Sherwood Forest, MD. In the event of inclement weather, the fireworks display will be scheduled for July 5, 2021. The COTP Maryland-National Capital Region has determined that potential hazards associated with the fireworks to be used in this display would be a safety concern for anyone within 150 yards of the fireworks discharge site.

2. Queen Anne's County Government, of Centreville, MD, plans to conduct a fireworks display from 10 p.m. to 10:20

p.m. on July 4, 2021. The fireworks are to be launched from Kent Island along the Kent Island Narrows (North Approach) in Chester, MD. In the event of inclement weather, the fireworks display will be scheduled for July 5, 2021. The COTP Maryland-National Capital Region has determined that potential hazards associated with the fireworks to be used in this display would be a safety concern for anyone within 800 feet of the fireworks discharge site.

3. The Independence Day Commission of Havre de Grace, MD, plans to conduct a fireworks display from 9:30 p.m. to 10 p.m. on July 4, 2021. The fireworks are to be launched from a fireworks barge located in the Susquehanna River, approximately 300 yards southeast of Concord Point in Havre de Grace, MD. In the event of inclement weather, the fireworks display will be scheduled for July 5, 2021. The COTP Maryland-National Capital Region has determined that potential hazards associated with the fireworks to be used in this display would be a safety concern for anyone within 200 yards of the fireworks barge.

The Coast Guard is requesting that interested parties provide comments within a shortened comment period of 15 days instead of the typical 30 days for this notice of proposed rulemaking. The Coast Guard believes a shortened comment period is necessary and reasonable to ensure the Coast Guard has time to review and respond to any significant comments submitted by the public in response to this NPRM and has a final rule in effect in time for the first scheduled event.

The Coast Guard is proposing this rulemaking under authority in 46 U.S.C. 70034 (previously 33 U.S.C. 1231).

III. Discussion of Proposed Rule

The COTP is proposing to establish three temporary safety zones for certain navigable waters within the COTP Maryland-National Capital Region Zone, as described in 33 CFR 3.25-15, and would be enforced during the times described below for each zone.

The first safety zone would be enforced from 8:30 p.m. to 10:30 p.m. on July 3, 2021, or if necessary due to inclement weather, from 8:30 p.m. to 10:30 p.m. on July 5, 2021. The safety zone would cover all navigable waters of the Severn River, within 150 yards of a fireworks discharge site located at the end of Sherwood Forest Club main pier in approximate position latitude 39°01'54.0" N, longitude 076°32'41.8" W, Sherwood Forest, MD. The duration of the zone is intended to ensure the safety of vessels and these navigable

waters before, during, and after the scheduled 9:20 p.m. to 9:50 p.m. on July 3, 2021 fireworks display.

The second safety zone would be enforced from 9 p.m. to 11 p.m. on July 4, 2021, or if necessary due to inclement weather, from 9 p.m. to 11 p.m. on July 5, 2021. The safety zone would cover all navigable waters of the Kent Island Narrows (North Approach), within 800 feet of the fireworks launch site at Kent Island in approximate position latitude 38°58'44.8" N, longitude 076°14'52.9" W, in Queen Anne's County, MD. The duration of the zone is intended to ensure the safety of vessels and these navigable waters before, during, and after the scheduled 10 p.m. to 10:20 p.m. on July 4, 2021 fireworks display.

The third safety zone would be enforced from 8:30 p.m. to 10:30 p.m. on July 4, 2021, or if necessary due to inclement weather, from 8:30 p.m. to 10:30 p.m. on July 5, 2021. The safety zone would cover all navigable waters of the Susquehanna River within 200 yards of a barge in approximate position latitude 39°32'19" N, longitude 076°04'58.3" W, located at Havre de Grace, MD. The duration of the zone is intended to ensure the safety of vessels and these navigable waters before, during, and after the scheduled 9:30 to 10 p.m. on July 4, 2021 fireworks display.

No vessel or person would be permitted to enter these safety zones without obtaining permission from the COTP or a designated representative. The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a "significant regulatory action," under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, duration, and time-of-day of the safety zones, which would impact small designated areas of the Severn River, Kent Island Narrows

(North Approach), and Susquehanna River for a total no more than six total enforcement-hours, during the evening when vessel traffic is normally low. Moreover, the Coast Guard will issue Local Notices to Mariners and a Broadcast Notice to Mariners via VHF-FM marine channel 16 about the zones.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial

direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves five safety zones lasting six total enforcement hours that would prohibit entry within portions of the Severn River, Kent Island Narrows (North Approach), and Susquehanna River. Normally such actions are categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A

preliminary Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <https://www.regulations.gov>. If your material cannot be submitted using <https://www.regulations.gov>, call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. Comments we post to <https://www.regulations.gov> will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Documents mentioned in this NPRM as being available in the docket, and public comments, will be in our online docket at <https://www.regulations.gov> and can be viewed by following that website's instructions. We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive. If you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

- 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

- 2. Add § 165.T05–0199 to read as follows:

§ 165.T05–0199 Safety Zones; July 4th Holiday Fireworks in the Coast Guard Captain of the Port Maryland-National Capital Region Zone.

(a) *Locations.* The following areas are a safety zone: These coordinates are based on datum NAD 83.

(1) Safety Zone 1. All waters of the Severn River, within 150 yards of a fireworks discharge site located at the end of Sherwood Forest Club main pier in approximate position latitude 39°01'54.0" N, longitude 076°32'41.8" W, Sherwood Forest, MD.

(2) Safety Zone 2. All navigable waters of the Kent Island Narrows (North Approach), within 800 feet of the fireworks launch site at Kent Island in approximate position latitude 38°58'44.8" N, longitude 076°14'52.9" W, in Queen Anne's County, MD.

(3) Safety Zone 3. All navigable waters of the Susquehanna River within 200 yards of a barge in approximate position latitude 39°32'19" N, longitude 076°04'58.3" W, located at Havre de Grace, MD.

(b) *Definitions.* As used in this section—

Captain of the Port (COTP) means the Commander, U.S. Coast Guard Sector Maryland-National Capital Region.

Designated representative means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Maryland-National Capital Region (COTP) in the enforcement of the safety zone.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative by telephone at 410–576–2693 or on Marine Band Radio VHF–FM channel 16 (156.8 MHz). Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(d) *Enforcement officials.* The U.S. Coast Guard may be assisted in the patrol and enforcement of the safety zone by Federal, State, and local agencies.

(e) *Enforcement periods.* (1) Paragraph (a)(1) of this section will be enforced from 8:30 p.m. to 10:30 p.m. on July 3, 2021. If necessary due to inclement weather on July 3, 2021, it will be enforced from 8:30 p.m. to 10:30 p.m. on July 5, 2021.

(2) Paragraph (a)(2) of this section will be enforced from 9 p.m. to 11 p.m. on July 4, 2021. If necessary due to inclement weather on July 4, 2021, it will be enforced from 9 p.m. to 11 p.m. on July 5, 2021.

(3) Paragraph (a)(3) of this section will be enforced from 8:30 p.m. to 10:30 p.m. on July 4, 2021. If necessary due to inclement weather on July 4, 2021, it will be enforced from 8:30 p.m. to 10:30 p.m. on July 5, 2021.

Dated: May 5, 2021.

David E. O'Connell,

Captain, U.S. Coast Guard, Captain of the Port Maryland-National Capital Region.

[FR Doc. 2021–09947 Filed 5–7–21; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2020–0254; FRL–10023–52–Region 9]

Clean Air Plans; 2008 8-Hour Ozone Nonattainment Area Requirements; West Mojave Desert, California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve, or conditionally approve, all or portions of the state implementation plan (SIP) revision submitted by the State of California to meet Clean Air Act requirements for the 2008 8-hour ozone national ambient air quality standards (NAAQS or “standards”) in the West Mojave Desert ozone nonattainment area. The SIP revision addresses the nonattainment area requirements for the

2008 8-hour ozone NAAQS, including the requirements for an emissions inventory, emissions statements, attainment demonstration, reasonable further progress, reasonably available control measures, contingency measures, and motor vehicle emissions budgets. The EPA is proposing to approve the SIP revision as meeting all the applicable ozone nonattainment area requirements, except for contingency measures, for which we are proposing conditional approval.

DATES: Written comments must arrive on or before June 9, 2021.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2020–0254 at <https://www.regulations.gov>. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www.epa.gov/dockets/commenting-epa-dockets>. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. **FOR FURTHER INFORMATION CONTACT:** Tom Kelly, EPA Region IX, (415) 972–3856, kelly.thomas@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, “we,” “us,” and “our” refer to the EPA.

I. Regulatory Context

A. Ozone Standards, Area Designations, and SIPs

Ground-level ozone pollution is formed from the reaction of volatile organic compounds (VOC) and oxides of nitrogen (NO_x) in the presence of sunlight.¹ These two pollutants, referred to as ozone precursors, are emitted by many types of sources, including on- and off-road motor vehicles and engines, power plants and industrial facilities, and smaller area sources such as lawn and garden equipment and paints.

Scientific evidence indicates that adverse public health effects occur following exposure to ozone, particularly in children and adults with lung disease. Breathing air containing ozone can reduce lung function and inflame airways, which can increase respiratory symptoms and aggravate asthma or other lung diseases.²

Under section 109 of the Clean Air Act (CAA or “Act”), the EPA promulgates NAAQS for pervasive air pollutants, such as ozone. The EPA has previously promulgated NAAQS for ozone in 1979 and 1997.³ In 2008, the

EPA revised and further strengthened the ozone NAAQS by setting the acceptable level of ozone in the ambient air at 0.075 parts per million (ppm) averaged over an 8-hour period.⁴ Although the EPA further tightened the 8-hour ozone NAAQS to 0.070 ppm in 2015, this action relates to the requirements for the 2008 ozone NAAQS.⁵

Following promulgation of a new or revised NAAQS, the EPA is required under CAA section 107(d) to designate areas throughout the country as attaining or not attaining the NAAQS. The “Los Angeles-San Bernardino Counties (West Mojave Desert), CA” area (“West Mojave Desert” or WMD) was designated as nonattainment for the 2008 ozone standards on May 21, 2012 and classified as “Severe-15.”⁶

Under the CAA, after the EPA designates areas as nonattainment for a NAAQS, states with nonattainment areas are required to submit SIP revisions that provide for, among other things, attainment of the NAAQS within certain prescribed periods that vary depending on the severity of nonattainment. Areas classified as Severe-15 must attain the NAAQS within 15 years of the effective date of the nonattainment designation.⁷

In California, the California Air Resources Board (CARB) is the agency responsible for the adoption and submission to the EPA of California SIPs and SIP revisions, and it has broad authority to establish emissions standards and other requirements for mobile sources. Local and regional air pollution control districts in California are responsible for the regulation of stationary sources and are generally responsible for the development of regional air quality plans. In the West Mojave Desert, two agencies develop and adopt air quality management plans to address CAA planning requirements applicable to that region, the Antelope Valley Air Quality Management District (AVAQMD) and the Mojave Desert Air Quality Management District (MDAQMD) (collectively, “Districts”). Such plans are then submitted to CARB for adoption and submittal to the EPA as revisions to the California SIP.

ozone NAAQS promulgated in 1997 was 0.08 ppm averaged over an 8-hour period. See 62 FR 38856 (July 18, 1997).

⁴ 73 FR 16436 (March 27, 2008).

⁵ Information on the 2015 ozone NAAQS is available at 80 FR 65292 (October 26, 2015).

⁶ 77 FR 30088 (May 21, 2012).

⁷ CAA section 181(a)(1), 40 CFR 51.1102 and 51.1103(a).

¹ The State of California typically refers to reactive organic gases (ROG) in its ozone-related submissions since VOC in general can include both reactive and unreactive gases. However, since ROG and VOC inventories pertain to common chemical species (*e.g.*, benzene, xylene, etc.), we refer to this set of gases as VOC in this proposed rule.

² See “Fact Sheet—2008 Final Revisions to the National Ambient Air Quality Standards for Ozone” dated March 2008.

³ The ozone NAAQS promulgated in 1979 was 0.12 parts per million (ppm) averaged over a 1-hour period. See 44 FR 8202 (February 8, 1979). The

B. The West Mojave Desert Ozone Nonattainment Area

The West Mojave Desert is located in northeast Los Angeles County and southwest San Bernardino County. For a precise description of the geographic boundaries of the area, see 40 CFR 81.305. The Los Angeles County portion of the WMD area is under the jurisdiction of the AVAQMD, and the San Bernardino County portion of the area is under the jurisdiction of the MDAQMD.

The population of the West Mojave Desert is approximately 868,380.⁸ Ambient 8-hour ozone concentrations in the WMD are above the level of the 2008 8-hour ozone NAAQS. The area's maximum design value for the 2017–2019 period, based on certified data at the Phalen monitor (Air Quality System ID: 06–071–0012), is 0.096 ppm.⁹

The West Mojave Desert receives significant transport of ozone and ozone precursors from the South Coast Air Basin, and to a lesser extent, the San Joaquin Valley. To attain the 2008 ozone NAAQS, the WMD will depend on continued emissions reductions in those areas.¹⁰

C. CAA and Regulatory Requirements for 2008 8-Hour Ozone Nonattainment Area SIPs

States must implement the 2008 ozone standards under title I, part D of the CAA, which includes sections 171–179B of subpart 1, “Nonattainment Areas in General,” and sections 181–185 of subpart 2, “Additional Provisions for Ozone Nonattainment Areas.” To assist states in developing effective plans to address ozone nonattainment problems, in 2015 the EPA issued a SIP Requirements Rule (SRR) for the 2008 ozone standards (“2008 Ozone SRR”) that addresses requirements for nonattainment areas, such as attainment dates, emissions inventories, attainment

and reasonable further progress (RFP) demonstrations, and the transition from the 1997 8-hour ozone standards to the 2008 8-hour ozone standards and associated anti-backsliding requirements.¹¹ The 2008 Ozone SRR is codified at 40 CFR part 51, subpart AA. We discuss each of the CAA statutory and regulatory requirements for 2008 8-hour ozone plans in more detail in Section III of this document.

The EPA's 2008 Ozone SRR was challenged, and on February 16, 2018, the U.S. Court of Appeals for the D.C. Circuit (“D.C. Circuit”) published its decision in *South Coast Air Quality Management District v. EPA* (“*South Coast II*”) ¹² vacating portions of the 2008 Ozone SRR. The only aspect of the *South Coast II* decision that affects this proposed action is the vacatur of the alternative baseline year for RFP plans. More specifically, the 2008 Ozone SRR required states to develop the baseline emissions inventory for RFP plans using the emissions inventory for the most recent calendar year for which states submit a triennial inventory to the EPA under subpart A of 40 CFR part 51, “Air Emissions Reporting Requirements,” which was 2011. The 2008 Ozone SRR, however, allowed states to use an alternative year, between 2008 and 2012, for the baseline emissions inventory, provided the state demonstrated why the alternative baseline year was appropriate. In the *South Coast II* decision, the D.C. Circuit vacated the provisions of the 2008 Ozone SRR that allowed states to use an alternative baseline year for demonstrating RFP.

II. Submissions From the State of California To Address 2008 Ozone Standards Requirements in the West Mojave Desert

A. Summary of Submissions

1. 2016 WMD Attainment Plan

On June 2, 2017, CARB submitted a SIP revision to address the WMD's planning obligations as a Severe-15 nonattainment area for the 2008 ozone NAAQS.¹³ The June 2, 2017 submittal includes attainment plans prepared by the AVAQMD (“AVAQMD Attainment

Plan”) ¹⁴ and the MDAQMD (“MDAQMD Attainment Plan”),¹⁵ an accompanying staff report prepared by CARB (“CARB Staff Report”),¹⁶ and other supporting documents. We refer to the AVAQMD Attainment Plan and the MDAQMD Attainment Plan collectively as the Districts’ “Attainment Plans,” and we refer to all the documents submitted to the EPA on June 2, 2017 as the “2016 WMD Attainment Plan.” The 2016 WMD Attainment Plan addresses the requirements for base year and projected future year emissions inventories, air quality modeling demonstrating attainment of the 2008 ozone NAAQS by the applicable attainment year, provisions demonstrating implementation of reasonably available control measures (RACM), provisions for transportation control strategies and measures, a demonstration of RFP, and contingency measures for failure to make RFP or to attain, among other requirements.

2. CARB's 2018 Updates to the California State Implementation Plan

On December 11, 2018, CARB submitted the “2018 Updates to the California State Implementation Plan” (“2018 SIP Update”) to the EPA as a revision to the California SIP.¹⁷ CARB adopted the 2018 SIP Update on October 25, 2018. CARB developed the 2018 SIP Update in response to the court's decision in *South Coast II* vacating the 2008 Ozone SRR with respect to the use of an alternate baseline year for demonstrating RFP, and to address contingency measure requirements in the wake of the court decision in *Bahr v. EPA*.¹⁸ The 2018 SIP Update includes updates for 8 different California ozone nonattainment areas. We have previously approved portions of the 2018 SIP Update related to other

⁸ 8-Hour Ozone (2008) Designated Area/State Information, Green Book, EPA, accessed on November 19, 2020, Population Data from 2010, <https://www3.epa.gov/airquality/greenbook/hbic.html>.

⁹ Air Quality System (AQS) Design Value Report, O3_designvalues 2017_2019_final_5_26_20.pdf, in the docket for this proposed action. The AQS is a database containing ambient air pollution data collected by the EPA and state, local, and tribal air pollution control agencies from over thousands of monitors. Design values, defined to be consistent with the individual NAAQS as described in 40 CFR part 50, are typically used to designate and classify nonattainment areas, as well as to assess progress towards meeting the NAAQS.

¹⁰ See CARB, Staff Report, “CARB Review of the Mojave Desert AQMD and Antelope Valley AQMD Federal 75 ppb Ozone Attainment Plans for the Western Mojave Desert Nonattainment Area,” April 21, 2017 (“CARB Staff Report”), Appendix B, “Weight of Evidence Analysis,” B–28.

¹¹ 80 FR 12264 (March 6, 2015).

¹² *South Coast Air Quality Management District v. EPA*, 882 F.3d 1138 (D.C. Cir. 2018). The term “*South Coast II*” is used in reference to the 2018 court decision to distinguish it from a decision published in 2006 also referred to as “*South Coast*.” The earlier decision involved a challenge to the EPA's Phase 1 implementation rule for the 1997 ozone NAAQS. *South Coast Air Quality Management Dist. v. EPA*, 472 F.3d 882 (D.C. Cir. 2006).

¹⁴ AVAQMD, “AVAQMD Federal 75 ppb Ozone Attainment Plan (Western Mojave Desert Nonattainment Area),” adopted on March 21, 2017.

¹⁵ MDAQMD, “MDAQMD Federal 75 ppb Ozone Attainment Plan (Western Mojave Desert Nonattainment Area),” adopted on February 27, 2017.

¹⁶ CARB, Staff Report, “CARB Review of the Mojave Desert AQMD and Antelope Valley AQMD Federal 75 ppb Ozone Attainment Plans for the Western Mojave Desert Nonattainment Area,” released April 21, 2017.

¹⁷ Letter dated December 5, 2018, from Richard Corey, CARB, to Mike Stoker, EPA Region IX.

¹⁸ *Bahr v. EPA*, 836 F.3d 1218 (9th Cir. 2016). In this case, the court rejected the EPA's longstanding interpretation of CAA section 172(c)(9) as allowing for early implementation of contingency measures. The court concluded that a contingency measure must take effect at the time the area fails to make RFP or attain by the applicable attainment date, not before. See also *Sierra Club v. EPA*, 985 F.3d 1055 (D.C. Cir. 2021), reaching a similar decision. These cases are addressed below in Section III.G of this document.

nonattainment areas.¹⁹ For the West Mojave Desert, the 2018 SIP Update includes an RFP demonstration using the required 2011 baseline year and revised motor vehicle emission budgets for the 2008 ozone NAAQS.²⁰

B. Clean Air Act Procedural Requirements for Adoption and Submission of SIP Revisions

1. Requirements

CAA sections 110(a)(1) and (2) and 110(l) require a state to provide reasonable public notice and opportunity for public hearing prior to the adoption and submission of a SIP or SIP revision. To meet this requirement, every SIP submittal should include evidence that adequate public notice was given and an opportunity for a public hearing was provided consistent with the EPA's implementing regulations in 40 CFR 51.102.

2. Summary of the State's Documentation

a. 2016 WMD Attainment Plan

On February 17, 2017, the AVAQMD published notice in a local newspaper of a public hearing to be held on March 21, 2017, for adoption of the AVAQMD Attainment Plan.²¹ The District held the public hearing on March 21, 2017,²² and signed a Board resolution adopting the plan that same day.²³ The District sent the plan to CARB on April 18, 2017.²⁴

On January 27, 2017, the MDAQMD published notice in a local newspaper of a public hearing to be held on February 27, 2017, for adoption of the MDAQMD Attainment Plan.²⁵ The District held the public hearing on February 27, 2017,²⁶ and signed a Board resolution adopting the plan the same day.²⁷ The District sent the plan to CARB on April 3, 2017.²⁸

¹⁹ See, e.g., 84 FR 11198 (March 25, 2019) (final approval of the San Joaquin Valley portion of the 2018 SIP Update) and 84 FR 52005 (October 1, 2019) (final approval of the South Coast portion of the 2018 SIP Update).

²⁰ CARB withdrew the 2016 WMD Attainment Plan RFP demonstration in a letter dated December 18, 2019, from Richard Corey, CARB, to Michael Stoker, EPA Region IX.

²³ Resolution 17-01, March 21, 2017.

²⁴ Letter dated April 18, 2017, from Alan J. De Salvio, AVAQMD, to Richard Corey, CARB.

²⁵ Appendix B of Final Staff Report, MDAQMD Attainment Plan.

²⁶ Minutes of the Governing Board of the Mojave Desert Air Quality Management District, Victorville, California, February 27, 2017.

²⁷ Resolution 17-05, dated February 27, 2017.

²⁸ Letter dated April 3, 2017, from Alan J. De Salvio, MDAQMD, to Richard Corey, CARB.

On April 20, 2017, CARB provided notice of a public comment period and public hearing to be held on May 25, 2017, for the 2016 WMD Attainment Plan.²⁹ CARB adopted the 2016 WMD Attainment Plan by resolution at the May 25, 2017 hearing,³⁰ and submitted it to the EPA on June 2, 2017.³¹ The EPA notified CARB the submittal was complete on November 22, 2017.³²

b. 2018 SIP Update

On September 21, 2018, CARB provided notice of a public comment period and public hearing to be held on October 25, 2018, for the 2018 SIP Update.³³ CARB adopted the 2018 SIP Update by resolution at the October 25, 2018 hearing,³⁴ and submitted it to the EPA in a letter dated December 5, 2018, which was electronically transmitted to the EPA's State Planning Electronic Collaboration System on December 11, 2018.³⁵

c. The EPA's Conclusions on the Submission Requirements for the WMD 2016 Attainment Plan

CARB has satisfied the applicable statutory and regulatory requirements for reasonable public notice and hearing prior to the adoption and submittal of the elements of the 2016 WMD Attainment Plan. Based on information provided in each SIP revision and summarized above, the EPA has determined that all hearings were properly noticed. Therefore, we find that the submittals of the 2016 WMD Attainment Plan meet the procedural requirements for public notice and hearing in CAA sections 110(a) and 110(l) and 40 CFR 51.102.

III. Evaluation of the 2016 WMD Attainment Plan and 2018 SIP Update

A. Emission Inventories

1. Statutory and Regulatory Requirements

Sections 172(c)(3) and 182(a)(1) of the CAA require states to submit for each ozone nonattainment area a "base year inventory" that is a comprehensive, accurate, current inventory of actual

²⁹ Notice of Public Meeting to Consider the 2016 Ozone State Implementation Plan for the Western Mojave Desert Nonattainment Area, California Air Resources Board, April 20, 2017.

³⁰ Board Resolution 17-12, May 25, 2017.

³² Letter dated November 22, 2017, from Matt Lakin, EPA Region IX, to Richard Corey, CARB.

³³ Notice of Public Meeting to Consider the 2018 Updates to the California State Implementation Plan, September 21, 2018.

³⁴ Board Resolution 18-50, October 25, 2018.

³⁵ Letter dated December 5, 2018, from Richard Corey, CARB, to Mike Stoker, EPA Region IX.

emissions from all sources of the relevant pollutant or pollutants in the area. In addition, the 2008 Ozone SRR requires that the inventory year be selected consistent with the baseline year for the RFP demonstration, which is usually the most recent calendar year for which a complete triennial inventory is required to be submitted to the EPA under the Air Emissions Reporting Requirements.³⁶ The EPA has issued guidance on the development of base year and future year emissions inventories for 8-hour ozone and other pollutants.³⁷ Emissions inventories for ozone must include emissions of VOC and NO_x and represent emissions for a typical ozone season weekday.³⁸ States should include documentation explaining how the emissions data were calculated. In estimating mobile source emissions, states should use the latest emissions models and planning assumptions available at the time the SIP is developed.³⁹

Future year baseline emissions inventories must reflect the most recent population, employment, travel, and congestion estimates for the area. In this context, "baseline" emissions inventories refer to emissions estimates for a given year and area that reflect rules and regulations and other measures that are already adopted. Future year baseline emissions inventories are necessary to show the projected effectiveness of SIP control measures. Both the base year and future year inventories are necessary for photochemical modeling to demonstrate attainment.

2. Summary of State's Submission

The 2016 WMD Attainment Plan includes base year (2012) and future year baseline inventories for NO_x and VOC for the West Mojave Desert.⁴⁰

³⁶ 2008 Ozone SRR at 40 CFR 51.1115(a) and the Air Emissions Reporting Requirements at 40 CFR part 51 subpart A.

³⁷ "Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations," EPA-454/B-17-002, May 2017. At the time the 2016 WMD Attainment Plan was developed, the following EPA emissions inventory guidance applied: "Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations," EPA-454/R-05-001, August 2005.

³⁸ 40 CFR 51.1115(a) and (c), and 40 CFR 51.1100(bb) and (cc).

³⁹ 80 FR 12264, 12290 (March 6, 2015).

⁴⁰ The 2012 base year and future year baseline emissions inventories in the CARB Staff Report exclude non-anthropogenic "natural sources" emissions such as biogenics and geogenics. However, emissions from such natural sources are included in the emissions inventories used for the attainment demonstration because they affect ozone formation.

Documentation for the inventories is found in Appendix A–2 of the CARB Staff Report.⁴¹ The emissions inventories represent average summer day emissions, consistent with the observation that ozone levels in West Mojave Desert are typically higher from May through October.⁴² For stationary and area sources, the 2012 base year and future year inventories considered several of the Districts' rules, specifically including MDAQMD Rule 1461, "Portland Cement Kilns" (covering mineral processing), and rules from both Districts based on CARB's rules for consumer products, aerosol coatings,⁴³ and architectural coatings.⁴⁴ The inventory also specifically notes the incorporation of CARB's performance standards for gasoline dispensing hose permeation,⁴⁵ and revised vehicle refueling emission factors.⁴⁶ These District and CARB rules are noted in Table 5, "Stationary Source Control

⁴¹ The 2012 base year emissions inventory included in the CARB Staff Report supersedes and replaces a previous submittal of the 2012 base year emissions inventory for the West Mojave Desert in the "8-Hour Ozone State Implementation Plan Emission Inventory Submittal" (the "Multi-Area Emission Inventory"). The Multi-Area Emission Inventory was submitted by CARB on July 17, 2014 and later withdrawn on December 18, 2019. The Multi-Area Inventory included 2012 base year emissions inventories for 16 nonattainment areas, including the West Mojave Desert. Relative to the corresponding inventory for the West Mojave Desert in the Multi-Area Emission Inventory, the 2012 base year emissions inventory in the 2016 WMD Attainment Plan reflects updated stationary, area, and nonroad source calculations as well as an updated version of the EMFAC model for on-road motor vehicle estimates.

⁴² Appendix A–2 of the CARB Staff Report. In contrast, the emissions inventory and projections in Appendix A and B of the Districts' Attainment Plans contain average daily emissions, not average summer day emissions.

⁴³ See California Code of Regulations 94522, "Limits and Requirements for Aerosol Coating Products," incorporated into the SIP on November 4, 2009 (74 FR 57074).

⁴⁴ As stated on the CARB website (<https://ww2.arb.ca.gov/our-work/programs/coatings/architectural-coatings/scm-district-rulemaking-schedule>, accessed on August 25, 2020), AVAQMD Rule 1113, adopted locally on June 18, 2013 and MDAQMD Rule 1113, adopted locally on April 23, 2012, implement California's 2007 suggested control measures for architectural coatings. These rules were incorporated into the SIP on December 8, 2015 (80 FR 76222) and December 8, 2015 (80 FR 76222), respectively.

⁴⁵ See <https://ww3.arb.ca.gov/vapor/gdf-emisfactor/attachment5.pdf>.

⁴⁶ See <https://ww2.arb.ca.gov/gasoline-dispensing-facility-emission-factors>.

Rules and Regulations Included in the Inventory," of Appendix A–1 of the CARB Staff Report. The mobile source portions of both base year and projected future year inventories were developed using California's EPA-approved mobile source emissions model, EMFAC2014, for estimating on-road motor vehicle emissions.⁴⁷

The 2016 WMD Attainment Plan includes emissions inventories for stationary sources, area sources, and on-road and off-road mobile sources.⁴⁸ Stationary sources refer to larger "point" sources that have a fixed geographic location. The 2018 SIP Update explains that 2012 "stationary source emissions reflect actual emissions reported from industrial point sources" and include stationary aggregate sources, such as gasoline dispensing facilities.⁴⁹ AVAQMD Rule 107, "Certification of Submissions and Emission Statements," and MDAQMD Rule 107, "Certification and Emission Statements," require all stationary sources within the nonattainment area that emit more than 25 tons per year (tpy) or more of VOC or NO_x to report and certify annual emissions. For the 2012 base year, CARB developed a list of stationary sources in Los Angeles and San Bernardino counties and their associated emissions. AVAQMD and MDAQMD separated the stationary sources within the WMD from those within their respective counties but outside the WMD.

Area sources include smaller emissions sources distributed across the nonattainment area, such as consumer products, architectural coatings, pesticides and herbicides, farming operations, and cooking. CARB and the District estimate emissions for area sources using surveys and information from other state and federal agencies. These estimates are updated with relevant factors such as population changes, demographic factors, and agency specific growth factors (e.g., for farming operations and use of herbicides and pesticides).⁵⁰

On-road emissions inventories in the CARB Staff Report are calculated using

⁴⁷ EMFAC is short for Emission FACtor.

⁴⁸ CARB Staff Report, Appendix A–2.

⁴⁹ 2018 SIP Update, Appendix A, A–1.

⁵⁰ CARB Staff Report, see the discussion of areawide sources beginning on page A1–8.

CARB's EMFAC2014 model⁵¹ and the travel activity data provided by the area's metropolitan planning organization, the Southern California Association of Governments (SCAG), in the "2016–2040 Regional Transportation Plan/Sustainable Communities Strategy."⁵² CARB consulted with MDAQMD staff to estimate emissions from off-road equipment and area sources occurring in the nonattainment area, most often using human population as default surrogate for the quantity of emissions occurring in the WMD.⁵³ Future emissions forecasts are primarily based on population and economic growth projections provided by SCAG; growth estimates from government agencies such as the U.S. Bureau of Labor Statistics, the U.S. Department of Agriculture, and CARB; forecasts from the Districts; and research studies. The growth factors for each emissions category are discussed in Appendix A–1 of the CARB Staff Report.

Table 1 below provides a summary of the CARB Staff Report's 2012 base year and future attainment year VOC and NO_x emissions estimates within the West Mojave Desert (average summer day). These inventories provide the basis for the control measure analysis and the attainment demonstration in the 2016 WMD Attainment Plan. Based on the inventory for 2012, stationary and area sources of VOC emissions are roughly equivalent to the combined on-road and off-road mobile source emissions. For NO_x emissions in 2012, on-road mobile sources contribute the highest fraction of emissions (37.11 tons per day (tpd) or 37.5 percent) followed by off-road (32.53 tpd or 32.9 percent), stationary (28.27 tpd or 28.6 percent), and area sources (1.05 tpd or 1.1 percent).

⁵¹ In December 2015, the EPA approved EMFAC2014 for SIP development and transportation conformity purposes in California. 80 FR 77337 (December 14, 2015). EMFAC2014 was the most recently approved version of the EMFAC model that was available at the time of preparation of the 2016 Attainment Plan. The EPA approved an updated version of the EMFAC model, EMFAC2017, for future SIP development and transportation purposes in California. 84 FR 41717 (August 15, 2019).

TABLE 1—WEST MOJAVE DESERT NONATTAINMENT AREA BASE YEAR AND ATTAINMENT YEAR EMISSIONS INVENTORY SUMMARY
[Summer season average tpd]

Category	NO _x (2012)	NO _x (2026)	VOC (2012)	VOC (2026)
Stationary Sources	28.27	42.08	13.16	17.35
Area Sources	1.05	0.92	11.32	12.15
On-road Mobile	37.11	9.84	15.21	5.98
Off-road Mobile	32.53	25.53	7.09	4.99
Total	98.95	68.56	46.78	40.47

Source: Appendix A–2, CARB Staff Report. Due to rounding, the totals may not agree to the hundredth of a tpd.

3. The EPA's Review of the State's Submission

We have reviewed the 2012 base year emissions inventory in the 2016 WMD Attainment Plan and the inventory methodologies used by CARB and the District for consistency with CAA requirements and EPA guidance. First, as required by EPA regulations, we find that the 2012 inventory includes estimates for VOC and NO_x for a typical ozone season weekday, and that CARB has provided adequate documentation explaining how the emissions are calculated. Second, we find that the 2012 base year emissions inventory in the 2016 WMD Attainment Plan reflects appropriate emissions models and methodologies, and, therefore, represents a comprehensive, accurate, and current inventory of actual emissions during that year in the WMD. Third, we find that selection of year 2012 for the base year emissions inventory is appropriate because it is consistent with the 2011 RFP baseline year (from the 2018 SIP Update) because both inventories are derived from a common set of models and methods. Therefore, the EPA is proposing to approve the 2012 emissions inventory in the 2016 WMD Attainment Plan as meeting the requirements for a base year inventory set forth in CAA section 182(a)(1) and 40 CFR 51.1115.

With respect to future year baseline projections, we have reviewed the growth and control factors and find them acceptable, and conclude that the future baseline emissions projections in the 2016 WMD Attainment Plan reflect appropriate calculation methods and the latest planning assumptions.

Furthermore, we note that the future year baseline projections account for emissions reductions from control measures in adopted state and local rules and regulations. As a general matter, the EPA will approve a SIP revision that takes emissions reduction credit for such control measures only where the EPA has approved the control measures as part of the SIP. Tables 1

and 2 in the technical support document (TSD) supporting this action document the approval of all rules within the West Mojave Desert. Table 5 of the CARB Staff Report documents the specific rules considered in the development of the emissions inventory.

With respect to mobile sources, the EPA has taken action in recent years to approve CARB mobile source regulations into the California SIP.⁵⁴ We therefore find that the future year baseline projections in the 2016 WMD Attainment Plan are properly supported by SIP-approved stationary and mobile source control measures.

B. Emissions Statements

1. Statutory and Regulatory Requirements

Section 182(a)(3)(B)(i) of the Act requires each state to submit a SIP revision requiring owners or operators of stationary sources of VOC or NO_x to provide the state with statements of actual emissions from such sources. Statements must be submitted at least every year and must contain a certification that the information contained in the statement is accurate to the best knowledge of the individual certifying the statement. Section 182(a)(3)(B)(ii) of the Act allows states to waive the emission statement requirement for any class or category of stationary sources that emit less than 25 tpy of VOC or NO_x, if the state provides an inventory of emissions from such class or category of sources as part of the base year or periodic inventories required under CAA sections 182(a)(1) and 182(a)(3)(A), based on the use of emission factors established by the EPA or other methods acceptable to the EPA.

The preamble of the 2008 Ozone SRR states that if an area has a previously approved emissions statement rule for the 1997 ozone NAAQS or the 1-hour ozone NAAQS that covers all portions

of the nonattainment area for the 2008 ozone NAAQS, such rule should be sufficient for purposes of the emissions statement requirement for the 2008 ozone NAAQS.⁵⁵ The state should review the existing rule to ensure it is adequate and, if so, may rely on it to meet the emissions statement requirement for the 2008 ozone NAAQS. Where an existing emissions statement requirement is still adequate to meet the requirements of this rule, states can provide the rationale for that determination to the EPA in a written statement in the SIP to meet this requirement. States should identify the various requirements and how each is met by the existing emissions statement program. Where an emissions statement requirement is modified for any reason, the state must provide the revisions to the emissions statement as part of its SIP.

2. Summary of the State's Submission

The 2016 WMD Attainment Plan addresses compliance with the emissions statement requirement in CAA section 182(a)(3)(B) for the 2008 ozone NAAQS by reference to AVAQMD Rule 107 and MDAQMD Rule 107.⁵⁶ These rules require, among other things, emissions reporting within the West Mojave Desert from all stationary sources of NO_x and VOC with emissions over 25 tpy.⁵⁷ The EPA approved AVAQMD Rule 107 on April 11, 2013 (78 FR 21545) and MDAQMD Rule 107 on May 26, 2004 (69 FR 29880) as revisions to each District's portion of the California SIP. AVAQMD and MDAQMD letters to CARB state that these rules continue to meet the emission statement requirements of CAA section 182(a)(3)(B) and that the Districts rely on these rules to meet the

⁵⁵ 80 FR 12264, at 12291 (March 6, 2015).

⁵⁶ Addendum A to Appendix D and Addendum A to Appendix E of the CARB Staff Report.

⁵⁷ Id.

⁵⁴ See 81 FR 39424 (June 16, 2016), 82 FR 14446 (March 21, 2017), and 83 FR 23232 (May 18, 2018).

emissions statement requirements for the 2008 ozone standards.⁵⁸

3. The EPA's Review of the State's Submission

For this action, we have reviewed AVAQMD Rule 107 and MDAQMD Rule 107 for compliance with the specific requirements for emissions statement rules under CAA section 182(a)(3)(B). We agree with the Districts' findings: That these rules apply within the entire ozone nonattainment area and that the nonattainment area is the same for both the 1997 Ozone NAAQS and the 2008 ozone NAAQS; that the rules apply to all stationary sources of VOC and NO_x, except those emitting less than 25 tpy for which the Districts have waived the requirement (consistent with CAA section 182(a)(3)(B)(ii)); and that the rules require reporting, on an annual basis, of total emissions of VOC and NO_x. We also find that AVAQMD Rule 107 and MDAQMD Rule 107 require certification that the information provided to the Districts is accurate to the best knowledge of the individual certifying the emissions data, as required under CAA section 182(a)(3)(B).

Therefore, we propose to approve the emissions statement element of the 2016 WMD Attainment Plan as meeting the requirements of CAA section 182(a)(3)(B) and the 40 CFR 51.1102.

C. Reasonably Available Control Measures Demonstration

1. Statutory and Regulatory Requirements

CAA section 172(c)(1) requires that each attainment plan provide for the implementation of all RACM as expeditiously as practicable (including such reductions in emissions from existing sources in the area as may be obtained through implementation of reasonably available control technology (RACT)), and also provide for attainment of the NAAQS. The 2008 Ozone SRR requires that, for each nonattainment area required to submit an attainment demonstration, the state concurrently submit a SIP revision demonstrating that it has adopted all RACM necessary to demonstrate attainment as expeditiously as practicable and to meet any RFP requirements.⁵⁹

The EPA has previously provided guidance interpreting the RACM requirement in the General Preamble for the Implementation of the Clean Air Act Amendments of 1990 ("General

Preamble") and in a memorandum entitled "Guidance on the Reasonably Available Control Measures (RACM) Requirement and Attainment Demonstration Submissions for Ozone Nonattainment Areas."⁶⁰ In summary, to address the requirement to adopt all RACM, states should consider all potentially reasonable control measures for source categories in the nonattainment area to determine whether they are reasonably available for implementation in that area and whether they would, if implemented individually or collectively, advance the area's attainment date by one year or more.⁶¹ Any measures that are necessary to meet these requirements that are not already either federally promulgated, or part of the state's SIP, or otherwise creditable in the SIP, must be submitted in enforceable form as part of the state's attainment plan for the area.⁶²

CAA section 172(c)(6) requires that nonattainment area plans include enforceable emission limitations, and such other control measures, means or techniques (including economic incentives such as fees, marketable permits, and auctions of emission rights), as well as schedules and timetables for compliance, as may be necessary or appropriate to provide for timely attainment of the NAAQS.⁶³ Under the 2008 Ozone SRR, all control

measures needed for attainment must be implemented no later than the beginning of the attainment year ozone season.⁶⁴ The attainment year ozone season is defined as the ozone season immediately preceding a nonattainment area's outermost attainment date.⁶⁵

2. Summary of the State's Submission

a. The Districts' RACM Analysis

The AVAQMD and MDAQMD Attainment Plans explain that they incorporate all RACM, and that the Districts have adopted or committed in the Attainment Plans to adopt all such measures.⁶⁶ The Plans note the Districts' reviews of stationary source rules conducted during the development of the RACT SIPs submitted to the EPA in 2015,⁶⁷ and set out the Districts' schedules for adoption of rules identified in those reviews.⁶⁸ The CARB Staff Report includes a further RACM assessment from each District confirming that the Districts have examined existing control measures and determined that no additional RACT or mobile source controls will advance the attainment date for the West Mojave Desert for the 2008 ozone standard.⁶⁹ These assessments also note that photochemical modeling shows the WMD would attain the ozone NAAQS if not for upwind emissions from the South Coast Air Basin and San Joaquin Valley.⁷⁰

b. CARB'S RACM Analysis

Source categories for which CARB has primary jurisdiction for reducing emissions in California include most new and existing on- and off-road engines and vehicles, motor vehicle fuels, and consumer products. CARB's RACM assessment is contained in the Appendix E, "Ozone RACM Assessment," of both the AVAQMD and MDAQMD Attainment Plans. Appendix

⁶⁰ General Preamble, 57 FR 13498 at 13560 (April 16, 1992); memorandum dated November 30, 1999, from John Seitz, Director, OAQPS, to EPA Regional Air Directors, Regions I–X, Subject: "Guidance on the Reasonably Available Control Measures (RACM) Requirement and Attainment Demonstration Submissions for Ozone Nonattainment Areas."

⁶¹ Id. See also 44 FR 20372 (April 4, 1979), and memorandum dated December 14, 2000, from John S. Seitz, Director, OAQPS, to Regional Air Directors, titled "Additional Submission on RACM From States with Severe One-Hour Ozone Nonattainment Area SIPs."

⁶² For ozone nonattainment areas classified as Moderate or above, CAA section 182(b)(2) also requires implementation of RACT for all major sources of VOC and for each VOC source category for which the EPA has issued a Control Techniques Guideline (CTG). CAA section 182(f) requires that RACT under section 182(b)(2) also apply to major stationary sources of NO_x. In Extreme areas, a major source is a stationary source that emits or has the potential to emit at least 10 tpy of VOC or NO_x (see CAA section 182(e) and (f)). Under the 2008 Ozone SRR, states were required to submit SIP revisions meeting the RACT requirements of CAA sections 182(b)(2) and 182(f) no later than 24 months after the effective date of designation for the 2008 Ozone NAAQS and to implement the required RACT measures as expeditiously as practicable but no later than January 1 of the 5th year after the effective date of designation (see 40 CFR 51.1112(a)). California submitted the CAA section 182 RACT SIP for AVAQMD and MDAQMD on October 23, 2015 and September 9, 2015, respectively. The EPA conditionally approved these submissions at 82 FR 46923 (October 10, 2017) and 83 FR 5921 (February 12, 2018).

⁶³ See also CAA section 110(a)(2)(A).

⁷⁰ CARB Staff Report, Appendix D–3 and E–3. This finding is supported by Appendix B of the CARB Staff Report, which contains a conceptual model explaining the formation of ozone in the WMD, and the heavy influence of transport from the South Coast Air Basin.

⁵⁸ Appendix D1 and D2 and Appendix E1 and E1 of the CARB Staff Report.

⁵⁹ 40 CFR 51.1112(c).

F, “CARB Adopted Mobile Source Programs,” of these attainment plans also includes a general description of CARB’s key mobile source regulations and programs and a comprehensive table listing on- and off-road mobile source regulatory actions taken by CARB from 1985 through 2016. The RACM assessment contains CARB’s evaluation of mobile source and other statewide control measures that reduce emissions of NO_x and VOC in the WMD.

Given the need for substantial emissions reductions from mobile and area sources to meet the NAAQS in California nonattainment areas, CARB has established stringent control measures for on-road and off-road mobile sources and the fuels that power them. California has unique authority under CAA section 209 (subject to a waiver by the EPA) to adopt and implement new emission standards for many categories of on-road vehicles and engines, and new and in-use off-road vehicles and engines.

CARB’s mobile source program extends beyond regulations that are subject to the waiver or authorization process set forth in CAA section 209, to include standards and other requirements to control emissions from in-use heavy-duty trucks and buses, gasoline and diesel fuel specifications, and many other types of mobile sources. Generally, these regulations have been submitted and approved as revisions to the California SIP.⁷¹

The Districts’ Attainment Plans include CARB’s RACM analysis for mobile source measures in the West Mojave Desert. In this analysis, CARB concludes:

There are no reasonable regulatory control measures excluded from use in this plan; therefore, there are no emissions reductions associated with unused regulatory control measures. As a result, California’s mobile source control programs fully meet the requirements for RACM.⁷²

c. Local Jurisdictions’ RACM Analysis and Transportation Control Measures

The supplemental RACM assessments included as addendums to appendices D and E of the CARB Staff Report address the Districts’ RACM findings, including for transportation control measures (TCMs). These addendums state that the

Districts examined existing control measures and determined that controls from RACT and mobile source emission control programs will not advance the West Mojave Desert’s attainment year for the 2008 ozone standards.⁷³

3. The EPA’s Review of the State’s Submission

The TSD for this action includes additional analysis to evaluate the Districts’ and CARB’s RACM assessments.⁷⁴ In that analysis, we estimate that a 1.2 tpd reduction of NO_x emissions would be necessary to advance attainment by one year from 2026 to 2025, and conservatively identify no more than 1.04 tpd of additional reductions that could be achieved through implementation of potential RACM for stationary sources. Based on this analysis, we agree with the Districts’ and CARB’s conclusion that there are no additional RACM that would advance attainment of the 2008 ozone standards in the WMD by at least one year.

We also find that CARB’s consumer products program comprehensively addresses emissions from consumer products in the WMD. CARB measures are more stringent than the EPA’s consumer products regulation promulgated in 1998,⁷⁵ and generally exceed the controls in place throughout other areas of the country. We agree with CARB’s conclusion that its mobile source regulations include all reasonably available controls.

For the WMD, given the significant influence of pollutant transport from the South Coast Air Basin and the minimal and diminishing emissions benefits generally associated with TCMs, no new TCMs implemented in the WMD, alone or in combination with potential additional rules, would contribute to advancing the attainment date in the WMD by one year. Therefore, no new TCMs are required to satisfy the RACM requirement in the WMD.

For the foregoing reasons, and as addressed more fully in the TSD for this action, we propose to find that the 2016 Attainment Plan provides for the implementation of all RACM as required by CAA section 172(c)(1) and 40 CFR 51.1112(c).

D. Attainment Demonstration

1. Statutory and Regulatory Requirements

An attainment demonstration consists of the following: (1) Technical analyses, such as base year and future year modeling, to locate and identify sources of emissions that are contributing to violations of the ozone NAAQS within the nonattainment area (*i.e.*, analyses related to the emissions inventory for the nonattainment area and the emissions reductions necessary to attain the standard); (2) a list of adopted measures (including RACT controls) with schedules for implementation and other means and techniques necessary and appropriate for demonstrating RFP and attainment as expeditiously as practicable but no later than the outside attainment date for the area’s classification; (3) a RACM analysis; and (4) contingency measures required under sections 172(c)(9) and 182(c)(9) of the CAA that can be implemented without further action by the state or the EPA to cover emissions shortfalls in RFP plans and failures to attain.⁷⁶ This subsection of this proposed rule addresses the first two components of the attainment demonstration—the technical analyses and a review of adopted measures. Section III.C of this document, “Reasonably Available Control Measures Demonstration,” addresses the RACM component, and section III.G, “Contingency Measures,” addresses the contingency measures component of the attainment demonstration in the Attainment Plans.

With respect to the technical analyses, section 182(c)(2)(A) of the CAA requires that a plan for an ozone nonattainment area classified “Serious” or above include a “demonstration that the plan . . . will provide for attainment of the ozone [NAAQS] by the applicable attainment date. This attainment demonstration must be based on photochemical grid modeling or any other analytical method determined . . . to be at least as effective.” The attainment demonstration predicts future ambient concentrations for comparison to the NAAQS, making use of available information on measured concentrations, meteorology, and current and projected emissions inventories of ozone precursors, including the effect of control measures in the plan. Areas classified Severe-15 for the 2008 ozone NAAQS must demonstrate attainment as expeditiously as practicable, but no later than 15 years

⁷¹ See, *e.g.*, the EPA’s approval of standards and other requirements to control emissions from in-use heavy-duty diesel-powered trucks, at 77 FR 20308 (April 4, 2012), revisions to the California on-road reformulated gasoline and diesel fuel regulations at 75 FR 26653 (May 12, 2010), and revisions to the California motor vehicle inspection and maintenance program at 75 FR 38023 (July 1, 2010).

⁷² AVAQMD Attainment Plan, Appendix E–7; MDAQMD Attainment Plan, Appendix E–7.

⁷³ CARB Staff Report, Appendix D–3 and E–3.

⁷⁴ Technical Support Document, Clean Air Plans; 2008 8-Hour Ozone Nonattainment Area Requirements; West Mojave Desert, California, U.S. EPA Region IX, September 2020.

⁷⁵ 63 FR 48819 (September 11, 1998).

⁷⁶ 78 FR 34178, 34184 (June 6, 2013), the EPA’s proposed rule for implementing the 2008 ozone NAAQS.

after the effective date of designation as nonattainment. The WMD was designated nonattainment for the 2008 ozone NAAQS effective July 20, 2012,⁷⁷ and accordingly must demonstrate attainment of the standards by no later than July 20, 2027.⁷⁸ An attainment demonstration must show attainment of the standards for a full calendar year before the attainment date, so in practice, Severe-15 nonattainment areas must demonstrate attainment no later than 2026.

The EPA's recommended procedures for modeling ozone as part of an attainment demonstration are contained in "Modeling Guidance for Demonstrating Attainment of Air Quality Goals for Ozone, PM_{2.5}, and Regional Haze" ("Modeling Guidance").⁷⁹ The Modeling Guidance includes recommendations for a modeling protocol, model input preparation, model performance evaluation, use of model output for the numerical NAAQS attainment test, and modeling documentation. Air quality modeling is performed using meteorology and emissions from a base year, and the predicted concentrations from this base case modeling are compared to air quality monitoring data from that year to evaluate model performance. Once the model performance is determined to be acceptable, future year emissions are simulated with the model. The relative (or percent) change in modeled concentration due to future emissions reductions provides a relative response factor (RRF). Each monitoring site's RRF is applied to its monitored base year design value to provide the future design value for comparison to the NAAQS. The Modeling Guidance also recommends supplemental air quality analyses, which may be used as part of a weight of evidence (WOE) analysis. A WOE analysis corroborates the attainment demonstration by considering evidence other than the main air quality modeling attainment

test, such as trends and additional monitoring and modeling analyses.

The Modeling Guidance also does not require a particular year to be used as the base year for 8-hour ozone plans.⁸⁰ The Modeling Guidance states that the most recent year of the National Emissions Inventory may be appropriate for use as the base year for modeling, but that other years may be more appropriate when considering meteorology, transport patterns, exceptional events, or other factors that may vary from year to year.⁸¹ Therefore, the base year used for the attainment demonstration need not be the same year used to meet the requirements for emissions inventories and RFP.

With respect to the list of adopted measures, CAA section 172(c)(6) requires that nonattainment area plans include enforceable emissions limitations, and such other control measures, means or techniques (including economic incentives such as fees, marketable permits, and auctions of emission rights), as well as schedules and timetables for compliance, as may be necessary or appropriate to provide for timely attainment of the NAAQS.⁸² Under the 2008 Ozone SRR, all control measures needed for attainment must be implemented no later than the beginning of the attainment year ozone season.⁸³ The attainment year ozone season is defined as the ozone season immediately preceding a nonattainment area's outermost attainment date.⁸⁴ For the West Mojave Desert, the outermost attainment year is 2026.

2. Summary of the State's Submission

a. Photochemical Modeling

The 2016 WMD Attainment Plan includes photochemical modeling for the 2008 ozone NAAQS. The South Coast Air Quality Management District (SCAQMD) performed the air quality modeling for the 2016 WMD Attainment Plan, as part of the Final 2016 Air Quality Management Plan for the South Coast Air Quality Management District ("SCAQMD 2016 AQMP").⁸⁵ The modeling relies on a 2012 base year and demonstrates attainment of the 2008 ozone NAAQS by the applicable Severe-15 area attainment year (*i.e.*, 2026).

The modeling and modeled attainment demonstration are described in Chapter 4, "Attainment

Demonstration," of the 2016 WMD Attainment Plan and in Appendix D, "Western Mojave Desert Modeling Analysis." The AVAQMD Attainment Plan and the MDAQMD Attainment Plan also reference Appendix V of the SCAQMD 2016 AQMP for additional information on the modeled attainment demonstration.

The modeling protocol is in Chapter 2, "Modeling Protocol," of Appendix V of the SCAQMD 2016 AQMP and contains all the elements recommended in the Modeling Guidance. Those include the following: Selection of model, time period to model, modeling domain, and model boundary conditions and initialization procedures; a discussion of emissions inventory development and other model input preparation procedures; model performance evaluation procedures; selection of days; and other details for calculating RRFs. Appendix V of the SCAQMD 2016 AQMP also provides the coordinates of the modeling domain and thoroughly describes the development of the modeling emissions inventory, its spatial and temporal allocation, its temperature dependence, and quality assurance procedures.

The modeling analysis uses version 5.0.2 of the Community Multiscale Air Quality (CMAQ) photochemical model, developed by the EPA. To prepare meteorological input for CMAQ, the modeling analysis uses the Weather and Research Forecasting model version 3.6 (WRF) from the National Center for Atmospheric Research. CMAQ and WRF are both recognized in the Modeling Guidance as technically sound, state-of-the-art models. The areal extent and the horizontal and vertical resolution used in these models are adequate for modeling West Mojave Desert ozone.

The SCAQMD assessed the performance of the WRF meteorological model through a series of simulations, and the SCAQMD concluded that the daily WRF simulation for 2012 provided representative meteorological fields that characterized the observed conditions well. The SCAQMD's conclusions are supported by hourly time series graphs of wind speed, direction, and temperature.⁸⁶

Ozone model performance statistics are described in Appendix D, "West Mojave Desert Community Multiscale Air Quality Model Performance Analysis," of both the AVAQMD and MDAQMD Attainment Plans, which include tables of statistics

⁷⁷ 77 FR 30088 (May 21, 2012).

⁷⁸ 80 FR 12264 (March 6, 2015).

⁷⁹ "Modeling Guidance for Demonstrating Attainment of Air Quality Goals for Ozone, PM_{2.5}, and Regional Haze," EPA 454/R-18-009 (November 2018); available at <https://www.epa.gov/scram/state-implementation-plan-sip-attainment-demonstration-guidance>. See also December 2014 draft of this guidance, available at the same website. The December 2014 draft guidance was available during development of the Plan; the final version differs mainly in organization, and in updates to the regional haze portion and to other document references. Additional EPA modeling guidance can be found in 40 CFR 51 Appendix W, Guideline on Air Quality Models, 82 FR 5182 (January 17, 2017); available at <https://www.epa.gov/scram/clean-air-act-permit-modeling-guidance>.

⁸⁴ 40 CFR 51.1100(h).

⁸⁵ Appendix V, Final 2016 Air Quality Management Plan, March 2017, SCAQMD. See AVAQMD Attainment Plan, 31, and MDAQMD Attainment Plan, 33.

⁸⁶ Attachment 1 ("WRF Model Performance Time Series"), Chapter 3 ("Meteorological Modeling and Sensitivity Analyses"), Appendix V ("Modeling and Attainment Demonstration") of the 2016 SCAQMD AQMP.

recommended in the Modeling Guidance for 8-hour daily maximum ozone for the WMD. This section presents hourly time series, as well as density scatter plots and plots of bias against concentration. Note that because only relative changes are used from the modeling, the overprediction or underprediction of absolute ozone concentrations does not mean that future concentrations will be overestimated or underestimated.

After model performance for the 2012 base case was accepted, the model was applied to develop RRFs for the attainment demonstration. This entailed running the model with the same meteorological inputs as before, but with adjusted emissions inventories to reflect the expected changes between 2012 and the 2026 attainment year. The base year or “reference year” modeling inventory was the same as the inventory for the modeling base case. The 2026 inventory projects the base year into the future by including the effect of economic growth and emissions control measures. The set of 153 days from May 1 through September 30, 2012, was simulated and analyzed to determine daily 8-hour average maximum ozone concentrations for the 2020 emissions inventory. To develop the RRFs for the 2008 ozone NAAQS, only the top 10 days were used.

The Modeling Guidance addresses attainment demonstrations with ozone NAAQS based on 8-hour averages. For the 2008 ozone NAAQS, Appendix D of the 2016 WMD Attainment Plan includes the attainment test procedure consistent with the Modeling Guidance. The RRFs were calculated as the ratio of future to base year concentrations. The resulting RRFs were then applied to 2012 weighted base year design values⁸⁷ for each monitor to arrive at a 2026 future year design value.⁸⁸ The 2016 WMD Attainment Plan narrowly projects that the West Mojave Desert will reach modeled attainment in 2023, with the highest ozone design value of 0.0759 ppm at the Phelan monitor site (station number: 06-071-0012); this value demonstrates attainment of the corresponding 2008 ozone NAAQS of 0.075 ppm.⁸⁹

⁸⁷ The Modeling Guidance recommends that RRFs be applied to the average of three three-year design values centered on the base year, in this case the design values for 2010–2012, 2011–2013, and 2012–2014. This amounts to a 5-year weighted average of individual year 4th-high concentrations, centered on the base year of 2012, and so is referred to as a weighted design value.

⁸⁸ Table 5 of Appendix A–1 of the CARB Staff Report.

⁸⁹ Appendix P of 40 CFR part 50 for a discussion of reporting and handling procedures for the primary and secondary ozone standards that

Appendix B of the CARB Staff Report presents a WOE analysis with further discussion of the modeling for the area. The WOE analysis includes the following: An evaluation of ambient ozone trends; precursor emissions trends for the region (*i.e.*, the South Coast Air Basin, San Joaquin Valley, and the WMD); an evaluation of diurnal ozone monitoring trends; and a conceptual model that describes the conditions that create the exceedances of the 2008 ozone NAAQS. These evaluations complement the photochemical modeling analysis for the area and show that the area’s timely attainment is dependent on continuing future reductions from implementation of control measures in neighboring upwind nonattainment areas. The WOE analysis concludes that, based on these upwind reductions from neighboring nonattainment areas, the WMD will attain the 2008 ozone standard by 2026.⁹⁰

Finally, Appendix D of each of the Districts’ Attainment Plans includes an unmonitored area analysis for the 2008 ozone NAAQS to assess the attainment status of locations other than monitoring sites. The unmonitored area analysis in the 2016 WMD Attainment Plan shows concentrations below the 2008 ozone NAAQS for all locations.⁹¹

b. Control Strategy

The control strategy for attainment of the 2008 ozone NAAQS in the WMD relies on timely attainment in 2023 of the 1997 ozone NAAQS in the upwind Los Angeles-South Coast Air Basin,⁹² which is the same year the WMD model shows attainment. The attainment plan for the 2008 ozone NAAQS for the South Coast Air Basin, which has been previously approved by the EPA, projects a 277 tpd reduction in NO_x and a 121 tpd reduction in VOC from 2012 base year emissions (522 tpd for NO_x and 500 tpd for VOC).⁹³ In addition, the 2008 ozone attainment plan for the San Joaquin Valley, which has also been previously approved by the EPA, projects a 214.6 tpd reduction of NO_x

discusses truncating the third digit to the right of the decimal place.

⁹⁰ Appendix B, CARB Staff Report, B–30. The TSD for this action includes additional discussion of the modeled attainment demonstration and WOE analysis that support this conclusion.

⁹¹ Figure 3: 2023 Predicted 8-hr Ozone Design Values, Appendix D, of both districts Attainment Plans.

⁹² Appendix B, CARB Staff Report, B–2.

⁹³ Approval of Air Quality Implementation Plans; California; South Coast Air Basin; 1-Hour and 8-Hour Ozone Nonattainment Area Requirements, Proposed Rule, 84 FR 28132 (June 17, 2019). EPA finalized approval of the South Coast plan for the 2008 ozone NAAQS at 84 FR 52005 (October 1, 2019).

and 34.4 tpd reduction of VOC in 2023, from 2012 base year emissions (339.6 tpd for NO_x and 337.3 tpd for VOC in 2011).⁹⁴ Both upwind areas continue to show emission reductions through 2026 and beyond.

Within the WMD, the control strategy for attainment of the 2008 ozone NAAQS in the 2016 WMD Attainment Plan relies primarily on emissions reductions from baseline (*i.e.*, already-adopted) measures. These baseline control measures include the Districts’ stationary source rules,⁹⁵ and CARB’s mobile source and consumer product rules adopted through 2016, as listed in Appendix F of the 2016 WMD Attainment Plan, “CARB Adopted Mobile Source Programs.” The attainment demonstration and base year emissions inventory use a 2012 base year (101.09 tpd of NO_x and 43.69 tpd of VOC), and consistent with *South Coast II*, the RFP demonstration relies on a 2011 baseline year.⁹⁶ The attainment year emissions estimate for the attainment demonstration is the same throughout the 2016 WMD Attainment Plan and 2018 SIP Update (68.5 tpd of NO_x and 40.5 tpd of VOC) and represents a 30.3 percent NO_x reduction and a 13.4 percent VOC reduction from the 2012 emissions inventory base year emissions.

c. Attainment Demonstration

Chapter 4 of the Districts’ Attainment Plans describes the attainment demonstration in general terms, including photochemical modeling results. Chapter 4 references Appendix V of the SCAQMD 2016 AQMP, which provides information on the modeling protocol. Appendix D of the District’s Attainment Plans contains model results and performance for the WMD. The WOE analysis in Appendix B to the CARB Staff Report includes additional supporting information to complement the photochemical modeling and to provide context for this attainment

⁹⁴ Air Quality State Implementation Plans; Approvals and Promulgations: Clean Air Plans; 2008 8-Hour Ozone Nonattainment Area Requirements; San Joaquin Valley, California, Proposed Rule 83 FR 61346 (November 28, 2018). EPA finalized approval of the San Joaquin Valley plan for the 2008 ozone NAAQS at 84 FR 3302 (February 12, 2018).

⁹⁵ Technical Support Document: Clean Air Plans; 2008 8-Hour Ozone Nonattainment Area Requirements; West Mojave Desert, California, EPA–R09–OAR–2020–0254, Tables 1 and 2.

⁹⁶ The modeling base year emissions were taken from Table 1 and Appendix A of the AVAQMD and MDAQMD Attainment Plans. The CARB Staff Report notes 2012 base year emissions from the Districts’ plans were average day emissions, *i.e.*, averaged over the entire year, rather than average summer day emissions, which are included in Appendix A of the CARB Staff Report and were submitted as the 2012 base year emissions.

demonstration, such as ambient ozone data, a conceptual model of ozone formation, anthropogenic emission trends, ozone trends, and a discussion of the attainment projections. Baseline measures are expected to reduce 2012 base year emissions of NO_x by 30.7 percent and VOC emissions by 13 percent by 2026, and to attain the 2008 ozone NAAQS in the WMD by 2023, three years ahead of the outermost attainment year, 2026.

3. The EPA's Review of the State's Submission

a. Photochemical Modeling

The EPA has reviewed the modeling platform and agrees that the CMAQ (version 5.0.2) modeling platform, and the WRF (version 3.6.1) meteorological fields are appropriate for the ozone attainment demonstration. After review, the EPA is satisfied that the meteorological model, WRF, performed adequately. The diurnal variation of temperature, humidity and surface wind are well represented by WRF. The EPA has also reviewed the time series, scatter plots, and ozone performance, and determined that overall, the CMAQ photochemical modeling performance for ozone is acceptable.

We are proposing to find the air quality modeling adequate to support the attainment demonstrations for the 2008 ozone NAAQS, based on reasonable meteorological and ozone modeling performance, supported by the weight of evidence analyses.

b. Control Strategy

Based on our review of the emissions inventory documentation in the CARB Staff Report, we find that CARB and the Districts have used the most recent planning and activity assumptions, emissions models, and methodologies to estimate the effect of the control strategy on the baseline and milestone year emissions inventories. The 2016 WMD Attainment Plan relies on state and locally adopted baseline control measures, *i.e.*, already-adopted control measures, to achieve the emissions reductions needed to attain the 2008 ozone NAAQS. The baseline measures are approved into the SIP and, as such, are fully creditable within the attainment demonstration analysis. Accordingly, we propose to find that the emissions reductions that are relied on for attainment are creditable and sufficient to provide for attainment.

c. Attainment Demonstration

Based on our review of the 2016 WMD Attainment Plan and our proposed findings that the photochemical modeling and control

strategy are acceptable and demonstrate attainment by July 20, 2027, we propose to approve the attainment demonstration for the 2008 ozone NAAQS in the 2016 WMD Attainment Plan as meeting the requirements of CAA section 182(c)(2)(A) and 40 CFR 51.1108. The Districts' Attainment Plans and the WOE in the CARB Staff Report demonstrate that the ozone design value in the WMD will meet the 0.075 ppm standard by 2026, and therefore will meet the attainment date of July 20, 2027, for the 2008 ozone standard. While the submitted modeling projects that attainment is possible in advance of the 2026 deadline, the EPA is relying on the modeling, additional information provided in the WOE, and current ozone trends, to conclude that the WMD will attain the 2008 ozone NAAQS by 2026, consistent with the outermost attainment date of July 20, 2027. See the TSD for additional information.

E. Rate of Progress Plan and Reasonable Further Progress Demonstration

1. Statutory and Regulatory Requirements

Requirements for RFP are specified in CAA sections 172(c)(2), 182(b)(1), and 182(c)(2)(B). CAA section 172(c)(2) requires that plans for nonattainment areas provide for RFP, which is defined at CAA section 171(1) as such annual incremental reductions in emissions of the relevant air pollutant as are required under part D, "Plan Requirements for Nonattainment Areas," or may reasonably be required by the EPA for the purpose of ensuring attainment of the applicable NAAQS by the applicable date. CAA section 182(b)(1) specifically requires that ozone nonattainment areas that are classified as "Moderate" or above demonstrate a 15 percent reduction in VOC between the years of 1990 and 1996. The EPA has typically referred to section 182(b)(1) as the rate of progress (ROP) requirement. For ozone nonattainment areas classified as Serious or higher, section 182(c)(2)(B) requires reductions averaged over each consecutive 3-year period beginning 6 years after the baseline year until the attainment date of at least 3 percent of baseline emissions per year. CAA section 182(c)(2)(B)(ii) allows an amount less than 3 percent of such baseline emissions each year if the state demonstrates to the EPA that the plan includes all measures that can feasibly be implemented in the area in light of technological achievability.

The 2008 Ozone SRR considers areas classified Moderate or higher to have met the ROP requirements of CAA section 182(b)(1) if the area has a fully

approved 15 percent ROP plan for the 1-hour or 1997 8-hour ozone standards, provided the boundaries of the ozone nonattainment areas are the same.⁹⁷ For such areas, the RFP requirements of CAA section 172(c)(2) require areas classified as Moderate to provide a 15 percent emission reduction of ozone precursors within 6 years of the baseline year. Areas classified as Serious or higher must meet the RFP requirements of CAA section 182(c)(2)(B) by providing an 18 percent reduction of ozone precursors in the first 6-year period, and an average ozone precursor emission reduction of 3 percent per year for all remaining 3-year periods thereafter.⁹⁸ Under CAA 182(c)(2)(C), a state may substitute NO_x emissions reductions for VOC emissions reductions.

Except as specifically provided in CAA section 182(b)(1)(C), emission reductions from all SIP-approved, federally promulgated, or otherwise SIP-creditable measures that occur after the baseline are creditable for purposes of demonstrating that the RFP targets are met. Because the EPA has determined that the passage of time has caused the effect of certain exclusions to be *de minimis*, the RFP demonstration is no longer required to calculate and specifically exclude reductions from measures related to motor vehicle exhaust or evaporative emissions promulgated by January 1, 1990; regulations concerning Reid vapor pressure promulgated by November 15, 1990; measures to correct previous RACT requirements; and measures required to correct previous vehicle inspection and maintenance (I/M) programs.⁹⁹

The 2008 Ozone SRR requires the RFP baseline year to be the most recent calendar year for which a complete triennial inventory is required to be submitted to the EPA (*i.e.*, 2011). As discussed above, the 2008 Ozone SRR provided states with the opportunity to use an alternative baseline year for RFP,¹⁰⁰ but this provision was vacated by the D.C. Circuit in the *South Coast II* decision.

2. Summary of the State's Submission

The 2016 WMD Attainment Plan addresses the 15 percent ROP requirement by noting that the EPA had proposed approval of the 15 percent ROP plan for the 1997 ozone NAAQS for the WMD, and that the 1997 ozone nonattainment area covers the entire

⁹⁷ 80 FR 12264, 12271 (March 6, 2015).

⁹⁸ *Id.*

⁹⁹ 40 CFR 51.1110(a)(7).

¹⁰⁰ 40 CFR 51.1110(b).

nonattainment area for the 2008 ozone standards.¹⁰¹ The EPA approved the 15 percent ROP demonstration for the 1997 ozone NAAQS, effective July 24, 2017.¹⁰²

With respect to the RFP demonstration requirement, the 2016 WMD Attainment Plan includes an RFP demonstration derived from a 2012 RFP baseline year.¹⁰³ In response to the *South Coast II* decision, CARB developed the 2018 SIP Update, which includes a section that replaces the RFP portion of the 2016 WMD Attainment Plan with an updated RFP demonstration based on a 2011 RFP baseline year.¹⁰⁴ To develop the 2011 RFP baseline inventory, CARB relied on

actual emissions reported from industrial point sources for year 2011. For emissions from smaller stationary sources and area sources, CARB backcast emissions from 2012 to 2011 using the same growth and control factors as were used for the 2016 WMD Attainment Plan. To develop the emissions inventories for the 2017, 2020 and 2023 RFP milestone years, CARB also relied upon the same growth and control factors as the 2016 WMD Attainment Plan. Therefore, the emissions estimates for the attainment year, 2026, are consistent in both the 2018 SIP Update and the 2016 WMD Attainment Plan.

Documentation for the WMD RFP baseline and milestone emissions inventories is found in the 2018 SIP Update on pages 36–37 and in Appendix A of the 2018 SIP Update on pages A–19 through A–22. The RFP baseline emissions inventories reflect rules identified in Table 5 of the CARB Staff Report.

Table 2 provides a summary of CARB's emissions estimates in tpd for VOC and NO_x for the 2011 RFP baseline year, the 2017, 2020, 2023 RFP milestone years, and the 2026 RFP milestone/attainment year, evaluated relative to the percentage reductions necessary to demonstrate RFP.

TABLE 2—WMD RFP DEMONSTRATION FOR THE 2008 OZONE NAAQS

[Summer planning inventory, tpd or percent]

	2011	2017	2020	2023	2026
VOCs					
Baseline VOC	48.7	41.5	40.4	40.4	40.5

NO _x reductions since 2011 available for VOC substitution in this milestone year, %		3.1%	6.8%	8.9%	9.6%
NO _x reductions since 2011 surplus after meeting VOC substitution needs in this milestone year, %		10.9%	9.0%	7.9%	1.5%
Total shortfall for RFP		0%	0%	0%	0%
RFP met?		Yes	Yes	Yes	Yes

Source: Table VI–2, 2018 SIP Update.

The revised RFP demonstration calculates future year VOC targets from the 2011 baseline, consistent with CAA 182(c)(2)(B)(i), which requires reductions of “at least 3 percent of baseline emissions each year,” and it substitutes NO_x reductions for VOC reductions beginning in milestone year 2017 to meet VOC emission targets. NO_x substitution is permitted under EPA regulations at 40 CFR 51.1110(a)(2)(i)(C) and 40 CFR 51.1110(a)(2)(ii)(B). As

stated in the WOE in the CARB Staff Report, “given Western Mojave’s downwind location from the only two extreme ozone nonattainment areas in the country, it is expected that ozone formation would be limited by available NO_x emissions,” meaning that NO_x reductions would be more effective at reducing ozone concentrations than VOC reductions. For the WMD, CARB concluded that the revised RFP demonstration meets the applicable

requirements for each milestone year as well as the attainment year.

3. The EPA’s Review of the State’s Submission

Consistent with the 2008 Ozone SRR, the EPA’s final approval of the 15 percent ROP demonstration for the 1997 ozone NAAQS fulfills the requirements of CAA section 182(b)(1) for WMD for the 2008 ozone NAAQS.¹⁰⁵

With respect to the RFP demonstration requirement, based on

¹⁰¹ Chapter 3 of both Districts’ Attainment Plans.

¹⁰² 82 FR 28560 (June 23, 2017).

¹⁰³ Chapter 3 of both Districts’ Attainment Plans.

¹⁰⁴ Chapter VI of the 2018 SIP Update.

¹⁰⁵ 82 FR 13086 (March 9, 2017).

our review of the emissions inventory documentation in the 2018 SIP Update, we find that CARB and the District have used the most recent planning and activity assumptions, emissions models, and methodologies in developing the RFP baseline and milestone year emissions inventories. We have also reviewed and verified the calculations in Table VI–3 of the 2018 SIP Update. Furthermore, we find that NO_x emission reductions are as effective as VOC emission reductions in reducing levels of ozone within the Western Mojave Desert.¹⁰⁶ For these reasons, we have determined that the 2018 SIP Update demonstrates RFP in the 2017, 2020, and 2023 milestone years as well as the 2026 milestone/attainment year, consistent with applicable CAA requirements and EPA guidance. Therefore, we propose to approve the RFP demonstration for the WMD for the 2008 ozone NAAQS under sections 172(c)(2) and 182(c)(2)(B) of the CAA and 40 CFR 51.1110(a)(2)(ii).

F. Transportation Control Strategies and Measures To Offset Emissions Increases From Vehicle Miles Traveled

1. Statutory and Regulatory Requirements

Section 182(d)(1)(A) of the Act requires a state to submit a revision for each area classified as Serious or above that identifies and adopts specific enforceable transportation control strategies (TCSs) and transportation control measures (TCMs) to offset any growth in emissions from growth in vehicle miles traveled (VMT) or number of vehicle trips in such area.¹⁰⁷ Herein, we use “VMT” to refer to vehicle miles traveled and refer to the related SIP requirement as the “VMT emissions offset requirement.” In addition, we refer to the SIP revision intended to demonstrate compliance with the VMT emissions offset requirement as the “VMT emissions offset demonstration.”

In *Association of Irrigated Residents v. EPA*, the United States Court of Appeals for the Ninth Circuit (“Ninth Circuit”) ruled that additional TCMs are required

whenever vehicle emissions are projected to be higher than they would have been had VMT not increased, even when aggregate vehicle emissions are actually decreasing.¹⁰⁸ In response to the Ninth Circuit’s decision, the EPA issued a memorandum titled “Guidance on Implementing Clean Air Act Section 182(d)(1)(A): Transportation Control Measures and Transportation Control Strategies to Offset Growth in Emissions Due to Growth in Vehicle Miles Travelled” (“August 2012 Guidance”).¹⁰⁹

The August 2012 Guidance discusses the meaning of TCSs and TCMs and recommends that both TCSs and TCMs be included in the calculations made for the purpose of determining the degree to which any hypothetical growth in emissions due to growth in VMT should be offset. Generally, TCSs encompass many types of controls (including, for example, motor vehicle emissions limitations, I/M programs, alternative fuel programs, other technology-based measures, and TCMs) that would fit within the regulatory definition of “control strategy.”¹¹⁰ Such measures include, but are not limited to, those listed in CAA section 108(f). TCM is defined at 40 CFR 51.100(r) as meaning “any measure that is directed toward reducing emissions of air pollutants from transportation sources,” including, but not limited to, those listed in section 108(f) of the CAA. TCMs generally refer to programs intended to reduce VMT, the number of vehicle trips, or traffic congestion, including, e.g., programs for improved public transit, designation of certain lanes for passenger buses and high-occupancy vehicles, and trip reduction ordinances.

The August 2012 Guidance explains how states may demonstrate that the VMT emissions offset requirement is satisfied in conformance with the Ninth Circuit’s ruling. The August 2012 Guidance recommends that states estimate emissions for the nonattainment area’s base year and attainment year. One emissions inventory is developed for the base year, and three different emissions inventory

scenarios are developed for the attainment year. For the attainment year, the state would present three emissions estimates, two of which would represent hypothetical emissions scenarios that would provide the basis to identify the growth in emissions due solely to the growth in VMT, and one that would represent projected actual motor vehicle emissions after fully accounting for projected VMT growth and offsetting emissions reductions obtained by all creditable TCSs and TCMs. See the August 2012 Guidance for specific details on how states might conduct the calculations.

The base year on-road VOC emissions should be calculated using VMT in that year and should reflect all enforceable TCSs and TCMs in place in the base year. This would include vehicle emissions standards, state and local control programs such as I/M programs or fuel rules, and any additional implemented TCSs and TCMs that were already required by or credited in the SIP as of that base year.

The first of the emissions calculations for the attainment year would be based on the projected VMT and trips for that year and assume that no new TCSs or TCMs beyond those already credited in the base year inventory have been put in place since the base year. This calculation demonstrates how emissions would hypothetically change if no new TCSs or TCMs were implemented, and VMT and trips were allowed to grow at the projected rate from the base year. This estimate would show the potential for an increase in emissions due solely to growth in VMT and trips. This represents a “no action” scenario. Emissions in the attainment year in this scenario may be lower than those in the base year due to fleet turnover; however, if VMT and/or numbers of vehicle trips are projected to increase in the attainment year, emissions would still likely be higher than if VMT had held constant.

The second of the attainment year’s emissions calculations would assume that no new TCSs or TCMs beyond those already credited have been put in place since the base year, but it would also assume that there was no growth in VMT and trips between the base year and attainment year. This estimate reflects the hypothetical emissions level that would have occurred if no further TCMs or TCSs had been put in place and if VMT and trip levels had held constant since the base year. Like the “no action” attainment year estimate described above, emissions in the attainment year may be lower than those in the base year due to fleet turnover, but in this case emissions would not be

¹⁰⁶ Additional evaluation of this matter is discussed in Section V of the TSD supporting this notice.

¹⁰⁷ CAA section 182(d)(1)(A) includes three separate elements. In short, under section 182(d)(1)(A), states are required to adopt transportation control strategies and measures (1) to offset growth in emissions from growth in VMT, and, (2) in combination with other emission reduction requirements, to demonstrate RFP, and (3) to demonstrate attainment. For more information on the EPA’s interpretation of the three elements of section 182(d)(1)(A), see 77 FR 58067, at 58068 (September 19, 2012) (proposed withdrawal of approval of South Coast VMT emissions offset demonstrations).

¹⁰⁸ *Association of Irrigated Residents v. EPA*, 632 F.3d 584, at 596–597 (9th Cir. 2011), reprinted as amended on January 27, 2012, 686 F.3d 668, further amended February 13, 2012 (“*Association of Irrigated Residents*”).

¹⁰⁹ Memorandum from Karl Simon, Director, Transportation and Climate Division, Office of Transportation and Air Quality, to Carl Edlund, Director, Multimedia Planning and Permitting Division, EPA Region VI, and Deborah Jordan, Director, Air Division, EPA Region IX, August 30, 2012.

¹¹⁰ See, e.g., 40 CFR 51.100(n). TCMs are defined at 40 CFR 51.100(r) as meaning any measure that is directed toward reducing emissions of air pollutants from transportation sources.

influenced by any growth in VMT or trips. This emissions estimate would reflect a ceiling on the attainment emissions that should be allowed to occur under the statute as interpreted by the Ninth Circuit because it shows what would happen under a scenario in which no offsetting TCSs or TCMs have yet been put in place and VMT and trips are held constant during the period from the area's base year to its attainment year. This represents a "VMT offset ceiling" scenario. These two hypothetical status quo estimates are necessary steps in identifying the target level of emissions from which states determine whether further TCMs or TCSs, beyond those that have been adopted and implemented in reality, would need to be adopted and implemented in order to fully offset any increase in emissions due solely to VMT and trips identified in the "no action" scenario.

Finally, the state would present the emissions that are actually expected to occur in the area's attainment year after taking into account reductions from all enforceable TCSs and TCMs put in place after the baseline year. This estimate would be based on the VMT and trip levels expected to occur in the attainment year (*i.e.*, the VMT and trip levels from the first estimate) and all of the TCSs and TCMs expected to be in place and for which the SIP will take credit in the area's attainment year, including any TCMs and TCSs put in place since the base year. This represents the "projected actual" attainment year scenario. If this emissions estimate is less than or equal to the emissions ceiling that was established in the second of the attainment year calculations, the TCSs or TCMs for the attainment year would be sufficient to fully offset the identified hypothetical growth in emissions.

Alternatively, if the estimated projected actual attainment year emissions are still greater than the

ceiling that was established in the second of the attainment year emissions calculations, even after accounting for post-baseline year TCSs and TCMs, the state would need to adopt and implement additional TCSs or TCMs to further offset the growth in emissions. The additional TCSs or TCMs would need to bring the actual emissions down to at least the "had VMT and trips held constant" ceiling estimated in the second of the attainment year calculations, in order to meet the VMT offset requirement of section 182(d)(1)(A) as interpreted by the Ninth Circuit.

2. Summary of the State's Submission

The VMT emissions offset demonstration for the WMD for the 2008 ozone NAAQS is contained in Chapter 3 of the Districts' Attainment Plans.¹¹¹ For the VMT emissions offset demonstration, CARB used EMFAC2014, the latest EPA-approved motor vehicle emissions model for California available at the time the 2016 WMD Attainment Plan was developed.¹¹² The EMFAC2014 model estimates the on-road emissions from two combustion processes (*i.e.*, running exhaust and start exhaust) and four evaporative processes (*i.e.*, hot soak, running losses, diurnal losses, and resting losses). The EMFAC2014 model combines trip-based VMT data from the regional transportation planning agency (*i.e.*, SCAG), starts data based on household travel surveys, and vehicle population data from the California Department of Motor Vehicles. These sets of data are combined with corresponding emission rates to calculate emissions.

Emissions from running exhaust, start exhaust, hot soak, and running losses are a function of how much a vehicle is driven. Emissions from these processes are thus directly related to VMT and vehicle trips, and the analysis included these emissions in the calculations that

provide the basis for the WMD VMT emissions offset demonstration. The analysis did not include emissions from resting loss and diurnal loss processes in the analysis because such emissions are related to vehicle population, not to VMT or vehicle trips, and thus are not part of "any growth in emissions from growth in vehicle miles traveled or numbers of vehicle trips in such area" under CAA section 182(d)(1)(A).

The WMD VMT emissions offset demonstration uses a 2012 base year. The base year for VMT emissions offset demonstration purposes should generally be the same base year used for nonattainment planning purposes. In section III.A of this document, the EPA is proposing to approve the 2012 base year inventory for the WMD for the purposes of the 2008 ozone NAAQS, and thus, the selection of 2012 as the base year for the WMD VMT emissions offset demonstration for the 2008 ozone NAAQS is appropriate.

The WMD VMT emissions offset demonstration also includes the previously described three different attainment year scenarios (*i.e.*, no action, VMT offset ceiling, and projected actual). The 2016 WMD Attainment Plan provides a demonstration of attainment of the 2008 ozone NAAQS in the WMD by the applicable attainment date, based on the controlled 2026 emissions inventory. As described in section III.D of this document, the EPA is proposing to approve the attainment demonstration for the 2008 ozone NAAQS for the WMD, and thus, we find the selection of year 2026 as the attainment year for the VMT emissions offset demonstration for the 2008 ozone NAAQS to be acceptable.

Table 3 summarizes the relevant distinguishing parameters for each of the emissions scenarios and shows CARB's corresponding VOC emissions estimates for the demonstration for the 2008 ozone NAAQS.

TABLE 3—VMT EMISSIONS OFFSET INVENTORY SCENARIOS AND RESULTS FOR 2008 OZONE NAAQS

Scenario	VMT		Starts		Controls	VOC emissions
	Year	1,000 miles/day	Year	1,000/day	Year	Tpd
Base Year	2012	26,536	2012	4,470	2012	12.4
No Action	2026	34,724	2026	5,238	2012	6.5
VMT Offset Ceiling	2012	26,536	2012	4,470	2012	5.3
Actual Projected	2026	34,724	2026	5,238	2026	4.6

¹¹² On August 15, 2019, the EPA approved and announced the availability of EMFAC2017, the latest update to the EMFAC model for use by State

and local governments to meet CAA requirements. See 84 FR 41717.

3. The EPA's Review of the State's Submission

Based on our review of the WMD VMT emissions offset demonstration in the 2016 WMD Attainment Plan, we find CARB's analysis to be consistent with our August 2012 Guidance and consistent with the emissions and vehicle activity estimates provided by CARB in support of the 2016 AQMP. We agree that the TCSs and TCMs in place for the area are sufficient to offset the growth in emissions from growth in VMT and vehicle trips in the WMD for the purposes of the 2008 8-hour ozone standards. As such, we find that the WMD VMT emissions offset demonstration complies with the VMT emissions offset requirement in CAA section 182(d)(1)(A). Therefore, we propose approval of the WMD VMT emissions offset demonstration portion of the 2016 WMD Attainment Plan.

G. Contingency Measures

1. Statutory and Regulatory Requirements

Under the CAA, SIPs for 8-hour ozone nonattainment areas classified under subpart 2 as Moderate or above must include contingency measures consistent with sections 172(c)(9) and 182(c)(9). Contingency measures are additional controls or measures to be implemented in the event an area fails to make RFP or to attain the NAAQS by the attainment date. The SIP should contain trigger mechanisms for the contingency measures, specify a schedule for implementation, and indicate that the measure will be implemented without significant further action by the state or the EPA.¹¹³

Neither the CAA nor the EPA's implementing regulations establish a specific level of emissions reductions that implementation of contingency measures must achieve, but the EPA's 2008 Ozone SRR reiterates the EPA's policy that contingency measures should generally provide for emissions reductions approximately equivalent to one year's worth of progress, amounting to reductions of 3 percent of the baseline emissions inventory for the nonattainment area.¹¹⁴

It has been the EPA's longstanding interpretation of CAA section 172(c)(9) that states may meet the contingency measure requirement by relying on federal measures (e.g., federal mobile source measures based on the incremental turnover of the motor

vehicle fleet each year) and local measures already scheduled for implementation that provide emissions reductions in excess of those needed to provide for RFP or expeditious attainment. The key is that the Act requires contingency measures to provide for additional emissions reductions that are not relied on for RFP or attainment and that are not included in the RFP or attainment demonstrations as meeting part or all of the contingency measure requirements. The purpose of contingency measures is to provide continued emissions reductions while a plan is being revised to meet the missed milestone or attainment date.

The EPA has approved numerous SIPs under this interpretation—i.e., SIPs that use as contingency measures one or more federal or local measures that are in place and provide reductions in excess of the reductions required by the attainment demonstration or RFP plan,¹¹⁵ and there is case law supporting the EPA's interpretation in this regard.¹¹⁶ However, in *Bahr v. EPA*, the Ninth Circuit rejected the EPA's interpretation of CAA section 172(c)(9) as allowing for early implementation of contingency measures.¹¹⁷ The Ninth Circuit concluded that contingency measures must take effect at the time the area fails to make RFP or attain by the applicable attainment date, not before.¹¹⁸ The D.C. Circuit recently reached a similar conclusion regarding the contingency measure provisions in CAA sections 172(c)(9) and 182(c)(9), in *Sierra Club v. EPA*.¹¹⁹ Following these decisions, states cannot rely on early-implemented measures to comply with the contingency measure requirements under CAA section 172(c)(9) and 182(c)(9).

2. Summary of the State's Submission

The Districts and CARB had largely prepared the 2016 WMD Attainment Plan prior to the *Bahr* and *Sierra Club* decisions; therefore, the plan relies

solely upon surplus emissions reductions from already implemented control measures in the RFP milestone years to demonstrate compliance with the RFP milestone contingency measures requirements of CAA sections 172(c)(9) and 182(c)(9).¹²⁰ The plan also demonstrates compliance with the attainment contingency measures requirements using surplus emissions reductions (in the year after the attainment year), and separately identifies use of the State's enhanced I/M program as an attainment contingency measure.¹²¹

In the 2018 SIP Update, CARB revised the RFP demonstration for the 2008 ozone NAAQS for the WMD and recalculated the extent of surplus emission reductions in the milestone years. Consistent with the *Bahr* decision (and the later *Sierra Club* decision), the 2018 SIP Update does not rely on the surplus or incremental emissions reductions to comply with the contingency measures requirements of sections 172(c)(9) and 182(c)(9) but instead documents the extent to which future baseline emissions would provide surplus emissions reductions beyond those required to meet applicable contingency measure requirements, to provide context for determining the magnitude of the contingency measures needed for the 2008 ozone NAAQS.

The 2018 SIP Update identifies one year's worth of RFP as approximately 1.5 tpd of VOC. The 2018 SIP Update estimates surplus NO_x reductions for RFP as ranging from approximately 10.7 tpd in 2017 to 7.8 tpd in 2023, and estimates that implementation of the state control measures will result in an additional 0.2 tpd VOC and 1.6 tpd of NO_x emissions reductions occurring in the year after the attainment year.¹²²

In subsequent communications, CARB has clarified that the proposed contingency measure would involve implementation of enhanced I/M specifically in those areas of the WMD subject to MDAQMD jurisdiction that are currently subject only to basic I/M requirements.¹²³ As described by the MDAQMD, within 30 days of a finding by the EPA that the WMD has either failed to meet an RFP milestone for the 2008 ozone NAAQS or failed to attain the 2008 ozone NAAQS by the

attainment deadline, the MDAQMD Executive Officer will transmit a formal letter to the California Bureau of Automotive Repair (BAR) requesting implementation of the enhanced I/M program throughout the entirety of the portion of the WMD that is subject to the District's jurisdiction. Upon receiving the District's letter, BAR would initiate the program and notify the relevant stakeholders of the updated requirements in the area. This procedure is described in section 44003(c) of the California Health and Safety Code, and no additional regulations would need to be adopted.¹²⁴ CARB estimates that implementation of the enhanced I/M program for this region will result in additional emissions reductions of 0.03 tpd of VOC and 0.04 tpd of NO_x.¹²⁵

The MDAQMD has committed to submit a Board resolution further detailing the circumstances, timing, and procedure for implementing this contingency measure, within eleven months of the EPA's final conditional approval of the contingency measures element of the 2016 WMD Attainment Plan.¹²⁶ CARB, in turn, has committed to submit the Board resolution to the EPA for SIP approval within 12 months of the EPA's final conditional approval.¹²⁷

3. The EPA's Review of the State's Submission

Sections 172(c)(9) and 182(c)(9) of the CAA require contingency measures to address potential failure to achieve RFP milestones or failure to attain the NAAQS by the applicable attainment date. To evaluate the contingency measure element of the 2016 WMD Attainment Plan, we find it useful to distinguish between contingency

measures to address potential failure to achieve RFP milestones ("RFP contingency measures") and contingency measures to address potential failure to attain the NAAQS ("attainment contingency measures").

With respect to the RFP contingency measure requirement, we have reviewed the surplus emissions estimates in each of the RFP milestone years, as shown in the 2018 SIP Update, and find that the calculations are correct. Therefore, we agree that the emission estimates from the 2018 SIP Update provide surplus reductions well beyond those necessary to demonstrate RFP in the RFP milestone years. While such surplus emissions reductions in the RFP milestone years do not represent contingency measures themselves, we believe they are relevant in evaluating the adequacy of RFP contingency measures that are submitted (or will be submitted) to meet the requirements of sections 172(c)(9) and 182(c)(9).

In this case, the MDAQMD and CARB have committed to develop, adopt, and submit a Board resolution further detailing the circumstances, timing, and procedure for implementing enhanced I/M requirements in the portion of the WMD that is currently subject to basic I/M, should the WMD fail to meet an RFP milestone. The specific commitment of the MDAQMD upon an RFP milestone failure (*i.e.*, changing from basic to enhanced I/M) complies with the requirements in CAA sections 172(c)(9) and 182(c)(9) because it would be undertaken if the area fails to meet an RFP milestone and would take effect without further significant action by the District, the State, or the EPA.¹²⁸

To assess the adequacy of the RFP contingency measure (once adopted and submitted), we next consider the magnitude of emissions reductions the measure would provide if triggered. Neither the CAA nor the EPA's implementing regulations for the ozone NAAQS establish a specific amount of emissions reductions that implementation of contingency measures must achieve, but we generally expect that contingency measures should provide for emissions reductions equivalent to approximately

one year's worth of RFP, which, for ozone, amounts to reductions of 3 percent of the baseline emissions inventory for the nonattainment area. For the 2008 ozone NAAQS in the WMD, one year's worth of RFP is approximately 1.5 tpd of VOC, or 3.0 tpd of NO_x reductions, or a combination of the two calculated on a percentage basis.¹²⁹ In its commitment letter, CARB conservatively estimates the potential additional emissions reductions from the contingency measure commitments at 0.03 tpd of VOC and 0.04 tpd of NO_x. While these amounts collectively reflect less than one year's worth of RFP, the 2018 SIP Update provides the larger SIP planning context with which to judge the adequacy of the to-be-submitted District contingency measures, by calculating the surplus emissions reductions estimated to be achieved in the RFP milestone years. The estimates of surplus NO_x reductions range from 10.7 to 7.8 tpd, depending on the RFP year, which represents more than twice one year's worth of progress (3.0 tpd of NO_x).¹³⁰ The surplus reflects already implemented regulations and is primarily the result of vehicle turnover, which refers to the ongoing replacement by individuals, companies, and government agencies of older, more polluting vehicles and engines with newer vehicles and engines. In light of these surplus NO_x emissions reductions in the RFP milestone years, the emissions reductions from the committed contingency measure are adequate to meet the contingency measure requirements of the CAA with respect to RFP milestones.

For attainment contingency measure purposes, we evaluate the emissions reductions from the District's contingency measures in the context of the expected reduction in emissions within the WMD in the year following the attainment year, relative to those occurring in the attainment year. In 2027, VOC and NO_x emissions for the WMD are expected to be approximately 0.2 and 1.6 tpd, respectively, lower than the emissions in 2026. Considered together, the continuing reductions from already-implemented measures and the emissions reductions from the MDAQMD's contingency measure provide for emissions reductions near to, but below, one year's worth of progress.¹³¹ Therefore, we find that the

¹²⁴ Letter dated March 29, 2021, from Brad Poiriez, Executive Officer, MDAQMD, to Richard Corey, Executive Officer, CARB. The EPA approved California Health and Safety Code section 44003(c) into the California SIP at 75 FR 38023 (July 1, 2010).

¹²⁵ Letter dated April 9, 2021, from Michael Benjamin, Chief, Air Quality Planning and Science Division, CARB, to Deborah Jordan, Acting Regional Administrator, EPA Region IX. CARB indicates that these figures represent conservative estimates of the potential emissions reductions that would result from implementation of the contingency measure, because they are derived from residential populations that may underrepresent the actual vehicle populations located within the zip codes currently subject to basic I/M. See Attachment A to letter dated April 9, 2021, from Michael Benjamin, Chief, Air Quality Planning and Science Division, CARB, to Deborah Jordan, Acting Regional Administrator, EPA Region IX.

¹²⁶ Letter dated March 29, 2021, from Brad Poiriez, Executive Officer, MDAQMD, to Richard Corey, Executive Officer, CARB.

¹²⁷ Letter dated April 9, 2021, from Michael Benjamin, Chief, Air Quality Planning and Science Division, CARB, to Deborah Jordan, Acting Regional Administrator, EPA Region IX.

¹²⁸ Section 182(c)(3) of the CAA requires states with ozone nonattainment areas classified under subpart 2 as Serious or above to implement an enhanced motor vehicle I/M program in each urbanized area within the nonattainment area. Section 182(c)(3) further explains that urbanized areas are "defined by the Bureau of the Census, with a 1980 population of 200,000 or more." Because parts of the MDAQMD within the WMD were not considered urbanized areas in 1980, only part of the WMD is subject to enhanced I/M. All of the area under the jurisdiction of the AVAQMD is subject to enhanced I/M.

¹²⁹ The 2011 baseline for VOC and NO_x is 48.7 tpd and 98.4 tpd, respectively, as shown in table VI-1 of the 2018 SIP Update. Three percent of these baselines is 1.5 tpd of VOC and 3.0 tpd of NO_x.

¹³⁰ 2018 SIP Update, Table VI-5.

¹³¹ Combined reductions (0.23 tpd VOC and 1.64 tpd NO_x) represent 70 percent of one year's RFP (15.3 percent of 1.5 tpd VOC; 54.7 percent of 3.0

contingency measures described in the MDAQMD's and CARB's commitment letters would provide sufficient emissions reductions to satisfy the attainment contingency measures requirement, even though reductions from the measures would be lower than one year's worth of RFP.

For these reasons, we propose to conditionally approve the contingency measures element of the 2016 WMD attainment plan, as supplemented by the commitment from the MDAQMD and CARB to adopt and submit an MDAQMD Board resolution detailing the circumstances, timing, and procedure for implementing the contingency measure requirements of CAA sections 172(c)(9) and 182(c)(9). Our proposed approval is conditional because it relies upon specific commitments from MDAQMD and CARB. Conditional approvals are authorized under CAA section 110(k)(4).

H. Motor Vehicle Emissions Budgets for Transportation Conformity

1. Statutory and Regulatory Requirements

Section 176(c) of the CAA requires federal actions in nonattainment and maintenance areas to conform to the SIP's goals of eliminating or reducing the severity and number of violations of the NAAQS and achieving expeditious attainment of the standards. Conformity to the SIP's goals means that such actions will not: (1) Cause or contribute to violations of a NAAQS, (2) worsen the severity of an existing violation, or (3) delay timely attainment of any NAAQS or any interim milestone.

Actions involving Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) funding or approval are subject to the EPA's transportation conformity rule, codified at 40 CFR part 93, subpart A. Under this rule, metropolitan planning

organizations (MPO) in nonattainment and maintenance areas coordinate with state and local air quality and transportation agencies, the EPA, the FHWA, and the FTA to demonstrate that an area's regional transportation plans and transportation improvement programs conform to the applicable SIP. This demonstration is typically done by showing that estimated emissions from existing and planned highway and transit systems are less than or equal to the motor vehicle emissions budgets (MVEBs or "budgets") contained in all control strategy SIPs. Budgets are generally established for specific years and specific pollutants or precursors. Ozone plans should identify budgets for on-road emissions of ozone precursors (NO_x and VOC) in the area for each RFP milestone year and, if the plan demonstrates attainment, the attainment year.¹³²

For motor vehicle emissions budgets to be approvable, they must meet, at a minimum, the EPA's adequacy criteria (40 CFR 93.118(e)(4) and (5)) and be approvable under all pertinent SIP requirements. To meet these requirements, the MVEBs must be consistent with the approvable attainment and RFP demonstrations and reflect all of the motor vehicle control measures contained in the attainment and RFP demonstrations.¹³³ Budgets may include a safety margin representing the difference between projected emissions and the total amount of emissions estimated to satisfy any requirements for attainment or RFP.

The EPA's process for determining adequacy of a MVEB consists of three basic steps: (1) Providing public notification of a SIP submission; (2) providing the public the opportunity to comment on the MVEB during a public comment period; and, (3) making a finding of adequacy or inadequacy.¹³⁴

2. Summary of the State's Submission

The 2016 WMD Attainment Plan includes budgets for the 2018, 2021, and 2024 RFP milestone years, and a 2026 attainment year. The budgets for 2018, 2021, and 2024 were derived from the 2012 RFP baseline year and the associated RFP milestone years. These budgets are affected by the *South Coast II* decision vacating the alternative baseline year provision, and therefore, the EPA has not previously acted on the budgets.

The 2018 SIP Update revised the RFP demonstration consistent with the *South Coast II* decision (*i.e.*, by using a 2011 RFP baseline year) and identifies new budgets for the WMD for VOC and NO_x for each updated RFP milestone year through 2026. The budgets in the 2018 SIP Update replace the budgets contained in the 2016 WMD Attainment Plan. Like the budgets in the 2016 WMD Attainment Plan, the budgets in the 2018 SIP Update were calculated using EMFAC2014, the version of CARB's EMFAC model approved by the EPA for estimating emissions from on-road vehicles operating in California at the time the 2016 WMD Attainment Plan and 2018 SIP Update were developed. The budgets in the 2018 SIP Update reflect updated VMT estimates from SCAG's 2016–2040 Regional Transportation Plan/Sustainable Communities Strategy, Amendment 2, adopted in July 2017, and align with the emissions inventory, RFP and attainment demonstrations in the 2016 WMD Attainment Plan. Additionally, the budgets in the 2018 SIP Update are more precise because they are rounded up to the nearest tenth of a tpd, instead of the nearest whole number.¹³⁵

The conformity budgets for NO_x and VOC in the 2018 SIP Update for the WMD are provided in Table 4 below.

TABLE 4—WEST MOJAVE DESERT MOTOR VEHICLE EMISSIONS BUDGETS IN THE 2018 SIP UPDATE
[tpd, average summer weekday]^a

	2020		2023		2026	
	VOC	NO _x	VOC	NO _x	VOC	NO _x
On-Road Inventory	7.87	17.57	6.73	10.98	5.98	9.79
Safety Margin					0.2	0.4
Total	7.87	17.57	6.73	10.98	6.18	10.19

tpd NO_x). Further emissions reductions are projected to occur in upwind areas in the year following the attainment year (see, *e.g.*, 2016 AQMP, Chapter 3), and we anticipate that these reductions will drive additional reductions in ozone concentrations in the WMD in this period, consistent with the strong influence of upwind emissions on nonattainment in the WMD.

¹³² 40 CFR 93.102(b)(2)(i).

¹³³ 40 CFR 93.118(e)(4)(iii), (iv) and (v). For more information on the transportation conformity requirements and applicable policies on MVEBs, please visit our transportation conformity website at: <http://www.epa.gov/otaq/stateresources/transconf/index.htm>.

¹³⁴ 40 CFR 93.118.

¹³⁵ For instance, the 2016 WMD Attainment Plan estimates that 2026 on-road vehicle emissions (summer planning inventory) would be 7 tpd for VOC and 11 tpd for NO_x. See Appendix A, A–23 through A–26. The corresponding budgets from the 2018 SIP Update are 6.2 tpd for VOC and 10.2 tpd for NO_x. See Table VI–3 and surrounding discussion in Section V of the TSD for this action for additional detail.

^b Rounded up to the next tenth of a ton.

The submittal letters for both the 2016 WMD Attainment Plan and the 2018 SIP Update include a request from CARB that the EPA limit the duration of our approval of the budgets to last only until the effective date of future EPA adequacy findings for replacement budgets.¹³⁶

3. The EPA's Review of the State's Submission

As part of our review of the approvability of the budgets in the 2018 SIP Update, we have evaluated the budgets using our adequacy criteria in 40 CFR 93.118(e)(4) and (5). We will complete the adequacy review concurrently with our final action on the 2016 WMD Attainment Plan. The EPA is not required under its transportation conformity rule to find budgets adequate prior to proposing approval of them.¹³⁷ Today, the EPA is announcing that the adequacy process for these budgets begins and the public has 30 days to comment on their adequacy, per the transportation conformity regulation at 40 CFR 93.118(f)(2)(i) and (ii).

As documented in Table 5 of section V of the EPA's TSD for this proposal, we preliminarily conclude that the budgets in the 2018 SIP Update for the West Mojave Desert meet each adequacy criterion. While adequacy and approval are two separate actions, reviewing the budgets in terms of the adequacy criteria informs the EPA's decision to propose to approve the budgets. We have completed our detailed review of the 2016 WMD Attainment Plan and the 2018 SIP Update, and we are proposing herein to approve the attainment and RFP demonstrations. We have also reviewed the budgets in the 2018 SIP Update and found that they are

consistent with the attainment and RFP demonstrations for which we are proposing approval, are based on control measures that have already been adopted and implemented, and meet all other applicable statutory and regulatory requirements, including the adequacy criteria in 40 CFR 93.118(e)(4) and (5). Therefore, we are proposing to approve the 2023 and 2026 budgets in the 2018 SIP Update. At the point when we finalize our adequacy process or approve the budgets for the 2008 ozone NAAQS in the 2018 SIP Update as proposed (whichever occurs first; note that they could also occur concurrently per 40 CFR 93.118(f)(2)(iii)), then these budgets will replace the budgets that we previously found adequate for use in transportation conformity determinations.¹³⁸

Under our transportation conformity rule, as a general matter, once budgets are approved, they cannot be superseded by revised budgets submitted for the same CAA purpose and the same year(s) addressed by the previously approved SIP submittal until the EPA approves the revised budgets as a SIP revision. In other words, as a general matter, such approved budgets cannot be superseded by revised budgets found adequate, but rather only through approval of the revised budgets, unless the EPA specifies otherwise in its approval of a SIP by limiting the duration of the approval to last only until subsequently submitted budgets are found adequate.¹³⁹

In this instance, CARB's submittal letters transmitting the 2016 WMD Attainment Plan and 2018 SIP Update requested that we limit the duration of our approval to the effective date of an EPA adequacy finding for subsequently

submitted budgets, and on April 9, 2021, CARB provided further explanation for its request. Generally, we will consider a state's request to limit an approval of a budget only if the request includes the following elements:¹⁴⁰

- An acknowledgement and explanation as to why the budgets under consideration have become outdated or deficient;
- A commitment to update the budgets as part of a comprehensive SIP update; and
- A request that the EPA limit the duration of its approval to the time when new budgets have been found to be adequate for transportation conformity purposes.

CARB's request includes an explanation for why the budgets have become, or will become, outdated or deficient. In short, CARB requested that we limit the duration of the approval of the budgets in light of the EPA's recent approval of EMFAC2017, an updated version of the EMFAC2014 model used for the budgets in the 2018 SIP Update. EMFAC2017 updates vehicle mix and emissions data of the previously approved version of the model, EMFAC2014.

In light of the approval of EMFAC2017, CARB requests that the budgets from the 2016 WMD Attainment Plan, for which we are proposing approval in this action, will be revised using EMFAC2017 in 2022. CARB's request also states, "without the ability to replace the applicable transportation conformity emissions budgets with submitted budgets found adequate using the budget adequacy process, the benefits of using the updated data may not be realized for a year or more after the SIPs are submitted, due to the SIP approval process."

We note that CARB has not committed to update the budgets as part of a comprehensive SIP update, but as a practical matter, CARB must submit a SIP revision that includes updated demonstrations as well as the updated budgets to meet the adequacy criteria in

¹³⁶ Letter dated April 9, 2021, from Michael Benjamin, Chief, Air Quality Planning and Science Division, CARB, to Deborah Jordan, Acting Regional Administrator, EPA Region IX, and letter dated December 5, 2018, from Richard Corey, Executive Officer, CARB, to Mike Stoker, Regional Administrator, EPA Region IX.

¹³⁷ Under the transportation conformity regulations, the EPA may review the adequacy of submitted motor vehicle emission budgets simultaneously with the EPA's approval or disapproval of the submitted implementation plan. 40 CFR 93.118(f)(2).

¹³⁸ We found adequate the budgets from the Antelope Valley-Western Mojave Desert 8-hour Ozone Early Progress Plan (February 2008) for the 1997 ozone NAAQS at 73 FR 24594 (May 5, 2008). The budgets in Table VI-3 of the 2018 SIP Update for the 2008 ozone NAAQS are lower than the corresponding budgets approved for the 1997 ozone NAAQS. The current budgets of 22 tpd for VOC and 77 tpd for NO_x for all years, would be replaced by budgets of 6.8 tpd for VOC and 11.0 tpd for NO_x in 2023 and 6.2 tpd for VOC and 10.2 tpd for NO_x in 2026.

¹³⁹ 40 CFR 93.118(e)(1).

¹⁴⁰ 67 FR 69139 (November 15, 2002) (final action limiting our prior approval of budgets in certain California SIPs).

40 CFR 93.118(e)(4) for the 2015 ozone NAAQS in 2022,¹⁴¹ and thus, we do not need a specific commitment for such a plan at this time. For the reasons provided above, and in light of CARB's explanation for why the budgets will become outdated and should be replaced upon an adequacy finding for updated budgets, we propose to limit the duration of our approval of the budgets in the 2018 SIP Update until we find revised budgets based on EMFAC2017 to be adequate.

I. Other Clean Air Act Requirements Applicable to Severe Ozone Nonattainment Areas

In addition to the requirements discussed above, title 1, subpart D of the CAA includes other provisions applicable to Severe ozone nonattainment areas, such as the WMD. We describe these provisions and their current status below for informational purposes only.

1. Enhanced Vehicle Inspection and Maintenance Programs

Section 182(c)(3) of the CAA requires states with ozone nonattainment areas classified under subpart 2 as Serious or above to implement an enhanced motor vehicle I/M program in each urbanized area within the nonattainment area. As discussed in Section III.G.3 of this document, Section 182(c)(3) further explains that urbanized areas are "defined by the Bureau of the Census, with a 1980 population of 200,000 or more." Because parts of the MDAQMD within the WMD were not considered urbanized areas in 1980, only part of the WMD is subject to enhanced I/M.¹⁴²

Consistent with the 2008 Ozone SRR, no new I/M programs are currently required for nonattainment areas for the 2008 ozone NAAQS.¹⁴³ The EPA previously approved the California I/M program in the West Mojave Desert as meeting the requirements of the CAA and applicable EPA regulations for enhanced I/M programs.¹⁴⁴

¹⁴¹ Under 40 CFR 93.118(e)(4), the EPA will not find a budget in a submitted SIP to be adequate unless, among other criteria, the budgets, when considered together with all other emissions sources, are consistent with applicable requirements for RFP and attainment. 40 CFR 93.118(e)(4)(iv).

¹⁴² As described in section III.G.2 of this document, the State has committed to adopt a contingency measure to implement enhanced I/M throughout the portion of the WMD that is currently subject to basic I/M, in the event that the area fails to meet an RFP milestone or to attain the 2008 NAAQS by the attainment date.

¹⁴³ 2008 Ozone SRR, 80 FR 12264, at 12283 (March 6, 2015).

¹⁴⁴ 75 FR 38023 (July 1, 2010).

2. New Source Review Rules

Section 182(a)(2)(C) of the CAA requires states to develop SIP revisions containing permit programs for each of its ozone nonattainment areas. The SIP revisions are to include requirements for permits in accordance with CAA sections 172(c)(5) and 173 for the construction and operation of each new or modified major stationary source for VOC and NO_x anywhere in the nonattainment area.¹⁴⁵ The 2008 Ozone SRR includes provisions and guidance for nonattainment new source review (NSR) programs.¹⁴⁶ We will address the NSR requirements for the 2008 ozone NAAQS in the WMD in a separate action.

3. Clean Fuels Fleet Program

Sections 182(c)(4)(A) and 246 of the CAA require California to submit to the EPA for approval into the SIP measures to implement a Clean Fuels Fleet Program. Section 182(c)(4)(B) of the CAA allows states to opt out of the federal clean-fuel vehicle fleet program by submitting a SIP revision consisting of a program or programs that will result in at least equivalent long-term reductions in ozone precursors and toxic air emissions.

In 1994, CARB submitted a SIP revision to the EPA to opt out of the federal clean-fuel fleet program and included a demonstration that California's low-emissions vehicle program achieved emissions reductions at least as large as would be achieved by the federal program. The EPA approved the SIP revision to opt out of the federal program on August 27, 1999.¹⁴⁷ There have been no changes to the federal Clean Fuels Fleet program since the EPA approved the California SIP revision to opt out of the federal program, and thus, no corresponding changes to the SIP are required. Thus, we find that the California SIP revision to opt out of the federal program, as approved in 1999, meets the requirements of CAA sections 182(c)(4)(A) and 246 for the WMD for the 2008 ozone standards.

4. Gasoline Vapor Recovery

Section 182(b)(3) of the CAA requires states to submit a SIP revision by November 15, 1992, that requires owners or operators of gasoline dispensing systems to install and operate gasoline vehicle refueling vapor recovery ("Stage II") systems in ozone nonattainment areas classified as Moderate and above. California's ozone

nonattainment areas implemented Stage II vapor recovery well before the passage of the CAA Amendments of 1990.¹⁴⁸

Section 202(a)(6) of the CAA requires the EPA to promulgate standards requiring motor vehicles to be equipped with onboard refueling vapor recovery (ORVR) systems. The EPA promulgated the first set of ORVR system regulations in 1994 for phased implementation on vehicle manufacturers, and since the end of 2006, essentially all new gasoline-powered light- and medium-duty vehicles are ORVR-equipped.¹⁴⁹ Section 202(a)(6) also authorizes the EPA to waive the SIP requirement under CAA section 182(b)(3) for installation of Stage II vapor recovery systems after such time as the EPA determines that ORVR systems are in widespread use throughout the motor vehicle fleet. Effective May 16, 2012, the EPA waived the requirement of CAA section 182(b)(3) for Stage II vapor recovery systems in ozone nonattainment areas regardless of classification.¹⁵⁰ Thus, a SIP submittal meeting CAA section 182(b)(3) is not required for the 2008 ozone NAAQS.

While a SIP submittal meeting CAA section 182(b)(3) is not required for the 2008 ozone NAAQS, under California state law (*i.e.*, Health and Safety Code section 41954), CARB is required to adopt procedures and performance standards for controlling gasoline emissions from gasoline marketing operations, including transfer and storage operations. State law also authorizes CARB, in cooperation with local air districts, to certify vapor recovery systems, to identify defective equipment and to develop test methods. CARB has adopted numerous revisions to its vapor recovery program regulations and continues to rely on its vapor recovery program to achieve emissions reductions in ozone nonattainment areas in California.

In the WMD, the installation and operation of CARB-certified vapor recovery equipment is required and enforced through AVAQMD Rule 461, "Gasoline Transfer and Dispensing," approved into the SIP on October 21, 2008, and MDAQMD Rule 461, "Gasoline Transfer and Dispensing," approved into the SIP on May 1, 2020.¹⁵¹

5. Enhanced Ambient Air Monitoring

Section 182(c)(1) of the CAA requires that all ozone nonattainment areas

¹⁴⁸ General Preamble, 57 FR 13498 at 13514 (April 16, 1992).

¹⁴⁹ 77 FR 28772, at 28774 (May 16, 2012).

¹⁵⁰ 40 CFR 51.126(b).

¹⁵¹ 76 FR 5277 (January 31, 2011) and 85 FR 25293 (May 1, 2020).

¹⁴⁵ See also CAA sections 182(e).

¹⁴⁶ 80 FR 12264 (March 6, 2015).

¹⁴⁷ 64 FR 46849 (August 27, 1999).

classified as Serious or above implement measures to enhance and improve monitoring for ambient concentrations of ozone, NO_x, and VOC, and to improve monitoring of emissions of NO_x and VOC. The enhanced monitoring network for ozone is referred to as the photochemical assessment monitoring station (PAMS) network. The EPA promulgated final PAMS regulations on February 12, 1993.¹⁵²

On November 10, 1993, CARB submitted to the EPA a SIP revision addressing the PAMS network for six ozone nonattainment areas in California, including the WMD, to meet the enhanced monitoring requirements of CAA section 182(c)(1). The EPA determined that the PAMS SIP revision met all applicable requirements for enhanced monitoring and the EPA PAMS regulations and approved the PAMS submittal into the California SIP.¹⁵³

Prior to 2006, the EPA's ambient air monitoring regulations in 40 CFR part 58, "Ambient Air Quality Surveillance," set forth specific SIP requirements (see former 40 CFR 52.20). In 2006, the EPA significantly revised and reorganized 40 CFR part 58.¹⁵⁴ Under revised 40 CFR part 58, SIP revisions are no longer required; rather, compliance with EPA monitoring regulations is established through review of required annual monitoring network plans.¹⁵⁵ The 2008 Ozone SRR made no changes to these requirements.¹⁵⁶

The 2016 WMD Attainment Plan does not specifically address the enhanced ambient air monitoring requirement in CAA section 182(c)(1). However, we note that CARB includes the ambient monitoring network within the WMD in its annual monitoring network plan that is submitted to the EPA, and that we have approved the most recent annual monitoring network plan ("Annual Network Plan Covering Monitoring Operations in 25 California Air Districts, July 2020" or "2018 ANP"), which includes the enhanced ambient air

monitoring element for the WMD.¹⁵⁷ Based on our review and approval of the 2020 ANP with respect to the WMD and our earlier approval of the PAMS SIP revision, we propose to find that CARB, AVAQMD and MDAQMD meet the enhanced monitoring requirements under CAA section 182(c)(1) for the WMD with respect to the 2008 ozone NAAQS.

6. CAA Section 185 Fee Program

Section 185 of the CAA requires that the SIP for each Severe and Extreme ozone nonattainment area provide that, if the area fails to attain by its applicable attainment date, each major stationary source of VOC and NO_x located in the area shall pay a fee to the state as a penalty for such failure for each calendar year beginning after the attainment date, until the area is redesignated as an attainment area for ozone. States are not yet required to submit a SIP revision that meets the requirements of CAA section 185 for the 2008 ozone NAAQS.¹⁵⁸

IV. Proposed Action

For the reasons discussed in this notice, under CAA section 110(k)(3), the EPA is proposing to approve as a revision to the California SIP the following portions of the 2016 WMD Attainment Plan for the 2008 ozone NAAQS, submitted by CARB on June 2, 2017, and the 2018 SIP Update, submitted on December 11, 2018:

- Base year emissions inventory element in the 2016 WMD Attainment Plan as meeting the requirements of CAA sections 172(c)(3) and 182(a)(1) and 40 CFR 51.1115;
- Emissions statement element in the 2016 WMD Attainment Plan as meeting the requirements of CAA section 182(a)(3)(B) and 40 CFR 51.1102;
- RACM demonstration element in the 2016 WMD Attainment Plan, as meeting the requirements of CAA section 172(c)(1) and 40 CFR 51.1112(c);
- Attainment demonstration element in the 2016 WMD Attainment Plan as meeting the requirements of CAA section 182(c)(2)(A) and 40 CFR 51.1108;
- RFP demonstration element in the 2018 SIP Update as meeting the requirements of CAA sections 172(c)(2), 182(b)(1), and 182(c)(2)(B), and 40 CFR 51.1110(a)(2)(ii);

¹⁵⁷ The EPA approved the 2020 ANP in a letter dated November 5, 2020, from Gwen Yoshimura, Manager, Air Quality Analysis Office, EPA Region IX, to Ravi Ramalingam, Chief, Consumer Products and Air Quality Assessment Branch, Air Quality Planning and Science Division, CARB.

¹⁵⁸ See 40 CFR 51.1117. For the WMD, a section 185 SIP revision for the 2008 ozone standards will be due on July 20, 2022.

- VMT emissions offset demonstration element in the 2016 WMD Attainment Plan as meeting the requirements of CAA section 182(d)(1)(A) and 40 CFR 51.1102; and
- Motor vehicle emissions budgets in the 2018 SIP Update for the 2023 RFP milestone year and the 2026 attainment year (see Table 4 of this notice) because they are consistent with the RFP and attainment demonstrations proposed for approval herein and meet the other criteria in 40 CFR 93.118(e).

We are also proposing to find that the:

- California SIP revision to opt out of the federal Clean Fuels Fleet Program meets the requirements of CAA sections 182(c)(4)(A) and 246 and 40 CFR 51.1102 with respect to the WMD;
- Enhanced monitoring in the WMD meets the requirements of CAA section 182(c)(1) and 40 CFR 51.1102; and
- Enhanced vehicle inspection and maintenance program element in the WMD meets the requirements of CAA section 182(c)(3) and 40 CFR 51.1102.

Lastly, we are proposing, under CAA section 110(k)(4), to conditionally approve the contingency measure element of the 2016 WMD Attainment Plan as meeting the requirements of CAA sections 172(c)(9) and 182(c)(9) for RFP contingency measures. Our proposed approval is based on commitments by the District and CARB to supplement the element through submission, as a SIP revision (within one year of final conditional approval action), a MDAQMD Board resolution detailing the circumstances, timing, and procedure for implementing enhanced vehicle inspection and maintenance for areas within WMD currently subject to basic I/M, if an RFP milestone is not met or the area fails to attain the 2008 ozone NAAQS by the attainment date.

The EPA is soliciting public comments on the issues discussed in this document. We will accept comments from the public on this proposal for the next 30 days and will consider comments before taking final action.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state plans as meeting federal requirements and does not impose additional

¹⁵² 58 FR 8452 (February 12, 1993).

¹⁵³ 82 FR 45191 (September 28, 2017). This action addressed 1-hour ozone nonattainment areas. The area identified as Southeast Desert Modified Air Quality Management Area for the 1-hour ozone NAAQS has been split into two separate nonattainment areas for the 1997 and 2008 ozone NAAQS, the WMD and Riverside County (Coachella Valley).

¹⁵⁴ 71 FR 61236 (October 17, 2006).

¹⁵⁵ 40 CFR 58.2(b) now provides that, "The requirements pertaining to provisions for an air quality surveillance system in the SIP are contained in this part."

¹⁵⁶ The 2008 ozone SRR addresses PAMS-related requirements at 80 FR 12264, 12291 (March 6, 2015).

requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2021–0078; FRL–10022–86–Region 9]

Finding of Failure To Attain the 2008 Lead and 2010 Sulfur Dioxide Standards; Arizona; Hayden and Miami Nonattainment Areas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to determine that the Hayden lead (Pb) nonattainment area (NAA) failed to attain the 2008 Pb primary and secondary national ambient air quality standards (NAAQS or “standards”) by the applicable attainment date of October 3, 2019. This proposed determination is based upon monitored air quality data from November 2015–December 2018 for the 2008 Pb NAAQS. The EPA is also proposing to determine that the Hayden and Miami sulfur dioxide (SO₂) NAAs failed to attain the 2010 1-hour SO₂ primary NAAQS by the applicable attainment date of October 4, 2018, based upon monitored air quality data from January 2015–December 2017. If the EPA finalizes these determinations as proposed, the State of Arizona will be required to submit revisions to the Arizona State Implementation Plan (SIP) that, among other elements, provide for expeditious attainment of the 2008 Pb and 2010 SO₂ standards.

DATES: Any comments must arrive by June 9, 2021.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2021–0078 at <http://www.regulations.gov>. For comments submitted at [Regulations.gov](http://www.regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the

official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

- III. Proposed Action and Request for Public Comment
- IV. Statutory and Executive Order Reviews

I. Background

A. The 2008 Pb and 2010 SO₂ National Ambient Air Quality Standards

Under section 109 of the Clean Air Act (CAA or “Act”), the EPA has established primary and secondary NAAQS for certain pervasive air pollutants (referred to as “criteria pollutants”) and conducts periodic reviews of the NAAQS to determine whether they should be revised or whether new NAAQS should be established. The primary NAAQS represent ambient air quality standards the attainment and maintenance of which the EPA has determined, including a margin of safety, are requisite to protect the public health.

The secondary NAAQS represent ambient air quality standards the attainment and maintenance of which the EPA has determined are requisite to protect the public welfare from any known or anticipated adverse effects associated with the presence of such air pollutant in the ambient air.

1. The 2008 Pb Standard

Under the CAA, the EPA must establish NAAQS for criteria pollutants, including Pb. Pb is generally emitted in the form of particles that are deposited in water, soil, and dust. People may be exposed to Pb by inhaling it or by ingesting Pb-contaminated food, water, soil, or dust. Once in the body, Pb is quickly absorbed into the bloodstream and can result in a broad range of adverse health effects including damage to the central nervous system, cardiovascular function, kidneys, immune system, and red blood cells. Children are particularly vulnerable to Pb exposure, in part because they are more likely to ingest Pb and in part because their still-developing bodies are more sensitive to the effects of Pb. The harmful effects to children's developing nervous systems (including their brains) arising from Pb exposure may include intelligence quotient (IQ) ¹ loss, poor academic achievement, long-term learning disabilities, and an increased risk of delinquent behavior.

The EPA first established primary and secondary Pb standards in 1978 at 1.5 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) as a quarterly average.² Based on new health and scientific data, on October 15, 2008, the EPA revised the federal Pb standards to 0.15 $\mu\text{g}/\text{m}^3$ and revised the averaging time for the standards.³ Since the primary and secondary Pb standards are the same, we refer to them hereafter in this document using the singular Pb standard or NAAQS. A violation of the 2008 Pb NAAQS occurs if any arithmetic 3-month mean concentration is greater than 0.15 $\mu\text{g}/\text{m}^3$.⁴

2. The 2010 SO₂ Standard

Under the CAA, the EPA must also establish a NAAQS for SO₂. SO₂ is primarily released to the atmosphere through the burning of fossil fuels by power plants and other industrial facilities. SO₂ is also emitted from

industrial processes including metal extraction from ore and heavy equipment that burn fuel with a high sulfur content. Short-term exposure to SO₂ can damage the human respiratory system and increase breathing difficulties. Small children and people with respiratory conditions, such as asthma, are more sensitive to the effects of SO₂. Sulfur oxides at high concentrations can also react with compounds to form small particulates that can penetrate deeply into the lungs and cause health problems.

The EPA first established primary SO₂ standards in 1971 at 0.14 parts per million (ppm) over a 24-hour averaging period and 0.3 ppm over an annual averaging period.⁵ In June 2010, the EPA revised the NAAQS for SO₂ to provide increased protection of public health, providing for revocation of the 1971 primary annual and 24-hour SO₂ standards for most areas of the country following area designations under the new NAAQS.⁶ The 2010 NAAQS is 75 parts per billion (ppb) (equivalent to 0.075 ppm) over a 1-hour averaging period.⁷ A violation of the 2010 1-hour SO₂ NAAQS occurs when the annual 99th percentile of ambient daily maximum 1-hour average SO₂ concentrations, averaged over a 3-year period, exceeds 75 ppb.⁸

B. Designations, Classifications, and Attainment Dates for the 2008 Pb and 2010 SO₂ National Ambient Air Quality Standards

Following promulgation of any new or revised NAAQS, the EPA is required by CAA section 107(d) to designate areas throughout the nation as attaining or not attaining the NAAQS.

1. Hayden 2008 Pb Nonattainment Area

The initial designations for the 2008 Pb NAAQS were established in two rounds and were completed on November 22, 2010, and November 22, 2011.⁹ The EPA initially designated the Hayden, Arizona area as unclassifiable due to insufficient monitoring data.¹⁰ In June 2013, the EPA determined that quality assured, certified monitoring data collected in 2012 at the Arizona Department of Environmental Quality

(ADEQ or "State") Globe Highway monitor showed that the area was violating the Pb NAAQS. Accordingly, on May 2, 2014, the EPA proposed to redesignate the Hayden area to nonattainment for the 2008 Pb NAAQS, and on September 3, 2014, finalized the nonattainment designation, effective October 3, 2014.¹¹ Under CAA sections 172(a)(2) and 192(a), the attainment date for a Pb nonattainment area is the date by which attainment can be achieved as expeditiously as practicable, but no later than five years after the area is designated nonattainment. Therefore, the maximum attainment date for the Hayden Pb NAA is October 3, 2019.¹² The Hayden nonattainment area for the 2008 Pb NAAQS includes parts of Gila and Pinal counties.¹³

2. Hayden and Miami 2010 SO₂ Nonattainment Areas

On August 5, 2013, the EPA finalized its first round of designations for the 2010 primary SO₂ NAAQS.¹⁴ In the 2013 action, the EPA designated 29 areas in 16 states as nonattainment for the 2010 SO₂ NAAQS, including the Hayden and Miami areas in Arizona. The Hayden SO₂ NAA includes parts of Gila and Pinal counties and excludes the parts of Indian country located in the area. The Miami SO₂ NAA includes parts of Gila County and excludes parts of Indian country within the area.¹⁵ The EPA's initial round of designations for the 2010 SO₂ NAAQS including the Hayden and Miami SO₂ NAAs became effective on October 4, 2013. Pursuant to CAA sections 172(a)(2) and 192(a), the maximum attainment date for the Hayden and Miami SO₂ NAAs is October 4, 2018, five years after the effective date of the final action designating each area as nonattainment for the 2010 SO₂ NAAQS.

II. Proposed Determination and Consequences

A. Applicable Statutory and Regulatory Provisions

Section 179(c)(1) of the CAA requires the EPA to determine whether a nonattainment area attained an applicable standard by the applicable

¹ IQ is a score created by dividing a person's mental age score, obtained by administering an intelligence test, by the person's chronological age, both expressed in terms of years and months.

"Glossary of Important Assessment and Measurement Terms," Philadelphia, PA: National Council on Measurement in Education. 2016.

¹⁰ Arizona Department of Environmental Quality's Globe Highway monitor registered four violations of the Pb NAAQS in 2011; however, at the time of designation the data had not been quality assured and certified. Consequently, the EPA could not rely on those violations as a basis for a nonattainment designation.

¹¹ 79 FR 52205 (September 3, 2014).

¹² ADEQ's "SIP Revision: Hayden Lead Nonattainment Area" (adopted on March 3, 2017), 18, describes "October 2019" as the attainment date for the area. Accordingly, in approving this SIP revision, 83 FR 56734 (November 14, 2018), the EPA established October 3, 2019 as the applicable attainment date for this area.

¹³ For an exact description of the Hayden Pb NAA, refer to 40 CFR 81.303.

¹⁴ 78 FR 47191 (August 5, 2013).

¹⁵ For exact descriptions of the Hayden and Miami SO₂ NAAs, refer to 40 CFR 81.303.

attainment date based on the area's air quality as of the attainment date.

A determination of whether an area's air quality meets applicable standards is generally based upon the most recent three years of complete, quality-assured data gathered at established state and local air monitoring stations (SLAMS) in a nonattainment area and entered into the EPA's Air Quality System (AQS) database.¹⁶ Data from ambient air monitors operated by state and local agencies in compliance with the EPA monitoring requirements must be submitted to AQS.¹⁷ Monitoring agencies annually certify that these data are accurate to the best of their knowledge.¹⁸ All data are reviewed to determine the area's air quality status in accordance with 40 CFR part 50, Appendix R (for Pb) and Appendix T (for SO₂).

We note that when determining the attainment status of SO₂ nonattainment areas, in addition to ambient monitoring data, the EPA may also consider air quality dispersion modeling and/or a demonstration that the control strategy in the SIP has been fully implemented.¹⁹ With regard to the use of monitoring data for such determinations, the EPA's 2014 SO₂ Guidance specifically notes that "[i]f the EPA determines that the air quality monitors located in the affected area are located in the area of maximum concentration, the EPA may be able to use the data from these monitors to make the determination of attainment without the use of air quality modeling data."²⁰ This language might be read to suggest that the EPA must always assess whether the air quality monitors in the affected area are located in the area of maximum concentration prior to using monitoring data to determine an SO₂ NAA's attainment status. However, this language was intended to refer to a situation where the EPA is considering making a determination that the area has attained the NAAQS based on a finding that all of the monitoring sites within the affected area had an attaining design value for the relevant period. As described in section II.C of this notice, in this instance, the monitoring sites in the Hayden and Miami SO₂ NAAs did not have attaining design values for the relevant period. Consequently, even if the monitoring sites are not located in the area of maximum concentration, any

monitors that would be located in the area of maximum concentration could not record concentrations lower than those recorded at the existing monitors at the Hayden and Miami sites. Accordingly, since the Hayden and Miami monitors are violating the NAAQS, it is not necessary to consider whether the monitors are located in the area of maximum concentration in order to determine that the Hayden and Miami SO₂ NAAs did not attain the 2010 SO₂ NAAQS by the October 4, 2018 attainment date. However, in any future assessment of whether these areas have attained the NAAQS, the EPA may assess whether the monitors are located in the area of maximum concentration and may also consider modeling and/or control implementation information, as appropriate.

1. Interpretation of the 2008 Pb Standard

Under EPA regulations in 40 CFR 50.16 and in accordance with 40 CFR part 50 Appendix R, the 2008 Pb standard is met when the design value is less than or equal to 0.15 µg/m³ at each eligible monitoring site within the area. The Pb design value at each eligible monitoring site is the maximum valid 3-month arithmetic mean Pb concentration calculated over three years. The 3-month mean Pb concentrations are rounded to the nearest hundredth µg/m³ for comparison to the NAAQS. Data completeness requirements for a given 3-month period are met if the average of the data capture rate of the three constituent monthly means is greater than or equal to 75 percent.²¹

2. Interpretation of the 2010 SO₂ Standard

Under EPA regulations in 40 CFR 50.17 and in accordance with 40 CFR part 50 Appendix T, the 2010 1-hour annual SO₂ standard is met when the design value is less than or equal to 75 ppb. Design values are calculated by computing the three-year average of the annual 99th percentile daily maximum 1-hour average concentrations.²² When calculating 1-hour primary standard design values, the calculated design values are rounded to the nearest whole number or 1 ppb by convention. An SO₂ 1-hour primary standard design value is valid if it encompasses three consecutive calendar years of complete

data. A year is considered complete when all four quarters are complete, and a quarter is complete when at least 75 percent of the sampling days are complete. A sampling day is considered complete if 75 percent of the hourly concentration values are reported; this includes data affected by exceptional events that have been approved for exclusion by the Administrator.²³

B. Monitoring Network Considerations

Section 110(a)(2)(B)(i) of the CAA requires states to establish and operate air monitoring networks to compile data on ambient air quality for all criteria pollutants. The EPA's monitoring requirements are specified by regulation in 40 CFR part 58. These requirements are applicable to state, and where delegated, local air monitoring agencies that operate criteria pollutant monitors. The regulations in 40 CFR part 58 establish specific requirements for operating air quality surveillance networks to measure ambient concentrations of Pb, including requirements for measurement methods, network design, quality assurance procedures, and in the case of large urban areas, the minimum number of monitoring sites designated as SLAMS.

In sections 4.4 and 4.5 of Appendix D to 40 CFR part 58, the EPA specifies minimum monitoring requirements for Pb and SO₂, respectively, to operate at SLAMS. SLAMS produce data that are eligible for comparison with the NAAQS, and therefore, the monitor must be an approved federal reference method (FRM), federal equivalent method (FEM), or approved regional method (ARM) monitor.

The minimum number of required Pb SLAMS is described in section 4.5 of Appendix D to 40 CFR part 58. There must be at least one source-oriented SLAMS site located to measure the maximum Pb concentration in ambient air resulting from each non-airport Pb source that emits 0.50 or more tons per year (tpy) and from each airport that emits 1.0 tpy or more based on either the most recent National Emission Inventory (NEI) or other scientifically justifiable methods and data. According to the 2017 NEI, two non-airport sources in Gila County, Arizona exceeded the 0.50 tpy threshold and therefore required source-oriented Pb monitoring: The Asarco LLC Hayden Smelter and the Freeport-McMoRan Miami Smelter.²⁴

²⁰ *Id.*, 50.

²¹ See 40 CFR part 50, Appendix R sections 1(c), 4(c), and 5(b).

²² As defined in 40 CFR part 50, Appendix T section 1(c), daily maximum 1-hour values refer to the maximum 1-hour SO₂ concentration values measured from midnight to midnight that are used in the NAAQS computations.

²³ See 40 CFR part 50, Appendix T sections 1(c), 3(b), 4(c), and 5(a).

²⁴ Arizona facility-level Pb emissions data from the 2017 NEI may be accessed on the EPA NEI website at <https://www.epa.gov/air-emissions>.

The minimum number of required SO₂ SLAMS is described in sections 4.4.2 and 4.4.3 of Appendix D to 40 CFR part 58. According to section 4.4.2, the minimum number of required SO₂ monitoring sites is determined by the population weighted emissions index for each state's core based statistical area. Section 4.4.3 describes additional monitors that may be required by an EPA regional administrator.

Under 40 CFR 58.10, states are required to submit annual network plans (ANP) for ambient air monitoring networks for approval by the EPA. Within the Hayden Pb, Hayden SO₂, and Miami SO₂ NAAs, ADEQ is responsible for assuring that each area meets air quality monitoring requirements. ADEQ submits annual monitoring network plans to the EPA that describe the various monitoring sites operated by ADEQ.²⁵ Each ANP discusses the status of the air monitoring network as required under 40 CFR 58.10 and addresses the operation and maintenance of the air monitoring network in the previous year. The EPA regularly reviews these ANPs for compliance with the applicable reporting requirements in 40 CFR part 58.²⁶

The EPA also conducts regular "technical systems audits" (TSAs) during which we review and inspect ambient air monitoring programs to assess compliance with applicable regulations concerning the collection, analysis, validation, and reporting of ambient air quality data.²⁷ In our 2018 TSA of ADEQ, we concluded that ADEQ's ambient air monitoring network meets or exceeds the requirements for the minimum number of SLAMS for all criteria pollutants, including for Pb in the Hayden NAA and for SO₂ in the Hayden and Miami NAAs.²⁸

1. Hayden Pb Monitoring Network

ADEQ operated two Pb SLAMS during the November 2015–December 2018 data period within the Hayden Pb NAA: Globe Highway (AQS ID 04–007–

inventories/2017-national-emissions-inventory-nei-data and are included in our docket via an Excel spreadsheet.

²⁵ See, e.g., "State of Arizona Air Monitoring Network Plan for the Year 2019." Copies of Arizona's ANPs for 2016–2019 are included in the docket.

²⁶ See, e.g., letter dated November 8, 2019, from Gwen Yoshimura, Manager, EPA Region IX, Air Quality Analysis Office, to Daniel Czecholinski, Acting Director, Air Quality Division, ADEQ. Copies of EPA letters responding to Arizona's ANPs for 2016–2019 are included in the docket.

²⁷ See 40 CFR part 58, appendix A, section 2.5.

²⁸ See letter dated April 25, 2019, from Elizabeth Adams, Director, Air Division, EPA Region IX, to Timothy Franquist, Director, Air Quality Division, ADEQ.

1002) and Hillcrest (AQS ID 04–025–8104). The Globe Highway site is located along State Route 77 in Winkelman. The Hillcrest site, which began monitoring on January 1, 2016, is located at 123 S. Hillcrest Avenue in Hayden.²⁹ The primary and secondary monitors at each Pb monitoring site are FEM monitors.

Based on our review of ADEQ's ANPs for the years 2016–2019³⁰ and the 2018 TSA of ADEQ's monitoring program, we propose to find that the monitoring network in the Hayden Pb NAA is adequate for the purpose of collecting ambient Pb concentration data for use in determining whether the Hayden Pb NAA attained the 2008 Pb NAAQS by the October 3, 2019 attainment date.

2. Hayden SO₂ and Miami SO₂ Monitoring Networks

During the 2015–2017 data period, ADEQ operated one SO₂ SLAMS in the Hayden SO₂ NAA: Hayden Old Jail (AQS ID 04–007–1001); and three SO₂ SLAMS in the Miami SO₂ NAA: Miami Ridgeline (AQS ID 04–007–0009); Miami Jones Ranch (AQS ID 04–007–0011); and Miami Townsite (AQS ID 04–007–0012). The Hayden Old Jail site is located on Canyon Drive and Kennecott Avenue in Hayden. The three SO₂ SLAMS in the Miami SO₂ NAA are located in Miami. The Miami Ridgeline site is located on 4030 Linden Street;³¹ the Miami Jones Ranch site is located on Cherry Flats Road; and the Miami Townsite site is located on Sullivan Street and Davis Canyon Road. The primary monitors at each of these sites are FEM monitors.²¹

Based on our review of ADEQ's ANPs for the years 2016–2018³² and the 2018 TSA of ADEQ's monitoring program, we propose to find that the monitoring networks in the Hayden SO₂ and Miami SO₂ NAAs are adequate for the purpose of collecting ambient SO₂ concentration data for use in determining whether each nonattainment area attained the 2010 SO₂ NAAQS by the October 4, 2018 attainment date.

²⁹ Refer to Appendices C and D of the "State of Arizona Air Monitoring Network Plan For the Year 2019" (July 2019) for detailed descriptions and locations of each Pb monitor.

³⁰ ADEQ's ANPs for 2016–2019 address the operation and maintenance of their air monitoring network for 2015–2018.

³¹ The Miami Ridgeline site was closed on September 6, 2017, with EPA approval. Letter dated September 19, 2017, from Elizabeth Adams, Acting Director, Air Division, EPA Region IX, to Timothy S. Franquist, Director, Air Quality Division, ADEQ.

³² ADEQ's ANPs for 2016–2018 address the operation and maintenance of their air monitoring network for 2015–2017.

C. Data Considerations and Proposed Determination

Under 40 CFR 58.15, monitoring agencies must certify, on an annual basis, data collected at all SLAMS and at all FRM, FEM, and ARM special purpose monitor stations that meet EPA quality assurance requirements. In doing so, monitoring agencies must certify that the previous year of ambient concentration and quality assurance data are completely submitted to AQS and that the ambient concentration data are accurate to the best of their knowledge. ADEQ annually certifies that the data it submits to AQS are quality assured, including data collected by ADEQ at monitoring sites in the Hayden Pb NAA, Hayden SO₂ NAA, and Miami SO₂ NAA.³³

1. Pb Data Considerations

As noted in Section II.A of this notice, CAA section 179(c)(1) requires the EPA to determine whether a nonattainment area attained an applicable standard by the applicable attainment date, based on the area's air quality "as of the attainment date." For the Hayden Pb NAA, for reasons discussed in Section I.B.1 of this notice, the applicable attainment date is October 3, 2019, with respect to the 2008 Pb NAAQS. In accordance with Appendix R to 40 CFR part 50, compliance with the Pb NAAQS is determined based on data from 36 consecutive valid 3-month periods (*i.e.*, 38 months, or a 3-year calendar period and the preceding November and December). Considering the applicable attainment date of October 3, 2019, for the 2008 Pb NAAQS, we must review the data collected in the Hayden Pb NAA from November 1, 2015–December 31, 2018. The Pb data collected in the Hayden Pb NAA from November 1, 2015–December 31, 2018 have been certified by ADEQ.³⁴

We have also evaluated the completeness of these data in accordance with the requirements of 40 CFR part 50 Appendix R. As detailed in 40 CFR part 50 Appendix R section 4(c)(i), a 3-month mean Pb value is determined to be valid (*i.e.*, meets data completeness requirements) if the average of the data capture rate of the three constituent monthly means is greater than or equal to 75 percent. The data collected by ADEQ at the Globe Highway monitoring site meet this

³³ See, e.g., letter from Timothy S. Franquist, Director, Air Quality Division ADEQ, to Gwen Yoshimura, Manager, Air Quality Analysis Office, EPA Region IX, certifying calendar year 2018 ambient air quality data and quality assurance data, dated May 1, 2019. Copies of annual certification letters from 2016–2019 are included in the docket.

³⁴ *Id.*

completeness criterion for each 3-month period from November 2015–December 2018. The Hillcrest monitoring site began collecting data on January 1, 2016. Three full months of data are therefore not available for the 3-month periods from November 2015–January 2016 and December 2015–February 2016. The data collected by ADEQ at the

Hillcrest monitoring site meet the Pb completeness criterion for each of the 34 available 3-month periods from January 2016–December 2018.³⁵

2. Pb Data

The Pb design values at both SLAMS within the Hayden Pb NAA for the relevant 36 consecutive 3-month

periods beginning November 2015 through December 2018 are presented in Table 1 of this notice. Table 1 demonstrates that the Pb design values for the November 2015–December 2018 data period are greater than 0.15 µg/m³ at the Globe Highway and Hillcrest monitoring sites.

TABLE 1—2016–2018 PB DESIGN VALUES FOR THE HAYDEN PB NONATTAINMENT AREA

Site (AQS ID)	Highest 3-month rolling average			Pb design value (µg/m ³)
	2016	2017	2018	
Globe Highway (04–007–1002)	0.14	0.21	0.15	0.21
Hillcrest (04–007–1003)	^a 0.31	0.28	0.23	0.31

Notes:

^a Three full months of data are not available for the first two 3-month periods (*i.e.*, November 2015–January 2016 and December 2015–February 2016) at the Hillcrest Monitoring site. However, based on the “above NAAQS level” test described in 40 CFR part 58, Appendix R, Section 4(c)(ii)(A), the February 2016 3-month rolling average of 0.31 µg/m³ is considered valid.

Source: EPA, Design Value Report, November 3, 2020.

The 2018 annual design value site (*i.e.*, the site with the highest design value based on November 2015–December 2018 data) is the Hillcrest site with a Pb design value of 0.31 µg/m³. Because the Hillcrest monitoring site began operation on January 1, 2016, three full months of monitoring data are not available for the 3-month periods from November 2015–January 2016 and December 2015–February 2016. The EPA applied the “above NAAQS level” test described in 40 CFR 50 Appendix R, Section 4(c)(ii)(A) to determine if the 3-month rolling average ending February 2016 could be considered valid. The 3-month period passed the diagnostic test described therein. Therefore, the February 2016 3-month rolling average of 0.31 µg/m³ is considered valid.

For the area to attain the 2008 Pb NAAQS by October 3, 2019, the Pb design value reflecting data from November 2015–December 2018 at each eligible monitoring site must be equal to or less than 0.15 µg/m³. As shown in Table 1, the 2018 design values at both sites in the Hayden Pb NAA are greater than 0.15 µg/m³. Therefore, based on quality-assured and certified data for November 2015–December 2018, we are proposing to determine that the Hayden

Pb NAA failed to attain the 2008 Pb standard by the October 3, 2019 attainment date.

3. SO₂ Data Considerations

For the Miami and Hayden SO₂ NAAs, for reasons discussed in section I.B.2 of this notice, the applicable attainment date is October 4, 2018. In accordance with Appendix T to 40 CFR part 50, determinations of SO₂ NAAQS compliance are based on three consecutive calendar years of data. To determine the air quality as of the attainment date in each nonattainment area, we must review the data collected during the three calendar years immediately preceding the attainment date for the Hayden and Miami SO₂ NAAs, or January 1, 2015–December 31, 2017.

The SO₂ data for the Hayden and Miami SO₂ NAAs from January 1, 2015–December 31, 2017, have been certified by ADEQ. We have also evaluated the completeness of these data in accordance with the requirements of 40 CFR part 50, Appendix T. The data collected by ADEQ meet the quarterly completeness criterion for all 12 quarters in the three calendar years preceding the attainment date at the Hayden Old Jail and Miami Jones Ranch

SO₂ monitoring sites. The data collected by ADEQ in the three calendar years preceding the attainment date meet the quarterly completeness criteria for only 11 out of 12 quarters at the Miami Townsite SO₂ monitor and 10 out of 12 quarters at the Miami Ridgeline SO₂ monitor. The Miami Townsite SO₂ monitor collected only three quarters of complete data in 2016 because a portion of the data collected in the 1st quarter of 2016 (January 2016–March 2016) was invalidated for not meeting quality assurance requirements. In 2017, the Miami Ridgeline monitor did not meet completeness criteria for the 2nd quarter (April 2017–June 2017) because a portion of data was not collected due to a collection error and machine malfunction, nor for the 4th quarter (October 2017–December 2017) because the site shut down on September 26, 2017.³⁶

4. SO₂ Data

The 1-hour SO₂ design values at each monitoring site within the Hayden and Miami SO₂ NAAs for the 2015–2017 period are presented in Table 2. Table 2 demonstrates that the 1-hour SO₂ design values for the 2015–2017 period are greater than 75 ppb at each eligible monitoring site.

³⁵ See footnote a to Table 1 of this document for a discussion of how we considered the data in these periods after initiation of the Hillcrest monitoring site.

³⁶ See the March 22, 2021 AQS Raw Data Report for SO₂ monitors in the Hayden and Miami SO₂ NAAs showing hourly data from the Miami

Townsite and Miami Ridgeline monitors throughout 2016 and 2017.

TABLE 2—2015–2017 1-HOUR DESIGN VALUES FOR THE HAYDEN AND MIAMI SO₂ NONATTAINMENT AREAS

Site (AQS ID)	Annual 99th percentile daily maximum 1-hour average			1-hour design value (ppb)	Design value valid?
	2015	2016	2017		
Hayden Old Jail (04–007–1001)	246	359	280	295	Yes.
Miami Ridgeline (04–007–0009)	171	120	^a 99	130	No.
Miami Townsite (04–007–0012)	231	^b 110	135	159	Yes.
Miami Jones Ranch (04–007–0011)	242	150	270	221	Yes.

Notes:

^a The Miami Ridgeline monitor failed to meet completeness criteria for the 2nd quarter of 2017 (April 2017–June 2017) and for the 4th quarter of 2017 (October 2017–December 2017).

^b The Miami Townsite monitor had only three quarters of complete data in 2016 because a portion of the data collected in the 1st quarter of 2016 was invalidated for not meeting quality assurance requirements.

Source: EPA, Design Value Report, November 30, 2020.

The data in Table 2 demonstrate that one site in the Hayden SO₂ NAA and two sites in the Miami SO₂ NAA failed to attain the 2010 1-hour SO₂ NAAQS by the applicable attainment date of October 4, 2018, while a third site in the Miami NAA, the Ridgeline monitor, did not have a valid design value for this period. Though the annual 99th percentile daily maximum 1-hour average at the Miami Townsite monitor did not meet applicable completeness criteria for all three years in the 2015–2017 data period, the 3-year design value for Miami Townsite was deemed valid due to meeting the criteria in 40 CFR part 50 Appendix T, section 3(c)(i), which requires that “at least 75 percent of the days in each quarter of each of three consecutive years have at least one reported hourly value, and the design value calculated according to the procedures specified in section 5 is above the level of the primary 1-hour standard.” The 3-year design value for Miami Ridgeline is not considered valid because the site did not meet the conditions in 40 CFR part 50 Appendix T, section 3(c)(i), (ii), or (iii) to allow for incomplete design values to be considered valid.

The annual design value site in each NAA is the site with the highest design value based on 2015–2017 data. In the Hayden SO₂ NAA, the annual design value site is the Hayden Old Jail site with a 1-hour SO₂ design value of 295 ppb. In the Miami SO₂ NAA, the annual design value site is the Miami Jones Ranch site with a 1-hour SO₂ design value of 221 ppb.

For an area to attain the 2010 SO₂ NAAQS by the October 4, 2018 attainment date, the design value based upon monitored air quality data from 2015–2017 at each eligible monitoring site must be equal to or less than 75 ppb for the 1-hour standard. Table 2 shows that the design values at each monitoring site in the Hayden and Miami SO₂ NAAs exceed 75 ppb.

Therefore, based on quality-assured and certified data for the 2015–2017 data period, we are proposing to determine that both the Hayden SO₂ NAA and Miami SO₂ NAA failed to attain the 2010 1-hour SO₂ standard by the October 4, 2018 attainment date.

D. Consequences for Pb and SO₂ Nonattainment Areas Failing To Attain Standards by Attainment Dates

The consequences for Pb and SO₂ nonattainment areas for failing to attain the standards by the applicable attainment date are set forth in CAA section 179(d). Under section 179(d), a state must submit a SIP revision for the area meeting the requirements of CAA sections 110 and 172, the latter of which requires, among other elements, a demonstration of attainment and reasonable further progress and contingency measures. In addition, under CAA section 179(d)(2), the SIP revision must include such additional measures as the EPA may reasonably prescribe, including all measures that can be feasibly implemented in the area in light of technological achievability, costs, and any non-air quality and other air quality-related health and environmental impacts. In this case, the dominant source of Pb and SO₂ emissions in the Hayden Pb and SO₂ NAAs is the Asarco Hayden Smelter, and the dominant source of SO₂ emissions in the Miami SO₂ NAA is the Freeport-McMoRan Miami Smelter. Due to the unique nature of these two facilities, which are the only two batch-process primary copper smelters in the country, we do not have adequate information to propose specific additional controls at this time. However, we are seeking comment on what additional measures could be feasibly implemented at these facilities in light of technological achievability, costs, and any non-air quality and other air quality-related health and environmental impacts. We also expect

that information concerning such potential additional control measures would be collected by ADEQ as part of its development of SIP revisions to address the requirements that would be triggered by a final finding of failure to attain for these areas.

The state is required to submit the SIP revision within one year after the EPA publishes a final action in the **Federal Register** determining that the nonattainment area failed to attain the applicable Pb or SO₂ standard. We note that on November 10, 2020, the EPA published an action partially disapproving the 2010 SO₂ attainment plan for the Hayden nonattainment area.³⁷ Although a final finding of failure to attain will not eliminate the state's obligation to address the disapproved elements of its prior plan submittal, the EPA anticipates that Arizona's submission of a new, approvable attainment plan in response to this finding would also satisfy these obligations.

In addition to triggering requirements for a new SIP submittal, a final determination that a nonattainment area failed to attain the NAAQS by the attainment date would trigger the implementation of contingency measures adopted under 172(c)(9).

Under CAA sections 179(d)(3) and 172(a)(2), the new attainment date for each nonattainment area is the date by which attainment can be achieved as expeditiously as practicable, but no later than five years after the EPA publishes a final action in the **Federal Register** determining that the nonattainment area failed to attain the applicable Pb or SO₂ standard.³⁸

³⁷ 85 FR 71547.

³⁸ Pursuant to CAA sections 172(a)(2)(D) and 192(a), the attainment date extension provision under section 172(a)(2)(A) does not apply to the Pb or SO₂ NAAQS.

III. Proposed Action and Request for Public Comment

Under CAA section 179(c)(1), the EPA proposes to determine that the Hayden Pb NAA failed to attain the 2008 Pb standard by the applicable attainment date of October 3, 2019. Under CAA section 179(c)(1), the EPA also proposes to determine that the Hayden SO₂ NAA and the Miami SO₂ NAA failed to attain the 2010 1-hour SO₂ standard by the applicable attainment date of October 4, 2018. If finalized as proposed, the State of Arizona would be required under CAA section 179(d) to submit revisions to the SIP for the Hayden Pb NAA, Hayden SO₂ NAA, and Miami SO₂ NAA. The required SIP revision for each area must, among other elements, demonstrate expeditious attainment of the standards within the time period prescribed by CAA section 179(d). If finalized as proposed, the SIP revisions required under CAA section 179(d) would be due for submittal to the EPA no later than one year after the publication date of the final action.

The EPA is soliciting public comments on the issues discussed in this notice. We will accept comments from the public on this proposal for the next 30 days. We will consider these comments before taking final action.

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <http://www2.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review, and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and therefore was not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the provisions of the PRA because it does not contain any information collection activities.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. This proposed action, if finalized, would require the state to adopt and submit SIP revisions to satisfy CAA requirements and would not itself directly regulate any small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate of \$100 million or more, as described in UMRA (2 U.S.C. 1531–1538) and does not significantly or uniquely affect small governments. This action itself imposes no enforceable duty on any state, local, or tribal governments, or the private sector. This action proposes to determine that the Hayden Pb NAA and the Hayden and Miami SO₂ NAAs failed to attain the NAAQS by the applicable attainment dates. If finalized, this determination would trigger existing statutory timeframes for the State to submit SIP revisions. Such a determination in and of itself does not impose any federal intergovernmental mandate.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. The proposed finding of failure to attain the Pb and SO₂ NAAQS does not apply to tribal areas, and the proposed rule would not impose a burden on Indian reservation lands or other areas where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction within the Hayden Pb, Hayden SO₂ and Miami SO₂ nonattainment areas. Thus, this proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175. Nonetheless, the EPA has notified the San Carlos Apache Tribe of the San Carlos Reservation, which borders the eastern boundary of the Hayden Pb and Hayden SO₂ NAAs, of the proposed action.

G. Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory

action” in section 2–202 of the Executive Order. This proposed action is not subject to Executive Order 13045 because the effect of this proposed action, if finalized, would be to trigger additional planning requirements under the CAA. This proposed action does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211, Actions That Significantly Affect Energy Supply, Distribution, or Use

This proposed rule is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). The effect of this proposed action, if finalized, would be to trigger additional planning requirements under the CAA.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2021–0176; FRL–10023–40–Region 9]

Approval of California Air Plan Revision, Imperial County Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the Imperial County Air

Pollution Control District (ICAPCD or “District”) portion of the California State Implementation Plan (SIP). The revision concerns emissions of volatile organic compounds (VOCs) from gasoline transfer at bulk gasoline terminals storage. We are proposing to approve a local rule to regulate these emission sources under the Clean Air Act (CAA or the Act). We are taking comments on this proposal and plan to follow with a final action.

DATES: Comments must be received on or before June 9, 2021.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2021–0176 at <https://www.regulations.gov>. For comments submitted at [Regulations.gov](https://www.regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](https://www.regulations.gov). The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is

restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. **FOR FURTHER INFORMATION CONTACT:** Donnique Sherman, EPA Region IX, 75

Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4129 or by email at sherman.donnique@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, “we,” “us” and “our” refer to the EPA.

Table of Contents

- I. The State’s Submittal
 - A. What rule did the State submit?
 - B. Are there other versions of this rule?
 - C. What is the purpose of the submitted rule revision?
- II. The EPA’s Evaluation and Action
 - A. How is the EPA evaluating the rule?
 - B. Does the rule meet the evaluation criteria?
 - C. Public comment and proposed action
- III. Incorporation by Reference
- IV. Statutory and Executive Order Reviews

I. The State’s Submittal

A. What rule did the State submit?

Table 1 lists the rule addressed by this proposal with the dates that it was revised by the local air agency and submitted by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED RULE

Local agency	Rule No.	Rule title	Revised	Submitted
ICAPCD	415	Transfer and Storage of Gasoline	11/03/2020	02/19/2021

On March 9, 2021, the EPA determined that the submittal for ICAPCD revised Rule 415 met the completeness criteria in 40 CFR part 51 Appendix V, which must be met before formal EPA review.

B. Are there other versions of this rule?

We approved an earlier version of Rule 415 into the SIP on February 22, 2005 (70 FR 8520). The ICAPCD adopted revisions to the SIP-approved version on November 3, 2020, and CARB submitted them to us on February 19, 2021. If we take final action to approve the November 3, 2020 version of Rule 415, this version will replace the previously approved version of the rule in the SIP.

C. What is the purpose of the submitted rule revision?

Emissions of VOCs contribute to the production of ground-level ozone, smog and particulate matter, which harm human health and the environment. Section 110(a) of the CAA requires states to submit regulations that control VOC emissions. SIP-approved Rule 415 limits VOCs from the transfer and storage of gasoline, including stationary storage containers, terminals and bulk plants, gasoline delivery vessels, and

vehicle fuel tanks. The rule was recently revised to lower the VOC emissions limit for gasoline transfers at bulk gasoline terminals. On March 16, 2020 (85 FR 8181), the EPA conditionally approved a portion of the California SIP revision submitted on November 14, 2017, demonstrating that control measures in the Imperial County Air Pollution Control District implemented reasonably available control technologies (RACT) for the 2008 8-hour National Ambient Air Quality Standards (NAAQS). The conditional approval was based on a commitment from the State to submit new or revised rules that would correct deficiencies in Rule 415, Transfer and Storage of Gasoline, to establish RACT-level controls for sources covered by the Control Techniques Guidelines (CTG) source category “Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals” (EPA–450/2–77–026). Revisions to Rule 415 on November 3, 2020, corrected the deficiency. The EPA’s technical support document (TSD) has more information about this rule.

II. The EPA’s Evaluation and Action

A. How is the EPA evaluating the rule?

Rules in the SIP must be enforceable (see CAA section 110(a)(2)), must not interfere with applicable requirements concerning attainment and reasonable further progress or other CAA requirements (see CAA section 110(l)), and must not modify certain SIP control requirements in nonattainment areas without ensuring equivalent or greater emissions reductions (see CAA section 193).

Generally, SIP rules must require RACT for each category of sources covered by a CTG document as well as each major source of VOCs in ozone nonattainment areas classified as Moderate or above (see CAA section 182(b)(2)). The ICAPCD regulates an ozone nonattainment area classified as Moderate for the 2008 8-hr ozone NAAQS (40 CFR 81.305). Therefore, this rule must implement RACT.

Guidance and policy documents that we used to evaluate enforceability, revision/relaxation and rule stringency requirements for the applicable criteria pollutants include the following:

1. “State Implementation Plans; General Preamble for the Implementation of Title I of the Clean

Air Act Amendments of 1990,” 57 FR 13498 (April 16, 1992); 57 FR 18070 (April 28, 1992).

2. “Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations,” EPA, May 25, 1988 (the Bluebook, revised January 11, 1990).

3. “Guidance Document for Correcting Common VOC & Other Rule Deficiencies,” EPA Region 9, August 21, 2001 (the Little Bluebook).

4. “Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals,” EPA 450/2-77-026, October 1977.

5. “Control of Volatile Organic Emissions from Bulk Gasoline Plants,” EPA-450/2-77-035, December 1977.

6. “Design Criteria for Stage I Vapor Control Systems—Gasoline Service Stations,” EPA-450/R-75-102, November 1975.

7. “Control of Volatile Organic Compound Leaks from Gasoline Tank Trucks and Vapor Collection Systems,” EPA-450/2-78-051, December 1978.

B. Does the rule meet the evaluation criteria?

This rule meets CAA requirements and is consistent with relevant guidance regarding enforceability, RACT, and SIP revisions and fulfills the District’s commitment to revise the rules to lower the emissions limit for gasoline transfers at bulk terminals in order to meet current RACT. The TSD has more information on our evaluation.

C. Public Comment and Proposed Action

As authorized in section 110(k)(3) of the Act, the EPA proposes to fully approve the submitted rule because it fulfills all relevant requirements. In addition, we propose to convert the partial conditional approval of the District’s 2008 RACT SIP, as found in 40 CFR 52.248 (i), to a full approval. We will accept comments from the public on this proposal until June 9, 2021. If we take final action to approve the submitted rule, our final action will incorporate this rule into the federally enforceable SIP.

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the ICAPCD rule described in Table 1 of this preamble. The EPA has made, and will continue to make, these materials available through <https://www.regulations.gov> and at the EPA Region IX Office (please contact the

person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or

an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MB Docket No. 21-185; RM-11906; DA 21-475; FR ID 24742]

Television Broadcasting Services Butte, Montana

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has before it a petition for rulemaking filed by Sinclair Media Licensee, LLC (Petitioner), the licensee of KTVM-TV (NBC), channel 6, Butte, Montana. The Petitioner requests the substitution of channel 20 for channel 6 at Butte, Montana in the DTV Table of Allotments.

DATES: Comments must be filed on or before June 9, 2021 and reply comments on or before June 24, 2021.

ADDRESSES: Federal Communications Commission, Office of the Secretary, 45 L Street NE, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve counsel for the Petitioner as follows: Paul A. Cicelski, Esq., Lerman Senter, PLLC, 2001 L Street NW, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Joyce Bernstein, Media Bureau, at (202) 418-1647; or Joyce Bernstein, Media Bureau, at Joyce.Bernstein@fcc.gov.

SUPPLEMENTARY INFORMATION: In support of its channel substitution request, the Petitioner states that the Commission has recognized that VHF channels have

certain propagation characteristics which may cause reception issues for some viewers. Petitioner further states that KTVM-TV has received numerous complaints from viewers unable to receive that Station's over-the-air signal, despite being able to receive signals from other stations, and that its channel substitution proposal will result in more effective building penetration for indoor antenna reception. In addition, the Petitioner states that while the proposed channel 20 facility's noise limited contour does not completely encompass the relevant channel 6 noise limited contour, KTVM-TV is an NBC affiliate and there are two other NBC affiliated stations that serve some of the portions of the loss area. The Petitioner also submitted an analysis, using the Commission's *TVStudy* software analysis program, demonstrating that after taking into account service provided by the other NBC stations, all of the population located within KTVM-TV's original post-transition channel 6 noise limited contour will continue to receive NBC service, except for 66 people. The Bureau used the technical parameters of KTVM-TV's original post-transition digital channel 6 facility (File Nos. BPCDT-20080314ADF and BLCDT-20090622ADT) in determining any predicted loss which may occur from the proposed channel substitution.

This is a synopsis of the Commission's *Notice of Proposed Rulemaking*, MB Docket No. 21-185; RM-11906; DA 21-475, adopted April 26, 2021, and released April 26, 2021. The full text of this document is

available for download at <https://www.fcc.gov/edocs>. To request materials in accessible formats (braille, large print, computer diskettes, or audio recordings), please send an email to FCC504@fcc.gov or call the Consumer & Government Affairs Bureau at (202) 418-0530 (VOICE), (202) 418-0432 (TTY).

This document does not contain information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104-13. In addition, therefore, it does not contain any proposed information collection burden "for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, *see* 44 U.S.C. 3506(c)(4). Provisions of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601-612, do not apply to this proceeding.

Members of the public should note that all *ex parte* contacts are prohibited from the time a Notice of Proposed Rulemaking is issued to the time the matter is no longer subject to Commission consideration or court review, *see* 47 CFR 1.1208. There are, however, exceptions to this prohibition, which can be found in Section 1.1204(a) of the Commission's rules, 47 CFR 1.1204(a).

See Sections 1.415 and 1.420 of the Commission's rules for information regarding the proper filing procedures for comments, 47 CFR 1.415 and 1.420.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

May 5, 2021.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by June 9, 2021 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it

displays a currently valid OMB control number.

Food Safety and Inspection Service

Title: Mechanically Tenderized Beef Products.

OMB Control Number: 0583–0160.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*). This statute mandate that FSIS protect the public by ensuring that meat products are safe, wholesome, unadulterated, and properly labeled and packaged.

Need and Use of the Information: FSIS requires the use of the descriptive designation "mechanically tenderized" on the labels of raw or partially cooked needle or blade tenderized beef products, including beef products injected with marinade or solution, unless such products are destined to be fully cooked at an official establishment. Beef products that have been needle or blade tenderized are referred to as "mechanically tenderized" products. Consumers use the information added to the labels of raw or partially cooked mechanically tenderized beef products to ensure that they thoroughly cook these products.

Description of Respondents: Business or other-for profit.

Number of Respondents: 555.

Frequency of Responses: Reporting: One time.

Total Burden Hours: 19,719.

Ruth Brown,

Departmental Information Collection Clearance Officer.

Submission for OMB Review; Comment Request

May 5, 2021.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding whether the collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by June 9, 2021 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: The FNS User Access Request Form Data Collection.

OMB Control Number: 0584–0532.

Summary of Collection: The Federal Information Security Modernization Act of 2014 (Pub. L. 113–283) and Office of Management and Budget (OMB) Circular A–130, Managing Information as a Strategic Resource, establish a minimum set of controls to be included in Federal automated information security programs. Establishing controls over the provisioning of access to sensitive systems and data is directed in OMB Circular A–130.

Need and Use of the Information: The FNS User Access Request Form, FNS–674, is designed for this purpose and can be used in situations where (1) access to the FNCS network or an FNCS information system is required; (2) current access is required to be modified; and (3) access is no longer

required and must be revoked. FNCS employees, contractors, State Agencies and partners (Food Banks, etc.) have requested access to FNCS systems via the User Access Request form. FNCS has used the information collected to grant access to the FNCS network and information systems. Information that is collected includes: Name, e-Authentication ID (if applicable), telephone number, email address, contract expiration date, temporary employee expiration date, office address, State/locality codes, system name, form type, type of access, action requested, comments and special instructions.

Description of Respondents: State and Local Government, Private Sector Businesses or other for-profits institutions.

Number of Respondents: 2,700.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 870.

Ruth Brown,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Forest Service, USDA.

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the renewal of a currently approved information collection, *Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery*.

DATES: Comments must be received in writing on or before July 9, 2021 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Commenters are encouraged to submit comments by email, if possible. You may submit comments by any of the following methods:

- *Email:* ann.goode@usda.gov and/or dannette.jones@usda.gov.

- *Mail:* Ann E. Goode, Branch Chief, Directives and Regulations Branch, Strategic Planning, Budget and Accountability, Forest Service, 1400

Independence Avenue SW, Washington, DC 20250.

- *Hand Delivery/Courier:* Forest Service, USDA, 1400 Independence Avenue SW, Washington, DC 20250.

Comments received in response to this notice may be made available to the public through relevant websites and upon request. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

The public may request an electronic copy of the draft supporting statement and/or any comments received. Requests should be emailed to dannette.jones@usda.gov.

FOR FURTHER INFORMATION CONTACT:

Dannette Jones, Information Collections Officer, Directives and Regulations, Strategic Planning, Budget and Accountability, via email at dannette.jones@usda.gov or (202) 205-1295. Individuals who use telecommunication devices for the hearing-impaired (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 twenty-four hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Number: 0596-0226.

Expiration Date of Approval: July 31, 2021.

Type of Request: Extension with no Revision.

Abstract: This information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Agency's commitment to improve service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions but are not statistical surveys that yield quantitative results that can be generalized to the population of study.

This feedback will provide insights into customer or stakeholder perceptions, experiences, and expectations, provide an early warning

of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public.

If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable. The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are noncontroversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered is intended to be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency (if released, the agency must indicate the qualitative nature of the information);
- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
- Information gathered will yield qualitative information. The collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study. Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population.

This type of generic clearance for qualitative information will not be used

for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Type of Respondents: Individuals and Households, Business and Organizations, State, Local or Tribal Government.

Estimate of Burden per Response: 1 to 60 Minutes.

Estimated Annual Number of Respondents: 3,500,000.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 875,000 hours.

Comment is Invited: Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the

submission to the Office of Management and Budget for approval.

Amelia Steed,

Acting Assistant Director, Formulations Branch, Strategic Planning, Budget and Accountability.

BILLING CODE 3411-15-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-37-2021]

Foreign-Trade Zone (FTZ) 20—Norfolk, Virginia; Notification of Proposed Production Activity; STIHL, Incorporated (Handheld Outdoor Power Equipment), Virginia Beach, Virginia

STIHL, Incorporated (STIHL) submitted a notification of proposed production activity to the FTZ Board for its facility in Virginia Beach, Virginia. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on May 3, 2021.

STIHL already has authority to produce handheld outdoor power equipment and related parts within Subzone 20E. The current request would add two foreign status materials/components to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status materials/components described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt STIHL from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, for the foreign-status materials/components noted below, STIHL would be able to choose the duty rates during customs entry procedures that apply to blowers, trimmers, sprayers, cutters, cultivators, and chainsaws (duty rate ranges from duty-free to 4.7%). STIHL would be able to avoid duty on foreign-status components which become scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The materials/components sourced from abroad include flat-rolled and cold-rolled alloy special steel products of a width less than 600 mm, and bars and rods of alloy special steel (duty-free). The request indicates that the components are subject to an antidumping/countervailing duty (AD/

CVD) order if imported from certain countries. The FTZ Board's regulations (15 CFR 400.14(e)) require that merchandise subject to AD/CVD orders, or items which would be otherwise subject to suspension of liquidation under AD/CVD procedures if they entered U.S. customs territory, be admitted to the zone in privileged foreign status (19 CFR 146.41). The request also indicates that certain materials/components are subject to duties under Section 232 of the Trade Expansion Act of 1962 (Section 232) or Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 232 and Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status.

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is June 21, 2021.

A copy of the notification will be available for public inspection in the "Reading Room" section of the Board's website, which is accessible via www.trade.gov/ftz.

For further information, contact Juanita Chen at juanita.chen@trade.gov or 202-482-1378.

Dated: May 5, 2021.

Elizabeth Whiteman,

Acting Executive Secretary.

Emerging Technology Technical Advisory Committee; Notice of Partially Closed Meeting

The Emerging Technology Technical Advisory Committee (ETTAC) will meet on May 21, 2021, at 10:30 a.m., Eastern Daylight Time. The meetings will be available via teleconference. The Committee advises the Office of the Assistant Secretary for Export Administration on the identification of emerging and foundational technologies with potential dual-use applications as early as possible in their developmental stages both within the United States and abroad.

Agenda

Closed Session: 10:30 a.m.–12:30 p.m.

1. Discussion of matters determined to be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 §§ 10(a)(1) and 10(a)(3)

Open Session: 1:00 p.m.–3:00 p.m.

1. Opening Remarks and Introduction by BIS Senior Management
2. Mastering Foreign Engagement Risk in the Research Enterprise (Kevin Gamache, Ph.D., Jeff Stoff, Glenn D. Tiffert, Ph.D.)
3. Q & A with speakers
4. Conclusion/announcements/next meeting

To join the conference, submit inquiries to Ms. Yvette Springer at Yvette.Springer@bis.doc.gov no later than May 17, 2021.

To the extent that time permits, members of the public may present oral statements to the Committee. The public may submit written statements at any time before or after the meeting. However, to facilitate the distribution of public presentation materials to the Committee members, the Committee suggests that presenters forward the public presentation materials prior to the meeting to Ms. Springer via email.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on February 9, 2021, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. app. 2 § 10(d)), that the portion of the meeting dealing with pre-decisional changes to the Commerce Control List and the U.S. export control policies shall be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 § 10(a)(1) and 10(a)(3). The remaining portions of the meeting will be open to the public. For more information, call Yvette Springer at (202) 482–2813.

Yvette Springer,

Committee Liaison Officer.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Application for NATO International Bidding

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to

comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 12, 2021, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: Bureau of Industry and Security.

Title: Application for NATO International Bidding.

OMB Control Number: 0694–XXXX.

Form Number(s): BIS–4023P.

Type of Request: Regular submission New Information Collection.

Number of Respondents: 50.

Average Hours per Response: 1.

Burden Hours: 50.

Needs and Uses: This new proposed information collection replaces previously approved generic collection 0694–0128. All U.S. firms desiring to participate in the NATO International Competitive Bidding (ICB) process under the NATO Security Investment Program (NSIP) must be certified as technically, financially and professionally competent. The U.S. Department of Commerce provides the Declaration of Eligibility that certifies these firms. Any such firm seeking certification is required to submit a completed Form BIS–4023P along with a current annual financial report and a resume of past projects in order to become certified and placed on the Consolidated List of Eligible Bidders.

Affected Public: Business or other for-profit organizations.

Frequency: On Occasion.

Respondent's Obligation: Voluntary.

Legal Authority: Section 401 (10) of Executive order 12656 (November 18, 1988), 15 U.S.C. Section 1512.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or

by using the search function and entering the title of the collection.

Oil Country Tubular Goods From the Republic of Turkey: Final Results and Partial Rescission of Countervailing Duty Administrative Review; 2018

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) determines that Borusan Mannesmann Boru Sanayi ve Ticaret A.S. (Borusan), exporter/producer of oil country tubular goods (OCTG) from the Republic of Turkey (Turkey), received *de minimis* net countervailable subsidies during the period of review (POR), January 1, 2018, through December 31, 2018. Commerce is also rescinding this review with respect to five non-selected companies for which the customs data show no reviewable entries during the POR.

DATES: Applicable May 10, 2021.

FOR FURTHER INFORMATION CONTACT:

Dusten Hom, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5075.

SUPPLEMENTAL INFORMATION:

Background

On January 26, 2021, Commerce published the *Preliminary Results* of this administrative review.¹ We invited parties to comment on the *Preliminary Results*. No interested party submitted comments. Borusan requested to participate in a hearing with Commerce, but because no party submitted comments, Commerce did not hold a hearing.² Commerce conducted this

¹ See *Oil Country Tubular Goods from the Republic of Turkey: Preliminary Results of Countervailing Duty Administrative Review, Rescission in Part, and Intent to Rescind in Part; 2018*, 86 FR 7069 (January 26, 2021) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

² See Borusan's Letter, “Oil Country Tubular Goods from Turkey, Case No. C–489–817; BMB's Request to Participate in Hearing,” dated February 25, 2021; see also 19 CFR 351.310 (c) (“At the

review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order ³

The merchandise covered by the Order is certain OCTG from Turkey. For a complete description of the scope, see the Preliminary Decision Memorandum accompanying the *Preliminary Results*.⁴

Changes Since the Preliminary Results

As no party submitted comments on the *Preliminary Results*, we made no changes in the final results of this review.

Partial Rescission of Administrative Review

It is Commerce's practice to rescind an administrative review of a countervailing duty order, pursuant to 19 CFR 351.213(d)(3), when there are no reviewable entries of subject merchandise during the POR for which liquidation is suspended.⁵ Normally, upon completion of an administrative review, the suspended entries are liquidated at the countervailing duty assessment rate calculated for the review period.⁶ Therefore, for an administrative review of a company to be conducted, there must be a reviewable, suspended entry that Commerce can instruct U.S. Customs and Border Protection (CBP) to liquidate at the calculated countervailing duty assessment rate calculated for the review period.⁷

According to the CBP import data, the five non-selected companies subject to this review, did not have reviewable entries of subject merchandise during the POR for which liquidation is suspended.⁸ Because there is no

hearing, an interested party may make an affirmative presentation only on arguments included in that party's case brief and may make a rebuttal presentation only on arguments included in that party's rebuttal brief⁹.

³ See *Certain Oil Country Tubular Goods from India and the Republic of Turkey: Countervailing Duty Orders and Amended Affirmative Final Countervailing Duty Determination for India*, 79 FR 53688 (September 10, 2014) (Order).

⁴ See *Preliminary Results PDM*.

⁵ See, e.g., *Lightweight Thermal Paper from the People's Republic of China: Notice of Rescission of Countervailing Duty Administrative Review*; 2015, 82 FR 14349 (March 20, 2017); see also *Circular Welded Carbon Quality Steel Pipe from the People's Republic of China: Rescission of Countervailing Duty Administrative Review*; 2017, 84 FR 14650 (April 11, 2019).

⁶ See 19 CFR 351.212(b)(2).

⁷ See 19 CFR 351.213(d)(3).

⁸ These five companies are: Bakir Grup Makine Imalat Bakim Montaj Demontaj Sanayi ve Ticaret Ltd. Sti.; Hydra Insaat Sanayi ve Ticaret Anonim Sirketi; Kalibre Boru Sanayi ve Ticaret; NETBORU San. ve Dis. Tic. Koll. Sti.; and Yilmaz Pipo.

evidence on the record of this segment of the proceeding to indicate that these companies had entries, exports, or sales of subject merchandise to the United States during the POR, we are rescinding the administrative review with respect to these companies consistent with 19 CFR 351.213(d)(3).

Final Results of the Administrative Review

In accordance with section 777A(e)(1) of the Act and 19 CFR 351.221(b)(5), we determine the following net countervailable subsidy rate for Borusan, for the period January 1, 2018, through December 31, 2018:

Company	Subsidy rate (percent <i>ad valorem</i>)
Borusan Mannesmann Boru Sanayi ve Ticaret A.S., Borusan Istikbal Ticaret, Borusan Lojistik Dag. Deg. Tas Ve, Borusan Mannesmann Boru Yatirim Holding A.S., and Borusan Holding A.S. ⁹ .	0.38 (<i>de minimis</i>)

Assessment Rates

Commerce shall determine, and CBP shall assess, countervailing duties on all appropriate entries covered by this review, pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(2). Because we calculated a *de minimis* countervailable subsidy rate for Borusan in the final results of this review, we intend to instruct CBP to liquidate the appropriate entries without regard to countervailing duties in accordance with 19 CFR 351.212(b)(2) and 19 CFR 351.106(c)(1).

With respect to the companies for which this administrative review is rescinded (*i.e.*, Bakir Grup Makine Imalat Bakim Montaj Demontaj Sanayi ve Ticaret Ltd. Sti.; Hydra Insaat Sanayi ve Ticaret Anonim Sirketi; Kalibre Boru Sanayi ve Ticaret; NETBORU San. ve Dis. Tic. Koll. Sti.; and Yilmaz Pipo), countervailing duties shall be assessed at rates equal to the cash deposit rate required at the time of entry, or withdrawal from warehouse, for consumption, during the period January 1, 2018, through December 31, 2018, in

⁹ Commerce has determined that Borusan Mannesmann Boru Sanayi ve Ticaret A.S.; Borusan Istikbal Ticaret; Borusan Lojistik Dag. Deg. Tas Ve; Borusan Mannesmann Boru Yatirim Holding A.S.; and Borusan Holding A.S. are cross-owned. See Preliminary Decision Memorandum.

accordance with 19 CFR 351.212(c)(1)(i).

Commerce intends to issue appropriate assessment instructions to CBP no earlier than 35 days after the date of this publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

Pursuant to section 751(a)(2)(C) of the Act, Commerce also intends to instruct CBP to collect cash deposits of estimated countervailing duties at the appropriate rates. For shipments of subject merchandise by Borusan entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results, the cash deposit rate will be zero. For all non-reviewed firms, CBP will continue to collect cash deposits of estimated countervailing duties at the most recent company-specific or all-others rate applicable to the company, as appropriate. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Administrative Protective Order

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is sanctionable violation.

Notification to Interested Parties

These final results are issued and published in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: May 4, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

[C-570-136]

Certain Chassis and Subassemblies Thereof From the People's Republic of China: Countervailing Duty Order and Amended Final Affirmative Countervailing Duty Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: Based on affirmative final determinations by the Department of Commerce (Commerce) and the International Trade Commission (ITC), Commerce is issuing a countervailing duty (CVD) order on certain chassis and subassemblies thereof (chassis) from the People's Republic of China (China). In addition, Commerce is amending its final determination with respect to chassis from China to correct a ministerial error.

DATES: Applicable May 10, 2021.

FOR FURTHER INFORMATION CONTACT: William Langley or Nicholas Czajkowski, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-3861 or (202) 482-1395, respectively.

SUPPLEMENTARY INFORMATION:**Background**

In accordance with sections 705(a), 705(d), and 777(i)(1) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.210(c), on March 22, 2021, Commerce published its affirmative final determination that countervailable subsidies are being provided to producers and exporters of chassis from China.¹ In the investigation of chassis from China, the Coalition of American Chassis Manufacturers (the petitioner) submitted a timely allegation on the record that Commerce made a ministerial error in the final CVD determination on chassis from China.² Section 705(e) of the Act and 19 CFR 351.224(f) define ministerial errors as errors in addition, subtraction, or other arithmetic function, clerical errors resulting from inaccurate copying,

duplication, or the like, and any other type of unintentional error which Commerce considers ministerial. We reviewed the allegation and determined that we made a ministerial error in the final CVD determination on chassis from China. See "Amendment to the Final Determination" section below for further discussion.

On May 3, 2021, the ITC notified Commerce of its affirmative final determination that pursuant to sections 705(b)(1)(A)(i) and 705(d) of the Act, an industry in the United States is materially injured by reason of subsidized imports of subject merchandise from China.³

Scope of the Order

The products covered by this order are certain chassis and subassemblies thereof from China. For a complete description of the scope of this order, see the appendix to this notice.

Amendment to the Final Determination

On March 22, 2021, the petitioner submitted a timely ministerial error allegation regarding the *Final Determination*.⁴ Commerce reviewed the record and, on April 8, 2021, agreed that the error alleged by the petitioner constituted a ministerial error within the meaning of section 705(e) of the Act and 19 CFR 351.224(f).⁵ Specifically, Commerce found that it made an error in calculating the subsidy rates for inputs provided for less than adequate remuneration to Qingdao CIMC Special Vehicles Co., Ltd. and Dongguan CIMC Vehicle Co., Ltd. and their cross-owned companies (collectively, CIMC). Pursuant to 19 CFR 351.224(e), Commerce is amending the *Final Determination* to reflect the correction of the ministerial error described in the Ministerial Error Memorandum. Based on the correction, the subsidy rate for CIMCs changed from 39.14 percent to 44.32 percent. Because the all-others rate is based entirely on CIMC's *ad valorem* subsidy rate, the all-others rate also changed from 39.14 percent to 44.32 percent.

Countervailing Duty Order

As stated above, on May 3, 2021, in accordance with section 705(d) of the Act, the ITC notified Commerce of its final determination that an industry in

the United States is materially injured within the meaning of section 705(b)(1)(A)(i) of the Act by reason of subsidized imports of chassis from China.⁶ Therefore, in accordance with section 705(c)(2) of the Act, Commerce is issuing this CVD order. Because the ITC determined that imports of chassis from China are materially injuring a U.S. industry, unliquidated entries of such merchandise from China, entered or withdrawn from warehouse for consumption, are subject to the assessment of countervailing duties.

Therefore, in accordance with section 706(a) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to assess, upon further instruction by Commerce, countervailing duties for all relevant entries of chassis from China which are entered, or withdrawn from warehouse, for consumption on or after January 4, 2021, the date of publication of the *Preliminary Determination*,⁷ but will not include entries occurring after the expiration of the provisional measures period and before the publication of the ITC's final injury determination under section 705(b) of the Act, as further described in the "Provisional Measures" section of this notice.⁸

Continuation of Suspension of Liquidation and Cash Deposits

Except as noted in the "Provisional Measures" section of this notice, in accordance with section 706(a)(1) of the Act, Commerce will instruct CBP to continue to suspend liquidation on all relevant entries of chassis from China. These instructions suspending liquidation will remain in effect until further notice.

Commerce will also instruct CBP to require cash deposits equal to the net countervailable subsidy rates indicated in the table below. Accordingly, effective on the date of publication in the **Federal Register** of the notice of the ITC's final affirmative injury determination, CBP must require, at the same time as importers would deposit estimated normal customs duties on

⁶ See ITC Notification Letter.

⁷ See *Certain Chassis and Subassemblies Thereof from the People's Republic of China: Preliminary Affirmative Countervailing Duty Determination*, 86 FR 56 (January 4, 2021) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

⁸ In the *Final Determination*, Commerce inadvertently stated that we would instruct CBP to "suspend liquidation of entries of subject merchandise from China that were entered, or withdrawn from warehouse, for consumption, effective January 4, 2020, which is the date of publication of the *Preliminary Determination*." The *Preliminary Determination* was published on January 4, 2021, which is the date reflected in our instructions to CBP.

subject merchandise, a cash deposit equal to the rates listed in the table below.

Company	Subsidy rate (percent)
Qingdao CIMC Special Vehicles Co., Ltd. and Dongguan CIMC Vehicle Co., Ltd. ⁹	44.32
All Others	44.32

Provisional Measures

Section 703(d) of the Act states that the suspension of liquidation pursuant to an affirmative preliminary determination may not remain in effect for more than four months. Commerce published the *Preliminary Determination* on January 4, 2021.¹⁰

The provisional measures period, beginning on the date of publication of the *Preliminary Determination*, ended on May 3, 2021. Therefore, in accordance with section 703(d) of the Act and our practice, Commerce will instruct CBP to terminate the suspension of liquidation and to liquidate, without regard to countervailing duties, unliquidated entries of chassis from China entered, or withdrawn from warehouse, for consumption after May 3, 2021, the final day on which the provisional measures were in effect, until and through the day preceding the date of publication of the ITC's final affirmative injury determination in the **Federal Register**. Suspension of liquidation and the collection of cash deposits will resume on the date of publication of the ITC's final determination in the **Federal Register**.

Notification to Interested Parties

This notice constitutes the CVD order with respect to chassis from China pursuant to section 706(a) of the Act. Interested parties can find a list of CVD orders currently in effect at <http://enforcement.trade.gov/stats/iastats1.html>.

This amended final determination and order is issued and published in

accordance with sections 705(d) and 706(a) of the Act and 19 CFR 351.211(b) and 351.224(e).

Dated: May 4, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Order

The merchandise covered by this order is chassis and subassemblies thereof, whether finished or unfinished, whether assembled or unassembled, whether coated or uncoated, regardless of the number of axles, for carriage of containers, or other payloads (including self-supporting payloads) for road, marine roll-on/roll-off (RORO) and/or rail transport. Chassis are typically, but are not limited to, rectangular framed trailers with a suspension and axle system, wheels and tires, brakes, a lighting and electrical system, a coupling for towing behind a truck tractor, and a locking system or systems to secure the shipping container or containers to the chassis using twistlocks, slide pins or similar attachment devices to engage the corner fittings on the container or other payload.

Subject merchandise includes, but is not limited to, the following subassemblies:

- Chassis frames, or sections of chassis frames, including kingpin assemblies, bolsters consisting of transverse beams with locking or support mechanisms, goosenecks, drop assemblies, extension mechanisms and/or rear impact guards;
- Running gear assemblies or axle assemblies for connection to the chassis frame, whether fixed in nature or capable of sliding fore and aft or lifting up and lowering down, which may or may not include suspension(s) (mechanical or pneumatic), wheel end components, slack adjusters, axles, brake chambers, locking pins, and tires and wheels;
- Landing gear assemblies, for connection to the chassis frame, capable of supporting the chassis when it is not engaged to a tractor; and
- Assemblies that connect to the chassis frame or a section of the chassis frame, such as, but not limited to, pintle hooks or B-trains (which include a fifth wheel), which are capable of connecting a chassis to a converter dolly or another chassis.

Importation of any of these subassemblies, whether assembled or unassembled, constitutes an unfinished chassis for purposes of this order.

Subject merchandise also includes chassis, whether finished or unfinished, entered with or for further assembly with components such as, but not limited to: Hub and drum assemblies, brake assemblies (either drum or disc), axles, brake chambers, suspensions and suspension components, wheel end components, landing gear legs, spoke or disc wheels, tires, brake control systems, electrical harnesses and lighting systems.

Processing of finished and unfinished chassis and components such as trimming, cutting, grinding, notching, punching, drilling, painting, coating, staining, finishing, assembly, or any other processing either in

the country of manufacture of the in-scope product or in a third country does not remove the product from the scope. Inclusion of other components not identified as comprising the finished or unfinished chassis does not remove the product from the scope.

Individual components entered and sold by themselves are not subject to the order, but components entered with or for further assembly with a finished or unfinished chassis are subject merchandise. A finished chassis is ultimately comprised of several different types of subassemblies. Within each subassembly there are numerous components that comprise a given subassembly.

This scope excludes dry van trailers, refrigerated van trailers and flatbed trailers. Dry van trailers are trailers with a wholly enclosed cargo space comprised of fixed sides, nose, floor and roof, with articulated panels (doors) across the rear and occasionally at selected places on the sides, with the cargo space being permanently incorporated in the trailer itself. Refrigerated van trailers are trailers with a wholly enclosed cargo space comprised of fixed sides, nose, floor and roof, with articulated panels (doors) across the rear and occasionally at selected places on the sides, with the cargo space being permanently incorporated in the trailer and being insulated, possessing specific thermal properties intended for use with self-contained refrigeration systems. Flatbed (or platform) trailers consist of load-carrying main frames and a solid, flat or stepped loading deck or floor permanently incorporated with and supported by frame rails and cross members.

The finished and unfinished chassis subject to this order are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings: 8716.39.0090 and 8716.90.5060. Imports of finished and unfinished chassis may also enter under HTSUS subheading 8716.90.5010. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise under order is dispositive.

[A-475-818]

Certain Pasta From Italy: Final Results of Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On November 9, 2020, the Department of Commerce (Commerce) published the preliminary results of the changed circumstances review (CCR) of the antidumping duty (AD) order on certain pasta from Italy and preliminarily determined that Newlat Food S.p.A. (Newlat) is not the successor-in-interest to Delverde

⁹ Commerce finds the following companies to be cross-owned with Qingdao CIMC Special Vehicles Co., Ltd. and Dongguan CIMC Vehicle Co., Ltd.: CIMC Vehicles (Group) Co., Ltd.; Shenzhen CIMC Vehicle Co., Ltd.; Zhumadian CIMC Huajun Casting Co., Ltd.; China International Marine Containers (Group) Co., Ltd.; Liangshan CIMC Dongyue Vehicles Co., Ltd.; Shandong Wanshida Special Vehicle Manufacturing Co., Ltd.; Yangzhou CIMC Tonghua Special Vehicles Co., Ltd.; Zhumadian CIMC Huajun Vehicle Co., Ltd.; Gansu CIMC Huajun Vehicles Co., Ltd.; CIMC Vehicles (Liaoning) Co., Ltd.; and Zhumadian CIMC Wanjia Axle Co., Ltd.

¹⁰ See *Preliminary Determination*.

Industrie Alimentari S.p.A. (Delverde). Based on our analysis for the final results, Commerce continues to find that Newlat is not the successor-in-interest to Delverde.

DATES: Applicable May 10, 2021.

FOR FURTHER INFORMATION CONTACT: John Hoffner, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482-3315.

SUPPLEMENTARY INFORMATION:

Background

On July 14, 1996, Commerce published in the **Federal Register** an AD order on certain pasta from Italy.¹ On July 30, 2020, Newlat requested that, pursuant to section 751(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.216(b), Commerce initiate and conduct a CCR of the Order to determine if Newlat is the successor-in-interest to Delverde. Newlat also requested that Commerce issue the preliminary results of this CCR in conjunction with the notice of initiation, as permitted under 19 CFR 315.221(c)(3)(ii).² The domestic industry filed no comments in response to the request for a CCR.

On November 9, 2020, Commerce initiated the CCR and preliminarily determined that Newlat is not the successor-in-interest to Delverde.³ On December 11, 2020, Newlat and the petitioners submitted case briefs regarding the *Preliminary Results*.⁴ No party submitted rebuttal briefs. On January 13, 2021, Commerce held a video conference with counsel to Newlat in lieu of the hearing requested on December 9, 2020, the request for which had been withdrawn on December 22, 2020.⁵ Commerce

received no requests from the petitioner for a hearing.

Scope of the Order

Imports covered by this Order are shipments of certain non-egg dry pasta. The merchandise subject to this Order is currently classifiable under subheadings 1901.90.9095 and 1902.19.20 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise subject to the Order is dispositive. For the full description of the scope of the Order, see the Issues and Decision Memorandum.⁶

Final Results of Changed Circumstances Review

All issues raised in the case briefs are addressed in the Issues and Decision Memorandum. A list of topics included in the Issues and Decision Memorandum is included as an Appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>.

For the reasons set forth in the *Preliminary Results* and Commerce's analysis of the comments received, Commerce continues to find that Newlat has not provided sufficient evidence to demonstrate that the management, production facilities, supplier relationships, and customer base of Newlat, after the acquisition of Delverde, are materially similar to those of Delverde before Newlat's acquisition with respect to the production and sale of subject merchandise. Thus, Commerce continues to find that Newlat is not the successor-in-interest to Delverde. For the complete successor-in-interest analysis, refer to the Preliminary Decision Memorandum.⁷

Cash Deposit Requirements

As a result of this CCR, Newlat may not receive the company-specific weighted-average dumping margin

previously determined for Delverde, but instead shall continue to be subject to the cash deposit rate currently in effect for Newlat, which is the all-others rate, 15.45 percent, as determined in the *Section 129 Final*.⁸ Further, as of the date of publication of these final results in the **Federal Register**, entries of the merchandise produced at the Delverde factory shall be treated as entries attributable to Newlat that are subject to the cash deposit rate in effect for Newlat.

Administrative Protective Order

This notice serves as a reminder to parties subject to administrative protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.306. Timely written notification of the destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing this determination and publishing these final results in accordance with sections 751(b)(1) and 777(i)(1) of the Act and 19 CFR 351.216(b), 351.221(b) and 351.221(c)(3).

Dated: May 4, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE**International Trade Administration****[A–201–837; A–570–954]****Certain Magnesia Carbon Bricks From Mexico and the People's Republic of China: Final Results of the Expedited Second Sunset Reviews of the Antidumping Duty Orders**

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of these expedited sunset reviews, the Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) orders on certain magnesia carbon bricks (MCBs) from Mexico and the People's Republic of China (China) would be likely to lead to the continuation or recurrence of dumping at the levels indicated in the "Final Results of Review" section of this notice.

DATES: Applicable May 10, 2021.

FOR FURTHER INFORMATION: Amaris Wade, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3874.

SUPPLEMENTARY INFORMATION:**Background**

On September 20, 2010, Commerce published the AD orders on MCBs from China and Mexico.¹ On January 4, 2021, Commerce published the notice of initiation of the second sunset reviews of the *AD Orders*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² In January 2021, Commerce received notices of intent to participate within the 15-day deadline specified in 19 CFR 351.218(d)(1)(i) from the Magnesia Carbon Bricks Fair Trade Committee (the Committee), an association comprised of three U.S. producers of MCBs: Resco Products, Inc.; Magnesita Refractories Company; and HarbisonWalker International, Inc.³ The Committee claimed interested party status under section 771(9)(E) of the Act, as each member of the Committee

is a manufacturer of the domestic like product.

On February 2, 2021, Commerce received adequate substantive responses to the notice of initiation from the Committee within the 30-day deadline specified in 19 CFR 351.218(d)(3).⁴ We received no substantive response from respondent interested parties with respect to either of the orders covered by these sunset reviews.

On February 22, 2021, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from respondent interested parties.⁵ As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted expedited (120-day) sunset reviews of the *AD Orders*.

Scope of the Orders

The scope of these orders includes certain chemically-bonded (resin or pitch), magnesia carbon bricks with a magnesia component of at least 70 percent magnesia (MgO) by weight, regardless of the source of raw materials for the MgO, with carbon levels ranging from trace amounts to 30 percent by weight, regardless of enhancements (for example, magnesia carbon bricks can be enhanced with coating, grinding, tar impregnation or coking, high temperature heat treatments, anti-slip treatments or metal casing) and regardless of whether or not antioxidants are present (for example, antioxidants can be added to the mix from trace amounts to 15 percent by weight as various metals, metal alloys, and metal carbides).

Certain magnesia carbon bricks that are the subject of these orders are currently classifiable under subheadings 6902.10.1000, 6902.10.5000, 6815.91.0000, 6815.99.2000 and 6815.99.4000 of the Harmonized Tariff Schedule of the United States (HTSUS). While HTSUS subheadings are provided for convenience and customs purposes, the written description is dispositive.

Analysis of Comments Received

All issues raised in these sunset reviews are addressed in the Issues and Decision Memorandum.⁶ The issues

discussed in the Issues and Decision Memorandum are the likelihood of continuation or recurrence of dumping and the magnitude of the dumping margin likely to prevail if the orders were revoked. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>. A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the internet at <http://enforcement.trade.gov/frn>.

Final Results of Reviews

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *AD Orders* would be likely to lead to the continuation or recurrence of dumping at weighted-average dumping margins up to 236 percent for China and up to 57.90 percent for Mexico.

Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective orders is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing the final results and this notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act, and 19 CFR 351.218.

Dated: May 3, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[C-570-955]

Certain Magnesia Carbon Bricks From the People's Republic of China: Final Results of the Expedited Second Five-Year Sunset Review of the Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of this sunset review, the Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on certain magnesia carbon bricks (bricks) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of countervailable subsidies at the levels indicated in the "Final Results of Review" section of this notice.

DATES: Applicable May 10, 2021.

FOR FURTHER INFORMATION CONTACT: Mark Hoadley, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-3148.

SUPPLEMENTARY INFORMATION:

Background

On September 21, 2010, Commerce published its CVD order on bricks from

China in the **Federal Register**.¹ On January 4, 2021, Commerce published the notice of initiation of the second sunset review of the *Order*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² Commerce received a notice of intent to participate from Magnesia Carbon Bricks Fair Trade Committee (the Committee), an *ad hoc* association of U.S. producers of magnesia carbon bricks, within the deadline specified in 19 CFR 351.218(d)(1)(i).³ The Committee claimed interested party status under section 771(9)(E) of the Act, as a trade or business association a majority of whose members manufacture, produce, or wholesale a domestic like product in the United States and stated that each member of the Committee is a manufacturer of the domestic like product and thus, are domestic interested parties pursuant to section 771(9)(C) of the Act.⁴

Commerce received a substantive response from the Committee⁵ within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i). We received no substantive response from any other domestic or interested parties in this proceeding, nor was a hearing requested.

On February 22, 2021, Commerce notified the U.S. International Trade Commission (ITC) that it did not receive an adequate substantive response from respondent interested parties.⁶ As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of this *Order*.

Scope of the Order

The merchandise subject to this *Order* includes certain chemically-bonded (resin or pitch), magnesia carbon bricks. Certain magnesia carbon bricks that are

the subject of this order are currently classifiable under subheadings 6902.10.1000, 6902.10.5000, 6815.91.0000, 6815.99.2000 and 6815.99.4000 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise covered by the scope of the *Order* is dispositive. For a complete description of the scope of the *Order*, see the accompanying Issues and Decision Memorandum.⁷

Analysis of Comments Received

All issues raised in this sunset review are addressed in the Issues and Decision Memorandum. A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via the Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the internet at <http://enforcement.trade.gov/frn/>.

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(b) of the Act, we determine that revocation of the CVD order on bricks from China would be likely to lead to continuation or recurrence of countervailable subsidies at the following rates:

Manufacturers/producers/exporters	Net countervailable subsidy (percent)
RHI Refractories Liaoning Co., Ltd. (RHIL), RHI Refractories (Dailian) Co., Ltd. (RHID), and Liaoning RHI Jinding Magnesia Co., Ltd. (RHIJ) (collectively, RHI)	3.00
Liaoning Mayerton Refractories (LMR) and Dalian Mayerton Refractories Co. Ltd. (DMR) (collectively, Mayerton)	253.87
All Others	3.00

SUPPLEMENTARY INFORMATION:**Background**

On July 1, 2020, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the AD order¹ on certain steel nails from Vietnam for the POR.² On July 31, 2020, Commerce received a timely request from Mid Continent Steel & Wire, Inc. (the petitioner), in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.213(b), to conduct an administrative review of this AD order for 23 companies.³ No other party requested an administrative review.

On September 3, 2020, Commerce published in the **Federal Register** a notice of initiation with respect to the following 23 companies:

1. Atlantic Manufacture Inc.
2. Chia Pao Metal Co., Ltd.
3. Delmar International (Vietnam) Ltd.
4. Dicha Sombrilla Co., Ltd.
5. Easylink Industrial Co., Ltd.
6. Expeditors Vietnam Company Limited
7. Gia Linh Logistics Services Co., Ltd.
8. Global Logistics Solution Co., Ltd.
9. Inmax Industries SDN. BHD
10. Jinhai Hardware Co., Ltd.
11. K-Apex Logistics (HK) Co., Limited
12. KPF Vietnam Co., Ltd.
13. KPF Vina Co., Ltd.
14. Orient Star Transport Int'l Ltd.
15. Oriental Multiple Enterprise Ltd.
16. Pudong Prime Int'l Logistics Inc.
17. Region Industries Co., Ltd.
18. Rich State, Inc.
19. Top Shipping Company Limited
20. Topy Fasteners Vietnam Co., Ltd.
21. Truong Vinh Ltd.
22. United Nail Products Co., Ltd.
23. Vina Hardwares Joint Stock Company⁴

¹ See *Certain Steel Nails from the Republic of Korea, Malaysia, the Sultanate of Oman, Taiwan, and the Socialist Republic of Vietnam: Antidumping Duty Orders*, 80 FR 39994 (July 13, 2015).

² See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review*, 85 FR 39531 (July 1, 2020).

³ See Petitioner's Letter, "Certain Steel Nails from SR of Vietnam: Request for Administrative Review," dated July 31, 2020. There were 24 listings in this letter, but one company, Top Shipping Company Limited, was listed twice; consequently, only 23 individual companies were named.

⁴ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 85 FR 54983 (September 3, 2020).

On September 24, 2020, the petitioner timely withdrew its request for an administrative review for all 23 companies.⁵

Rescission of Administrative Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the parties that requested a review withdraw the request within 90 days of the date of publication of the notice of initiation of the requested review. The petitioner withdrew its request for review for all companies by the 90-day deadline, and no other party requested an administrative review of this order. Therefore, we are rescinding the administrative review of the AD order on certain steel nails from Vietnam covering the period July 1, 2019, through June 30, 2020, in its entirety.

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Consistent with its recent notice,⁶ Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Notification to Importers

This notice serves as the only reminder to importers of their responsibility, under 19 CFR 351.402(f)(2), to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement may result in the presumption that reimbursement of antidumping duties occurred and the

⁵ See Petitioner's Letter, "Certain Steel Nails from Vietnam—Withdrawal of Request for Administrative Review," dated September 24, 2020.

⁶ See *Notice of Discontinuation of Policy to Issue Liquidation Instructions After 15 Days in Applicable Antidumping and Countervailing Duty Administrative Proceedings*, 86 FR 3995 (January 15, 2021).

subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Orders

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This notice is published in accordance with section 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: May 4, 2021.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-945, C-570-946]

Prestressed Concrete Steel Wire Strand From the People's Republic of China: Continuation of Antidumping and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the Department of Commerce (Commerce) and the International Trade Commission (ITC) that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on prestressed concrete steel wire strand (PC strand) from the People's Republic of China (China) would likely lead to a continuation or recurrence of dumping, net countervailable subsidies, and material injury to an industry in the United States, Commerce is publishing a notice of continuation of the AD and CVD orders.

DATES: *Applicable Date:* Applicable May 10, 2021.

FOR FURTHER INFORMATION CONTACT: Emily Halle (AD Order) or John Hoffner (CVD Order), AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-0176 or (202) 482-3315, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 1, 2020, the ITC instituted,¹ and Commerce initiated,² the second sunset reviews of the AD and CVD orders on PC strand from China,³ pursuant to section 751(c) of the Tariff Act of 1930 as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *Orders* would likely lead to continuation or recurrence of dumping and of net countervailable subsidies and, therefore, Commerce notified the ITC of the magnitude of the margin of dumping and subsidy rates likely to prevail should the *Orders* be revoked, pursuant to sections 751(c)(1) and 752(b) and (c) of the Act.⁴

On May 4, 2021, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁵

Scope of the Orders

The product covered by the *Orders* is PC strand, produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475. Imports of the subject merchandise

¹ See *Prestressed Concrete Steel Wire Strand from China; Institution of Five-Year Reviews*, 85 FR 54401 (September 1, 2020).

² See *Initiation of Five-Year (Sunset) Reviews*, 85 FR 54348 (September 1, 2020).

³ See *Notice of Antidumping Duty Order: Prestressed Concrete Steel Wire Strand from the People's Republic of China*, 75 FR 37382 (June 29, 2010); and *Prestressed Concrete Steel Wire Strand from the People's Republic of China: Notice of Amended Final Affirmative Countervailing Duty Determination and Notice of Countervailing Duty Order*, 75 FR 38977 (July 7, 2010) (collectively, *Orders*).

⁴ See *Prestressed Concrete Steel Wire Strand from the People's Republic of China: Final Results of the Expedited Second Sunset Review of the Antidumping Duty Order*, 85 FR 86908 (December 31, 2020); and *Final Results of Expedited Sunset Review of Countervailing Duty Order: Prestressed Concrete Steel Wire Strand From the People's Republic of China*, 86 FR 86904 (December 31, 2020).

⁵ See *Prestressed Concrete Steel Wire Strand from China*, 86 FR 23739 (May 4, 2021).

are currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these orders is dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to a continuation or a recurrence of dumping and net countervailable subsidies, as well as material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), Commerce hereby orders the continuation of the *Orders* on PC strand from China.

U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of the *Orders* will be the date of publication in the **Federal Register** of this notice of continuation. Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next five-year reviews of the *Orders* not later than 30 days prior to the fifth anniversary of the effective date of continuation.

Notification to Interested Parties

These five-year sunset reviews and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act and published in accordance with section 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: May 4, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XB055]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the North Jetty Maintenance and Repairs Project in Coos Bay, Oregon

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of incidental harassment authorization.

SUMMARY: NMFS has received a request from the U.S. Army Corps of Engineers (USACE) for the re-issuance of a previously issued incidental harassment authorization (IHA) with the only change being effective dates. The initial IHA authorized take of seven species of marine mammals, by Level B harassment only, incidental to construction associated with the Coos Bay North Jetty maintenance and repairs project in Coos Bay, Oregon. The project has been delayed and none of the work covered in the initial IHA has been conducted. The initial IHA was effective from September 1, 2020, through August 31, 2021. The USACE has requested re-issuance with new effective dates of September 1, 2021, through August 31, 2022. The scope of the activities and anticipated effects remain the same, authorized take numbers are not changed, and the required mitigation, monitoring, and reporting remains the same as included in the initial IHA. NMFS is, therefore, issuing a second identical IHA to cover the incidental take analyzed and authorized in the initial IHA.

DATES: This authorization is effective from September 1, 2021 through August 31, 2022.

ADDRESSES: An electronic copy of the final 2020 IHA previously issued to the USACE, the USACE's application, and the **Federal Register** notices proposing and issuing the initial IHA may be obtained by visiting <https://www.fisheries.noaa.gov/action/incidental-take-authorization-us-army-corps-engineers-north-jetty-maintenance-and-repairs>. In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Amy Fowler, Office of Protected Resources, NMFS, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a

proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined "negligible impact" in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term "take" means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA defines "harassment" as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On March 18, 2019, NMFS received a request from USACE for two IHAs to take marine mammals incidental to vibratory pile driving and removal associated with the North Jetty maintenance and repairs project, Coos Bay, Oregon over the course of two years with pile installation occurring during Year 1 and pile removal occurring during Year 2. The application was deemed adequate and complete on September 10, 2019. The USACE's request was for take of a small number of seven species of marine mammals by Level B harassment only. Neither USACE nor NMFS expects injury, serious injury or mortality to result from this activity and, therefore, IHAs are appropriate. The USACE, in coordination with the Oregon Department of Fish and Wildlife (ODFW) and NMFS' Northwest Region, plans to conduct pile driving and removal October 1st through February 15th and June 1st and July 31st to minimize effects to listed salmonids. Adherence to the in-water work window is part of USACE's Endangered Species

Act (ESA) consultation under Standard Local Operating Procedures for Endangered Species (SLOPES) to administer actions authorized or carried out by the USACE in Oregon (SLOPES IV In-water Over-water Structures). The ODFW will make the final determination of the in-water work window. On January 3, 2020, NMFS issued the two IHAs to the USACE. The Year 1 IHA was effective from September 1, 2020 through August 31, 2021 and the Year 2 IHA was effective July 1, 2022 through June 30, 2023. On February 20, 2021, the USACE notified NMFS that the project had been delayed. None of the work identified in the year 1 IHA (e.g., pile installation) has occurred. The USACE submitted a request for a new identical IHA for Year 1 of construction that would be effective from September 1, 2021 through August 31, 2022, in order to conduct the construction work that was analyzed and authorized through the previously issued IHA (hereafter referred to as the initial IHA). Therefore, re-issuance of the IHA is appropriate.

Summary of Specified Activity and Anticipated Impacts

The planned activities (including mitigation, monitoring, and reporting), authorized incidental take, and anticipated impacts on the affected stocks are the same as those analyzed and authorized through the previously issued IHA.

The purpose of the USACE's construction project is to repair critically damaged sections of the Coos Bay North Jetty, monitor erosion, and to maintain stable deep-draft navigation through the entrance into Coos Bay. Repair activities completed now will reduce the risk of jetty failure or a potential breach of the Coos Bay North Spit (CBNS). The USACE maintains this jetty system and navigational channels, and is planning on conducting major repairs and rehabilitation of the North Jetty. The location, timing, and nature of the activities, including the types of equipment planned for use, are identical to those described in the initial IHA. The mitigation and monitoring are also as prescribed in the initial IHA.

Species that are expected to be taken by the planned activity include the harbor seal (*Phoca vitulina*), northern elephant seal (*Mirounga angustirostris*), Steller sea lion (*Eumetopias jubatus*), California sea lion (*Zalophus californianus*), gray whale (*Eschrichtius robustus*), harbor porpoise (*Phocoena phocoena*), and killer whale (*Orcinus orca*). A description of the methods and inputs used to estimate take anticipated to occur and, ultimately, the take that

was authorized is found in the previous documents referenced above. The data inputs and methods of estimating take are identical to those used in the initial IHA. NMFS has reviewed recent Stock Assessment Reports, information on relevant Unusual Mortality Events, and recent scientific literature, and determined that no new information affects our original analysis of impacts or take estimate under the initial IHA.

We refer to the documents related to the initial IHA, which include the **Federal Register** notice of the issuance of the initial Year 1 and Year 2 IHAs for the USACE's construction work (85 FR 1140; January 9, 2020), the USACE's application, the **Federal Register** notice of the proposed IHAs (84 FR 56781; October 23, 2019), and all associated references and documents.

Determinations

The USACE will conduct activities as analyzed in the initial IHA. As described above, the number of authorized takes of the same species and stocks of marine mammals are identical to the numbers that were found to meet the negligible impact and small numbers standards and authorized under the initial IHA and no new information has emerged that would change those findings. The re-issued Year 1 IHA includes identical required mitigation, monitoring, and reporting measures as the initial IHA, and there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has determined the following: (1) The required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) the USACE's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action with respect to environmental consequences on the human environment.

Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review. This action is consistent with categories of activities identified in CE B4 of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion.

Endangered Species Act (ESA)

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

However, no incidental take of ESA-listed species is authorized or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Authorization

NMFS has issued an IHA to the USACE for in-water construction activities associated with the specified activity from September 1, 2021 through August 31, 2022. All previously described mitigation, monitoring, and reporting requirements from the initial Year 1 IHA are incorporated.

Dated: May 5, 2021.

Catherine Marzin,

*Acting Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No. PTO-P-2021-0027]

Grant of Interim Extension of the Term of U.S. Patent No. 9,364,354; Reducer®

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of interim patent term extension.

SUMMARY: The United States Patent and Trademark Office has issued an order granting interim extension for a one-year interim extension of the term of U.S. Patent No. 9,364,354.

FOR FURTHER INFORMATION CONTACT: Ali Salimi by telephone at (571) 272-0909; by mail marked to his attention and addressed to the Commissioner for Patents, Mail Stop Hatch-Waxman PTE, P.O. Box 1450, Alexandria, VA 22313-1450; by fax marked to his attention at (571) 273-0909; or by email to ali.salimi@uspto.gov.

SUPPLEMENTARY INFORMATION: Section 156 of Title 35, United States Code, generally provides that the term of a patent may be extended for a period of up to five years if the patent claims a product, or a method of making or using a product, that has been subject to certain defined regulatory review, and that the patent may be extended for interim periods of up to one year if the regulatory review is anticipated to extend beyond the expiration date of the patent.

On April 20, 2021, Neovasc Medical Ltd., the patent owner of record, timely filed an application under 35 U.S.C. 156(d)(5) for a second interim extension of the term of U.S. Patent No. 9,364,354. The patent claims the catheter implantable device, Reducer®. The application for patent term extension indicates that a Premarket Approval Application (PMA) P190035 was submitted to the Food and Drug Administration (FDA) on December 31, 2019.

Review of the patent term extension application indicates that, except for permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156, and that the patent should be extended for one year as required by 35 U.S.C. 156(d)(5)(B). Because the regulatory review period will continue beyond the once-extended expiration date of the patent, June 6, 2021, a second interim extension of the patent term under 35 U.S.C. 156(d)(5) is appropriate.

A second interim extension under 35 U.S.C. 156(d)(5) of the term of U.S. Patent No. 9,364,354 is granted for a period of one year from the once-extended expiration date of the patent.

Robert Bahr,

Deputy Commissioner for Patents, United States Patent and Trademark Office.

BILLING CODE 3510-16-P

DEPARTMENT OF EDUCATION**[Docket No. ED–2021–SCC–0071]****Agency Information Collection Activities; Comment Request; Rural, Insular, Native Achievement Programs (RINAP) Progress Update—Outlying Areas and the Republic of Palau****AGENCY:** Office of Elementary and Secondary Education (OESE), Department of Education (ED).**ACTION:** Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is requesting the Office of Management and Budget (OMB) to conduct an emergency review of a new information collection.

DATES: The Department has requested emergency processing from OMB for this information collection request by May 31, 2021; and therefore, request interested persons to submit comments by May 26, 2021. The regular clearance process is also being initiated to provide the public with the opportunity to comment under the full comment period. Interested persons are invited to submit comments on or before July 9, 2021.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2021–SCC–0071. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the regulations.gov site is not available to the public for any reason, ED will temporarily accept comments at ICDocketMgr@ed.gov. Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the PRA Coordinator of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W208D, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Joanne Osborne, 202–401–1265.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Rural, Insular, Native Achievement Programs (RINAP) Progress Update—Outlying Areas and the Republic of Palau

OMB Control Number: 1810–NEW.

Type of Review: A new information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 52.

Total Estimated Number of Annual Burden Hours: 52.

Abstract: The Rural, Insular, and Native Achievement Program (RINAP), within the Office of Elementary and Secondary Education (OESE), part of the U.S. Department of Education (ED), seeks emergency approval from OMB for its progress update protocol for the Outlying Areas and the Republic of Palau. RINAP administers Section 1121 of Title I, Part A of the ESEA; Title II of Public Law 108–118 (Supplemental Education Grant (SEG)), CARES Act—Outlying Areas; Title III of CRRSA—Outlying Areas, Sections 2005 and 11006(2–3) of the ARP; Title V, Part B of the ESEA (Rural Education Achievement Program), Title VI, Part B of the ESEA (Native Hawaiian Education); and Title VI, Part C of the ESEA (Alaska Native Education).

Periodic progress updates, phone, virtual, or in-person conversations during a fiscal year with authorized representatives and project directors help ensure grantees are making progress toward meeting program goals and objectives. The information shared with RINAP helps inform the selection and delivery of technical assistance to grantees and aligns structures, processes, and routines so RINAP can monitor the connection between grant administration and intended outcomes.

Additional Information: If this collection is not allowed to proceed, ED will not be able to fulfill its oversight responsibilities under 2 CFR 200.207 and 2 CFR 3474.10. Three of the four Outlying Areas have been designated for high-risk status for over ten years resulting in ED's need to more routinely monitor grantee progress and program implementation. The Risk Management Services Division of the Office of Grants Administration has determined that all ED grants awarded to the State education agency in each Outlying Area are subject to Departmental Specific Conditions applicable to that Outlying Area. In addition, two Outlying Areas are each required to have a third-party fiduciary agent to manage ED funds. Given that the funds have already been awarded to the Outlying Areas, the need for immediate and frequent monitoring and technical assistance is critical to ensure that the funds are used in accordance with grant award assurances and conditions.

Dated: May 5, 2021.

Kate Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY**Environmental Management Site-Specific Advisory Board, Paducah; Meeting**

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of open virtual meeting.

SUMMARY: This notice announces an online virtual meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Paducah. The Federal Advisory Committee Act requires that public notice of this online virtual meeting be announced in the **Federal Register**.

DATES: Thursday, June 17, 2021; 5:30 p.m.–7:00 p.m.

ADDRESSES: Online Virtual Meeting. To attend, please send an email to the Federal Coordinator, Robert Smith, at robert.smith@pppo.gov by no later than 5:00 p.m. CDT on Monday, June 14, 2021.

To Submit Public Comments: Public comments will be accepted via email prior to and after the meeting. Comments received by no later than 5:00 p.m. CDT on Monday, June 14, 2021 will be read aloud during the virtual meeting. Comments will also be accepted after the meeting, by no later than 5:00 p.m. CDT on Friday, June 25, 2021. Please submit comments to robert.smith@pppo.gov.

FOR FURTHER INFORMATION CONTACT: Robert Smith, Federal Coordinator, by Phone: (270) 441-6821 or Email: robert.smith@pppo.gov.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE-EM and site management in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda:

- Review of Agenda
- Administrative Issues
- Reading of Public Comments

Public Participation: The online virtual meeting is open to the public. Written statements may be filed with the Board either before or after the meeting as there will not be opportunities for live public comment during this online virtual meeting. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to submit public comments should email them as directed above.

Minutes: Minutes will be available by writing or calling Robert Smith, Federal Coordinator, U.S. Department of Energy, 5507 Hobbs Rd., Kevil, KY 42053; Phone: (270) 441-6821. Minutes will also be available at the following website: <https://www.energy.gov/pppo/pgdp-cab/listings/meeting-materials>.

Signed in Washington, DC, on May 4, 2021.

LaTanya Butler,

Deputy Committee Management Officer.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Agency Information Collection Extension

AGENCY: U.S. Department of Energy.

ACTION: Submission for Office of Management and Budget (OMB) review; comment request.

SUMMARY: The Department of Energy (DOE) has submitted an information collection request to the OMB for extension under the provisions of the Paperwork Reduction Act of 1995. The information collection requests a three-year extension of its Privacy Act Administration, OMB Control Number 1910-1700. The proposed collection will aid DOE's processing of Privacy Act requests submitted by an individual or an authorized representative, wherein he or she requests records that the government may maintain pertaining to that individual. The DOE's use of the form continues to contribute to DOE's Privacy Act processes, including, but not limited to, providing for faster processing of Privacy Act information requests by asking individuals or their authorized representatives for pertinent information needed for records retrieval.

DATES: Comments regarding this collection must be received on or before June 9, 2021. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, please advise the OMB Desk Officer of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at (202) 395-4718.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Ken Hunt, Chief Privacy Officer, U.S. Department of Energy, 19901 Germantown Road, Rm. G-302, Germantown, MD 20874 or by telephone at (301) 903-3880 or by facsimile at (301) 903-7738 or by email at privacyactoffice@hq.doe.gov.

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) *OMB No.:* 1910-1700; (2) *Information Collection Request Title:* Privacy Act Administration; (3) *Type of Request:* Renewal; (4) *Purpose:* The Privacy Act Information Request form aids DOE's processing of Privacy Act requests submitted by an individual or an authorized representative, wherein he or she requests records that the government may maintain pertaining to that individual. The DOE's use of its form continues to contribute to DOE's

Privacy Act processes, including, but not limited to, providing for faster processing of Privacy Act Information requests by asking individuals or their authorized representatives for pertinent information needed for records retrieval; (5) *Annual Estimated Number of Respondents:* 406; (6) *Annual Estimated Number of Total Responses:* 406; (7) *Annual Estimated Number of Burden Hours:* 135; (8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* \$7,973.

Statutory Authority: The Privacy Act of 1974, 5 U.S.C. 552(a); 10 CFR 1008.7; and DOE Order 206.1.

Signing Authority: This document of the Department of Energy was signed on April 7, 2021 by Emery Csulak, Acting Chief Information Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on May 5, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Oak Ridge; Meeting

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of open virtual meeting.

SUMMARY: This notice announces an online virtual meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Oak Ridge. The Federal Advisory Committee Act requires that public notice of this online meeting be announced in the **Federal Register**.

DATES: Wednesday, June 9, 2021; 6:00 p.m.–7:30 p.m.

ADDRESSES: Online Virtual Meeting. To attend, please send an email to: orssab@orem.doe.gov by no later than 5:00 p.m. EDT on Wednesday, June 2, 2021.

To Submit Public Comments: Public comments will be accepted via email

prior to and after the meeting. Comments received by no later than 5:00 p.m. EDT on Wednesday, June 2, 2021 will be read aloud during the virtual meeting. Comments will also be accepted after the meeting, by no later than 5:00 p.m. EDT on Monday, June 14, 2021. Please submit comments to orssab@orem.doe.gov.

FOR FURTHER INFORMATION CONTACT:

Melyssa P. Noe, Alternate Deputy Designated Federal Officer, U.S. Department of Energy (DOE), Oak Ridge Office of Environmental Management (OREM), P.O. Box 2001, EM-942, Oak Ridge, TN 37831; Phone (865) 241-3315; or E-Mail: Melyssa.Noel@orem.doe.gov. Or visit the website at <https://www.energy.gov/orem/services/community-engagement/oak-ridge-site-specific-advisory-board>.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE-EM and site management in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

- Comments from the Deputy Designated Federal Officer (DDFO)
- Comments from the DOE, Tennessee Department of Environment and Conservation, and Environmental Protection Agency Liaisons
- Presentation: Groundwater Remedies
- Public Comment Period
- Motions/Approval of May 12, 2021 Meeting Minutes
- Status of Outstanding Recommendations
- Alternate DDFO Report
- Committee Reports

Public Participation: The online meeting is open to the public. Written statements may be filed with the Board either before or after the meeting as there will not be opportunities for live public comment during this online virtual meeting. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to submit public comments should email them as directed above.

Minutes: Minutes will be available by writing or calling Melyssa P. Noe at the address and telephone number listed above. Minutes will also be available at the following website: <https://www.energy.gov/orem/listings/oak-ridge-site-specific-advisory-board-meetings>.

Signed in Washington, DC, on May 4, 2021.

LaTanya Butler,

Deputy Committee Management Officer.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL21-71-000]

Macquarie Energy LLC v. PacifiCorp; Notice of Complaint

Take notice that on May 3, 2021, pursuant to section 206 of the Federal Power Act, 16 U.S.C. 824e and Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206 (2020), Macquarie Energy LLC (Complainant) filed a formal complaint against PacifiCorp (Respondent), alleging that the Respondent has violated Commission regulations and Orders 888, 889, and 890 *et seq.* by refusing transmission service to Macquarie, all as more fully explained in its complaint.

The Complainant certifies that copies of the complaint were served on the contacts listed for Respondent in the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date.

The Respondent's answer, motions to intervene, and protests must be served on the Complainant.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID-19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at FERCOnlineSupport@ferc.gov, or call toll-free, (886) 208-3676 or TTY, (202) 502-8659.

Comment Date: 5:00 p.m. Eastern Time on May 24, 2021.

Dated: May 4, 2021.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP15-554-009 and CP15-555-007]

Atlantic Coast Pipeline, LLC; Eastern Gas Transmission and Storage, Inc. Notice of Intent To Prepare a Supplemental Environmental Impact Statement and Notice of Schedule for Environmental Review for the Proposed Atlantic Coast Pipeline Disposition and Restoration Plan And Supply Header Project Restoration Plan

The staff of the Federal Energy Regulatory Commission (FERC or

Commission) will prepare a supplemental environmental impact statement (supplemental EIS) that will discuss the environmental impacts resulting from Atlantic Coast Pipeline, LLC's (Atlantic) Atlantic Coast Pipeline Disposition and Restoration Plan and Eastern Gas Transmission and Storage, Inc.'s (EGTS) ¹ Supply Header Project Restoration Plan.² The Commission will use this supplemental EIS in its decision-making process to determine whether Atlantic's and EGTS' proposals are in the public interest.

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from its action whenever it considers whether or not to authorize a project or proposal. NEPA also requires the Commission to discover concerns the public may have about proposed actions. This process is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the supplemental EIS on the important environmental issues.

On March 2, 2021, the Commission issued a Notice of Amendment of Certificates and Opening of Scoping Period regarding the proposed restoration activities associated with the Atlantic Coast Pipeline (ACP) and Supply Header Project (SHP). That notice opened a public scoping period of 45 days to gather input from the public and interested agencies regarding both projects.

Summary of the Proposed Project Actions

Atlantic requests authorization to implement its strategy for the restoration of ACP project workspaces in compliance with associated permits, authorizations, and legal agreements. For the pipeline, Atlantic proposes to abandon in place all installed pipe (approximately 31.4 miles of the pipeline right-of-way) and restore lands that were cleared and graded (approximately 82.7 miles of the pipeline right-of-way), and seeks exemptions to the restoration of certain lands, to include leaving felled trees in place in areas where trees have not yet been cleared (approximately 25 miles of

the pipeline right-of-way). For ACP aboveground facilities, Atlantic proposes to restore the sites, and manage the disposition of the materials and land through an investment recovery process.

EGTS requests authorization to implement its strategy for the restoration of SHP workspaces in compliance with associated permits, authorizations, and legal agreements. EGTS plans to leave in place all previously installed pipe (approximately 11.7 miles) and complete final restoration of approximately 9 miles of the pipeline right-of-way that EGTS has previously cleared and/or graded. EGTS owns the properties on which SHP aboveground facilities are located and proposes to stabilize all facility sites and prepare assets for long term preservation.

The Supplemental EIS Process and Identified Issues

The supplemental EIS will discuss impacts that could occur as a result of the proposed activities related to the disposition of the projects and restoration of the project workspaces. To date, we have identified potential environmental concerns related to Atlantic's and EGTS' proposals to leave felled trees in place and abandon installed pipe, and potential impacts on wetlands and waterbodies from restoration activities. As a result, the supplemental EIS will include a reevaluation of mitigation associated with the restoration activities previously analyzed for the construction of the ACP and SHP.³ The supplemental EIS will also consider revisions to land use, air emissions, and noise levels. Commission staff will also evaluate reasonable alternatives to the proposed project amendments or portions of the proposals and make recommendations on how to lessen or avoid impacts on the various resource areas.

The supplemental EIS will present Commission staff's independent analysis of the issues. The draft supplemental EIS will be available in electronic format in the public record through eLibrary⁴ and the Commission's natural gas environmental documents web page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). If

¹ On November 1, 2020, Dominion Energy sold certain companies, including Dominion Energy Transmission, Inc. (the Supply Header Project developer), to Berkshire Hathaway Energy Company; and Dominion Energy Transmission, Inc. changed its name to Eastern Gas Transmission and Storage, Inc.

² The Atlantic Coast Pipeline Disposition and Restoration Plan and the Supply Header Project Restoration Plan were submitted in response to Commission staff's October 27, 2020 Data Request and can be found on FERC's eLibrary at accession numbers 20210104-5278 and 20201120-5243.

³ *Atlantic Coast Pipeline and Supply Header Project Final Environmental Impact Statement*, issued on July 21, 2017; accessible on the FERC website at: <https://cms.ferc.gov/final-environmental-impact-statement-atlantic-coast-pipeline-and-supply-header-project>.

⁴ For instructions on connecting to eLibrary, refer to the last page of this notice.

eSubscribed, you will receive instant email notification when the draft supplemental EIS is issued. The draft supplemental EIS will be issued for an allotted public comment period. After the comment period on the draft supplemental EIS, Commission staff will consider all timely comments and revise the document, as necessary, before issuing a final supplemental EIS.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of these projects to formally cooperate in the preparation of the supplemental EIS.⁵ Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice. The U.S. Forest Service has already agreed to participate as a cooperating agency in the preparation of the supplemental EIS.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) for the original ACP and SHP and anyone who submits comments on the project amendments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project amendments.

A Notice of Availability of the draft supplemental EIS will be sent to the environmental mailing list and will provide instructions to access the electronic document on the FERC's website (www.ferc.gov). If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please complete one of the following steps:

(1) Send an email to GasProjectAddressChange@ferc.gov stating your request. You must include the docket number CP15-554-009 and/or CP15-555-007 in your request. If you are requesting a change to your address, please be sure to include your name and

the correct address. If you are requesting to delete your address from the mailing list, please include your name and address as it appeared on this notice. This email address is unable to accept comments.

OR

(2) Return the attached "Mailing List Update Form" (appendix 1).⁶

Schedule for Environmental Review

The Commission's March 2, 2021 Notice of Amendment for the ACP and SHP alerted other agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on the request for a federal authorization within 90 days of the date of issuance of the Commission staff's final supplemental EIS for the ACP and SHP. This instant notice identifies the FERC staff's planned schedule for completion of the final supplemental EIS for the ACP and SHP, which is based on an issuance of the draft supplemental EIS in July 2021. The forecasted schedule for both the draft and final supplemental EIS is based upon Atlantic and EGTS providing complete and timely responses to any future data requests. In addition, the schedule assumes that the cooperating agencies will provide input on their areas of responsibility on a timely basis. Issuance of Notice of Availability of the final supplemental EIS—November 19, 2021

90-day Federal Authorization Decision Deadline—February 17, 2022

If a schedule change becomes necessary for the final EIS, an additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Additional Information

In order to receive notification of the issuance of the EIS and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

⁶ The appendices referenced in this notice will not appear in the **Federal Register**. Copies of appendices were sent to all those receiving this notice in the mail and are available at www.ferc.gov using the link called "eLibrary" or from the Commission's Public Reference Room, 888 First Street NE, Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

Additional information about the project amendment is available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the eLibrary link. Click on the eLibrary link, click on "General Search" and enter the docket number in the "Docket Number" field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at www.ferc.gov/EventCalendar/EventsList.aspx along with other related information.

Dated: May 4, 2021.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL21–70–000]

Luna Valley Solar I, LLC v. Pacific Gas and Electric Company and California Independent System Operator Corporation; Notice of Complaint

Take notice that on April 30, 2021, pursuant to section 206 of the Federal Power Act, 16 U.S.C. 824e and Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206 (2020), Luna Valley Solar I, LLC (Complainant) filed a formal complaint against Pacific Gas and Electric Company and California Independent System Operator Corporation (Respondents), alleging that Pacific Gas and Electric Company interconnection security demands and refusal to negotiate inconsistent with the California Independent System Operator Corporation Tariff, are unjust and unreasonable, all as more fully explained in its complaint.

The Complainant certifies that copies of the complaint were served on the contacts listed for Respondent in the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondents' answer, motions to intervene, and protests must be served on the Complainant.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed

proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC21–86–000.

Applicants: Alta Wind VIII, LLC, Granite Reliable Power, LLC, Windstar Energy LLC, Tusk Wind Holdings, LLC, Tusk Wind Holdings II, LLC, Tusk Wind Holdings III, LLC, NextEra Energy Partners, LP.

Description: Application for Authorization Under Section 203 of the Federal Power Act of Alta Wind VIII, LLC, et al.

Filed Date: 5/3/21.

Accession Number: 20210503–5292.

Comments Due: 5 p.m. ET 5/24/21.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG21–137–000.

Applicants: Rayos del Sol Solar Project, LLC.

Description: Notice of Self Certification of Exempt Wholesale

Generator Status of Rayos del Sol Solar Project, LLC.

Filed Date: 5/3/21.

Accession Number: 20210503–5127.

Comments Due: 5 p.m. ET 5/24/21.

Docket Numbers: EG21–138–000.

Applicants: Guernsey Power Station LLC.

Description: Notice of Self-Certification of Exempt Wholesale Generator Status of Guernsey Power Station LLC.

Filed Date: 5/3/21

Accession Number: 20210503–5276.

Comments Due: 5 p.m. ET 5/24/21.

Docket Numbers: EG21–139–000.

Applicants: Stony Creek Energy LLC.

Description: Notice of Self-Certification of Exempt Wholesale Generator Status of Stony Creek Energy LLC.

Filed Date: 5/4/21.

Accession Number: 20210504–5153.

Comments Due: 5 p.m. ET 5/25/21.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–1801–006; ER10–1805–007; ER10–2370–005.

Applicants: The Connecticut Light and Power Company, NSTAR Electric Company, Public Service Company of New Hampshire.

Description: Notice of Non-Material Change in Status of The Connecticut Light and Power Company, et al.

Filed Date: 5/3/21.

Accession Number: 20210503–5124.

Comments Due: 5 p.m. ET 5/24/21.

Docket Numbers: ER10–2527–010; ER10–1821–021; ER10–2400–014; ER10–2405–009; ER10–2414–012; ER10–2528–005; ER10–2529–005; ER10–2530–006; ER10–2531–012; ER10–2532–016; ER10–2533–010; ER10–2534–006; ER10–2535–012; ER10–2839–007; ER10–3097–012; ER11–4475–014; ER17–2059–008; ER19–1044–003; ER20–1608–002; ER20–1610–003.

Applicants: Allegheny Ridge Wind Farm, LLC, Goshen Phase II LLC, Blue Canyon Windpower LLC, High Prairie Wind Farm II, LLC, Old Trail Wind Farm, LLC, Aragonne Wind LLC, Buena Vista Energy, LLC, Caprock Wind LLC, Cedar Creek Wind Energy, LLC, Crescent Ridge LLC, GSG, LLC, Kumeyaay Wind LLC, Mendota Hills, LLC, Midland Cogeneration Venture Limited Partnership, Bruce Power Inc., Rockland Wind Farm LLC, Puget Sound Energy, Inc., Telocaset Wind Power Partners, LLC, Mountain Breeze Wind, LLC, Lone Tree Wind, LLC.

Description: Notice of Non-Material Change in Status of Allegheny Ridge Wind Farm, LLC.

Filed Date: 4/30/21.

Accession Number: 20210430–5750.

Comments Due: 5 p.m. ET 5/21/21.

Docket Numbers: ER20–681–002.

Applicants: Tri-State Generation and Transmission Association, Inc.

Description: Notice of Non-Material Change in Status of Tri-State Generation and Transmission Association, Inc.

Filed Date: 5/3/21.

Accession Number: 20210503–5101.

Comments Due: 5 p.m. ET 5/24/21.

Docket Numbers: ER21–1778–000; TS21–2–000.

Applicants: Guernsey Power Station, LLC.

Description: Request of Guernsey Power Station LLC for Temporary Waivers under Section 35.28 of the Commission's Regulations.

Filed Date: 4/27/21.

Accession Number: 20210427–5245.

Comments Due: 5 p.m. ET 5/18/21.

Docket Numbers: ER21–1821–000.

Applicants: St. Joseph Phase II, LLC.

Description: Request for Prospective Tariff Waiver, et al. of St. Joseph Phase II, LLC.

Filed Date: 4/30/21.

Accession Number: 20210430–5609.

Comments Due: 5 p.m. ET 5/21/21.

Docket Numbers: ER21–1833–000.

Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Original ISA, SA No. 6024 and Original ICSPA, SA No. 6025; Queue No. AB2–135 to be effective 4/5/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5010.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1834–000.

Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Original WMPA, Service Agreement No. 6062; Queue No. AG1–253 to be effective 4/6/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5026.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1835–000.

Applicants: Public Service Company of Colorado

Description: § 205(d) Rate Filing: 2021–05–04 PSC–MEAN–GlnwdSpngs–CardnellSS–COM–583–0.0.0 to be effective 7/3/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5038.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1836–000.

Applicants: AEP Texas Inc.

Description: § 205(d) Rate Filing: AEPTX–King Creek Wind Farm 1 (Apogee) 1st A&R GIA to be effective 4/29/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5065.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1837–000.

Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Original WMPA, SA No. 6022; Queue No. AB1–176 to be effective 4/5/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5113.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1838–000.

Applicants: Orangeville Energy Storage LLC.

Description: Baseline eTariff Filing: Application for Market-Based Rate Authorization to be effective 6/7/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5114.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1839–000.

Applicants: Orangeville Energy Storage LLC.

Description: Initial rate filing: Filing of Assignment, Co-Tenancy, and Shared Facilities Agreement to be effective 6/7/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5123.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1840–000.

Applicants: Stony Creek Energy LLC.

Description: Initial rate filing: Filing of Assignment, Co-Tenancy, and Shared Facilities Agreement to be effective 6/7/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5125.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1841–000.

Applicants: Lookout Solar Park I, LLC.

Description: Request for Limited Waiver of Tariff Provision, et al. of Lookout Solar Park I, LLC.

Filed Date: 5/4/21.

Accession Number: 20210504–5141.

Comments Due: 5 p.m. ET 5/18/21.

Docket Numbers: ER21–1842–000.

Applicants: Richland Interconnection, LLC.

Description: Baseline eTariff Filing: Richland Interconnection SFA Filing to be effective 5/5/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5144.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1843–000.

Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Original WMPA, SA No. 6023; Queue No. AE1–109 to be effective 4/6/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5149.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1844–000.
Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Capital Recovery Factor for Avoidable Project Investment Cost Determinations to be effective 11/12/2020.

Filed Date: 5/4/21.

Accession Number: 20210504–5154.

Comments Due: 5 p.m. ET 5/25/21.

Docket Numbers: ER21–1845–000.
Applicants: Interstate Power and Light Company.

Description: § 205(d) Rate Filing: IPL Assignment Co-Tenancy Agreement Filing to be effective 5/5/2021.

Filed Date: 5/4/21.

Accession Number: 20210504–5159.

Comments Due: 5 p.m. ET 5/25/21.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: May 4, 2021.

Kimberly D. Bose,
 Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2016–0108; FRL–10016–66–OMS]

Agency Information Collection Activities; Renewal Request Submitted to OMB for Review and Approval; Comment Request; Notice of Supplemental Distribution of a Registered Pesticide Product (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an

information collection request (ICR), Notice of Supplemental Distribution of a Registered Pesticide Product (EPA ICR Number 0278.13, OMB Control Number 2070–0044) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28, 2021. EPA previously provided a 60-day public review opportunity via the **Federal Register** on August 17, 2020. With this submission, EPA is providing an additional 30-days for public review. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be received on or before June 9, 2021.

ADDRESSES: Submit your comments to EPA referencing Docket ID No. EPA–HQ–OPP–2016–0108, online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Carolyn Siu, Mission Support Division (7101M), Office of Program Support, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (703) 347–0159; email address: siu.carolyn@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, including the ICR that explains in detail the information collection activities and the related burden and cost estimates that are summarized in this document, are available in the docket for this ICR. The docket can be viewed online at

www.regulations.gov or in person at the EPA Docket Center, WJC West. Room. 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is (202) 566–1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: This information collection activity notifies the EPA of supplemental distribution of registered pesticide products. As mandated by FIFRA, as amended, EPA is responsible for the regulation of pesticides. FIFRA section 3(e) (7 U.S.C. 136a(e)) allows pesticide products with the same formulation, label claims, and manufacturer as a registered product to be distributed under the same registration as the basic product. Pesticide registrants may distribute or sell registered pesticides under a different product name in addition to the registered name, or under a different entity's name and address. Such distribution and sale are termed "supplemental distribution" and the product is termed a "distributor product." EPA requires pesticide registrants who enter into supplemental distribution agreements with other companies to submit EPA Form 8570–5, Notice of Supplemental Distribution of a Registered Pesticide Product. Supplemental registrations are only an extension of a currently federally registered pesticide product.

Form Number: 8570–5.

Respondents/Affected Entities: Pesticide and other agricultural chemical manufacturing.

Respondent's obligation to respond: Mandatory pursuant to Section 3(e) of FIFRA, as amended. Regulations pertaining to supplemental distribution of pesticide products are contained in Title 40 CFR part 152.132.

Estimated number of respondents: 1,885 (total).

Frequency of response: On occasion.

Total estimated burden: 603 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated costs: \$54,463 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There are no changes in the estimated respondent burden compared with that identified in the ICR currently approved by OMB.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY**[EPA-HQ-OECA-2014-0056; FRL-10022-30-OMS]****Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Shipbuilding and Ship Repair Facilities—Surface Coating (Renewal)****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Shipbuilding and Ship Repair Facilities—Surface Coating (EPA ICR Number 1712.11, OMB Control Number 2060-0330), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through May 31, 2021. Public comments were previously requested, via the **Federal Register**, on May 12, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before June 9, 2021.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2014-0056, online using www.regulations.gov (our preferred method), or by email to doctet.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. It is EPA policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public

Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov, or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA’s public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Shipbuilding and Ship Repair Facilities—Surface Coating applies to owners or operators of shipbuilding and ship repair facilities with primer and top -coat applications in manufacturing processes and in ship repair processes. Owners or operators of shipbuilding and ship repair facilities are required to report startup, initial performance test, and retest information. Facilities will also periodically report emission exceedances, changes to equipment, and comply with other requirements of the NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart II.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of shipbuilding and ship repair surface coating facilities.

Respondent’s obligation to respond:

Mandatory (40 CFR part 63, subpart II).

Estimated number of respondents: 56 (total).

Frequency of response: Semiannual.

Total estimated burden: 28,700 hours (per year). ‘Burden’ is defined at 5 CFR 1320.3(b).

Total estimated cost: \$3,200,000 (per year), includes \$0 in annualized capital/start up and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden on the respondents from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated

to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs. There is a decrease in the reported hour burden due to a correction. The previous ICR incorrect included burden for federal facilities, which has been removed in this request.

Courtney Kerwin,

Director, Regulatory Support Division.

[FR Doc. 2021-09791 Filed 5-7-21; 8:45 am]

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY**[FRL-10022-14-Region 3]****Draft TMDL for Sediment in the Indian Creek Watershed in Montgomery County, Pennsylvania****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice; request for public comment.

SUMMARY: The Environmental Protection Agency (EPA) is publishing for public review and comment a draft total maximum daily load (TMDL) for sediment in the Indian Creek Watershed in Montgomery County, Pennsylvania pursuant to Section 303(d) of the Clean Water Act. To assist the public in their understanding of the draft TMDL and provide an overview of the TMDL process, EPA invites the public to attend a virtual public meeting. Section 303(d) of the Clean Water Act requires that each state identify those waters (called “water quality-limited segments”) for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards and for which total maximum daily loads (TMDLs) must be developed. A TMDL establishes a target for the total load of a particular pollutant that a waterbody can assimilate without exceeding water quality standards and divides that load into wasteload allocations, given to point sources, load allocations, given to nonpoint sources and natural background, and a margin of safety, which takes into account any uncertainty. TMDLs provide a framework to achieve water quality standards in a watershed and inform other federal and state programs of the necessary pollutant reductions needed

by sources to achieve those standards. The draft TMDL report and information pertaining to the virtual public meeting is available from EPA Region 3's website at: <https://www.epa.gov/tmdl/revise-sediment-tmdl-indian-creek-watershed-montgomery-county-pennsylvania>.

DATES: Comments must be received on or before June 24, 2021. The public is welcomed to attend a virtual public meeting on June 8, 2021 from 1–2:30 p.m.

ADDRESSES: Comments on the draft TMDL must be received in writing and sent by electronic mail to Ms. Jillian Adair at adair.jillian@epa.gov or by mail to Ms. Jillian Adair, Water Division (3WD42), U.S. Environmental Protection Agency Region 3, 1650 Arch Street, Philadelphia, PA 19103–2029. Electronic mail submissions including body text and attachments are limited to 25 megabytes. In addition, EPA cannot receive electronic mail attachments in ZIP format (.zip). To attend the virtual public meeting, please use the weblink or conference line phone number provided at the above weblink in the **SUMMARY**.

FOR FURTHER INFORMATION CONTACT: Jillian Adair at adair.jillian@epa.gov or (215) 814–5713.

SUPPLEMENTARY INFORMATION: On June 30, 2008, EPA established a sediment TMDL for the Indian Creek Watershed. On October 17, 2011 a complaint was filed against EPA regarding the TMDL [Civil Action No. 2:11-cv-06489-CDJ (E.D.PA)]. EPA then agreed to reconsider the TMDL and investigate several concerns raised by the plaintiffs. On March 21, 2014, EPA issued a reconsideration document, which identified certain concerns that the reference watershed approach and sediment loading rates used should be revisited. The court granted EPA's request for a voluntary remand of the 2008 sediment TMDL on April 3, 2014. EPA subsequently solicited input to seek relevant data and feedback, including four stakeholder meetings from 2014 to 2018 as part of its efforts to develop a revised draft sediment TMDL. EPA considered the information and data that were submitted by various stakeholders as part of the TMDL development effort. That information can also be accessed at the above weblink in the **SUMMARY**.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2019–0178; FRL–10023–89–OMS]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Ethylene Oxide Commercial Sterilization Facilities National Emission Standards for Hazardous Air Pollutants (NESHAP) Technology Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The U.S. Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Ethylene Oxide Commercial Sterilization Facilities National Emission Standards for Hazardous Air Pollutants (NESHAP) Technology Review (EPA ICR Number 2623.01, OMB Control Number 2060–NEW), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA). This is a request for approval of a new collection. Public comments were previously requested via the **Federal Register** on June 12, 2020, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A complete description of the ICR is provided below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before June 9, 2021.

ADDRESSES: Submit your comments to EPA, referencing Docket ID No. EPA–HQ–OAR–2019–0178, online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain.

Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Mr. Matthew Witosky, Sector Policies and Programs Division (E143–05), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711; telephone number: (919) 541–2865; email address: witosky.matthew@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents explaining in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov/>. The telephone number for the Docket Center is (202) 566–1742. For additional information about EPA's Docket Center services and the current status, please visit us online at <https://www.epa.gov/dockets>.

Abstract: The NESHAP for EtO Commercial Sterilization and Fumigation Operations were finalized in December 1994 at 40 CFR part 63, subpart O. The NESHAP establishes emission standards for both major and area sources that use at least 1 ton of EtO in sterilization or fumigation operations in any 12-month period. The standards require existing and new major sources to control emissions to the level achievable by the maximum achievable control technology and require existing and new area sources to control emissions using generally available control technology. The EPA completed a residual risk and technology review for the NESHAP in 2006 and, at that time, concluded that the risk under existing standards were acceptable and provided an ample margin of safety. More recently, in 2016, the EPA released its updated Integrated Risk Information System unit risk estimate for EtO, which indicated that cancer risks from EtO were significantly higher than previously understood. Subsequently, the National Air Toxics Assessment (NATA) released in August 2018, identified EtO emissions as an important risk driver in several areas across the country. Further investigation revealed the EtO Commercial Sterilization source category contributes to some of these risks, which has led the EPA to evaluate, in greater depth, potential options to reduce emissions of EtO from the source category.

Since 2019, the EPA has been gathering additional information to evaluate opportunities to reduce EtO emissions through potential rule revisions and more immediate emission

reduction steps. The goal of the data gathering efforts is to better understand the emissions sources, measurement and monitoring techniques, and available control technologies and their associated efficiencies. These efforts have included an advance notice of proposed rulemaking (ANPRM) requesting facility-specific data on process controls and operational practices as well as a CAA section 114 questionnaire that was distributed to 9 companies engaged in EtO commercial sterilization. The instructions and questionnaire were posted to the EPA web page where they were accessed by facilities. Electronic responses were required within 60 days or by February 6, 2020. While these data gathering efforts have been successful, there are still several important information gaps that should be filled prior to any final rulemaking activity. Therefore, the EPA is now exercising its authority under section 114(a) of the CAA to broaden its data collection efforts to include all facilities subject to 40 CFR part 63, subpart O that were not involved in the December 2019 questionnaire. The data collected through the initial questionnaire and this new ICR would enable the EPA to have a complete understanding of all emissions, emissions sources, processes, and control technologies in use at EtO sterilization facilities nationwide, providing a robust foundation for a final rulemaking.

Form numbers: Main Questionnaire; Supplement 1 (as needed); Supplement 2 (as needed); Supplement 3 (as needed).

Respondents/affected entities: Facilities subject to 40 CFR part 63, subpart O that are not included in the initial December 2019 questionnaire.

Respondent's obligation to respond: Responses to the ICR are mandatory under the authority of section 114 of the CAA. All respondents are required to fill out the main questionnaire, while Supplements 1, 2, and 3 may be filled out as needed.

Estimated number of respondents: 61 (total).

Frequency of response: This is a one-time questionnaire.

Total estimated burden: 6,573 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$604,027 (per year), includes \$920 annualized capital or operation & maintenance costs.

Changes in the estimates: This is a new collection. Therefore, there is no change in burden.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-10023-47-Region 9]

Public Water System Supervision Program Revision for the State of Nevada

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of tentative approval.

SUMMARY: Notice is hereby given that the State of Nevada (State) revised its approved Public Water System Supervision (PWSS) Program under the federal Safe Drinking Water Act (SDWA) by incorporating by reference the federal Arsenic Rule. The Environmental Protection Agency (EPA) has determined that the State's revisions are no less stringent than the corresponding Federal regulations and otherwise meet applicable SDWA primacy requirements. Therefore, EPA intends to approve the stated revisions to the State's PWSS Program.

DATES: A request for a public hearing must be received on or before June 9, 2021.

ADDRESSES: All documents relating to this determination are available for inspection online at <http://ndep.nv.gov/posts>. In addition, documents relating to this determination are available for inspection by appointment between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, except official State or Federal holidays at the following address: Nevada Department of Environmental Protection, Administration Office, 901 South Stewart Street, Suite 4001, Carson City, NV 89701. Please contact the Bureau of Safe Drinking Water at (775) 687-9521 to schedule an appointment.

FOR FURTHER INFORMATION CONTACT: Jacob Jenzen, United States Environmental Protection Agency, Region 9, Drinking Water Section, via telephone number: (415) 972-3570 or email address: Jenzen.Jacob@epa.gov.

SUPPLEMENTARY INFORMATION:

Background. EPA approved the State's initial application for PWSS Program primary enforcement authority ("primacy") on February 27, 1978 (43 FR 8030). Since initial approval, EPA

has approved various revisions to Nevada's PWSS Program. For the revisions covered by this action, EPA revised the Arsenic Rule on January 22, 2001 (66 FR 6976). The revisions included a more stringent federal standard for arsenic in drinking water from 0.050 mg/L to 0.010 mg/L to better protect public health. The State submitted its final application to add the Arsenic Rule to its approved PWSS Program on December 30, 2011, followed by an application supplement on February 11, 2021. EPA has determined that the Arsenic Rule was incorporated by reference into the Nevada Administrative Code (NAC), Title 40 Chapter 445A, in a manner that Nevada's regulations are comparable to and no less stringent than the federal requirements. EPA has also determined that State's primacy revision meets all of the regulatory requirements for approval, as set forth in 40 CFR 142.12, including a side-by-side comparison of the Federal requirements and the corresponding State authorities, additional materials to support special primacy requirements of 40 CFR 142.16, and a statement by the Nevada Attorney General certifying that Nevada's laws and regulations adopted by the State to carry out the program revisions were duly adopted and are enforceable. Therefore, EPA intends to approve the State's revisions as part of its PWSS Program.

Public Process. Any interested party may request a public hearing on this determination. A request for a public hearing must be received or postmarked by June 9, 2021, and addressed to the Regional Administrator at the EPA Region 9, via the following email address: R9dw-program@epa.gov. Please note, "State Primacy Rule Determination" in the subject line of the email. The Regional Administrator may deny frivolous or insubstantial requests for a hearing. If a substantial request for a public hearing is made by June 9, 2021, EPA Region 9 will hold a public hearing. Any request for a public hearing shall include the following information: 1. The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; 2. A brief statement of the requesting person's interest in the Regional Administrator's determination and a brief statement of the information that the requesting person intends to submit at such hearing; and 3. The signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

If EPA does not receive a timely and appropriate request for a hearing and the Regional Administrator does not elect to hold a hearing on her own motion, this determination shall become final and effective on June 10, 2021, and no further public notice will be issued.

Authority: Section 1413 of the Safe Drinking Water Act, as amended, 42 U.S.C. 300g-2 (1996), and 40 CFR part 142 of the National Primary Drinking Water Regulations.

Dated: April 30, 2021.

Deborah Jordan,

Acting Regional Administrator, EPA Region 9.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-10022-08-OMS]

Cross-Media Electronic Reporting: Authorized Program Revision Approval, State of New Hampshire

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the Environmental Protection Agency's (EPA) approval of the State of New Hampshire's request to revise/modify certain of its EPA-authorized programs to allow electronic reporting.

DATES: EPA approves the authorized program revisions/modifications as of May 10, 2021.

FOR FURTHER INFORMATION CONTACT:

Shirley M. Miller, CROMERR Program Manager, U.S. Environmental Protection Agency, Office of Information Management, Mail Stop 2824T, 1200 Pennsylvania Avenue NW, Washington, DC 20460, (202) 566-2908, miller.shirley@epa.gov.

SUPPLEMENTARY INFORMATION: On October 13, 2005, the final Cross-Media Electronic Reporting Rule (CROMERR) was published in the **Federal Register** (70 FR 59848) and codified as part 3 of Title 40 of the CFR. CROMERR establishes electronic reporting as an acceptable regulatory alternative to paper reporting and establishes requirements to assure that electronic documents are as legally dependable as their paper counterparts. Subpart D of CROMERR requires that state, tribal or local government agencies that receive, or wish to begin receiving, electronic reports under their EPA-authorized programs must apply to EPA for a revision or modification of those programs and obtain EPA approval.

Subpart D provides standards for such approvals based on consideration of the electronic document receiving systems that the state, tribe, or local government will use to implement the electronic reporting. Additionally, § 3.1000(b) through (e) of 40 CFR part 3, subpart D provides special procedures for program revisions and modifications to allow electronic reporting, to be used at the option of the state, tribe or local government in place of procedures available under existing program-specific authorization regulations. An application submitted under the subpart D procedures must show that the state, tribe or local government has sufficient legal authority to implement the electronic reporting components of the programs covered by the application and will use electronic document receiving systems that meet the applicable subpart D requirements.

On September 17, 2020, the New Hampshire Department of Environmental Services (NHDES) submitted two applications titled NH Online Forms (nForm) and State and Local Emissions Inventory System (SLEIS) for revisions/modifications to its EPA-approved programs under title 40 CFR to allow new electronic reporting. EPA reviewed NHDES's request to revise/modify its EPA-authorized programs and, based on this review, EPA determined that the applications met the standards for approval of authorized program revisions/modifications set out in 40 CFR part 3, subpart D. In accordance with 40 CFR 3.1000(d), this notice of EPA's decision to approve New Hampshire's request to revise/modify its following EPA-authorized programs to allow electronic reporting under 40 CFR parts 52, 60, 62, 63, 70, 142, 145, 239, 271, 281, and 763 to allow electronic reporting under 40 CFR parts 50-52, 60-65, 70, 141, 144, 146, 240-259, 260-270, 272-280 and 763 is being published in the **Federal Register**:

Part 52: Approval and Promulgation of Implementation Plans (SIP/Clean Air Act Title II) Reporting under CFR 50-52

Part 60: Standards of Performance for New Stationary Sources (NSPS/CAR/Clean Air Act Title III) Reporting under CFR 60 & 65

Part 62: Approval and Promulgation of State Plans for Designated Facilities and Pollutants (NSPS/Clean Air Act Title III—Hospital/Medical) Reporting under CFR 62

Part 63: National Emission Standards for Hazardous Air Pollutants for Source Categories (NESHAP MACT/Clean Air Act Title III) Reporting under CFR 61, 63 & 65

Part 70: State Operating Permit Programs (Clean Air Act Title V) Reporting under CFR 64 & 70

Part 142: National Primary Drinking Water Regulations Implementation (NPDWR) Reporting under CFR 141

Part 145: State Underground Injection Control Programs (UIC) Reporting under CFR 144 & 146

Part 239: Requirements for State Permit Program Determination of Adequacy (RCRA Subtitle C) Reporting under CFR 240-259

Part 271: Requirements for Authorization of State Hazardous Waste Programs (RCRA Subtitle C) Reporting under CFR 260-270, 272-279

Part 281: Technical Standards and Corrective Action Requirements for Owners and Operators of Underground Storage Tanks (UST) Reporting under CFR 280

Part 763: Asbestos Reporting under CFR 763NHDES was notified of EPA's determination to approve its application with respect to the authorized programs listed above.

Also, in this notice, EPA is informing interested persons that they may request a public hearing on EPA's action to approve the State of New Hampshire's request to revise its authorized public water system program under 40 CFR part 142, in accordance with 40 CFR 3.1000(f). Requests for a hearing must be submitted to EPA within 30 days of publication of this **Federal Register** notice. Such requests should include the following information:

(1) The name, address and telephone number of the individual, organization or other entity requesting a hearing;

(2) A brief statement of the requesting person's interest in EPA's determination, a brief explanation as to why EPA should hold a hearing, and any other information that the requesting person wants EPA to consider when determining whether to grant the request;

(3) The signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

In the event a hearing is requested and granted, EPA will provide notice of the hearing in the **Federal Register** not less than 15 days prior to the scheduled hearing date. Frivolous or insubstantial requests for hearing may be denied by EPA. Following such a public hearing, EPA will review the record of the hearing and issue an order either affirming this determination or rescinding such determination. If no timely request for a hearing is received and granted, EPA's approval of the State

of New Hampshire's request to revise its part 142—National Primary Drinking Water Regulations Implementation program to allow electronic reporting will become effective 30 days after this notice is published, pursuant to CROMERR section 3.1000(f)(4).

Dated: May 3, 2021.

Jennifer Campbell,

Director, Office of Information Management.

BILLING CODE 6560-50-P

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Termination of Receiverships

The Federal Deposit Insurance Corporation (FDIC or Receiver), as Receiver for each of the following insured depository institutions, was charged with the duty of winding up the affairs of the former institutions and liquidating all related assets. The Receiver has fulfilled its obligations and

made all dividend distributions required by law.

NOTICE OF TERMINATION OF RECEIVERSHIPS

Fund	Receivership name	City	State	Termination date
10311	Cooper Star Bank	Scottsdale	AZ	05/01/2021
10313	Tifton Banking Company	Tifton	GA	05/01/2021
10353	Bartow County Bank	Cartersville	GA	05/01/2021
10371	McIntosh State Bank	Jackson	GA	05/01/2021
10377	High Trust Bank	Stockbridge	GA	05/01/2021
10419	The First State Bank	Stockbridge	GA	05/01/2021
10426	Central Bank of Georgia	Ellaville	GA	05/01/2021

The Receiver has further irrevocably authorized and appointed FDIC-Corporate as its attorney-in-fact to execute and file any and all documents that may be required to be executed by the Receiver which FDIC-Corporate, in its sole discretion, deems necessary, including but not limited to releases, discharges, satisfactions, endorsements, assignments, and deeds. Effective on the termination dates listed above, the Receiverships have been terminated, the Receiver has been discharged, and the Receiverships have ceased to exist as legal entities.

(Authority: 12 U.S.C. 1819)

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on May 5, 2021.

Debra A. Decker,

Deputy Executive Secretary.

BILLING CODE 6714-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Conditional Sailing Order Technical Instructions and Operations Manual

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC), within the Department of Health and Human

Services (HHS), announces the availability of additional technical instructions and documents released under its Framework for Conditional Sailing Order (CSO). These documents apply to cruise ship operators with cruise ships operating in U.S. waters and cruise ship operators who are operating cruise ships outside of U.S. waters, but intend for their cruise ships to return to operating in U.S. waters while CDC's Conditional Sailing Order remains in effect.

DATES: These documents were available April 2, 2021 and May 5, 2021.

FOR FURTHER INFORMATION CONTACT:

Jennifer Buigut, Division of Global Migration and Quarantine, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H16-4, Atlanta, GA 30329. Phone: 404-498-1600. Email: dgmqpolicyoffice@cdc.gov.

SUPPLEMENTARY INFORMATION: On October 30, 2020 CDC issued an Agency Order establishing a framework for a phased approach to resuming cruise ship passenger operations in U.S. waters (85 FR 70153). The phased approach includes: (1) Establishment of laboratory testing of crew onboard cruise ships in U.S. waters; (2) simulated voyages designed to test a cruise ship operators' ability to mitigate COVID-19 onboard cruise ships; (3) a certification process; and (4) a return to passenger voyages in a manner that mitigates the risk of COVID-19 introduction, transmission, or spread among passengers and crew onboard ships and ashore to communities.

In the initial crew testing phase, the Order additionally contained requirements for: (1) Shoreside COVID-19 laboratory screening testing of all crew currently onboard cruise ships; (2) onboard diagnostic testing capabilities for symptomatic travelers (crew and future passengers); (3) shoreside COVID-19 laboratory screening testing of all newly embarking crew; and (4) continued compliance with complete, accurate, and acknowledged, No Sail Order Response Plans.

On April 2, 2021 CDC released Phase 2A Technical Instructions. Phase 2A Technical Instructions assists cruise ship operators in documenting the approval of U.S. port and local health authorities as a condition of receiving or retaining controlled free pratique to conduct a simulated voyage or to obtain a COVID-19 Conditional Sailing Certificate to commence restricted passenger voyages. This includes documenting the approval of U.S. port and local health authorities in developing medical care, housing, and port components (including a vaccination component).

On May 5, 2021 CDC released two documents under Phase 2B and Phase 3 of the Conditional Sailing Framework: Technical Instructions for Simulated Voyages by Cruise Ship Operators under CDC's Framework for Conditional Sailing Order and COVID-19 Operations Manual for Simulated and Restricted Voyages under the Framework for Conditional Sailing Order.

The Technical Instructions for Simulated Voyages provides technical instructions for Phase 2B of CDC's CSO

for cruise ship operators to test the efficacy of their health and safety protocols in U.S. waters. In lieu of conducting a simulated voyage, a cruise ship operator's responsible officials, at their discretion, may sign and submit to CDC an attestation under 18 U.S.C. 1001 that 98 percent of crew are fully vaccinated and submit to CDC a clear and specific vaccination plan and timeline to limit cruise ship sailings to 95 percent of passengers who have been verified by the cruise ship operator as fully vaccinated prior to sailing.

CDC's oversight and inspection of cruise ships during simulated and restricted passenger voyages will be based on the Operations Manual. The findings and/or observations of these inspections will be shared with the cruise ship operator. Cruise ship operators are expected to align their health and safety protocols with any CDC findings and observations. Such findings and observations must also be incorporated into the cruise ship operator's simulated voyage after-action report or as a condition of applying for and retaining permission to conduct restricted passenger voyages. Based on these inspections, CDC may also issue additional recommendations to the cruise ship operator that the operator should consider for adoption into their health and safety protocols as best practices.

The Technical Instructions document for Cruise Ship Operator's Agreement with Port and Local Health Authorities under CDC's Framework for Conditional Sailing Order is found at <https://www.cdc.gov/quarantine/cruise/ti-simulated-voyages-cso.html>.

The Technical Instructions document for Simulated Voyages by Cruise Ship Operators under CDC's Framework for Conditional Sailing Order is found at <https://www.cdc.gov/quarantine/cruise/ti-simulated-voyages-cso.html>.

The COVID-19 Operations Manual for Simulated and Restricted Voyages under the Framework for Conditional Sailing Order is found at <https://www.cdc.gov/quarantine/cruise/covid19-operations-manual-cso.html>.

Authority

The Technical Instructions and Operations Manual are issued pursuant to the Framework for Conditional Sailing which was issued under the authority of Sections 361 and 365 of the Public Health Service Act (42 U.S.C. 264, 268) and 42 CFR 70.2, 71.31(b), 71.32(b).

Dated: May 5, 2021.

Sherri Berger,

Acting Chief of Staff, Centers for Disease Control and Prevention.

[FR Doc. 2021-09895 Filed 5-6-21; 4:15 pm]

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC-2021-0049]

Advisory Committee on Immunization Practices (ACIP)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting and request for comment.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC), announces the following meeting of the Advisory Committee on Immunization Practices (ACIP). This meeting is open to the public. The meeting will be webcast live via the World Wide Web.

DATES: The meeting will be held on May 12, 2021, from 11:00 a.m. to 5:00 p.m., EDT (dates and times subject to change, see the ACIP website for updates: <http://www.cdc.gov/vaccines/acip/index.html>). The public may submit comments from May 10, 2021 through May 12, 2021.

ADDRESSES: For more information on ACIP please visit the ACIP website: <http://www.cdc.gov/vaccines/acip/index.html>.

You may submit comments, identified by Docket No. CDC-2021-0049 by any of the following methods:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments.

- **Mail:** Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS-H24-8, Atlanta, GA 30329-4027, Attn: May 12, 2021 ACIP Meeting.

Instructions: All submissions received must include the Agency name and Docket Number. All relevant comments received in conformance with the <https://www.regulations.gov> suitability policy will be posted without change to <https://www.regulations.gov>, including any personal information provided. For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Stephanie Thomas, ACIP Committee

Management Specialist, Centers for Disease Control and Prevention, National Center for Immunization and Respiratory Diseases, 1600 Clifton Road NE, MS-H24-8, Atlanta, GA 30329-4027; Telephone: 404-639-8367; Email: ACIP@cdc.gov.

SUPPLEMENTARY INFORMATION: In accordance with 41 CFR 102-3.150(b), less than 15 calendar days' notice is being given for this meeting due to the exceptional circumstances of the COVID-19 pandemic and rapidly evolving COVID-19 vaccine development and regulatory processes. The Secretary of Health and Human Services has determined that COVID-19 is a Public Health Emergency. A notice of this ACIP meeting has also been posted on CDC's ACIP website at: <http://www.cdc.gov/vaccines/acip/index.html>. In addition, CDC has sent notice of this ACIP meeting by email to those who subscribe to receive email updates about ACIP.

Purpose: The committee is charged with advising the Director, CDC, on the use of immunizing agents. In addition, under 42 U.S.C. 1396s, the committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children (VFC) program, along with schedules regarding dosing interval, dosage, and contraindications to administration of vaccines. Further, under provisions of the Affordable Care Act, section 2713 of the Public Health Service Act, immunization recommendations of the ACIP that have been approved by the Director of the Centers for Disease Control and Prevention and appear on CDC immunization schedules must be covered by applicable health plans.

Matters to be Considered: The agenda will include discussions on COVID-19 vaccines, including use of the Pfizer-BioNTech COVID-19 vaccine under the Food and Drug Administration's (FDA) expanded Emergency Use Authorization (EUA) for adolescents 12-15 years of age. A recommendation vote(s) is scheduled. Agenda items are subject to change as priorities dictate. For more information on the meeting agenda visit <https://www.cdc.gov/vaccines/acip/meetings/meetings-info.html>.

Meeting Information: The meeting will be webcast live via the World Wide Web; for more information on ACIP please visit the ACIP website: <http://www.cdc.gov/vaccines/acip/index.html>.

Public Participation

Interested persons or organizations are invited to participate by submitting written views, recommendations, and

data. Please note that comments received, including attachments and other supporting materials, are part of the public record and are subject to public disclosure. Comments will be posted on <https://www.regulations.gov>. Therefore, do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure. If you include your name, contact information, or other information that identifies you in the body of your comments, that information will be on public display. CDC will review all submissions and may choose to redact, or withhold, submissions containing private or proprietary information such as Social Security numbers, medical information, inappropriate language, or duplicate/near duplicate examples of a mass-mail campaign. CDC will carefully consider all comments submitted into the docket.

Written Public Comment: Written comments must be received on or before May 12, 2021.

Oral Public Comment: This meeting will include time for members of the public to make an oral comment. Oral public comment will occur before any scheduled votes including all votes relevant to the ACIP's Affordable Care Act and Vaccines for Children Program roles. Priority will be given to individuals who submit a request to make an oral public comment before the meeting according to the procedures below.

Procedure for Oral Public Comment: All persons interested in making an oral public comment at the May 12, 2021 ACIP meeting must submit a request at <http://www.cdc.gov/vaccines/acip/meetings/> no later than 11:59 p.m., EDT, May 10, 2021 according to the instructions provided.

If the number of persons requesting to speak is greater than can be reasonably accommodated during the scheduled time, CDC will conduct a lottery to determine the speakers for the scheduled public comment session. CDC staff will notify individuals regarding their request to speak by email by 12:00 p.m., EDT, May 11, 2021. To accommodate the significant interest in participation in the oral public comment session of ACIP meetings, each speaker will be limited to 3 minutes, and each speaker may only speak once per meeting.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other

committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

*Director, Strategic Business Initiatives Unit,
Office of the Chief Operating Officer, Centers
for Disease Control and Prevention.*

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[CFDA Number: 93.676]

Announcement of Intent To Issue Multiple Single-Source Awards To Provide Residential (Shelter) and Transitional Foster Care Services, and for Finger Print Services for Unaccompanied Children

AGENCY: Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), Department of Health and Human Services (HHS).

ACTION: Notice of issuance of multiple single-source awards to seven recipients.

SUMMARY: ACF, ORR announces the issuance of multiple Single-Source Awards to seven recipients in the amount of \$65,366,800. ORR has been identifying additional permanent capacity to provide shelter for recent increases in apprehensions of Unaccompanied Children (UC) at the Southwest Border. The addition of permanent capacity is a prudent step to ensure that ORR is able to meet its responsibility, by law, to provide shelter and appropriate services for UC referred to its care by the Department of Homeland Security.

DATES: The proposed period of performance is May 1, 2021 to May 1, 2022.

FOR FURTHER INFORMATION CONTACT:

Stephen Antkowiak, Office of Refugee Resettlement, Division of Unaccompanied Alien Children Operations, 330 Street SW, Washington, DC 20447. Phone: 202-260-6165. Email: stephen.antkowiak@acf.hhs.gov.

SUPPLEMENTARY INFORMATION: ORR is continuously monitoring its capacity to shelter the UC referred to HHS, as well as the information received from interagency partners, to inform any future decisions or actions.

ORR has specific requirements for the provision of services. Award recipients must have the infrastructure, licensing,

experience, and appropriate level of trained staff to meet those requirements.

ORR announces the intent to award the following single-source awards:

Recipient	Award amount
Child Crisis, Mesa, AZ	\$5,780,118
Catholic Guardian Services, New York, NY	5,183,433
Center for Family Services, Camden, NJ	1,665,980
LIRS—Shelter/TFC, Multiple Locations	27,767,725
Baptiste Group, Memphis, TN	14,135,642
Bethany Christian Service, Multiple Locations	7,018,576
LIRS—Safe Release Expansion, Multiple Locations	3,815,326

Statutory Authority: This program is authorized by—

(A) Section 462 of the Homeland Security Act of 2002, which in March 2003, transferred responsibility for the care and custody of UAC from the Commissioner of the former Immigration and Naturalization Service to the Director of ORR within HHS.

(B) The *Flores* Settlement Agreement, Case No. CV85-4544RJK (C.D. Cal. 1996), as well as the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (Pub. L. 110-457), which authorizes post release services under certain conditions to eligible children. All programs must comply with the *Flores* Settlement Agreement, Case No. CV85-4544-RJK (C.D. Cal. 1996); pertinent regulations; and ORR policies and procedures.

Elizabeth Leo,

Senior Grants Policy Specialist, Office of Grants Policy, Office of Administration.

[Docket Nos. FDA-2020-N-2030; FDA-2017-N-4951; FDA-2017-N-5569; FDA-2020-N-1652; FDA-2017-N-7012; and FDA-2019-N-4763]

Agency Information Collection Activities; Announcement of Office of Management and Budget Approvals

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is publishing a list of information collections that have

been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA).

FOR FURTHER INFORMATION CONTACT: Ila S. Mizrahi, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD

20852, 301–796–7726, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: The following is a list of FDA information collections recently approved by OMB under section 3507 of the PRA (44 U.S.C. 3507). The OMB control number and expiration date of OMB approval for each information collection are shown

in table 1. Copies of the supporting statements for the information collections are available on the internet at <https://www.reginfo.gov/public/do/PRAMain>. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

TABLE 1—LIST OF INFORMATION COLLECTIONS APPROVED BY OMB

Title of collection	OMB control No.	Date approval expires
Applications for FDA Approval to Market a New Drug	0910–0001	3/31/2024
Medical Devices; Humanitarian Use Devices	0910–0332	3/31/2024
Medical Devices; Device Tracking	0910–0442	3/31/2024
Dispute Resolution Procedures for Science Based Decision on Products Regulated by CVM	0910–0566	3/31/2024
Use of Public Human Genetic Variant Databases to Support Clinical Validity for Genetic and Genomic-Based In Vitro Diagnostics	0910–0850	3/31/2024
Assessment of Terms and Phrases Commonly Used in Prescription Drug Promotion	0910–0895	3/31/2024

Dated: May 4, 2021.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. FDA–2021–N–0387]

Agency Information Collection Activities; Proposed Collection; Comment Request; Recommended Content of Medical Product Communications That Are Consistent With the Food and Drug Administration-Required Labeling and Recommendations for Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information collection associated with

recommended content of medical product communications that are consistent with the FDA-required labeling and recommendations for drug and device manufacturer communications with payors, formulary committees, and similar entities.

DATES: Submit either electronic or written comments on the collection of information by July 9, 2021.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before July 9, 2021. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of July 9, 2021. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note

that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2021–N–0387 for “Agency Information Collection Activities; Proposed Collection; Comment Request; Recommended Content of Medical Product Communications That Are Consistent With the FDA-Required Labeling and Recommendations for Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities.” Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly

viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–5733, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the

public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

I. Medical Product Communications That Are Consistent With the FDA-Required Labeling—Questions and Answers

OMB Control Number 0910–0856—Extension

This information collection supports the Federal Food, Drug, and Cosmetic Act (FD&C Act) and FDA’s implementing regulations that govern drug and device labeling and prescription drug and restricted device advertising. The FD&C Act specifies that a drug or device shall be deemed to be misbranded if its labeling is false or misleading in any particular (section 502(a) (21 U.S.C. 352(a)) and that labeling may be considered misleading if it fails to reveal material facts about the product being promoted, including facts that are material in light of the representations made in a promotional piece (section 201(n) (21 U.S.C. 321(n))). Similarly, under sections 201(n) and 502(n) of the FD&C Act and FDA’s implementing regulations (21 CFR 202.1(e)(5)(i) and (iii)), an advertisement for a prescription drug must not be false or misleading with respect to side effects, contraindications, or effectiveness, or fail to reveal material facts about the product being advertised, including facts that are material in light

of the representations made in a promotional piece. The FD&C Act also specifies that restricted device advertisements must not be false or misleading (section 502(q)(1)) and must reveal facts that are material about the product being advertised (section 201(n)).

To assist respondents with the requirements drug and device labeling and prescription drug and restricted device advertising, we developed the guidance for industry entitled “Medical Product Communications That Are Consistent With the FDA-Required Labeling—Questions and Answers” (June 2018) (medical product communications guidance), available at <https://www.fda.gov/media/133619/download>. This medical product communications guidance includes recommendations that firms consider when developing “consistent with the FDA-required labeling (CFL)” presentations in their labeling and advertising materials to help ensure the presentations are not false or misleading in violation of the FD&C Act and FDA’s implementing regulations. The guidance also describes FDA’s thinking when examining the consistency of a firm’s product communications with that product’s own FDA-required labeling.

As explained in the guidance, if a firm communicates information that is not contained in its product’s FDA-required labeling but that is determined to be consistent with the FDA-required labeling, FDA does not intend to rely on that communication to establish a new intended use that is different from the use or uses for which the product is legally marketed. Establishing a product’s intended uses is an element in establishing certain violations under the FD&C Act and Public Health Service Act. Firms’ communications about their products that are consistent with the products’ FDA-required labeling but that are false or misleading may subject a firm to enforcement action under the FD&C Act. Thus, the guidance not only describes FDA’s thinking on communications that are consistent with the FDA-required labeling, but also provides general recommendations intended to help firms comply with requirements in the FD&C Act and FDA’s implementing regulations for conveying information that is consistent with the FDA-required labeling in a truthful and non-misleading way. The medical product communications guidance recommends that firms accurately represent in the communications any study results or other data and information that are relied upon to support a firm’s CFL promotional communication. Other

recommendations include the clear and prominent disclosure of aspects of study design and methodology that are material for audiences to accurately interpret the information being presented (e.g., type of study, study objectives, product dosage and use regimens, control or controls used, patient population studied), as well as material limitations related to the study design, methodology, and results. Also, the guidance recommends that firms accurately characterize and contextualize the relevant information

about the product, including by disclosing unfavorable or inconsistent findings. In addition, the guidance recommends that firms disclose material contextual information from the FDA-required labeling in these communications, such as data and information from studies in the FDA-required labeling that are relevant to the data or information presented in the CFL promotional communication.

The recommendations will help ensure that health care professional and consumer audiences receive truthful

information about the benefits and risks of drugs and devices in firms' CFL promotional communications and that material contextual information is included in these communications so that audiences are not misled. Accurate information helps these audiences know whether drugs or devices may be appropriate for them or their patients and know what they can expect to experience when prescribing or using these products.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN ¹

Information collection activity	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
Recommended information to be included when firms choose to disseminate communications that are consistent with the FDA-required labeling	324	30	9,720	4	38,880

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

Since our last request for OMB approval, we have made no adjustments to the currently approved burden estimate.

II. Recommendations for Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities

OMB Control Number 0910–0857—Extension

This information collection also supports implementation of section 502(a) of the FD&C Act and applicable Agency regulations. Section 502(a)(1) of the FD&C Act provides that a drug or device is deemed to be misbranded “[i]f its labeling is false or misleading in any particular.” Under longstanding FDA practice and FDA’s statute and regulations, and under case law, *labeling* encompasses more than merely the label of the drug, but extends to other written, printed, or graphic matter “accompanying such article” (section 201(m) of the FD&C Act; see also 21 CFR 1.3(a)). Section 502(a) also includes a provision about communication of health care economic information (HCEI) to payors through labeling or advertising. To assist respondents in this regard, we developed the guidance for industry and review staff entitled “Drug and Device Manufacturer Communications With Payors, Formulary Committees, and Similar Entities—Questions and Answers” (June 2018) (drug and device communications guidance), available at <https://www.fda.gov/media/133620/download>.

This drug and device communications guidance includes recommendations regarding information firms should include in HCEI for prescription drugs if they choose to disseminate such materials (HCEI materials) to payors, in accordance with section 502(a) of the FD&C Act. Specifically, if a manufacturer communicates HCEI for approved prescription drugs (including biological products that also meet the definition of *drug* under the FD&C Act and approved or cleared medical devices (collectively referred to as *medical products*)) to payors, FDA recommends that firms include in HCEI materials disseminated to payors information about: (1) Various aspects of study design and methodology of an economic analysis (*i.e.*, type of analysis, modeling technique, patient population, perspective or viewpoint, treatment comparator, time horizon, outcome measures, cost estimates, and assumptions); (2) factors that limit generalizability of an economic analysis; limitations to an economic analysis; and (3) sensitivity analyses, if applicable, to allow for informed decision making by payors.

Furthermore, FDA recommends that firms include other information when disseminating HCEI materials, as applicable, to provide a balanced and complete presentation. Such information includes a statement of the FDA-approved indication of the drug and a copy of the most current FDA-approved labeling. Under section 502(a) of the FD&C Act, firms must also include a conspicuous and prominent

statement to describe any material differences between the HCEI and the FDA-approved labeling. HCEI materials should also disclose whether certain studies or data sources were omitted from an economic analysis and how the omission of those studies or data sources may alter the conclusions presented in the analysis. Moreover, FDA recommends that HCEI materials disclose important risk information associated with the approved use of the drug, and pursuant to section 502(a) of the FD&C Act, HCEI materials must disclose any additional risk information related to assumptions that vary from the approved labeling. In addition, HCEI materials should disclose potential financial or affiliation biases to the extent reasonably known by firms at the time of dissemination.

The drug and device communications guidance provides similar recommendations for HCEI materials disseminated to payors about approved or cleared devices.

If firms choose to make communications to payors about unapproved products or unapproved uses of approved or cleared products, FDA recommends that firms include a clear statement with their communications that the product or use is not approved or cleared and that the safety or effectiveness of the product or use has not been established.

We estimate the burden of this collection of information as follows:

TABLE 2—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN¹

Information collection activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Recommended information to be included when firms choose to disseminate HCEI materials to payors about approved prescription drugs	430	10.465	4,500	20	90,000
Recommended information to be included when firms choose to disseminate HCEI materials to payors about approved or cleared devices	236	10	2,360	20	47,200
Recommended information to be included when firms choose to disseminate information about unapproved products or unapproved uses of approved or cleared products	717	2	1,434	0.5 (30 minutes)	717
Follow-up information to payors regarding previously communicated information about unapproved products or unapproved uses of approved or cleared products	359	2	718	2	1,436
Total			9,012		139,353

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

We have adjusted the estimate of burden we associate with the information collection recommendations in the guidance to reflect an increase of 2,000 hours and 100 responses annually.

Dated: May 4, 2021.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2011–N–0742]

Agency Information Collection Activities; Proposed Collection; Comment Request; Registration of Producers of Drugs and Listing of Drugs in Commercial Distribution

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, we, or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information

collection associated with drug establishment registration and product listing requirements.

DATES: Submit either electronic or written comments on the collection of information by July 9, 2021.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before July 9, 2021. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of July 9, 2021. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your

comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2011–N–0742 for “Agency Information Collection Activities; Proposed Collection; Comment Request; Registration of Producers of Drugs and Listing of Drugs in Commercial Distribution.” Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper

submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A-12M, 11601 Landsdown St., North Bethesda, MD 20852, 301-796-5733, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501-3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information,

before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Registration of Producers of Drugs and Listing of Drugs in Commercial Distribution—21 CFR Part 207

OMB Control Number 0910-0045—Revision

This information collection supports implementation of drug establishment registration and listing requirements governed by FDA. These requirements are set forth in section 510 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360) and section 351 of the Public Health Service Act (42 U.S.C. 262) and provide for electronic submission of information. Agency regulations implementing these provisions are found in part 207 (21 CFR part 207) and set forth the scope, applicability, and content of information to be included in submissions. Except as provided in § 207.65, all information submitted under part 207 must be transmitted to FDA in an electronic format by using our electronic drug registration and listing system, in a form that we can process, review, and archive. For more information pertaining to drug establishment registration and listing, we invite you to visit our website at: <https://www.fda.gov/drugs/drug-approvals-and-databases/drug-establishments-current-registration-site>.

We are revising the information collection to include the collection of certain information required by the Coronavirus Aid, Relief, and Economic Security (CARES) Act. Section 3112 of the CARES Act requires that registrants under section 510 of the FD&C Act must annually report the amount of each drug listed that was manufactured, prepared,

propagated, compounded, or processed for commercial distribution. Section 3112(e) also authorizes FDA to require that registrants report this information electronically. Finally, section 3112(e) granted FDA the authority to require that registrants report this information at the time a public health emergency is declared.

To assist respondents to the information collection with the current electronic reporting requirements, we issued the guidance document entitled "Providing Regulatory Submissions in Electronic Format—Drug Establishment Registration and Drug Listing" (June 2009), available from our website at: <https://www.fda.gov/regulatory-information/search-fda-guidance-documents/providing-regulatory-submissions-electronic-format-drug-establishment-registration-and-drug-listing>. Guidance on the submission of the reporting required in section 3112(e) of the CARES Act is included on CDER's 2021 guidance agenda available from our website at: <https://www.fda.gov/media/134778/download>. Agency guidance documents are issued consistent with our good guidance practice regulations in 21 CFR 10.115, which provide for public comment at any time.

Registration under part 207: Unless otherwise exempt under section 510(g) of the FD&C Act or § 207.13, all manufacturers, repackers, relabelers, and salvagers must register each domestic establishment that manufactures, repacks, relabels, or salvages a drug, or an animal feed bearing or containing a new animal drug, and each foreign establishment that manufactures, repacks, relabels, or salvages a drug, or an animal feed bearing or containing a new animal drug that is imported or offered for import into the United States. When operations are conducted at more than one establishment and common ownership and control among all the establishments exists, the parent, subsidiary, or affiliate company may submit registration information for all establishments. Private label distributors who do not also manufacture, repack, relabel, or salvage drugs are not required to register under part 207. We will accept registration or listing information submitted by a private label distributor only if the distributor is acting as an authorized agent for and submitting information that pertains to an establishment that manufactures, repacks, relabels, or salvages drugs.

Listing requirements under part 207: Under § 207.41, registrants must list each drug that it manufactures, repacks,

relabels, or salvages for commercial distribution. Each domestic registrant must list each such drug regardless of whether the drug enters interstate commerce. When operations are conducted at more than one establishment, and common ownership

and control exists among all the establishments, the parent, subsidiary, or affiliate company may submit listing information for any drug manufactured, repacked, relabeled, or salvaged at any such establishment. A drug manufactured, repacked, or relabeled for

private label distribution must be listed in accordance with the requirements in § 207.41(c).

We estimate the burden of the information collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹

Information collection activity; 21 CFR/statutory citation	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Initial establishment registration; §§ 207.17, 207.21, and 207.25.	1,480	2	2,960	1	2,960
Annual review and update of registration information (including expedited updates); § 207.29.	10,000	1	10,000	0.5 (30 minutes)	5,000
Initial listing (including National Drug Code); §§ 207.33, 207.41, 207.45, 207.49, 207.53, 207.54, and 207.55.	1,713	7.28	12,470	1.5	18,705
June and December review and update (or certification) of listing; §§ 207.35 and 207.57.	5,300	20	106,000	0.75 (45 minutes)	79,500
Waiver requests; § 207.65	1	1	1	0.5 (30 minutes)	1
Public disclosure exemption request; § 207.81(c)	100	1	100	1	100
Manufacturing amount information; Section 3112 CARES Act.	12,800	22.5	288,000	0.25 (15 minutes)	72,000
Total	419,531	178,266

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN¹

Information collection from guidance recommendations	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
Preparing Standard Operating Procedures for creating and uploading the Structured Product Labeling file	1,000	1	1,000	40	40,000

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

According to internal data, we estimate 1,480 respondents will submit 2,960 new establishment registrations annually. We estimate that 10,000 registrants will provide 10,000 annual reviews and updates of registration information (including expedited updates) or reviews and certifications that no changes have occurred. The estimates include the registration of establishments for both domestic and foreign manufacturers, repackers, relabelers, and drug product salvagers, and registration information submitted by anyone acting as an authorized agent for an establishment that manufactures, repacks, relabels, or salvages drugs. The estimates include an additional 80 positron emission tomography drug producers who are not exempt from registration and approximately 30 manufacturers of plasma derivatives.

We assume 1 hour is necessary for registrants to submit initial registration information electronically for each new establishment. We assume 30 minutes is necessary for each annual review and update of registration information (including any expedited updates) or

each review and certification that no changes have occurred. Our estimate reflects the average amount of time and effort necessary to register a domestic or foreign establishment, and the average amount of time and effort necessary to review and update registration information, or review registration information and certify no changes have occurred.

Based on the number of drugs listed annually since June 2009, we estimate 1,713 registrants will report approximately 12,469 new listings annually (including the information submitted to obtain a labeler code and to reserve a National Drug Code (NDC) for future use). Based on the number of drugs in our listing database and the current number of changes to listing information submitted, we estimate 5,300 registrants will each report 20 reviews and updates (including the information submitted to revise an NDC) for a total of 106,000 annually. The estimates for the number of drug listings include both domestic and foreign listings, listings submitted by registrants for products sold under their own

names as well as products intended for private label distribution, and information submitted related to an NDC and to obtain a labeler code. The estimate for the number of drugs subject to the listing requirements includes positron emission tomography drugs and approximately 30 plasma derivatives. The estimates for the number of June and December reviews and updates of listing information include the number of changes to drug characteristics pertaining to the drug product code to obtain a new NDC and the reports of the withdrawal of an approved drug from sale under § 314.81(b)(3)(iii) (21 CFR 314.81(b)(3)(iii)).

Based on our experience with electronically listing submissions since June 2009, we assume it takes 1 hour and 30 minutes to submit information electronically for each drug listed for the first time (for both foreign and domestic registrant listings). These estimates are an average of the time it will take manufacturers, repackers, relabelers, and drug product salvagers, with drug product salvagers taking

considerably less time than manufacturers. The estimates include the time for submitting the content of labeling and other labeling in an electronic format (for drugs subject to an approved marketing application, the electronic submission of the content of labeling under § 314.50(l)(1)(i) is approved under OMB control number 0910-0001). We assume it takes 45 minutes for each June and December review and update. These estimates represent the average amount of time to review and update listing information or to review and certify that no changes have occurred. The estimates include the time for submitting any labeling for each drug, changes to the drug's characteristics submitted for a new NDC, and reports of the withdrawal of an approved drug from sale under § 314.81(b)(3)(iii).

Finally, although we expect most respondents will already have prepared a standard operating procedure (SOP) for the electronic submission of drug establishment registration and drug listing information, we estimate each year additional firms will need to create an SOP as recommended in the guidance. We therefore estimate 1,000 firms will expend approximately 40 hours to prepare, review, and approve an SOP, for a total of 40,000 hours annually.

While we retain the currently approved burden estimates for information collection associated with provisions in part 207, we have adjusted our estimate upward by 72,000 hours and 288,000 responses to account for information collection associated with the new manufacturing amount information element required by the CARES Act.

Dated: May 4, 2021.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Heart, Lung, and Blood Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of meetings of the Board of Scientific Counselors, NHLBI.

The meetings will be closed to the public as indicated below in accordance with the provisions set forth in section

552b(c)(6), Title 5 U.S.C., as amended for the review, discussion, and evaluation of individual intramural programs and projects conducted by the NATIONAL HEART, LUNG, AND BLOOD INSTITUTE, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Board of Scientific Counselors, NHLBI.

Date: June 4, 2021.

Time: 9:55 a.m. to 4:00 p.m.

Agenda: To review and evaluate to review and evaluate personnel qualifications and performance, and competence of individual investigators.

Place: National Institutes of Health, Building, 10, 10 Center Drive Bethesda, MD 20892 (Virtual Meeting).

Date: June 7, 2021.

Time: 10:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate to review and evaluate personnel qualifications and performance, and competence of individual investigators.

Place: National Institutes of Health, Building 10, 10 Center Drive Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Robert S. Balaban, Ph.D., Scientific Director, Division of Intramural Research, National Institutes of Health, NHLBI, Building 10, CRC, 4th Floor, Room 1581, 10 Center Drive, Bethesda, MD 20892, 301/496-2116.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person. These meetings are closed to the public.

Information is also available on the Institute's/Center's home page: www.nhlbi.nih.gov/meetings/index.htm, where an agenda and any additional information for the meeting will be posted when available.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Amended Notice of Meeting

Notice is hereby given of a change in the meeting of the Center for Scientific Review Special Emphasis Panel, May 26, 2021, 11:00 a.m. to May 26, 2021, 04:00 p.m., National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD, 20892 which was published in the **Federal Register** on April 20, 2021, 86 FR 20505.

This notice is being amended to change the panel name of the Center for Scientific Review Special Emphasis Panel; RFA Panel: Tobacco Regulatory Science A (or B) to RFA Panel: Tobacco Regulatory Science A. The meeting is closed to the public.

Dated: May 5, 2021.

David W. Freeman,
Program Analyst, Office of Federal Advisory Committee Policy.

[FR Doc. 2021–09836 Filed 5–7–21; 8:45 am]

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2021–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below. The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in

effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The date of August 24, 2021 has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at <https://msc.fema.gov> by the date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbabit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbabit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the

Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at <https://msc.fema.gov>.

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

(Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Michael M. Grimm,

Assistant Administrator for Risk Management, Department of Homeland Security, Federal Emergency Management Agency.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Transportation Security Administration****Intent To Request Extension From OMB of One Current Public Collection of Information: Law Enforcement Officer (LEO) Reimbursement Request****AGENCY:** Transportation Security Administration, DHS.**ACTION:** 60-Day notice.

SUMMARY: The Transportation Security Administration (TSA) invites public comment on one currently approved Information Collection Request (ICR), Office of Management and Budget (OMB) control number 1652-0063, abstracted below that we will submit to OMB for an extension in compliance with the Paperwork Reduction Act. The ICR describes the nature of the information collection and its expected burden. The collection involves the reimbursement of expenses incurred by airport operators for the provision of law enforcement officers to support airport checkpoint screening.

DATES: Send your comments by July 9, 2021.

ADDRESSES: Comments may be emailed to TSAPRA@tsa.dhs.gov or delivered to the TSA PRA Officer, Information Technology, TSA-11, Transportation Security Administration, 6595 Springfield Center Drive, Springfield, VA 20598-6011.

FOR FURTHER INFORMATION CONTACT: Christina A. Walsh at the above address, or by telephone (571) 227-2062.

SUPPLEMENTARY INFORMATION:**Comments Invited**

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation will be available at <http://www.reginfo.gov> upon its submission to OMB. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

- (1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

OMB Control Number 1652-0063; Law Enforcement Officer (LEO) Reimbursement Request. TSA has authority to enter into agreements with participants to reimburse expenses incurred by airport operators for the provision of LEOs in support of screening at airport checkpoints. *See* 49 U.S.C. 106(l) and (m) and 114(m). Consistent with these authorities, TSA created the LEO Reimbursement Program.

TSA requires participants in the LEO Reimbursement Program to record the details of all reimbursements sought. In order to provide for the orderly tracking of reimbursements, the LEO Reimbursement Program uses TSA Form 3503, LEO Reimbursement Request. The information collected includes, but is not limited to, information regarding the invoice, invoicing point of contact, banking and checkpoint log worksheet.

The LEO Reimbursement Request form is available at www.tsa.gov. Upon completion, participants submit the LEO Reimbursement Request form directly to the LEO Reimbursement Program via fax, electronic upload (via scanning the document), mail, or in person. Upon receipt, TSA reviews all request for reimbursement forms.

TSA estimates that there will be 294 participant responses monthly, or 3,528 yearly. TSA estimates each respondent will spend approximately one hour to complete the request for reimbursement form, for a total annual hour burden of 3,528 hours.

Dated: May 4, 2021.

Christina A. Walsh,

*TSA Paperwork Reduction Act Officer,
Information Technology.*

[FR Doc. 2021-09804 Filed 5-7-21; 8:45 am]

BILLING CODE 9110-05-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-7038-N-04]

60-Day Notice of Proposed Information Collection: Survey To Assess Operational and Capacity Status of Housing Counseling Agencies Due to Disaster/National Emergency; OMB Control No.: 2502-0615

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* July 9, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410-5000; telephone 202-402-3400 (this is not a toll-free number) or email at Colette.Pollard@hud.gov for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at Colette.Pollard@hud.gov or telephone 202-402-3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Survey to Assess Operational Status and Capacity of Housing Counseling Agencies Due to a Disaster/National Emergency.

OMB Approval Number: 2502–0615.

OMB Expiration Date: May 31, 2021.

Type of Request: Revision of a currently approved collection.

Form Number: None.

Description of the need for the information and proposed use: The Disaster/National Emergency Survey will assess the operational and capacity status of Housing Counseling Agencies impacted by COVID–19 and other disasters and national emergencies. This Survey is necessary to assess the impact of the disasters and national emergencies on the operation of HUD-approved housing counseling agencies. This survey will more accurately assess the current operating status and capacity of housing counseling agencies impacted by disasters or national emergencies. The information collected will be used to identify the needs of the housing counseling agency and to inform OHC about the types of support that would be the most responsive to the needs of agencies and their clients.

Respondents (i.e., affected public): Not-for-profit institutions; Local, State, or Tribal Government.

Estimated Number of Respondents: 1,614.

Estimated Number of Responses: 1,614.

Frequency of Response: 1.

Average Hours per Response: 1.

Total Estimated Burden: 1,614.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Janet Golrick,

Acting, Chief of Staff for the Office of Housing—Federal Housing Administration.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service**

[FWS–R2–ES–2020–0122;

FXES11130200000–212–FF02ENEH00]

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for Kuenzler Hedgehog Cactus

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of our draft recovery plan for Kuenzler hedgehog cactus, a small cactus found in New Mexico. Kuenzler hedgehog cactus is listed as threatened under the Endangered Species Act. We provide this notice to seek comments from the public and Federal, Tribal, State, and local governments.

DATES: To ensure consideration, we must receive written comments on or before July 9, 2021. However, we will accept information about any species at any time.

ADDRESSES: *Reviewing documents:* You may obtain a copy of the draft recovery plan, recovery implementation strategy, and species status assessment by any one of the following methods:

- *Internet:* Go to one of the following sites:

- <http://www.regulations.gov> in Docket No. FWS–R2–ES–2020–0122;
- <https://ecos.fws.gov/ecp0/profile/speciesProfile?spcode=Q1VW>; or
- <https://www.fws.gov/southwest/es/NewMexico/>.

- *U.S. mail:* Send a request to U.S. Fish and Wildlife Service, New Mexico Ecological Services Field Office (NMESFO), 2105 Osuna NE, Albuquerque, NM 87113.

- *Telephone:* 505–346–2525 or 800–299–0196.

Submitting comments: Submit your comments on the draft recovery plan in writing by either of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the

instructions for submitting comments on Docket No. FWS–R2–ES–2020–0122; or

- *U.S. mail:* Public Comments Processing; Attn: Docket No. FWS–R2–ES–2020–0122; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike, Falls Church, VA 22041–3803

For additional information about submitting comments, see Request for Public Comments and Public Availability of Comments under **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT:

Shawn Sartorius, Field Supervisor, at the above address and phone number, or by email at nmesfo@fws.gov. Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of our draft recovery plan for Kuenzler hedgehog cactus (*Echinocereus fendleri* var. *kuenzleri*), listed as endangered in 1979 and reclassified to threatened in 2018 under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). We request review and comment on this plan from local, State, and Federal agencies; Tribes; and the public. We will also accept any new information on the status of Kuenzler hedgehog cactus throughout the species' range to assist in finalizing the recovery plan.

Kuenzler hedgehog cactus (*Echinocereus fendleri* var. *kuenzleri*) is a small cactus that is endemic to the Sacramento Mountains in Lincoln County, New Mexico, and the Guadalupe Mountains in Eddy County, New Mexico. The draft recovery plan includes specific recovery objective, measurable criteria and management actions that, when achieved, will enable us to consider removing the Kuenzler hedgehog cactus from the Federal List of Endangered and Threatened Wildlife (List).

Background

Section 4(f) of the ESA requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species. Also pursuant to section 4(f) of the ESA, a recovery plan must, to the maximum extent practicable, include:

(1) A description of site-specific management actions as may be necessary to achieve the plan's goals for the conservation and survival of the species;

(2) Objective, measurable criteria that, when met, would support a

determination under section 4(a)(1) that the species should be removed from the List of Endangered and Threatened Species; and

(3) Estimates of the time and costs required to carry out those measures needed to achieve the plan's goal and to achieve intermediate steps toward that goal.

We used a streamlined approach to recovery planning and implementation by first conducting a species status assessment (SSA) of Kuenzler hedgehog cactus (Service 2017). An SSA is a comprehensive analysis of the species' needs, current condition, threats, and future viability. The information in the SSA provides the biological background, a threats assessment, and a basis for a strategy for recovery of Kuenzler hedgehog cactus. We then used this information to prepare an abbreviated draft recovery plan for Kuenzler hedgehog cactus that includes prioritized recovery actions, criteria for removing the species from the List, and the estimated time and cost to recovery.

Species Background

Kuenzler hedgehog cactus was federally listed as endangered in 1979 (October 26, 1979; 44 FR 61924) as *Echinocereus kuenzleri*, and downlisted to threatened in 2018 (May 11, 2018; 83 FR 21928). No critical habitat was designated, due to threat of collection. At the time of listing, fewer than 200 individuals had been documented at 11 locations. Biologists and botanists have since found at least 4,330 individual plants through inventories conducted from 1976 to 2015.

This endemic cactus occurs primarily on Federal lands in New Mexico, ranging from the northwest side of the Sacramento Mountains in Lincoln County to the middle of the Guadalupe Mountains in Eddy County. The Kuenzler hedgehog cactus occupies gentle slopes (0.3–30.6 degrees) or benches with gravelly to rocky soils and southern, eastern, and western exposures (New Mexico Energy, Minerals, and Natural Resources Department 1989: pp. 93–94) in shrubby grassland and juniper savanna habitat types with tree cover varying from 2 to 25 percent, with grasses being the dominant vegetative cover (Sivinski 1999: pp. 1–2).

The factors influencing the current and future health of populations include wildfire, livestock grazing, illegal collection, climate change, and small population size and low densities.

These influences pose the greatest risks to the future viability of this species and are largely related to direct impacts such as mortality or removal, and habitat changes exacerbated by changing climatic conditions.

Recovery Criteria

The draft recovery criteria are summarized below. For a complete description of the rationale behind the criteria, the recovery strategy, management actions, and estimated time and costs associated with recovery, refer to the Draft Recovery Plan for Kuenzler Hedgehog Cactus (see **ADDRESSES** for document availability).

The ultimate recovery goal is to remove the Kuenzler hedgehog cactus from the Federal List of Endangered and Threatened Wildlife (*i.e.*, “delist” the species) by ensuring the long-term viability of the species in the wild. In the recovery plan, we define the following criteria for “delisting,” or removal of the species from the List, based on the best available information on the species.

Delisting Criteria

Criterion 1 (Resiliency): Demonstrate a stable or increasing trend in abundance for the northern Sacramento, southern Sacramento, and Guadalupe Mountains core sites (Fort Stanton, Elk, Texas Hills) over a 20-year period.

Criterion 2 (Redundancy): Maintain a minimum of three geographically separated core sites over a 20-year period.

Criterion 3 (Representation):

3a. Maintain presence of Kuenzler hedgehog cactus at 80 percent of all known subpopulations (element occurrences) outside of the core sites over a 20-year period, with any extirpations compensated for by newly identified or colonized subpopulations.

3b. Maintain genetic diversity within all core sites as measured by the inbreeding coefficient for individuals within subpopulations (F_{IS}) at or within one standard deviation of the F_{IS} from viable populations of a closely related cactus species with similar reproductive strategies.

Request for Public Comments

Section 4(f) of the ESA requires us to provide public notice and an opportunity for public review and comment during recovery plan development. It is also our policy to request peer review of recovery plans (July 1, 1994; 59 FR 34270). In an

appendix to the final recovery plan, we will summarize and respond to the issues raised by the public and peer reviewers. Comments may or may not result in changes to the recovery plan; comments regarding recovery plan implementation will be forwarded as appropriate to Federal or other entities so that they can be taken into account during the course of implementation of recovery actions. Responses to individual commenters will not be provided, but we will provide a summary of how we addressed substantive comments in an appendix to the final recovery plan.

We invite written comments on this draft recovery plan. In particular, we are interested in additional information regarding the current threats to the species, ongoing beneficial management efforts, and the costs associated with implementing the recommended recovery actions. The species status assessment and recovery implementation strategy are accessible as supporting documents for the draft recovery plan, but we are not seeking comments on those documents.

Public Availability of Comments

All comments received, including names and addresses, will become part of the administrative record and will be available to the public. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—will be publicly available. If you submit a hard copy comment that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Comments and materials we receive will be available, by appointment, for public inspection during normal business hours at our office (see **ADDRESSES**).

Authority

We developed our draft recovery plan and publish this notice under the authority of section 4(f) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Amy L. Lueders,

Regional Director, Southwest Region, U.S. Fish and Wildlife Service.

[FWS–R8–ES–2020–N107; FXES11130000–190–FF08E00000]

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for Mount Charleston Blue Butterfly

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability; request for public comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of the draft recovery plan for the Mount Charleston Blue Butterfly (*Icaricia [Plebejus] shasta charlestonensis*), an endangered butterfly species, for public review and comment. We request review and comment on this draft recovery plan from local, State, and Federal agencies; nongovernmental organizations; and the public.

DATES: We must receive any comments on the draft recovery plan on or before July 9, 2021.

ADDRESSES: *Document availability:* You may obtain a copy of the recovery plan from our website at <http://www.fws.gov/endangered/species/recovery-plans.html>. Alternatively, you may contact the Southern Nevada Fish and Wildlife Office, U.S. Fish and Wildlife Service, 4701 North Torrey Pines Drive, Las Vegas, Nevada 89130 (telephone 702–515–5230).

Comment submission: If you wish to comment on the draft recovery plan, you may submit your comments in writing by any one of the following methods:

- *U.S. mail:* Field Supervisor, at the above address;

- *Email:* Glen_Knowles@fws.gov.

For additional information about submitting comments, see the Request for Public Comments and Public Availability of Comments sections below.

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program and the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*). Recovery means

improvement of the status of listed species to the point at which listing is no longer necessary under the criteria specified in section 4(a)(1) of the Act. The Act requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species.

Pursuant to section 4(f) of the Act, a recovery plan must, to the maximum extent practicable, include (1) a description of site-specific management actions as may be necessary to achieve the plan's goals for the conservation and survival of the species; (2) objective, measurable criteria which, when met, would support a determination under section 4(a)(1) that the species should be removed from the List of Endangered and Threatened Species; and (3) estimates of the time and costs required to carry out those measures needed to achieve the plan's goal and to achieve intermediate steps toward that goal.

The U.S. Fish and Wildlife Service (USFWS) has revised its approach to recovery planning; the revised process is called Recovery Planning and Implementation (RPI). The RPI process is intended to reduce the time needed to develop and implement recovery plans, increase recovery plan relevancy over a longer timeframe, and add flexibility to recovery plans so they can be adjusted to new information or circumstances. Under RPI, a recovery plan will include statutorily required elements (objective, measurable criteria; site-specific management actions; and estimates of time and costs), along with a concise introduction and our strategy for how we plan to achieve species recovery. The RPI recovery plan is supported by a separate Species Status Assessment, or in cases such as this one, a species biological report that provides the background information and threat assessment, which are key to recovery plan development. The essential component to flexible implementation under RPI is producing a separate working document called the Recovery Implementation Strategy (implementation strategy). The implementation strategy steps down from the more general description of actions described in the recovery plan to detail the specific, near-term activities needed to implement the recovery plan. The implementation strategy will be adaptable by being able to incorporate new information without having to concurrently revise the recovery plan, unless changes to statutory elements are required.

Mount Charleston blue butterfly was federally listed as endangered under the Act in 2013 (USFWS 2013). USFWS designated critical habitat for the

species in 2015 (USFWS 2015). Mount Charleston blue butterfly is endemic to the Spring Mountains in southern Nevada. Evidence of decreasing range and population size and the presence of ongoing threats to Mount Charleston blue butterfly resulted in its listing as endangered. The majority of the historic range and all currently occupied locations of the Mount Charleston blue butterfly are on lands managed by the Spring Mountains National Recreation Area, Humboldt-Toiyabe National Forest, United States Department of Agriculture Forest Service (Forest Service). Therefore, close coordination and cooperation will need to occur between the USFWS and Forest Service for recovery to be successful. Here we describe a draft recovery plan for the conservation and survival of the Mount Charleston blue butterfly.

Threats facing the Mount Charleston blue butterfly increase the risk of extinction of the subspecies, given its few occurrences in a small area. The largest threats to Mount Charleston blue butterfly are the loss and degradation of habitat due to changes in natural fire regimes and succession, the implementation of recreational development projects and fuels reduction projects, and the increases in nonnative plants. These threats are likely to be exacerbated by the impact of climate change, which is anticipated to increase drought and extreme precipitation events.

Recovery Strategy

The purpose of a recovery plan is to provide a framework for the recovery of a species so that protection under the Act is no longer necessary. A recovery plan includes scientific information about the species and provides criteria that enable us to gauge whether downlisting or delisting the species may be warranted. Furthermore, recovery plans help guide our recovery efforts by describing actions we consider necessary for each species' conservation and by estimating time and costs for implementing needed recovery measures.

The primary threats to be addressed through this recovery strategy are the loss and degradation of habitat due to changes in natural fire regimes and succession, the implementation of recreational development projects and fuels reduction projects, feral horses, and the increases in nonnative plants. Habitat for Mount Charleston blue butterfly may be increased through properly sited and implemented management actions to favor optimal habitat quantity, quality, and patch arrangement. Where appropriate, habitat

that once existed may be restored; habitat that currently exists should be protected and may be enhanced or augmented; and, where conditions are suitable, new habitat may be created. After an evaluation is completed, population growth and connectivity may be assisted with translocation, if necessary, to ensure conservation and expedite recovery of the Mount Charleston blue butterfly. Evaluations, monitoring, and research will be implemented to inform decisions towards the recovery goal.

To downlist to threatened status and ultimately delist the Mount Charleston blue butterfly will require active and ongoing protection of existing populations and occupied habitat, and discovered or established new habitat. Additional habitat and locations that can be categorized as known occupied are critical to ensure Mount Charleston blue butterfly life history processes, population growth, and connectivity will occur, thereby ensuring the genetic diversity of the species, sufficiently large populations to withstand stochastic events, and a sufficiently large number of populations to provide a safety margin to withstand catastrophic events.

Request for Public Comments

We request written comments on the draft recovery plan described in this notice. All comments received by the date specified in **DATES** will be considered in development of a final recovery plan for Mount Charleston blue butterfly. You may submit written comments and information by mail or email to the Southern Nevada Fish and Wildlife Office at the above address (see **ADDRESSES**).

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We developed this recovery plan and publish this notice under the authority

of section 4(f) of the Act, 16 U.S.C. 1533(f).

Paul Souza,

Regional Director, Pacific Southwest Region.

BILLING CODE 4333-15-P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[212A2100DD/AAKC001030/
AOA501010.999900]

Rate Adjustments for Indian Irrigation Projects

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Indian Affairs (BIA) owns or has an interest in irrigation projects located on or associated with various Indian reservations throughout the United States. We are required to establish irrigation assessment rates to recover the costs to administer, operate, maintain, and rehabilitate these projects. We request your comments on the proposed rate adjustments.

DATES: Interested parties may submit comments on the proposed rate adjustments on or before July 9, 2021.

ADDRESSES: You may send comments on the proposed rate adjustments via email to comments@bia.gov. Please reference “Rate Adjustments for Indian Irrigation Projects” in the subject line. Or you may submit comments to the Chief, Division of Water and Power, Office of Trust Services, 13922 Denver West Parkway, Suite 300, Lakewood, Colorado 80401.

For details about a particular irrigation project, please use the tables in the **SUPPLEMENTARY INFORMATION** section to contact the regional or local office where the project is located.

SUPPLEMENTARY INFORMATION: The first table in this notice provides contact information for individuals who can give further information about the irrigation projects covered by this notice. The second table provides the proposed rates for calendar year (CY) 2022 for all irrigation projects.

What is the meaning of the key terms used in this notice?

In this notice:

Administrative costs mean all costs we incur to administer our irrigation projects at the local project level and are a cost factor included in calculating your operation and maintenance assessment. Costs incurred at the local project level do not normally include

agency, region, or central office costs unless we state otherwise in writing.

Assessable acre means lands designated by us to be served by one of our irrigation projects, for which we collect assessments in order to recover costs for the provision of irrigation service. (See *total assessable acres*.)

BIA means the Bureau of Indian Affairs.

Bill means our statement to you of the assessment charges and/or fees you owe the United States for administration, operation, maintenance, and/or rehabilitation. The date we mail or hand-deliver your bill will be stated on it.

Costs means the costs we incur for administration, operation, maintenance, and rehabilitation to provide direct support or benefit to an irrigation facility. (See administrative costs, operation costs, maintenance costs, and rehabilitation costs).

Customer means any person or entity to whom or to which we provide irrigation service.

Due date is the date on which your bill is due and payable. This date will be stated on your bill.

I, me, my, you and *your* mean all persons or entities that are affected by this notice.

Irrigation project means a facility or portion thereof for the delivery, diversion, and storage of irrigation water that we own or have an interest in, including all appurtenant works. The term “irrigation project” is used interchangeably with irrigation facility, irrigation system, and irrigation area.

Irrigation service means the full range of services we provide customers of our irrigation projects. This includes our activities to administer, operate, maintain, and rehabilitate our projects in order to deliver water.

Maintenance costs means costs we incur to maintain and repair our irrigation projects and associated equipment and is a cost factor included in calculating your operation and maintenance assessment.

Operation and maintenance (O&M) assessment means the periodic charge you must pay us to reimburse costs of administering, operating, maintaining, and rehabilitating irrigation projects consistent with this notice and our supporting policies, manuals, and handbooks.

Operation or operating costs means costs we incur to operate our irrigation projects and equipment and is a cost factor included in calculating your O&M assessment.

Past due bill means a bill that has not been paid by the close of business on the 30th day after the due date as stated

on the bill. Beginning on the 31st day after the due date, we begin assessing additional charges accruing from the due date.

Rehabilitation costs means costs we incur to restore our irrigation projects or features to original operating condition or to the nearest state which can be achieved using current technology and is a cost factor included in calculating your O&M assessment.

Responsible party means an individual or entity that owns or leases land within the assessable acreage of one of our irrigation projects and is responsible for providing accurate information to our billing office and paying a bill for an annual irrigation rate assessment.

Total assessable acres mean the total acres served by one of our irrigation projects.

Water delivery is an activity that is part of the irrigation service we provide our customers when water is available.

We, us, and our mean the United States Government, the Secretary of the Interior, the BIA, and all who are authorized to represent us in matters covered under this notice.

Does this notice affect me?

This notice affects you if you own or lease land within the assessable acreage of one of our irrigation projects or if you have a carriage agreement with one of our irrigation projects.

Where can I get information on the regulatory and legal citations in this notice?

You can contact the appropriate office(s) stated in the tables for the irrigation project that serves you, or you can use the internet site for the Government Publishing Office at <http://www.gpo.gov>.

Why are you publishing this notice?

We are publishing this notice to inform you that we propose to adjust our irrigation assessment rates. This notice is published in accordance with the BIA's regulations governing its operation and maintenance of irrigation projects, found at 25 CFR part 171. This regulation provides for the establishment and publication of the proposed rates for annual irrigation assessments as well as related information about our irrigation projects.

What authorizes you to issue this notice?

Our authority to issue this notice is vested in the Secretary of the Interior by 5 U.S.C. 301 and the Act of August 14, 1914 (38 Stat. 583; 25 U.S.C. 385). The

Secretary has in turn delegated this authority to the Assistant Secretary—Indian Affairs under Part 209, Chapter 8.1A, of the Department of the Interior's Departmental Manual.

When will you put the rate adjustments into effect?

We will put the rate adjustments into effect for CY 2022.

How do you calculate irrigation rates?

We calculate annual irrigation assessment rates in accordance with 25 CFR part 171.500 by estimating the annual costs of operation and maintenance at each of our irrigation projects and then dividing by the total assessable acres for that particular irrigation project. The result of this calculation for each project is stated in the rate table in this notice.

What kinds of expenses do you consider in determining the estimated annual costs of operation and maintenance?

Consistent with 25 CFR part 171.500, these expenses include the following:

(a) Personnel salary and benefits for the project engineer/manager and project employees under the project engineer/manager's management or control;

(b) Materials and supplies;

(c) Vehicle and equipment repairs;

(d) Equipment costs, including lease fees;

(e) Depreciation;

(f) Acquisition costs;

(g) Maintenance of a reserve fund available for contingencies or emergency costs needed for the reliable operation of the irrigation facility infrastructure;

(h) Maintenance of a vehicle and heavy equipment replacement fund;

(i) Systematic rehabilitation and replacement of project facilities;

(j) Contingencies for unknown costs and omitted budget items; and

(k) Other expenses we determine necessary to properly perform the activities and functions characteristic of an irrigation project.

When should I pay my irrigation assessment?

We will mail or hand deliver your bill notifying you (a) the amount you owe to the United States and (b) when such amount is due. If we mail your bill, we will consider it as being delivered no later than five business days after the day we mail it. You should pay your bill by the due date stated on the bill.

What information must I provide for billing purposes?

All responsible parties are required to provide the following information to the billing office associated with the irrigation project where you own or lease land within the project's assessable acreage or to the billing office associated with the irrigation project with which you have a carriage agreement:

(1) The full legal name of the person or entity responsible for paying the bill;

(2) An adequate and correct address for mailing or hand delivering our bill; and

(3) The taxpayer identification number or social security number of the person or entity responsible for paying the bill.

Why are you collecting my taxpayer identification number or social security number?

Public Law 104–134, the Debt Collection Improvement Act of 1996, requires that we collect the taxpayer identification number or social security number before billing a responsible party and as a condition to servicing the account.

What happens if I am a responsible party but I fail to furnish the information required to the billing office responsible for the irrigation project within which I own or lease assessable land or for which I have a carriage agreement?

If you are late paying your bill because of your failure to furnish the required information listed above, you will be assessed interest and penalties as provided below, and your failure to provide the required information will not provide grounds for you to appeal your bill or any penalties assessed.

What can happen if I do not provide the information required for billing purposes?

We can refuse to provide you irrigation service.

If I allow my bill to become past due, could this affect my water delivery?

Yes. 25 CFR 171.545(a) states: "We will not provide you irrigation service until: (1) Your bill is paid; or (2) You make arrangement for payment pursuant to § 171.550 of this part." If we do not receive your payment before the close of business on the 30th day after the due date stated on your bill, we will send you a past due notice. This past due notice will have additional information concerning your rights. We will consider your past due notice as delivered no later than five business

days after the day we mail it. We follow the procedures provided in 31 CFR 901.2, "Demand for Payment," when demanding payment of your past due bill.

Are there any additional charges if I am late paying my bill?

Yes. We are required to assess interest, penalties, and administrative costs on past due bills in accordance with 31 U.S.C. 3717 and 31 CFR 901.9. The rate of interest is established annually by the Secretary of the United States Treasury (Treasury) and accrues

from the date your bill is past due. If your bill becomes more than 90 days past due, you will be assessed a penalty charge of no more than six percent per year, which accrues from the date your bill became past due. Each time we try to collect your past due bill, you will be charged an administrative fee of \$12.50 for processing and handling.

What else will happen to my past due bill?

If you do not pay your bill or make payment arrangements to which we agree, we are required to transfer your

past due bill to Treasury for further action. Pursuant to 31 CFR 285.12, bills that are 120 days past due will be transferred to Treasury.

Who can I contact for further information?

The following tables are the regional and project/agency contacts for our irrigation facilities.

Project name	Project project/agency contacts
Northwest Region Contacts	
Bryan Mercier, Regional Director, Bureau of Indian Affairs, Northwest Regional Office, 911 NE 11th Avenue, Portland, OR 97232-4169, Telephone: (503) 231-6702.	
Flathead Indian Irrigation Project	Larry Nelson, Acting Irrigation Project Manager, P.O. Box 40, Pablo, MT 59855, Telephone: (406) 745-2661 Project Manager.
Fort Hall Irrigation Project	Tim Gardner, Acting Irrigation Project Manager, Building #2 Bannock Avenue, Fort Hall, ID 83203-0220, Telephone: (208) 238-1992.
Wapato Irrigation Project	Pete Plant, Project Administrator, 413 South Camas Avenue, Wapato, WA 98951-0220, Telephone: (509) 877-3155 Project Administrator.
Rocky Mountain Region Contacts	
Susan Messerly, Regional Director, Bureau of Indian Affairs, Rocky Mountain Regional Office, 2021 4th Avenue North, Billings, MT 59101, Telephone: (406) 247-7943.	
Blackfeet Irrigation Project	Thedis Crowe, Superintendent, Greg Tatsey, Irrigation Project Manager, Box 880, Browning, MT 59417, Telephones: (406) 338-7544 Superintendent, (406) 338-7519 Irrigation Project Manager.
Crow Irrigation Project	Clifford Serawop, Superintendent, Richard Green, Irrigation Project Manager, (Project operation & maintenance performed by Water Users Association), P.O. Box 69, Crow Agency, MT 59022, Telephones: (406) 638-2672 Superintendent, (406) 247-7469 Irrigation Project Manager.
Fort Belknap Irrigation Project	Mark Azure, Superintendent, Jim Gappa, Irrigation Project Manager (BIA), (Project operation & maintenance contracted to Fort Belknap Indian Community under PL 93-638), 158 Tribal Way, Suite B, Harlem, MT 59526, Telephones: (406) 353-2901 Superintendent, (406) 353-8466 Irrigation Project Manager (Tribal Office).
Fort Peck Irrigation Project	Anna Eder, Superintendent, Jim Gappa, Acting Irrigation Project Manager, (Project operation & maintenance performed by Fort Peck Water Users Association), P.O. Box 637, Poplar, MT 59255, Telephones: (406) 768-5312 Superintendent, (406) 653-1752 Huber Wright—Lead ISO.
Wind River Irrigation Project	Leslie Shakespeare, Superintendent, Jim Gappa, Acting Irrigation Project Manager, (Project operation & maintenance for Little Wind, Johnstown, and Lefthand Units contracted to Wind River Tribes under PL 93-638; Little Wind-Ray and Upper Wind Units operation & maintenance performed by Ray Canal, A Canal, and Crowheart Water Users Associations), P.O. Box 158, Fort Washakie, WY 82514, Telephones: (307) 332-7810 Superintendent, (406) 247-7998 Acting Irrigation Project Manager.
Southwest Region Contacts	
Patricia L. Mattingly, Regional Director, Bureau of Indian Affairs, Southwest Regional Office, 1001 Indian School Road, Albuquerque, NM 87104, Telephone: (505) 563-3100.	
Pine River Irrigation Project	Priscilla Bancroft, Superintendent, Vickie Begay, Irrigation Project Manager, P.O. Box 315, Ignacio, CO 81137-0315, Telephones: (970) 563-4511, Superintendent, (970) 563-9484, Irrigation Project Manager.
Western Region Contacts	
Bryan Bowker, Regional Director, Bureau of Indian Affairs, Western Regional Office, 2600 North Central Avenue, 4th Floor Mailroom, Phoenix, AZ 85004, Telephone: (602) 379-6600.	
Colorado River Irrigation Project	Davetta Ameelyenah, Superintendent, Gary Colvin, Irrigation Project Manager, 12124 1st Avenue, Parker, AZ 85344, Telephone: (928) 669-7111.

Project name	Project project/agency contacts
Duck Valley Irrigation Project	Joseph McDade, Superintendent, (Project operation & maintenance compacted to Shoshone-Paiute Tribes under PL 93-638), 2719 Argent Avenue, Suite 4, Gateway Plaza, Elko, NV 89801, Telephone: (775) 738-5165, (208) 759-3100 (Tribal Office).
Yuma Project, Indian Unit	Denni Shields, Superintendent, 256 South Second Avenue, Suite D, Yuma, AZ 85364, Telephone: (928) 782-1202.
San Carlos Irrigation Project (Indian Works and Joint Works).	Ferris Begay, Project Manager, Kyle Varvel, Acting Supervisory Civil Engineer, (Portions of Indian Works operation & maintenance compacted to Gila River Indian Community under PL 93-638), 13805 North Arizona Boulevard, Coolidge, AZ 85128, Telephone: (520) 723-6225.
Uintah Irrigation Project	Antonio Pingree, Superintendent, Ken Asay, Irrigation System Manager, (Project operation & maintenance performed by Uintah Indian Irrigation Project Operation and Maintenance Company), P.O. Box 130, Fort Duchesne, UT 84026, Telephone: (435) 722-4300, (435) 722-4344.
Walker River Irrigation Project	Gerry Emm, Acting Superintendent, 311 East Washington Street, Carson City, NV 89701, Telephone: (775) 887-3500.

What irrigation assessments or charges are proposed for adjustment by this notice?

The rate table below contains current final CY 2021 rates for irrigation

projects where we recover costs of administering, operating, maintaining, and rehabilitating them. The table also contains proposed CY 2022 rates for all irrigation projects. An asterisk

immediately following the rate category notes irrigation projects where rates are proposed for adjustment.

Project name	Rate category	Final 2021 rate	Proposed 2022 rate
Northwest Region Rate Table			
Flathead Irrigation Project	Basic per acre—A	\$33.50	\$33.50
	Basic per acre—B	16.75	16.75
	Minimum Charge per tract	75.00	75.00
Fort Hall Irrigation Project	Basic per acre *	58.50	62.50
	Minimum Charge per tract *	39.00	40.00
Fort Hall Irrigation Project—Minor Units	Basic per acre *	38.00	41.00
	Minimum Charge per tract *	39.00	40.00
Fort Hall Irrigation Project—Michaud Unit	Basic per acre *	63.50	68.50
	Pressure per acre *	99.50	106.50
	Minimum Charge per tract *	39.00	40.00
Wapato Irrigation Project—Toppenish/Simcoe Units	Minimum Charge per bill	25.00	25.00
	Basic per acre	25.00	25.00
Wapato Irrigation Project—Ahtanum Units	Minimum Charge per bill	30.00	30.00
	Basic per acre	30.00	30.00
Wapato Irrigation Project—Satus Unit	Minimum Charge per bill	79.00	79.00
	“A” Basic per acre	79.00	79.00
	“B” Basic per acre	85.00	85.00
Wapato Irrigation Project—Additional Works	Minimum Charge per bill	80.00	80.00
	Basic per acre	80.00	80.00
Wapato Irrigation Project—Water Rental	Minimum Charge per bill	86.00	86.00
	Basic per acre	86.00	86.00

Rocky Mountain Region Rate Table

Blackfeet Irrigation Project	Basic-per acre	20.50	20.50
Crow Irrigation Project—Willow Creek O&M (includes Agency, Lodge Grass #1, Lodge Grass #2, Reno, Upper Little Horn, and Forty Mile Units).	Basic-per acre	28.50	28.50
Crow Irrigation Project—All Others (includes Bighorn, Soap Creek, and Pryor Units).	Basic-per acre	28.50	28.50
Crow Irrigation Project—Two Leggins Unit	Basic-per acre	14.00	14.00
Crow Irrigation Two Leggins Drainage District	Basic-per acre	2.00	2.00
Fort Belknap Irrigation Project	Basic-per acre *	17.00	18.00
Fort Peck Irrigation Project	Basic-per acre	27.00	27.00
Wind River Irrigation Project—Units 2, 3 and 4	Basic-per acre	25.00	25.00
Wind River Irrigation Project—Unit 6	Basic-per acre	22.00	22.00
Wind River Irrigation Project—LeClair District (See Note #1).	Basic-per acre	47.00	47.00
Wind River Irrigation Project—Crow Heart Unit	Basic-per acre	16.50	16.50
Wind River Irrigation Project—A Canal Unit	Basic-per acre	16.50	16.50
Wind River Irrigation Project—Riverton Valley Irrigation District (See Note #1).	Basic-per acre	30.65	30.65

Southwest Region Rate Table

Pine River Irrigation Project	Minimum Charge per tract	50.00	50.00
-------------------------------------	--------------------------------	-------	-------

Project name	Rate category			Final 2021 rate	Proposed 2022 rate
	Basic-per acre *			22.00	22.50
Western Region Rate Table					
Colorado River Irrigation Project	Basic per acre up to 5.75 acre-feet *			61.50	64.00
	Excess Water per acre-foot over 5.75 acre-feet			18.00	18.00
Duck Valley Irrigation Project	Basic per acre			5.30	5.30
Yuma Project, Indian Unit (See Note #2)	Basic per acre up to 5.0 acre-feet *			154.50	(+)
	Excess Water per acre-foot over 5.0 acre-feet *			30.00	(+)
	Basic per acre up to 5.0 acre-feet (Ranch 5)*			154.50	(+)
San Carlos Irrigation Project (Joint Works) (See Note #3).	Basic per acre *			25.78	26.00
	Proposed 2022 Construction Water Rate Schedule:				
		Off project construction	On project construction—gravity water	On project construction—pump water	
	Administrative Fee	\$300.00	\$300.00	\$300.00.	
	Usage Fee	\$250.00 per month	No Fee	\$100.00 per acre foot.	
	Excess Water Rate †.	\$5.00 per 1,000 gal..	No Charge	No Charge.	
Project name	Rate category			Final 2021 rate	Proposed 2022 rate
San Carlos Irrigation Project (Indian Works) (See Note #4).	Basic per acre *			\$97.78	\$90.50
Uintah Irrigation Project	Basic per acre			23.00	23.00
	Minimum Bill			25.00	25.00
Walker River Irrigation Project	Basic per acre			31.00	31.00

* Notes irrigation projects where rates are adjusted.

+ These rates have not yet been determined.

† The excess water rate applies to all water used in excess of 50,000 gallons in any one month.

Note #1 O&M rates for LeClair and Riverton Valley Irrigation Districts apply to Trust lands that are serviced by each irrigation district. The annual O&M rates are based on budgets submitted by LeClair and Riverton Valley Irrigation Districts, respectively.

Note #2 The O&M rate for the Yuma Project, Indian Unit has two components. The first component of the O&M rate is established by the Bureau of Reclamation (BOR), the owner and operator of the Project. BOR's rate, which is based upon the annual budget submitted by BOR, is \$151.00 for 2021 but has not been established for 2022. The second component of the O&M rate is established by BIA to cover administrative costs, which includes billing and collections for the Project. The final 2021 (85 FR 47235 (August 4, 2020)) BIA rate component is \$3.50/acre. The proposed 2022 BIA rate component is \$4.00/acre.

Note #3 The Construction Water Rate Schedule identifies fees assessed for use of irrigation water for non-irrigation purposes.

Note #4 The O&M rate for the San Carlos Irrigation Project—Indian Works has three components. The first component is established by the San Carlos Irrigation Project—Indian Works, the owner and operator of the Project; the final 2021 rate is \$56.00 per acre, and proposed 2022 rate is \$56.50 per acre. The second component is established by the San Carlos Irrigation Project—Joint Works; the 2021 rate is \$25.78 per acre, and proposed 2022 rate is \$26.00 per acre. The third component is established by the San Carlos Irrigation Project Joint Control Board; the 2021 rate is \$16.00 per acre, and 2022 rate is \$8.00 per acre.

Consultation and Coordination With Tribal Governments (Executive Order 13175)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this notice under the Department's consultation policy and under the criteria of Executive Order 13175 and have determined there to be substantial direct effects on federally recognized Tribes because the irrigation projects are located on or associated with Indian reservations. To fulfill its consultation responsibility to Tribes and Tribal organizations, BIA communicates, coordinates, and consults on a continuing basis with

these entities on issues of water delivery, water availability, and costs of administration, operation, maintenance, and rehabilitation of projects that concern them. This is accomplished at the individual irrigation project by project, agency, and regional representatives, as appropriate, in accordance with local protocol and procedures. This notice is one component of our overall coordination and consultation process to provide notice to, and request comments from, these entities when we adjust irrigation assessment rates.

Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use (Executive Order 13211)

The proposed rate adjustments are not a significant energy action under the

definition in Executive Order 13211. A Statement of Energy Effects is not required.

Regulatory Planning and Review (Executive Order 12866)

These proposed rate adjustments are not a significant regulatory action and do not need to be reviewed by the Office of Management and Budget under Executive Order 12866.

Regulatory Flexibility Act

These proposed rate adjustments are not a rule for the purposes of the Regulatory Flexibility Act because they establish "a rule of particular applicability relating to rates."

5 U.S.C. 601(2).

Unfunded Mandates Reform Act of 1995

These proposed rate adjustments do not impose an unfunded mandate on state, local, or Tribal governments in the aggregate, or on the private sector, of more than \$130 million per year. They do not have a significant or unique effect on State, local, or Tribal governments or the private sector. Therefore, the Department is not required to prepare a statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*).

Takings (Executive Order 12630)

These proposed rate adjustments do not effect a taking of private property or otherwise have “takings” implications under Executive Order 12630. The proposed rate adjustments do not deprive the public, State, or local governments of rights or property.

Federalism (Executive Order 13132)

Under the criteria in section 1 of Executive Order 13132, these proposed rate adjustments do not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement because they will not affect the States, the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. A federalism summary impact statement is not required.

Civil Justice Reform (Executive Order 12988)

This notice complies with the requirements of Executive Order 12988. Specifically, in issuing this notice, the Department has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct as required by section 3 of Executive Order 12988.

Paperwork Reduction Act of 1995

These proposed rate adjustments do not affect the collections of information which have been approved by the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995. The OMB Control Number is 1076-0141 and expires January 31, 2023.

National Environmental Policy Act

The Department has determined that these proposed rate adjustments do not constitute a major Federal action significantly affecting the quality of the human environment and that no

detailed statement is required under the National Environmental Policy Act of 1969, 42 U.S.C. 4321–4370(d), pursuant to 43 CFR 46.210(i). In addition, the proposed rate adjustments do not present any of the 12 extraordinary circumstances listed at 43 CFR 46.215.

Bryan Newland,

Principal Deputy Assistant Secretary—Indian Affairs.

BILLING CODE 4337–15–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–525 and 731–TA–1260–1261 (Review)]

Certain Welded Line Pipe From Korea and Turkey; Scheduling of Expedited Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of expedited reviews pursuant to the Tariff Act of 1930 (“the Act”) to determine whether revocation of the countervailing and antidumping duty orders on certain welded line pipe from Korea and Turkey would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time.

DATES: February 5, 2021.

FOR FURTHER INFORMATION CONTACT:

Christopher W. Robinson (202–205–2542), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission’s TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for these reviews may be viewed on the Commission’s electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On February 5, 2021, the Commission determined that the domestic interested party group response to its notice of institution (85 FR 69354, November 2, 2020) of the subject five-year reviews was adequate and that the respondent interested party

group response was inadequate. The Commission did not find any other circumstances that would warrant conducting full reviews.¹ Accordingly, the Commission determined that it would conduct expedited reviews pursuant to section 751(c)(3) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(3)).

For further information concerning the conduct of these reviews and rules of general application, consult the Commission’s Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Please note the Secretary’s Office will accept only electronic filings at this time. Filings must be made through the Commission’s Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Staff report.—A staff report containing information concerning the subject matter of the reviews will be placed in the nonpublic record on May 11, 2021, and made available to persons on the Administrative Protective Order service list for these reviews. A public version will be issued thereafter, pursuant to section 207.62(d)(4) of the Commission’s rules.

Written submissions.—As provided in section 207.62(d) of the Commission’s rules, interested parties that are parties to the reviews and that have provided individually adequate responses to the notice of institution,² and any party other than an interested party to the reviews may file written comments with the Secretary on what determination the Commission should reach in the reviews. Comments are due on or before May 18, 2021 and may not contain new factual information. Any person that is neither a party to the five-year reviews nor an interested party may submit a brief written statement (which shall not contain any new factual information) pertinent to the reviews by May 18, 2021. However, should the Department of Commerce (“Commerce”) extend the time limit for its completion of the final results of its reviews, the deadline for

¹ A record of the Commissioners’ votes is available from the Office of the Secretary and at the Commission’s website.

² The Commission has found a joint response to its notice of institution filed on behalf of American Cast Iron Pipe Company, Axis Pipe and Tube, California Steel Industries, IPSCO Tubulars Inc., Maverick Tube Corporation, Stupp Corporation, Tex-Tube Company, and Welspun Tubular LLC, and Wheatland Tube Company, domestic producers of certain welded line pipe, to each be individually adequate. Comments from other interested parties will not be accepted (*see* 19 CFR 207.62(d)(2)).

comments (which may not contain new factual information) on Commerce's final results is three business days after the issuance of Commerce's results. If comments contain business proprietary information (BPI), they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings.

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the reviews must be served on all other parties to the reviews (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Determination.—The Commission has determined these reviews are extraordinarily complicated and therefore has determined to exercise its authority to extend the review period by up to 90 days pursuant to 19 U.S.C. 1675(c)(5)(B).

Authority: These reviews are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: May 4, 2021.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2021-09787 Filed 5-7-21; 8:45 am]

BILLING CODE 7020-02-P

DEPARTMENT OF LABOR

Employment and Training Administration

Workforce Information Advisory Council

AGENCY: Employment and Training Administration, Labor.

ACTION: Request for nominations for membership on the Workforce Information Advisory Council.

SUMMARY: The Department of Labor (DOL) invites interested parties to submit nominations for individuals to serve on the Workforce Information Advisory Council (WIAC) and announces the procedures for those nominations. There are vacant positions on the WIAC representing State agencies with responsibility for workforce investment activities (State Workforce Agency representatives) and

representatives of State workforce and labor market information (LMI) directors. While this notice is directed specifically to obtaining nominations for the current vacancies, LMI director and State Workforce Agency representatives, individuals qualified for the other five membership categories listed below in the **SUPPLEMENTARY INFORMATION** section are invited to submit nomination materials, and DOL will consider these nominees in the event that seats in those categories become available. When submitting nomination materials, please indicate the category or categories for which the nominee would like to be considered. Information regarding the WIAC can be found at <https://www.dol.gov/agencies/eta/wioa/wiac>.

DATES: Nominations for individuals to serve on the WIAC must be submitted (postmarked, if sending by mail; submitted electronically; or received, if hand delivered) by June 9, 2021.

ADDRESSES: You may submit nominations and supporting materials described in this **Federal Register** Notice by the following method:

Electronically: Submit nominations, including attachments, by email using the following address: WIAC@dol.gov (use subject line "Nomination—Workforce Information Advisory Council"). The Department will not accept nominations by mail, express delivery, hand delivery, messenger, courier service, or facsimile.

SUPPLEMENTARY INFORMATION: Section 15 of the Wagner-Peyser Act, 29 U.S.C. 491–2, as amended by section 308 of the Workforce Innovation and Opportunity Act of 2014 (WIOA), Pub. L. 113–128, requires the Secretary of Labor (Secretary) to establish a WIAC.

The statute, as amended, requires the Secretary, acting through the Commissioner of Labor Statistics and the Assistant Secretary for Employment and Training, to formally consult at least twice annually with the WIAC to address: (1) Evaluation and improvement of the nationwide workforce and labor market information system established by the Wagner-Peyser Act, and of the statewide systems that comprise the nationwide system, and (2) how the Department of Labor and the States will cooperate in the management of those systems. The Secretary, acting through the Bureau of Labor Statistics (BLS) and the Employment and Training Administration (ETA), and in consultation with the WIAC and appropriate federal agencies, must also develop a two-year plan for management of the labor market information system. The statute

generally prescribes how the plan is to be developed and implemented, outlines the contents of the plan, and requires the Secretary to submit the plan to designated authorizing committees in the House and Senate.

By law, the Secretary must "seek, review, and evaluate" recommendations from the WIAC, and respond in writing to the Council. The WIAC must make written recommendations to the Secretary on the evaluation and improvement of the workforce and labor market information system, including recommendations for the two-year plan. The two-year plan, in turn, must describe WIAC recommendations and the extent to which the plan incorporates them.

The Department anticipates that the WIAC will accomplish its objectives by, for example: (1) Studying workforce and labor market information issues; (2) seeking and sharing information on innovative approaches, new technologies, and data to inform employment, skills training, and workforce and economic development decision making and policy; and (3) advising the Secretary on how the workforce and labor market information system can best support workforce development, planning, and program development.

Pertinent information about the WIAC, including recommendations, reports, background information, agendas, and meeting minutes, can be accessed at the WIAC's website located at <https://www.dol.gov/agencies/eta/wioa/wiac>.

The Wagner-Peyser Act, at section 15(d)(2)(B), requires the WIAC to have 14 members, appointed by the Secretary, consisting of:

(1) Four members who are representatives of lead State agencies with responsibility for workforce investment activities, or State agencies described in Wagner-Peyser Act section 4 (agency designated or authorized by Governor to cooperate with the Secretary of Labor), who have been nominated by such agencies or by a national organization that represents such agencies;

(2) Four members who are representatives of the State workforce and labor market information directors affiliated with the State agencies responsible for the management and oversight of the workforce and labor market information system as described in Wagner-Peyser Act section 15(e)(2), who have been nominated by the directors;

(3) One member who is a representative of providers of training services under WIOA section 122

(Identification of Eligible Providers of Training Services);

(4) One member who is a representative of economic development entities;

(5) One member who is a representative of businesses, who has been nominated by national business organizations or trade associations;

(6) One member who is a representative of labor organizations, who has been nominated by a national labor federation;

(7) One member who is a representative of local workforce development boards, who has been nominated by a national organization representing such boards; and

(8) One member who is a representative of research entities that use workforce and labor market information.

The Secretary must ensure that the membership of the WIAC is geographically diverse, and that no two members appointed under clauses (1), (2), and (7) above represent the same State. Please note, the members whom the Secretary appoints to fill these vacancies will serve the balance of their predecessors' unexpired terms, in this case from the date of appointment until March 9, 2023. Members of the Council will serve on a voluntary and generally uncompensated basis, but will be reimbursed for travel expenses to attend WIAC meetings, including per diem in lieu of subsistence, as authorized by the Federal travel regulations.

The WIAC is a permanent advisory council and, as such, is not governed by the Federal Advisory Committee Act's (FACA) section 14, on termination of advisory committees. In other respects, however, WIAC membership will be consistent with the FACA requirement that membership be "fairly balanced in terms of the points of view represented and the functions to be performed" (5 U.S.C. App. 2, section 5(b)(2)), as specified in Wagner-Peyser section 15(2)(B) & (C), and the requirement that members come from "a cross-section of those directly affected, interested, and qualified, as appropriate to the nature and functions" of the WIAC (41 CFR 102-3.60(b)(3)). Under the FACA regulation, the composition of the WIAC will, therefore, depend upon several factors, including: (i) The WIAC's mission; (ii) the geographic, ethnic, social, economic, or scientific impact of the WIAC's recommendations; (iii) the types of specific perspectives required; (iv) the need to obtain divergent points of view on the issues before the WIAC, such as those of consumers, technical experts, the public at large, academia, business, or other sectors; and (v) the

relevance of State, local, or tribal governments to the development of the WIAC's recommendations (41 CFR 102-3, Subpart B, Appendix A.).

To the extent permitted by FACA and other applicable laws, WIAC membership should also be consistent with achieving the greatest impact, scope, and credibility among diverse stakeholders. The diversity in such membership includes, but is not limited to, race, gender, disability, sexual orientation, and gender identity.

Nominations Process: Nominations for a representative of lead State agencies with responsibility for workforce investment activities, or State agencies described in Wagner-Peyser Act section 4 (agency designated or authorized by Governor to cooperate with the Secretary of Labor), must be nominated by such agencies or by a national organization that represents such agencies. Nominations for a representative of State workforce and labor market information directors affiliated with the State agencies responsible for the management and oversight of the workforce and labor market information system as described in Wagner-Peyser Act section 15(e)(2), must be nominated by the directors.

To nominate an individual for appointment to the WIAC, please submit, to one of the addresses listed below, the following information:

- A copy of the nominee's resume or curriculum vitae;
- A cover letter that provides your reason(s) for nominating the individual, the constituency area that they represent (as outlined above in the WIAC membership identification discussion), and their particular expertise for contributing to the national policy discussion on: (1) The evaluation and improvement of the nationwide workforce and labor market information system and statewide systems that comprise the nationwide system, and (2) how the Department of Labor and the States will cooperate in the management of those systems, including programs that produce employment-related statistics and State and local workforce and labor market information; and
- Contact information for the nominee (name, title, business address, business phone, and business email address).

In addition, the cover letter must state the nomination is being made in response to this **Federal Register** Notice and the nominee (if nominating someone other than oneself) has agreed to be nominated and is willing to serve on the WIAC. Nominees will be appointed based on their qualifications, professional experience, and

demonstrated knowledge of issues related to the purpose and scope of the WIAC, as well as diversity considerations. The Department will publish a list of the new WIAC members on the WIAC's website at <https://www.dol.gov/agencies/eta/wioa/wiac>.

FOR FURTHER INFORMATION CONTACT: Steve Rietzke, WIAC Designated Federal Officer, WIAC@dol.gov.

Authority: Pursuant to the Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 *et seq.*; Workforce Innovation and Opportunity Act, Pub. L. 113-128; Federal Advisory Committee Act, as amended, 5 U.S.C. App. 2.

Suzan G. LeVine,

Principal Deputy Assistant Secretary for Employment and Training Administration, Labor.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

Employment and Training Administration (ETA) Program Year (PY) 2021 Workforce Innovation and Opportunity Act (WIOA) Section 167, National Farmworker Jobs Program (NFJP) Proposed Modifications to Allotment Formula

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice; request for comments.

SUMMARY: This Notice announces proposed modifications to the allotment formula for the National Farmworker Jobs Program (NFJP), which is authorized under the Workforce Innovation and Opportunity Act (WIOA), Section 167, and presents preliminary State planning estimates for Program Year (PY) 2021. These allotments are estimates based on the funds appropriated in the Consolidated Appropriations Act, 2021 (from this point forward will be referred to as the "the Act"). The U.S. Department of Labor (DOL), Employment and Training Administration (ETA) will accept comments related to the allotment methodology, including modifications and the hold-harmless provision.

DATES: The PY 2021 NFJP allotments become effective for the grant period that begins July 1, 2021. Written comments on this notice are invited and must be received on or before May 24, 2021.

ADDRESSES: Comments are accepted via email to NFJP@dol.gov. Please enter "PY21 National Farmworker Jobs

Program Grantee Allotments Public Comment” in the subject line of the email.

FOR FURTHER INFORMATION CONTACT:

Questions on this notice can be submitted to the Employment and Training Administration, Office of Workforce Investment, Attention: Laura Ibañez, Unit Chief, (202) 693–3645 or Steven Rietzke, Division Chief at (202) 693–3912, or at NFJP@dol.gov.

Individuals with hearing or speech impairments may access the telephone numbers above via TTY by calling the toll-free Federal Information Relay Service at 1–877–889–5627 (TTY–TDD).

SUPPLEMENTARY INFORMATION: This notice is published according to Section 182(d) of the WIOA, Prompt Allotment of Funds. ETA developed the formula to distribute funds geographically by state service area, based on each state service area’s relative share of persons eligible for the program. The formula’s original methodology is described in the **Federal Register** notice 64 FR 27390, May 19, 1999. That information is accessible at <https://www.federalregister.gov/>. In PY 2018, ETA incorporated two modifications to the allotment formula to provide more accurate estimates of each state service area’s relative share of persons eligible for the program. The formula also used updated data from each of the four data files serving as the basis of the formula since 1999. The revised formula methodology is described in the **Federal Register** notice 83 FR 32151, July 11, 2018.

Beginning in PY 2021, ETA is making two modifications to the allotment formula. These modifications will improve the formula’s accuracy in terms of estimating the true NFJP-eligible population in state service areas, and one of the modifications is necessitated by a recent statutory change to the NFJP eligibility criteria, which Congress enacted in the FY 2021 appropriation. Section II includes further explanation of these modifications. This Notice includes the following sections:

- Section II of this notice provides a discussion of the updated data that will be used to populate the formula and the proposed formula modifications.
- Section III describes the hold-harmless provision for the implementation year and the following years. The hold-harmless provision is designed to provide a staged transition from old to new shares of funding for State service areas.
- Section IV describes minimum funding provisions to address State service areas that would receive less than \$60,000.

- Section V describes the application of the formula and the hold-harmless provision using preliminary planning estimates for PY 2021.

This notice represents the first of a two-stage process. Upon receipt of public comments regarding this notice related to the formula methodology and modifications, ETA will consider comments and finalize the formula methodology and results. In the second stage, ETA will publish the final formula and final allotment levels in the **Federal Register**.

I. Background

The Department is announcing preliminary PY 2021 allotments for the National Farmworker Jobs Program (NFJP). This notice provides information on the amount of funds available during PY 2021 to state service areas awarded grants through Funding Opportunity Announcement FOA–ETA–20–08 for the NFJP Career Services and Training grants and Housing grants. Funds to implement NFJP are appropriated in the Act. In appropriating these funds, Congress provided \$87,083,000 for formula grants (of which \$86,946,000 was allotted after \$137,000 was set aside for program integrity), \$6,256,000 for migrant and seasonal farmworker housing (of which not less than 70 percent shall be for permanent housing), and another \$557,000 was set aside for discretionary purposes. Included below is the table listing the preliminary PY 2021 allotments for the NFJP Career Services and Training grants. Individual grants are awarded for Housing as a result of the grants competition and are further distributed according to language in the appropriations law requiring that of the total amount available, not less than 70 percent shall be allocated to permanent housing activities, leaving not more than 30 percent to temporary housing activities.

II. Description of Data Files and Review of PY 2021 Modifications to the Allotment Formula

As with all state planning estimates since 1999, the PY 2021 estimates are based on four data sources: (1) State-level, 2017 hired farm labor expenditure data from the United States Department of Agriculture’s (USDA) Census of Agriculture (COA); (2) regional-level, 2017 average hourly earnings data from the USDA’s Farm Labor Survey; (3) regional-level, 2010–2018 demographic data from the ETA’s National Agricultural Workers Survey (NAWS); and, (4) 2015–2019 (5-year file) data from the United States Census Bureau’s American Community Survey (ACS). A

detailed description of how each data source is used within the formula is in the **Federal Register** notice 64 FR 27390, May 19, 1999). In addition to populating the formula with updated data, ETA is proposing two modifications that will improve the formula’s accuracy in terms of estimating the true NFJP-eligible population in state service areas, and one of the modifications is necessitated by the change to the NFJP eligibility criteria applicable to the PY 2021 appropriation.

(1) First, the Act expands program eligibility for grants funded by the PY 2021 appropriation to include farmworkers who are in families with total family incomes at or below 150 percent of the poverty line. Previously, the definition of a low income individual in WIOA section 3(36)(A)(ii) was based on whether the individual was in a family with a total family income that did not exceed the higher of the poverty line or 70 percent of the lower living standard income level. As noted above, a provision to expand program eligibility is included in the appropriations language for PY 2021. It applies to grant activities funded under the PY 2021 awards. Therefore, the PY 2021 allocations will use special tabulations of data from the American Community Survey (ACS) that reflect farmworkers with total family incomes at or below 150 percent of the poverty line. ETA will subsequently revise the PY 2022 guidance regarding the definition of “low-income individual,” as needed if the same provision is not included in subsequent appropriations.

(2) Second, and to more closely align the formula with the definition of eligible migrant and seasonal farmworker under WIOA Section 167(i) and 20 CFR 685.110 and clarified in the Training and Employment Guidance Letter 18–16, ETA proposes modifying how the formula accounts for crop workers who are primarily employed in agriculture. Previously, for the formula, a crop worker was considered to be primarily employed in agriculture if (1) at least 50 percent of their total individual income was from farm work, *and* (2) if they worked at least 25 days or earned at least \$800 in crop farm work in the previous 24 months. ETA proposes the formula consider a crop worker to be primarily employed in agriculture if at least 50 percent of their total individual income is from farm work *or* at least 50 percent of their total employment time is in farm work.¹ As

¹ To determine “primarily employed in agriculture” criteria, which has two parts, ETA uses individual income from farm work.

with all state planning estimates since 1999, ETA will use NAWS data to determine the share of crop labor hours in each state that was performed by crop workers who were primarily employed in agriculture, per this eligibility criterion. This modification only applies to estimates of NFJP-eligible labor hours performed by crop workers, because the data that would be needed to similarly estimate NFJP-eligible labor hours performed by animal agricultural (livestock) workers are not available. As with previous allocations of NFJP grant funds, updating the data sources used in the formula and modifying the NFJP eligibility criteria will result in changes in each state's relative share of funding. Therefore, ETA mitigates large changes in state allotments by using the StopLoss/StopGain provisions discussed in Section III.

III. Description of the Hold-Harmless Provision

ETA is proposing to continue the hold-harmless provision as instituted in PY 2018. The updated data resulted in significant changes for a few states and the hold-harmless provision provides for a stop loss/stop gain limit to transition to the use of the updated data. This approach is based on a state service area's previous year's allotment percentage, which is its relative share of the total formula allotments. ETA will implement the staged transition of the hold-harmless provision as follows:

(1) In PY 2021, each state service area will receive an amount equal to at least 95 percent of their PY 2020 allotment percentage, as applied to the PY 2021 formula funds available;

(2) In PY 2022, each state service area will receive an amount equal to at least 90 percent of their PY 2021 allotment

percentage, as applied to the PY 2022 formula funds available;

(3) In PY 2023, each state service area will receive an amount equal to at least 85 percent of their PY 2022 allotment percentage, as applied to the PY 2023 formula funds available.

In PY 2021, 2022, and 2023, the stop gain provision provides that no state service area will receive an amount that is more than 150 percent of their previous year's allotment percentage.

In PY 2024, since the Department has a responsibility to use the most current and reliable data available, amounts for the new awards will be based on updated data from the sources described in Section II, pending their availability. At that time, the Department will determine whether the changes to state allotments are significant enough to warrant another hold-harmless provision. Otherwise, allotments to each state service area will be for an amount resulting from a direct allotment of the proposed funding formula without adjustment.

IV. Minimum Funding Provisions

A state area that would receive less than \$60,000 by application of the formula will, at the option of the DOL, receive no allotment or, if practical, be combined with another adjacent state area. Funding below \$60,000 is deemed insufficient for sustaining an independently administered program. However, if practical, a state jurisdiction that would receive less than \$60,000 may be combined with another adjacent state area.

V. Program Year 2021 Preliminary State Allotments

The state allotments set forth in the Table appended to this notice reflect the

distribution resulting from the allotment formula described above. For PY 2020, \$91,896,000 was appropriated for migrant and seasonal farmworker programs, of which \$85,229,000 was appropriated for training grants and allotted based on the PY 2018 formula updates. The remaining \$6,122,000 of the PY 2020 appropriation was retained to fund housing grants, and \$545,000 was retained for Training and Technical Assistance. The figures in the first numerical column show the actual PY 2020 formula allotments to state service areas. The next column shows the percentage share of each allotment to the total available.

For PY 2021, the funding level provided for in the Act for the migrant and seasonal farmworker program is \$93,896,000 of which \$87,083,000 was appropriated for training grants. After allowable funds are set aside for program integrity (\$137,000), the Department will allot \$86,946,000 for training grants based on the formula and data outlined in this notice. For purposes of illustrating the effects of the updates to the allotment formula, columns 3 and 4 show the state service area allotments with the application of the first-year (95 percent) hold-harmless and minimum funding provisions, followed by the percentages. The difference between PY 2021 and PY 2020 allotments is shown in column 5. Column 6 of the Table shows the allotments based on the proposed formula without the application of the hold-harmless or minimum funding provisions. The percentages are reported in column 7.

Suzan G. LeVine,

Principal Deputy Assistant Secretary,
Employment and Training, Labor.

[FR Doc. 2021-09799 Filed 5-7-21; 8:45 am]

BILLING CODE 4510-FN-C

DEPARTMENT OF LABOR

[Docket No. DOL-2021-09669]

Privacy Act of 1974; System of Records

AGENCY: Transition Assistance Program, Veterans' Training and Employment Service, Department of Labor.

ACTION: Notice of a new system of records.

SUMMARY: Employment Navigators will be located on-site at specific military installations. Their primary duty is to assist transitioning service members by finding suitable employment before the transition to the civilian workforce occurs. This can be done directly, or with assistance from an approved Veterans' Employment and Training Service (VETS) partner entity. A cloud-based case management system is required to collect certain key data elements, including personally identifiable (PII) information, for the purposes of employment outcome analysis and return on investment calculations. Because of the nature of geographic spread of Employment Navigators, Transition Assistance Program (TAP) partners, and VETS staff, a cloud-based data entry and reporting system must be available to all users wherever internet access is available. The PII will be matched with external data sources, such as the National Directory of New Hires, to produce validated employment outcomes, as well as reducing burden on Employment Navigators to conduct follow-up assessments with services members or veterans.

DATES: This System of Records Notice (SORN) is effective upon its publication in today's **Federal Register** with the exception of the routine uses. The new routine uses will not be effective until June 9, 2021 pending public comment. Comments on the new routine uses or other aspects of the SORN must be submitted on or before June 9, 2021.

ADDRESSES: Submit your comments by one of the following methods:

Electronic Comments: Comments may be sent via email to SORN Murren.Luke@dol.gov. Mail: Address written submissions (including thumb drive and CD-ROM submissions) to U.S. DOL, VETS, and Attn: Luke Murren, 200 Constitution Avenue NW, Suite 2-1212,

and Washington, DC 20210.

Instructions: Please submit only one copy of your comments by only one method. All submissions must include the agency's name and the Docket Number DOL-2021-09669. Please be advised that comments received will become a matter of public record and will be posted without change to <http://www.regulations.gov>, including any personal information provided. Comments that are mailed must be received by the date indicated for consideration.

Docket: For access to the docket to read background documents or comments, go to the Federal e-Rulemaking Portal at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Request for additional information should be submitted to the email and physical address *Electronic Comments:* Comments may be sent via email to Murren.Luke@dol.gov attention Luke Murren. Mail: Address written submissions to U.S. DOL, VETS, and Attn: Luke Murren, 200 Constitution Avenue NW, Suite 2-1212, and Washington, DC 20210. You may also contact Luke Murren at his work number 202-693-4711 for additional information.

SUPPLEMENTARY INFORMATION: The proposed system will be vital to safeguarding the information collected while receiving services from an Employment Navigator, or approved partner. This is a new DOL data collection system.

SYSTEM NAME AND NUMBER:

Employment Navigator Case Management System; DOL/VETS-7

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Primary location: Offices in various components within the U.S. Department of Labor, at the Frances Perkins Building, 200 Constitution Avenue NW, Washington, DC 20210, or other Department offices. Additionally, duplicate versions of some or all system information may also be at satellite locations where VETS has granted direct access to support VETS operations, system backup, emergency preparedness, and/or continuity of operations. To determine the location of particular program records, contact the system manager, listed in section "SYSTEM MANAGER" below.

SYSTEM MANAGER(S):

VETS Information Technology Director, U.S. Department of Labor/

Veterans' Employment and Training Service (VETS), 200 Constitution Ave. NW, Room S-1212, Washington, DC 20210, Work: (202) 693-4712.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Defense Manpower Data Center Data Base, November 23, 2011, 76 FR 72391; 38 U.S.C. 4102, Job Counseling, Training, and Placement Service for Veterans; and 10 U.S.C. 1142, Pre-separation Counseling; E.O. 9397. And pursuant to 10 U.S. Code § 1144 Employment assistance, job training assistance, and other transitional services: Department of Labor. The above referenced section requires DOL to "establish and maintain a program to furnish counseling, assistance in identifying employment and training opportunities, help in obtaining such employment and training, and other related information and services to members of the armed forces under the jurisdiction of the Secretary concerned who are being separated from active duty and the spouses of such members." However, there is currently no way to measure the effectiveness or capture best practices of this requirement. Congress and the Office of Management and Budget have mentioned a great desire for DOL to be able to provide return-on-investment performance metrics for this program requirement. This requires analyzing data pertaining to all transitioning service members. The Department of Defense maintains this dataset, and will share the information with DOL through an established Memorandum of Understanding.

PURPOSE(S) OF THE SYSTEM:

The purpose of the proposed system is to enable transitioning service members and recently separated veterans' assistance in finding the best-fit career as quickly as possible. The system will allow Employment Navigators and partners to capture necessary information for DOL to conduct employment outcome analysis. The case management/reporting system should have three separate functions, with three separate roles assigned to users. The first module will allow for Employment Navigators to enter individual record data for each participant (transitioning service member) into the system. This information will be personal characteristics, services offered, and/or referral information. The second module will be accessible by TAP partner entities who will provide information on services they provided, and outcomes such as job placements, occupation employed in, and wages

earned at start of employment. The last module will be accessible by internal DOL/VETS staff who wish to extract data entered in the first two modules mentioned above. DOL staff should be able to view logs of data entered in the system, create a data extract, and view canned reports created from either module.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Exiting service members participating in the United States Department of Defense (DOD) Pre-separation Counseling of the Transition Assistance Program (TAP) who complete documentation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Data securely stored in the system will include personal characteristics, various services received from Employment Navigators and/or TAP partners, employment outcome data, and PII required to match to NDNH for employment status and earnings.

RECORD SOURCE CATEGORIES:

Data stored in this system include those captured by Employment Navigators and/or TAP partner entities at the time of service. Additional employment and earnings data will come from the NDNH.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

Each record maintained in the system will represent one transitioning service member/recently separated veteran. Routine uses for Employment Navigators and Tap partners include data entry for services received, and employment outcomes. DOL staff will utilize the system for outcome analysis, research and return on investment calculations.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records will be stored electronically in a secure environment.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Retrieval of records will only be conducted by DOL staff and approved contractors who pass a data sensitivity training module. Retrieval and analysis will be done according to: rank, military branch, military occupation specialty, employment status, quarterly earnings, and/or length of military service.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are retained indefinitely.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

The system will require a username and password for all users. The system will also feature cloud-based security protocols, and servers will be located in a secure physical location.

RECORD ACCESS PROCEDURES:

A request for access should be mailed or emailed to the system manager.

CONTESTING RECORD PROCEDURES:

A petition for amendment should be mailed or emailed to the system manager.

NOTIFICATION PROCEDURES:

Inquiry requests should be mailed or emailed to the system manager.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

A 60-day notice has been published to the **Federal Register**, and is available to be viewed here: <https://www.federalregister.gov/documents/2020/07/29/2020-16378/agency-information-collection-activities-comment-request>.

Rachana Desai Martin,

Senior Agency Official for Privacy, Deputy Assistant Secretary for Policy, Office of the Assistant Secretary for Administration and Management, Department of Labor.

[FR Doc. 2021-09669 Filed 5-7-21; 8:45 am]

BILLING CODE 4510-79-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by the party listed below.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before June 9, 2021.

ADDRESSES: You may submit your comments including the docket number of the petition by any of the following methods:

1. *Electronic Mail:* zzMSHA-comments@dol.gov. Include the docket number of the petition in the subject line of the message.

2. *Facsimile:* 202-693-9441.

3. *Regular Mail or Hand Delivery:*

MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202-5452, Attention: S. Aromie Noe, Acting Deputy Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202-693-9440 (voice), noe.song-ae.a@dol.gov (email), or 202-693-9441 (facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M-2021-006-C.

Petitioner: Patton Mining, LLC., P.O. Box 457, Hillsboro Illinois (ZIP 62049).

Mine: Deer Run Mine, MSHA I.D. No. 11-03182, located in Montgomery County, Illinois.

Regulations Affected: 30 CFR 75.503 (Permissible electric face equipment; maintenance); and 18.35(a)(5)(i) (Portable (trailing) cables and cords).

Modification Request: The petitioner requests a modification of 30 CFR

75.503 to increase the maximum length of trailing cables supplying power to permissible equipment used in continuous mining sections. Specifically, the petitioner requests a modification of 30 CFR 18.35(a)(5)(i) to permit an increase in the maximum length of trailing cables supplying power to roof bolters beyond 500 feet. The petitioner asserts this alternate method of compliance will decrease the likelihood of cable damage and therefore enhance safety for miners handling the cable.

The petitioner states that:

(a) Increasing the length of cable supplying power to the roof bolter machines will reduce the frequency that a section power center must be advanced, and thus, lessen handling of the cable, decrease the opportunities for cable damage, and minimize exposure to the miners handling the cable.

The petitioner proposes the following:

(a) This petition shall apply only to trailing cables supplying three-phase, 995-volt power to roof bolters.

(b) The maximum length of the 995-volt trailing cables shall be 950 feet.

(c) The 995-volt trailing cables shall not be smaller than #2 American Wire Gauge (AWG).

(d) A Schweitzer Engineering Laboratories 751A ("SEL-751A") overcurrent protection relay will be used, and a designated official of Patton Mining, LLC shall manage the password protected settings.

(e) All circuit breakers used to protect #2 AWG trailing cables exceeding 700 feet in length shall have instantaneous trip units calibrated to trip at 800 amperes. The trip setting of these circuit breakers shall be password protected, and these circuit breakers shall have permanent, legible labels. Each label shall identify the circuit breaker as being suitable for protecting #2 AWG cables. This label shall be maintained legible.

(f) Replacement instantaneous trip units that are used to protect #2 AWG trailing cables, shall be calibrated to trip at 800 amperes, and this setting shall be password protected.

(g) During each production day, persons designated by the operator shall visually examine the trailing cables to ensure that the cables are in safe operating condition.

(h) Any trailing cable that is not in safe operating condition shall be removed from service immediately and shall be repaired or replaced.

(i) Each splice or repair in the trailing cables shall be made in a workmanlike manner and in accordance with the instructions of the manufacturer of the splice or repair materials. The splice or

repair shall comply with 30 CFR 75.603 and 75.604.

(j) Permanent warning labels shall be installed and maintained on the cover(s) of the power center identifying the location of each password protected short-circuit protection device. These labels shall warn miners not to change or alter the short-circuit settings.

(k) The petitioner's alternative method shall not be implemented until miners designated to examine the integrity of the settings, verify the short-circuit settings, examine trailing cables for defects and damage according to the proper procedure have received specified training.

(l) Within sixty (60) days after this petition is granted, the petitioner shall propose revisions to the mine's training plans approved under 30 CFR part 48 and submit the proposed revisions to the Coal Mine Safety and Health District Manager for the area where the mine is located. The training shall include the following elements:

1. Training in mining methods and operating procedures that will protect the trailing cables against damage;

2. Training in the proper procedures for examining the trailing cables to ensure the cables are in safe operating condition;

3. Training in hazards of setting the instantaneous circuit breakers too high to adequately protect the trailing cables; and

4. Training in how to verify the circuit interrupting device(s) protecting the trailing cable(s) are properly set and maintained.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standards.

Song-ae Aromie Noe,

Acting Deputy Director, Office of Standards, Regulations, and Variances.

[FR Doc. 2021-09796 Filed 5-7-21; 8:45 am]

BILLING CODE 4520-43-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219-0120]

Proposed Extension of Information Collection; Occupational Noise Exposure

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce

paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Occupational Noise Exposure.

DATES: All comments must be received on or before July 9, 2021.

ADDRESSES: You may submit comment as follows. Please note that late, untimely filed comments will not be considered.

Electronic Submissions: Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for docket number MSHA-2021-0004. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket, with no changes. Because your comment will be made public, you are responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as your or anyone else's Social Security number or confidential business information.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission.

Written/Paper Submissions: Submit written/paper submissions in the following way:

- *Mail/Hand Delivery:* Mail or visit DOL-MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202-5452.

- MSHA will post your comment as well as any attachments, except for information submitted and marked as confidential, in the docket at <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Acting Deputy Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov

(email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

Noise is a harmful physical agent and one of the most pervasive health hazards in mining. Repeated exposure to high levels of sound over time causes occupational noise-induced hearing loss (NIHL), a serious physical impairment with far-reaching psychological and social effects. NIHL can be distinguished from aging and other factors that can contribute to hearing loss and it can be prevented. According to the National Institute for Occupational Safety and Health, NIHL is among the “top ten” leading occupational illnesses and injuries.

At mines, various machines that generate loud sounds are used, such as drills, crushers, compressors, conveyors, trucks, loaders, and other heavy-duty equipment for the excavation, haulage, and processing of materials. The operators of these machines and miners working nearby are exposed to the high sound levels. For many years, NIHL was regarded as an inevitable consequence of working in a mine, but that is no longer the case. MSHA, the Occupational Safety and Health Administration, the U.S. military, and other organizations around the world have established and enforced standards to reduce the loss of hearing. Quieter equipment, isolation of workers from noise sources, and limiting the time workers are exposed to noise are among the many well-accepted methods that will prevent costly incidences of NIHL.

Records of miner exposures to noise are necessary so that mine operators and MSHA can evaluate the need for and effectiveness of engineering controls, administrative controls, and personal protective equipment to protect miners from harmful levels of noise that can result in hearing loss. However, MSHA believes that extensive records for this purpose are not needed. These requirements are a performance-oriented approach to monitoring. Records of miner hearing examinations enable mine operators and MSHA to

ensure that the controls are effective in preventing NIHL for individual miners. Records of training are needed to confirm that miners receive the information they need to become active participants in hearing conservation efforts.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Occupational Noise Exposure. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Background documents related to this information collection request are available at <https://regulations.gov> and in DOL–MSHA located at 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This information collection request concerns provisions for Occupational Noise Exposure. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request from the previous information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0120.

Affected Public: Business or other for-profit.

Number of Respondents: 12,929.

Frequency: On occasion.

Number of Responses: 190,001.

Annual Burden Hours: 14,153 hours.

Annual Respondent or Recordkeeper Cost: \$30,585.

Comments submitted in response to this notice will be summarized in the request for Office of Management and Budget approval of the proposed information collection request; they will become a matter of public record and will be available at <https://www.reginfo.gov>.

Song-ae Aromie Noe,
Certifying Officer.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2007–0041]

FM Approvals LLC: Grant of Expansion of Recognition and Modification to the NRTL Program’s List of Appropriate Test Standards

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the final decision to expand the scope of recognition for FM Approvals LLC for expansion of recognition as a Nationally Recognized Testing Laboratory (NRTL). Additionally, OSHA announces the final decision to modify the NRTL Program’s List of Appropriate Test Standards to include one additional test standard.

DATES: The expansion of the scope of recognition become effective on May 10, 2021.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, telephone: (202) 693–1999; email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, phone: (202) 693–2110 or email: robinson.kevin@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Notice of Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition of FM Approvals LLC (FM) as a NRTL. This expansion covers the addition of five test standards to FM’s NRTL scope

of recognition, one of which will be added to the NRTL Program's List of Appropriate Test Standards.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified by 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition and is not a delegation or grant of government authority. As a result of recognition, employers may use products properly approved by the NRTL to meet OSHA standards that require testing and certification of the products.

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides the final decision on the application. These notices set forth the

NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including FM, which details the NRTL's scope of recognition. These pages are available from the OSHA website at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

FM submitted an application to OSHA to expand recognition as a NRTL to include five additional test standards on May 16, 2019 (OSHA-2007-0041-0014). OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA did not perform any on-site reviews in relation to this application.

OSHA published the preliminary notice announcing FM's expansion application in the **Federal Register** on February 26, 2021 (86 FR 11794). The agency requested comments by March 15, 2021, but it received no comments in response to this notice. OSHA is now proceeding with this final notice to grant expansion of FM's scope of recognition.

To obtain or review copies of all public documents pertaining to FM's application, go to www.regulations.gov or contact the Docket Office,

Occupational Safety and Health Administration, U.S. Department of Labor; (202) 693-2350. Docket No. OSHA-2007-0041 contains all materials in the record concerning FM's recognition. *Please note:* While OSHA's Docket Office is continuing to accept and process submissions by regular mail, due to the COVID-19 pandemic, the Docket Office is closed to the public and not able to receive submissions to the docket by hand, express mail, messenger, and courier service.

II. Final Decision and Order

OSHA staff examined FM's expansion application, their capability to meet the requirements of the test standards, and other pertinent information. Based on its review of this evidence, OSHA finds that FM meets the requirements of 29 CFR 1910.7 for expansion of its recognition, subject to the limitations and conditions listed below. OSHA, therefore, is proceeding with this final notice to grant FM's scope of recognition. OSHA limits the expansion of FM's recognition to testing and certification of products for demonstration of conformance to the test standards listed in Table 1 below.

TABLE 1—LIST OF APPROPRIATE TEST STANDARDS FOR INCLUSION IN FM'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
* ANSI FM 3265	Spark Detection and Extinguishing Systems.
UL 268	Smoke Detectors for Fire Alarm Systems.
UL 1971	Signaling Devices for the Hearing Impaired.
UL 2127	Inert Gas Clean Agent Extinguishing System Units.
UL 2166	Halocarbon Clean Agent Extinguishing System Units.

* Represents the standard that OSHA is adding to the NRTL Program's List of Appropriate Test Standards.

In this notice, OSHA also announces the addition of a new test standard to the NRTL Program's List of Appropriate Test Standards. Table 2 below lists the

standard that is new to the NRTL Program. OSHA has determined that this test standard is an appropriate test standard and will add it to the NRTL

Program's List of Appropriate Test Standards.

TABLE 2—STANDARD OSHA IS PROPOSING TO ADD TO THE NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
ANSI FM 3265	Spark Detection and Extinguishing Systems.

OSHA's recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, a NRTL's scope of recognition does not include these products.

The American National Standards Institute (ANSI) may approve the test

standard listed above as an American National Standard. However, for convenience, we may use the designation of the standards-developing organization for the standard as opposed to the ANSI designation. Under the NRTL Program's policy (see OSHA Instruction CPL 1-0.3, Appendix C, paragraph XIV), any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine

whether a test standard is currently ANSI-approved.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7, FM must abide by the following conditions of the recognition:

1. FM must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its

operations as a NRTL, and provide details of the change(s);

2. FM must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and

3. FM must continue to meet the requirements for recognition, including all previously published conditions on FM's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of FM, subject to the limitations and conditions specified above. OSHA also adds one standard to the NRTL Program's List of Appropriate Test Standards.

III. Authority and Signature

James S. Frederick, Acting Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW, Washington, DC 20210, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8-2020 (85 FR 58393, September 18, 2020) and 29 CFR 1910.7.

Signed at Washington, DC, on May 4, 2021.

James S. Frederick,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2021-09800 Filed 5-7-21; 8:45 am]

BILLING CODE 4510-26-P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA-2021-028]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of proposed extension request.

SUMMARY: We are proposing to request an extension from the Office of Management and Budget (OMB) of a currently approved information collection used by registrants or other authorized individuals to request information from or copies of Selective Service System (SSS) records. We invite you to comment on this proposed information collection pursuant to the Paperwork Reduction Act of 1995.

DATES: We must receive written comments on or before July 9, 2021.

ADDRESSES: Send comments by email to tamee.fechhelm@nara.gov. Because our buildings are temporarily closed during the COVID-19 restrictions, we are not

able to receive comments by mail during this time.

FOR FURTHER INFORMATION CONTACT:

Tamee Fechhelm, Paperwork Reduction Act Officer, by email at

tamee.fechhelm@nara.gov or by telephone at 301.837.1694 with requests for additional information or copies of the proposed information collection and supporting statement.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104-13), we invite the public and other Federal agencies to comment on proposed information collections. If you have comments or suggestions, they should address one or more of the following points: (a) Whether the proposed information collection is necessary for NARA to properly perform its functions; (b) our estimate of the burden of the proposed information collection and its accuracy; (c) ways we could enhance the quality, utility, and clarity of the information we collect; (d) ways we could minimize the burden on respondents of collecting the information, including through information technology; and (e) whether this collection affects small businesses.

We will summarize any comments you submit and include the summary in our request for OMB approval. All comments will become a matter of public record.

In this notice, we solicit comments concerning the following information collection:

Title: Selective Service System Record Request.

OMB number: 3095-0071.

Agency form numbers: NA Form 13172.

Type of review: Regular.

Affected public: Individuals or households.

Estimated number of respondents: 1,500.

Estimated time per response: 2 minutes.

Frequency of response: On occasion.

Estimated total annual burden hours: 50.

Abstract: The National Personnel Records Center (NPRC) of the National Archives and Records Administration (NARA) administers the Selective Service System (SSS) records. The SSS records contain both classification records and registration cards of registrants born before January 1, 1960. When registrants or other authorized individuals request information from or copies of SSS records they must provide on forms or letters certain information about the registrant and the nature of the request. Requesters use NA Form 13172, Selective Service Record Request

to obtain information from SSS records stored at NARA facilities.

Swarnali Haldar,

Executive for Information Services/CIO.

BILLING CODE 7515-01-P

NATIONAL SCIENCE FOUNDATION

Proposal Review; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub., L. 92-463, as amended), the National Science Foundation (NSF) announces its intent to hold proposal review meetings throughout the year. The purpose of these meetings is to provide advice and recommendations concerning proposals submitted to the NSF for financial support. The agenda for each of these meetings is to review and evaluate proposals as part of the selection process for awards. The review and evaluation may also include assessment of the progress of awarded proposals. The majority of these meetings will take place at NSF, 2415 Eisenhower Avenue, Alexandria, VA 22314.

These meetings will be closed to the public. The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act. NSF will continue to review the agenda and merits of each meeting for overall compliance of the Federal Advisory Committee Act.

These closed proposal review meetings will not be announced on an individual basis in the **Federal Register**. NSF intends to publish a notice similar to this on a quarterly basis. For an advance listing of the closed proposal review meetings that include the names of the proposal review panel and the time, date, place, and any information on changes, corrections, or cancellations, please visit the NSF website: <https://www.nsf.gov/events/>. This information may also be requested by telephoning, 703/292-8687.

Dated: May 55, 2021.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[NRC–2020–0185]

Information Collection: Voluntary Reporting of Performance Indicators

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, “Voluntary Reporting of Performance Indicators.”

DATES: Submit comments by June 9, 2021. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: Infocollects.Resource@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2020–0185 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- **Federal Rulemaking website:** Go to <https://www.regulations.gov/> and search for Docket ID NRC–2020–0185. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC–2020–0185 on this website.

- **NRC’s Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/>

[adams.html](#). To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. A copy of the collection of information and related instructions may be obtained without charge by accessing ADAMS Accession No. ML19025A257. The supporting statement is available in ADAMS under Accession No. ML21060B481.

- **Attention:** The PDR, where you may examine and order copies of public documents, is currently closed. You may submit your request to the PDR via email at pdr.resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (EST), Monday through Friday, except Federal holidays.

- **NRC’s Clearance Officer:** A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC’s Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: Infocollects.Resource@nrc.gov.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (<https://www.regulations.gov/>). Please include Docket ID NRC–2020–0185 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov/> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently

submitted a request for renewal of an existing collection of information to OMB for review entitled, “Voluntary Reporting of Performance Indicators.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on January 8, 2021, (86 FR 1544).

1. *The title of the information collection:* “Voluntary Reporting of Performance Indicators.”

2. *OMB approval number:* 3150–0195.

3. *Type of submission:* Revision.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* Quarterly for Performance Indicator reporting and on occasion for the Frequently Asked Question process.

6. *Who will be required or asked to respond:* Power reactor licensees.

7. *The estimated number of annual responses:* 380 (359 reporting responses + 21 recordkeepers).

8. *The estimated number of annual respondents:* 89.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* The total reporting and recordkeeping burden is 77,734 (76,660 hours reporting + 1,074 hours recordkeeping).

10. *Abstract:* As part of a joint industry-NRC initiative, the NRC receives information submitted voluntarily by power reactor licensees regarding selected performance attributes known as performance indicators (PIs). Performance indicators are objective measures of the performance of licensee systems or programs. The NRC uses PI information and inspection results in its Reactor Oversight Process (ROP) to make decisions about plant performance and regulatory response. Licensees transmit PIs electronically to reduce burden on themselves and the NRC. Licensees also participate in the ROP Performance Indicator Frequently Asked Question (FAQ) process that it is used to resolve interpretation issues with NEI 99–02. The FAQ process and white papers may also be used to propose changes to NEI 99–02 guidance and the PI Program. The NRC and industry review FAQs and white papers and work to achieve resolution during periodic public meetings.

Dated: May 5, 2021.

For the Nuclear Regulatory Commission.
David C. Cullison,
*NRC Clearance Officer, Office of the Chief
 Information Officer.*
 [FR Doc. 2021-09825 Filed 5-7-21; 8:45 am]
BILLING CODE 7590-01-P

POSTAL SERVICE

Privacy Act; System of Records

AGENCY: Postal Service™.

ACTION: Notice of a new system of records.

SUMMARY: The United States Postal Service (USPS™) is proposing to create a new General Privacy Act System of Records.

DATES: These revisions will become effective without further notice on June 9, 2021 unless comments received on or before that date result in a contrary determination.

ADDRESSES: Comments may be submitted via email to the Privacy and Records Management Office, United States Postal Service Headquarters (privacy@usps.gov). Arrangements to view copies of any written comments received, to facilitate public inspection, will be made upon request.

FOR FURTHER INFORMATION CONTACT: Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, 202-268-3069 or privacy@usps.gov.

SUPPLEMENTARY INFORMATION:

Background

The world of commercial information technology resources ("IT") is constantly changing and innovating to improve the daily lives of businesses, their employees, and their customers. This pace can often result in unanticipated obsolescence, necessitating review of an organization's already implemented solutions. For the Postal Service, legal processes and notice required by the Privacy Act present additional challenges, as new technologies will require further review for possible compliance issues to meet statutory and regulatory requirements.

To better meet the changing technology world, the Postal Service will consolidate existing Systems of Records ("SOR"s) covering IT into three new, comprehensive Systems of Records. These SORs will work in tandem, with each individual SOR covering a specific group of related functions, and all three SORs working together to support a seamless technology experience.

These SORs, generally, will cover the following three areas:

- Infrastructure, covering records created for use throughout the entirety of a particular IT resource in addition to covering the records created from the usage of those records by users and applications.
- Applications, covering records created through the regular use of an application.
- Administrative, covering records created for monitoring and administration of users and applications within an IT resource.

In addition to covering these three areas generally, the Postal Service will look ahead in an effort to include possible future technology solutions within this System of Records. This will give the Postal Service flexibility to more easily adapt to the advancing pace of information technology and to better fulfill its service obligations. This will also provide transparency into the collection of records relating to commercial IT, allowing Postal employees, contractors, and the public to more easily identify what we do with their information.

Rationale for the Creation of a New USPS System of Records

Currently, records relating to the implementation of IT resources are housed primarily in USPS 500.000, Property Management Records, with other IT-related components appearing in 890.000, Sales, Marketing, Events, and Publications, and other SORs. SOR 500.000 reflects not only IT access records, but also building access and related records. This results in a mixture of uses within SOR 500.000, which reduces optimization and can result in confusion.

The creation of a new SOR to encompass commercial IT resources, therefore, provides a platform which is easy to understand and allows for greater flexibility in use and maintenance. Since the new SOR will house only IT resources, the public can more easily understand what information is collected and how it is used.

Further, documenting IT records within one SOR provides for greater flexibility in adding new resources as well as maintaining existing resources. For example, one application may already collect and store, for the same purpose, data elements that a new application will use. With a record already documented, the implementation process of the new technology will be streamlined while also meeting statutory and regulatory mandates.

Description of New or Modified System of Records

This new System of Records is being developed to support the implementation of various commercial IT resources and to provide support for future implementations.

This system specifically will cover categories of records referred to collectively as "Administrative." Categories of Records in this system reference data elements created from a user or application's interactions with other applications. Applications covered in this SOR reference or incorporate data elements otherwise documented in USPS 550.000 Commercial Information Technology Resources- Infrastructure; therefore, they will not be specifically documented here unless this system references a transformative use of that element.

This System of Records may overlap with elements appearing in other Systems of Records, as indicated in the Rationale for Changes to USPS System of Records section. This new System of Records will encompass commercially developed or commercially assisted IT resources. Applications developed in-house or by the Postal Service, such as Informed Delivery®, will still be represented in their own SOR.

SYSTEM NAME AND NUMBER:

550.200 Commercial Information Technology Resources—Administrative.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

All USPS facilities and contractor sites.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Information Officer and Executive Vice President, United States Postal Service, 475 L'Enfant Plaza SW, Washington, DC 20260.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 403, and 404.

PURPOSE(S) OF THE SYSTEM:

1. To provide active and passive monitoring and review of information system applications and user activities.
2. To generate logs and reports of information system application and user activities.
3. To provide a means of auditing commercial information system activities across applications and users.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Individuals with authorized access to USPS computers, information

resources, and facilities, including employees, contractors, business partners, suppliers, and third parties.

2. Individuals participating in web-based meetings, web-based video conferencing, web-based communication applications, and web-based collaboration applications.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. *General Audit Log activities:* DateTime, IP Address, User Activity, User Item Accessed, Activity Detail, Object ID, Record Type, Client IP Address, CorrelationID, CreationTime, EventData, EventSource, ItemType, OrganizationID, UserAgent, UserKey, UserType, Version, Workload.

2. *File and page activities:* Accessed file, Change retention label for a file, Deleted file marked as a record, Checked in file, Changed record status to locked, Changed record status to unlocked, Checked out file, Copied file, Discarded file checkout, Deleted file, Deleted file from recycle bin, Deleted file from second-stage recycle bin, Detected document sensitivity mismatch, Detected malware in file, Deleted file marked as a record, Downloaded file, Modified file, Moved file, Recycled all minor versions of file, Recycled all versions of file, Recycled version of file, Renamed file, Restored file, Uploaded file, Viewed page, View signaled by client, Performed search query.

3. *Folder activities:* Copied folder, Created folder, Deleted folder, Deleted folder from recycle bin, Deleted folder from second-stage recycle bin, Modified folder, Moved folder, Renamed folder, Restored folder.

4. *Cloud-based Enterprise Storage activities:* Created list, Created list column, Created list content type, Created list item, Created site column, Created site content type, Deleted list, Deleted list column, Deleted list content type, Deleted list item, Deleted site column, Deleted site content type, Recycled list item, Restored list, Restored list item, Updated list, Updated list column, Updated list content type, Updated list item, Updated site column, Updated site content type.

5. *Sharing and access request activities:* Added permission level to site collection, Accepted access request, Accepted sharing invitation, Blocked sharing invitation, Created access request, Created a company shareable link, Created an anonymous link, Created secure link, Deleted secure link, Created sharing invitation, Denied access request, Removed a company shareable link, Removed an anonymous link, Shared file, folder, or site,

Unshared file folder or site, Updated access request, Updated an anonymous link, Updated sharing invitation, Used a company shareable link, Used an anonymous link, Used secure link, User added to secure link, User removed from secure link, Withdrew sharing invitation.

6. *Synchronization activities:* Allowed computer to sync files, Blocked computer from syncing files, Downloaded files to computer, Downloaded file changes to computer, Uploaded files to document library, Uploaded file changes to document library.

7. *Site permissions activities:* Added site collection admin, Added user of group to Cloud-based Enterprise Storage group, Broke permission level inheritance, Broke sharing inheritance, Created group, Deleted group, Modified access request setting, Modified “Members Can Share” setting, Modified permission level on site collection, Modified site permissions, Removed site collection admin, Removed permission level from site collection, Removed user or group from Cloud-based Enterprise Storage group, Requested site admin permissions, Restored sharing inheritance, Updated group.

8. *Site administration activities:* Added allowed data location, Added exempt user agent, Added geo location admin, Allowed user to create groups, Cancelled site geo move, Changed a sharing policy, Changed deice access policy, Changed exempt user agents, Changed network access policy, Completed site geo move, Created Sent To connection, Created site collection, Deleted orphaned hub site, Deleted Sent To connection, Deleted site, Enabled document preview, Enabled legacy workflow, Enabled service applications on Demand, Enabled result source for People Searched, Enabled RSS feeds, Failed site swap, Joined site to hub site, Registered hub site, Removed allowed data location, Removed geo location admin, Renamed site, Scheduled site rename, Scheduled site swap, Scheduled site geo move, Set host site, Set storage quota for geo location, Swapped site, Unjoined site from hub site, Unregistered hub site.

9. *Cloud-based Email Server mailbox activities:* Created mailbox item, Copied messages to another folder, User signed in to mailbox, Accessed mailbox items, Sent message using Send On Behalf permissions, Purged messages from mailbox, Moved messages to Deleted Items folder, Moved messages to another folder, Sent message using Send As permissions, Sent message, Updated message, Deleted messages from Deleted Items folder, New-Inbox Rule Create-

Inbox Rule from email web application, Set-Inbox Rule Modify inbox rule from email web application, Update inbox rules from email web application, Added delegate mailbox permissions, Removed delegate mailbox permissions, Added permissions to folder, Modified permissions of folder, Removed permissions from folder, Added or removed user with delegate access to calendar folder, Labeled message as a record.

10. *Retention policy and retention level activities:* Created retention label, Created retention policy, Configured settings for a retention policy, Deleted retention label, Deleted retention policy, Deleted settings from a retention policy, Updated retention label, Updated retention policy, Updated settings for a retention policy, Enabled regulatory record option for retention labels.

11. *User administration activities:* Added user, Deleted user, Set license properties, Reset user password, Changed user password, Changed user license, Updated user, Set property that forces user to change password.

12. *Enterprise User Administration group administration activities:* Added group, Updated group, Deleted group, Added member to group, Removed member from group.

13. *Application Administration Activities:* Added service principal, Removed a service principal from the directory, Set delegation entry, Removed credentials from a service principal, Added delegation entry, Added credentials to a service principal, Removed delegation entry.

14. *Role administration activities:* Added member to Role, Removed a user from a directory role, Set company contact information.

15. *Directory administration activities:* Added a partner to the directory, Removed a partner from the directory, Added domain to company, Removed domain from company, Updated domain, Set domain authentication, Verified domain, Updated the federation settings for a domain, Verified email verified domain, Turned on Enterprise Information Technology Account Administration sync, Set password policy, Set company information.

16. *eDiscovery activities:* Created content search, Deleted content search, Changed content search, Started content search, Stopped content search, Started export of content search, Started export report, Previewed results of content search, Purged results of content search, Started analysis of content search, Removed export of content search, Removed preview results of content search, Removed purge action

performed on content search, Removed analysis of content search, Removed search report, Content search preview item listed, Content search preview item viewed, Content search preview item downloaded, Downloaded export of content search, Created search permissions filter, Deleted search permissions filter, Changed search permissions filter, Created hold in eDiscovery case, Deleted hold in eDiscovery case, Changed hold in eDiscovery case, Created eDiscovery case, Deleted hold in eDiscovery case, Changed hold in eDiscovery case, Created eDiscovery data, Changed hold in eDiscovery case, Added member to eDiscovery case, Removed member from eDiscovery case, Changed eDiscovery case membership, Created eDiscovery administrator, Deleted eDiscovery administrator, Changed eDiscovery administrator membership, Remediation action created, Item deleted using Remediation, Created workingset search, Updated workingset search, Deleted workingset search, Previewed workingset search, Document viewed, Document annotated, Document downloaded, Tag created, Tag edited, Tag deleted, Tag files, Tag job, Created review set, Added Cloud-based productivity software data, Added non-service application data, Added data to another workingset, Added remediated data, Run algo job, Run export job, Run burn job, Run error remediation job, Run load comparison job, Updated case settings.

17. eDiscovery system command activities: Created content search, Deleted content search, Changed content search, Started content search, Stopped content search, created content search action, Deleted content search action, Created search permissions filter, Deleted search permissions filter, Changed search permissions filter, Created hold in eDiscovery case, Deleted hold in eDiscovery case, Changed hold in eDiscovery case, Created search query for eDiscovery case hold, Deleted search query for eDiscovery case hold, Changed search query for eDiscovery case hold, Created eDiscovery case, Deleted eDiscovery case, Changed eDiscovery case, Added member to eDiscovery case, Removed member from eDiscovery case, Changed eDiscovery case membership, Created eDiscovery administrator, Deleted eDiscovery administrator, Changed eDiscovery administrator membership.

18. Data Analysis application activities: Viewed program dashboard, Created program dashboard, Edited program dashboard, Deleted program dashboard, Shared program dashboard,

Printed program dashboard, Copied program dashboard, Viewed program tile, Exported program tile data, Viewed program report, Deleted program report, Printed program report page, Created program report, Edited program report, Copied program report, Exported program artifact to another file format, Export program activity events, Updated program workspace access, Restored program workspace, Updated program workspace, Viewed program metadata, Created program dataset, Deleted program dataset, Created program group, Deleted program group, Added program group members, Retrieved program groups, Retrieved program dashboard, Retrieved data sources from program dataset, Retrieved upstream data flows from program dataflow, Retrieved data sources from program dataflow, Removed program group members, Retrieved links between datasets and dataflows, Created organizational program content pack, Created program app, Installed program app, Updated program app, Updated organization's program settings, Started program trial, Started program extended trial, Analyzed program dataset, Created program gateway, Deleted program gateway, Added data source to program gateway, Removed data source from program gateway, Changed program gateway admins, Changed program gateway data source users, Set scheduled refresh on program dataset, Unpublished program app, Deleted organizational program content pack, Renamed program dashboard, Edited program dataset, Updated capacity display name, Changed capacity state, Updated capacity admin, Changed capacity user assignment, Migrated workspace to a capacity, Removed workspace from a capacity, Retrieved program workspaces, Shared program report, Generated program Embed Token, Discover program dataset data sources, Updated program dataset data sources, Requested program dataset refresh, Binded program dataset to gateway, Changed program dataset data sources, Requested program dataset refresh, Binded program dataset to gateway, Changed program dataset connections, Took over program dataset, Updated program gateway data source credentials, Imported file to program, Updated program dataset parameters, Generated program dataflow SAS token, Created program dataflow, Updated program dataflow, Deleted program dataflow, Viewed program dataflow, Exported program dataflow, Set scheduled refresh on program dataflow, Requested program dataflow refresh, Received program dataflow secret from

Key Vault, Attached dataflow storage account, Migrated dataflow storage location, Updated dataflow storage assignment permissions, Set dataflow storage location for workspace, Took ownership of program dataflow, Canceled program dataflow refresh, Created program email subscription, Updated program email subscription, Deleted program email subscription, Created program folder, Deleted program folder, Updated program folder, Added program folder access, Deleted program folder access, Updated program folder access, Posted program comment, Deleted program comment, Analyzed program report, Viewed program usage metrics, Edited program dataset endorsement, Edited program dataflow endorsement, Edited program report endorsement, Edited program app endorsement, Retrieved list of modified workspaces in program tenant, Sent a scan request in program tenant, Retrieve scan result in program tenant, Inserted snapshot for user in program tenant, Updated snapshot for user in program tenant, Deleted snapshot for user in program tenant, Inserted snapshot for user in program tenant, Updated snapshot for user in program tenant, Deleted snapshot for user in program tenant, Retrieved snapshots for user in program tenant, Edited program certification permission, Took over a program data source, Updated capacity custom settings, Created workspace for program template app, Deleted workspace for program template app, Updated settings for program template app, Updated testing permissions for program template app, Created program template app, Deleted program template app, Promoted program template app, Installed program template app, Updated parameters for installed program template app, Created install ticker for installing program template app, Updated an organizational custom visual, Created an organizational custom visual, Deleted an organizational custom visual, Custom visual requested Enterprise Information Technology Account Administration access token, Customer visual requested Cloud-based productivity software access token, Connected to program dataset from external app, Created program dataset from external app, Deleted program dataset from external app, Edited program dataset from external app, Requested program dataset refresh from external app, Requested SAS token for program storage, Requested account key for program storage, Assigned a workspace to a deployment pipeline, Removed a workspace from a deployment pipeline, Deleted

deployment pipeline, Created deployment pipeline, Deployed to a pipeline stage, Updated deployment pipeline configuration, Updated deployment pipeline access, Added external resource, Added link to external resource, Deleted link to external resource, Updated featured tables, Applied sensitivity label to program artifact, Changed sensitivity label for program artifact, Deleted sensitivity label from program artifact.

19. *Productivity Analysis activities:* Updated privacy setting, Updated data access setting, Uploaded organization data, Created meeting exclusion, Updated preferred meeting exclusion, Execute query, Canceled query, Deleted result, Downloaded report, Accessed Odata link, Viewed query visualization, Viewed explore, Created partition, Updated partition, Deleted partition, User logged in, User logged out.

20. *Briefing email activities:* Updated user privacy settings, Updated organization privacy settings.

21. *Cloud-based Collaboration Application activities:* Created team, Deleted team, Added channel, Deleted channel, Changed organization setting, Changed team setting, Changed channel setting, User signed in to Cloud-based Collaboration Application, Added members, Changed role of members, Removed members, Added bot to team, Removed bot from team, Added tab, Removed tab, Updated tab, Added connector, Removed connector, Updated connector, Downloaded analytics report, Upgraded Cloud-based Collaboration Application device, Blocked Cloud-based Collaboration Application device, Unblocked Cloud-based Collaboration Application device, Changed configuration of Cloud-based Collaboration Application device, Enrolled Cloud-based Collaboration Application device, Installed app, Upgraded app, Uninstalled app, Published app, Updated app, Deleted app, Deleted all organization apps, Performed action on card, Added scheduling group, Edited scheduling group, Deleted scheduling group, Added shift, Edited shift, Deleted shift, Added time off, Edited time off, Deleted time off, Added open shift, Edited open shift, Deleted open shift, Shared schedule, Clocked in using Time clock, Clocked out using Time clock, Started break using Time clock, Ended break using Time clock, Added Time clock entry, Edited Time clock entry, Deleted Time clock entry, Added shift request, Responded to shift request, Canceled shift request, Changed schedule setting, Added workforce integration, Accepted off shift message.

22. *Cloud-based Collaboration Application approvals activities:* Created new approval request, Viewed approval request details, Approved approval request, Rejected approval request, Canceled approval request, Shared approval request, File attached to approval request, Reassigned approval request, Added e-signature to approval request.

23. *Enterprise Social Network activities:* Changed data retention policy, Changed network configuration, Changed network profile settings, Changed private content mode, Changed security configuration, Created file, Created group, Deleted group, Deleted message, Downloaded file, Exported data, Shared file, Suspended network user, Suspended user, Updated file description, Updated file name, Viewed file.

24. *Enterprise Customer Relationship Management activities:* Accessed out-of-box entity (deprecated), Accessed custom entity (deprecated), Accessed admin entity (deprecated), Performed bulk actions (deprecated), All Enterprise Customer Relationship Management activities, Accessed Enterprise Customer Relationship Management admin center (deprecated), Accessed internal management tool (deprecated), Signed in or out (deprecated), Activated process or plug-in (deprecated).

25. *Information Systems Infrastructure Automation activities:* Created flow, Edited flow, Deleted flow, Edited flow permissions, Deleted flow permissions, Started a Flow paid trial, Renewed a Flow paid trial.

26. *Application authoring program activities:* Created app, Edited app, Deleted app, Launched app, Published app, Marked app as Hero, Marked app as Featured, Edited app permission, Restored app version.

27. *Enterprise Automation DLP activities:* Created DLP Policy, Updated DLP Policy, Deleted DLP Policy.

28. *Video platform activities:* Created video, Edited video, Deleted video, Uploaded video, Downloaded video, Edited video permission, Viewed video, Shared video, Liked video, Unliked video, Commented on video, Deleted video comment, Uploaded video text track, Deleted video text track, Uploaded video thumbnail, Deleted video thumbnail, Replaced video permissions and channel links, Marked video public, Marked video private, Created Video platform group, Edited Video platform group, Deleted Video platform group, Edited Video platform group memberships, Created Video platform channel, Edited Video platform channel, Deleted a Video platform channel, Replaced Video platform

channel thumbnails, Edited Video platform user settings, Edited tenant settings, Edited global role members, Deleted Video platform user, Deleted Video platform user's data report, Edited Video platform user, Exported Video platform user's data report, Downloaded Video platform user's data report.

29. *Content explorer activities:* Accessed item

30. *Quarantine activities:* Previewed Quarantine message, Deleted Quarantine message, Released Quarantine message, Exported Quarantine message, Viewed Quarantine Message's header.

31. *Customer Key Service Encryption activities:* Fallback to Availability Key

32. *Form application activities:* Created form, Edited form, Moved form, Deleted form, Viewed form, Previewed form, Exported form, Allowed share form for copy, Added form co-author, Removed form co-author, Viewed response page, Created response, Updated response, Deleted all responses, Deleted response, Viewed responses, Viewed response, Created summary link, Deleted summary link, Updated from phishing status, Updated user phishing status, Sent premium form product invitation, Updated form setting, Updated user setting, Listed forms.

33. *Sensitivity label activities:* Applied sensitivity label to site, Removed sensitivity label from site, Applied sensitivity label to file, Changed sensitivity label applied to file, Removed sensitivity label from file.

34. *Local machine communications platform system command activities:* Set tenant federation.

35. *Search activities:* Performed email search, Performed Cloud-based Enterprise Storage search.

36. *Security analytics activities:* Attempted to compromise accounts.

37. *Device activities:* Printed file, Deleted file, Renamed file, Created file, Modified file, Read file, Captured screen, Copied file to removable media, Copied file to network share, Copied file to clipboard, Uploaded file to cloud, File accessed by an unallowed application.

38. *Information barrier activities:* Removed segment from site, Changed segment of site, Applied segment to site.

39. *On-premises DLP scanning activities:* Matched DLP rule, Enforced DLP rule.

40. *Individual Productivity Analytics activities:* Updated user settings, Updated organization settings.

41. *Exact Data Match (EDM) activities:* Created EDM schema, Modified EDM schema, Removed EDM scheme,

Completed EDM data upload, Failed EDM data upload.

42. *Enterprise Information System Information Protection activities:* Accessed file, Discovered file, Applied sensitivity label, Updated sensitivity label, Removed sensitivity label, Removed file, Applied protection, Changed protection, Removed protection, Received AIP heartbeat.

43. *Data Repository Team Discussion Post Actions:* Team Discussion Post Updated, Team Discussion Post Destroyed.

44. *Data Repository Team Discussion Post Reply Actions:* Team Discussion Post Reply Updated, Team Discussion Post Reply Destroyed.

45. *Data Repository Enterprise Actions:* Self-Hosted Runner Removed, Self-Hosted Runner Registered, Self-Hosted Runner Group Created, Self-Hosted Runner Group Removed, Self-Hosted Runner Removed From Group, Self-Hosted Runner Added To Group, Self-Hosted Runner Group Member List Updated, Self-Hosted Runner Group Configuration Changed, Self-Hosted Runner Updated.

46. *Data Repository Hook Actions:* Hook Created, Hook Configuration Changed, Hook Destroyed, Hook Events Altered.

47. *Data Repository Integration Installation Request Actions:* Integration Installation Request Created, Integration Installation Request Closed.

48. *Data Repository Issue Action:* Issue Destroyed.

49. *Data Repository Org Actions:* Secret Action Created, Member Creation Disabled, Two Factor Authentication Requirement Disabled, Member Creation Enabled, Two Factor Authentication Enabled, Member Invited, Self-Hosted Runner Registered, Secret Action Removed, Member Removed, Outside Collaborator Removed, Self-Hosted Runner Removed, Self-Hosted Runner Group Created, Self-Hosted Runner Group Removed, Self-Hosted Runner Group Updated, Secret Action Updated, Repository Default Branch Named Updated, Default Repository Permission Updated, Member Role Updated, Member Repository Creation Permission Updated.

50. *Data Repository Organization Label Actions:* Default Label Created, Default Label Updated, Default Label Destroyed.

51. *Data Repository Oauth Application Actions:* Oauth Application Created, Oauth Application Destroyed, Oauth Application Secret Reset, Oauth Application Token Revoked, Oauth Application Transferred.

52. *Data Repository Profile Picture Actions:* Organization Profile Picture Updated.

53. *Data Repository Project Actions:* Project Board Created, Project Board Linked, Project Board Renamed, Project Board Updated, Project Board Deleted, Project Board Unlinked, Project Board Permissions Updated, Project Board Team Permissions Updated, Project Board User Permission Updated.

54. *Data Repository Protected Branch Actions:* Branch Protection Enabled, Branch Protection Destroyed, Branch Protection Enforced For Administrators, Branch Enforcement Of Required Code Owner Enforced, Stale Pull Request Dismissal Enforced, Branch Commit Signing Updated, Pull Request Review Updated, Required Status Check Updated, Requirement For Branch To Be Up To Date Before Merging Changed, Branch Update Attempt Rejected, Branch Protection Requirement Overridden, Force Push Enabled, Force Push Disabled, Branch Deletion Enabled, Branch Deletion Disabled, Linear Commit History Enabled, Linear Commit History Disabled.

55. *Data Repository Repo Actions:* User Visibility Changed, Actions Enabled For Repository, Collaboration Member Added, Topic Added To Repository, Repository Archived, Anonymous Git Read Access Disabled, Anonymous Git Read Access Enabled, Anonymous Git Read Access Setting Locked, Anonymous Git Read Access Setting Unlocked, New Repository Created, Secret Created For Repository, Repository Deleted, Repository Enabled, Secret Removed, User Removed, Self-Hosted Runner Registered, Topic Removed From Repository, Repository Renamed, Self-Hosted Runner Updated, Repository Transferred, Repository Transfer Started, Repository Unarchived, Secret Action Updated.

56. *Data Repository Dependency Graph Actions:* Dependency Graph Disabled, Dependency Graph Disabled for New Repository, Dependency Graph Enabled, Dependency Graph Enabled for New Repository.

57. *Data Repository Secret Scanning Actions:* Secret Scanning Disabled for Individual Repository, Secret Scanning Disabled for All Repositories, Secret Scanning Disabled for New Repositories, Secret Scanning Enabled for Individual Repository, Secret Scanning Enabled for All Repositories, Secret Scanning Enabled for New Repositories.

58. *Data Repository Vulnerability Alert Actions:* Vulnerable Dependency Alert Created, Vulnerable Dependency Alert Dismissed, Vulnerable Dependency Alert Resolved.

59. *Data Repository Team Actions:* Member Added To Team, Repository Added To Team, Team Parent Changed, Team Privacy Level Changed, Team Created, Member Demoted In Team, Team Destroyed, Member Promoted In Team, Member Removed From Team, Repository Removed From Team.

60. *Data Repository Team Discussion Actions:* Team Discussion Disabled, Team Discussion Enabled.

61. *Data Repository Workflow Actions:* Workflow Run Cancelled, Workflow Run Completed, Workflow Run Created, Workflow Run Deleted, Workflow Run Rerun, Workflow Job Prepared.

62. *Data Repository Account Actions:* Billing Plan Change, Plan Change, Pending Plan Change, Pending Subscription Change.

63. *Data Repository Advisory Credit Actions:* Accept Credit, Create Credit, Decline Credit, Destroy Credit.

64. *Data Repository Billing Actions:* Change Billing Type, Change Email.

65. *Data Repository Bot Alerts Actions:* Disable Bot, Enable Bot.

66. *Data Repository Bot Alerts for New Repository Actions:* Disable Alerts, Enable Alerts.

67. *Data Repository Bot Security Alerts for Update Actions:* Disable Security Update Alerts, Enable Security Update Alerts.

68. *Data Repository Bot Security Alerts for New Repository Actions:* Disable New Repository Security Alerts, Enable New Repository Security Alerts.

69. *Data Repository Environment Actions:* Create Actions Secret, Delete, Remove Actions Secret, Update Actions Secret.

70. *Data Repository Git Actions:* Clone, Fetch, Push.

71. *Data Repository Marketplace Agreement Signature Actions:* Create.

72. *Data Repository Marketplace Listing Actions:* Approve, Create, Delist, Redraft, Reject

73. *Data Repository Members Can Create Pages Actions:* Enable, Disable

74. *Data Repository Organization Credential Authorization Actions:* Security Assertion Markup Language Single-Sign On Authorized, Security Assertion Markup Language Single-Sign On Deauthorized, Authorized Credentials Revoked.

75. *Data Repository Package Actions:* Package Version Published, Package Version Deleted, Package Deleted, Package Version Restored, Package Restored.

76. *Data Repository Payment Method Actions:* Payment Method Cleared, Payment Method Created, Payment Method Updated.

77. *Data Repository Advisory Actions:* Security Advisory Closed, Common

Vulnerabilities And Exposures Advisory Requested, Data Repository Security Advisory Made Public, Data Repository Security Advisory Withdrawn, Security Advisory Opened, Security Advisory Published, Security Advisory Reopened, Security Advisory Updated.

78. *Data Repository Content Analysis:* Data Use Settings Enabled, Data Use Settings Disabled.

79. *Data Repository Sponsors Actions:* Repo Funding Link Button Toggle, Repo Funding Links File Action, Sponsor Sponsorship Cancelled, Sponsor Sponsorship Created, Sponsor Sponsorship Preference Changed, Sponsor Sponsorship Tier Changed, Sponsored Developer Approved, Sponsored Developer Created, Sponsored Developer Profile Updated, Sponsored Developer Request Submitted For Approval, Sponsored Developer Tier Description Updated, Sponsored Developer Newsletter Sent, Sponsored Developer Invited From Waitlist, Sponsored Developer Joined From Waitlist.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Standard routine uses 1. through 9. apply. In addition:

(a) Disclosure of records to appropriate agencies, entities, and persons when (1) the Postal Service suspects or has confirmed that there has been a breach of the system of records; (2) the Postal Service has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Postal Service (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Postal Service's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

RECORD SOURCE CATEGORIES:

Employees; contractors; suppliers; customers.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Automated database, computer storage media, and paper.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records relating to system administration are retrievable by user ID.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records relating to system administration are retained for twenty-four months.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Paper records, computers, and computer storage media are located in controlled-access areas under supervision of program personnel. Computer access is limited to authorized personnel with a current security clearance, and physical access is limited to authorized personnel who must be identified with a badge.

Access to records is limited to individuals whose official duties require such access. Contractors and licensees are subject to contract controls and unannounced on-site audits and inspections.

Computers are protected by encryption, mechanical locks, card key systems, or other physical access control methods. The use of computer systems is regulated with installed security software, computer logon identifications, and operating system controls including access controls, terminal and transaction logging, and file management software.

RECORD ACCESS PROCEDURES:

Requests for access must be made in accordance with the Notification Procedure above and USPS Privacy Act regulations regarding access to records and verification of identity under 39 CFR 266.5.

CONTESTING RECORD PROCEDURES:

See Notification Procedure and Record Access Procedures above.

NOTIFICATION PROCEDURE:

Customers wanting to know if other information about them is maintained in this system of records must address inquiries in writing to the Chief Information Officer and Executive Vice President and include their name and address.

EXEMPTION(S) PROMULGATED FROM THIS SYSTEM:

None.

HISTORY:

None.

Joshua J. Hofer,

Attorney, Ethics & Legal Compliance.

BILLING CODE P

POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service™.

ACTION: Notice of a new system of records.

SUMMARY: The United States Postal Service (USPS™) is proposing to create a new General Privacy Act System of Records.

DATES: This new System of Records will become effective without further notice on June 9, 2021, unless comments received on or before that date result in a contrary determination.

ADDRESSES: Comments may be submitted via email to the Privacy and Records Management Office, United States Postal Service Headquarters (privacy@usps.gov). Arrangements to view copies of any written comments received, to facilitate public inspection, will be made upon request.

FOR FURTHER INFORMATION CONTACT: Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, 202-268-3069 or privacy@usps.gov.

SUPPLEMENTARY INFORMATION:

Background

The world of commercial information technology resources ("IT") is constantly changing and innovating to improve the daily lives of businesses, their employees, and their customers. This pace can often result in unanticipated obsolescence, necessitating review of an organization's already implemented solutions. For the Postal Service, legal processes and notice required by the Privacy Act present additional challenges, as new technologies will require further review for possible compliance issues to meet statutory and regulatory requirements.

To better meet the changing technology world, the Postal Service will consolidate existing Systems of Records ("SOR"s) covering IT into three new, comprehensive Systems of Records. These SORs will work in tandem, with each individual SOR covering a specific group of related functions, and all three SORs working together to support a seamless technology experience.

These SORs, generally, will cover the following three areas:

- Infrastructure, covering records created for use throughout the entirety of a particular IT resource in addition to covering the records created from the usage of those records by users and applications.

- Applications, covering records created through the regular use of an application.
- Administrative, covering records created for monitoring and administration of users and applications within an IT resource.

In addition to covering these three areas generally, the Postal Service will look ahead in an effort to include possible future technology solutions within this System of Records. This will give the Postal Service flexibility to more easily adapt to the advancing pace of information technology and to better fulfill its service obligations. This will also provide transparency into the collection of records relating to commercial IT, allowing Postal employees, contractors, and the public to more easily identify what we do with their information.

Rationale for the Creation of a New USPS System of Records

Currently, records relating to the implementation of IT resources are housed primarily in USPS 500.000, Property Management Records, with other IT-related components appearing in USPS 890.000, Sales, Marketing, Events, and Publications and other SORs. SOR 500.000 reflects not only IT access records, but also building access and related records. This results in a mixture of uses within SOR 500.000, which reduces optimization and can result in confusion.

The creation of a new SOR to encompass commercial IT resources, therefore, provides a platform which is easy to understand and allows for greater flexibility in use and maintenance. Since the new SOR will house only IT resources, the public can more easily understand what information is collected and how it is used.

Further, documenting IT records within one SOR provides for greater flexibility in adding new resources as well as maintaining existing resources. For example, one application may already collect and store, for the same purpose, data elements that a new application will use. With a record already documented, the implementation process of the new technology will be streamlined while also meeting statutory and regulatory mandates.

Description of New or Modified System of Records

This new system of records is being developed to support the implementation of various commercial IT resources and to provide support for future implementations.

This system specifically will cover categories of records referred to collectively as “Infrastructure.” Categories of Records in this system reference data elements created in one application and passed through to multiple applications. This SOR also contains Categories of Records that reference transformations or analysis of those data elements resulting from interactions with users or applications. Data elements documented within this system may be passed through or referenced by records otherwise contained in systems USPS 550.100 Commercial Information Technology Resources- Applications and USPS 550.200 Commercial Information Technology Resources—Administrative; therefore, those elements will not be specifically documented within those systems unless those systems utilize those elements in a transformative manner.

This System of Records may overlap with elements appearing in other Systems of Records, as indicated in the Rationale for Changes to USPS System of Records section. This new System of Records will encompass commercially developed or commercially assisted IT resources. Applications developed in-house or by the Postal Service, such as Informed Delivery®, will still be represented in their own SOR.

SYSTEM NAME AND NUMBER:

550.000 Commercial Information Technology Resources—Infrastructure

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

All USPS facilities and contractor sites.

SYSTEM MANAGER(S):

Chief Information Officer and Executive Vice President, United States Postal Service, 475 L’Enfant Plaza SW, Washington, DC 20260.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 403, and 404.

PURPOSE(S) OF THE SYSTEM:

1. To provide USPS employees, contractors, and other authorized individuals with hierarchical access to and accounts for commercial information technology resources administered by the Postal Service and based on least privileged access.
2. To facilitate a cohesive software experience and simplify ease of use by sharing user and application data across participating IT programs.
3. To authenticate user identity for the purpose of accessing USPS information systems.

4. To assess user attributes and assign related access privileges.

5. To authenticate suppliers and contractors and facilitate further access to downstream Postal Service information systems.

6. To provide active and passive monitoring of information systems, applications, software, devices, and users for information security risks.

7. To review information systems, applications, software, devices, and users to ensure compliance with USPS regulations.

8. To facilitate and support cybersecurity investigations of detected or reported information security incidents.

9. To administer programs, processes, and procedures to assess information security risks and to detect information security threats and vulnerabilities.

10. To provide tools and analytics for USPS employees and contractors to measure work productivity and improve efficiency.

11. To improve manager-subordinate relationships within their formal reporting structure through data-based insights generated from their own email and related electronic communications with subordinates.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Individuals with authorized access to USPS computers, information resources, and facilities, including employees, contractors, business partners, suppliers, and third parties.

2. Individuals participating in web-based meetings, web-based video conferencing, web-based communication applications, and web-based collaboration applications.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. *Information System Account Access records:* Records relating to the access or use of an information system, application, or piece of software, including; Name, User ID, Email Address, User Type, User Role, Job Title, Department, Manager, Company, Street Address, State Or Province, Country Or Region, Work Phone Number(s), Employee Identification Number (EIN), Advanced Computing Environment (ACE) ID, License Information, Action Initiated, Datetime, User Principle Name, Usage Location, Alternate Email Address, Proxy Address, Age Group, IP Address, MAC Address, Password, Multi-Factor Authentication Credentials, Security Questions, Security Answers, Passcode, Geolocation Data, User Profile Picture, Picture Metadata, Information Technology Account Administration

User Configuration Status, Supplier Credentials, Supplier Company Codes, Conditional Access Attributes.

2. *Security Analytics records:* Records relating to the gathering, analysis, review, monitoring, and investigation of information system security risks, including; User Investigation Priority Score, User Identity Risk Level, User Lateral Movement Paths, User Devices Numbers, User Account Numbers, User Resources Numbers, User Locations Numbers, User Matches Files Numbers, User Locations, Apps Used By User, User Groups, User Last Seen Date, User Affiliation, User Domain, App Instance, Organizational Groups, User Account Status, Activity ID, Activity Objects, Activity Type, Administrative Activity, Alert ID, Applied Action, Activity Date, Device Tag, Activity Files And Folders, Impersonated Activities, App Instance Activity, App Location Activity, Activity Matched Policy, Activity Registered ISP, Activity Source, Activity User, Activity User Agent, Activity User Agent Tag, Application Risk Score, Application Activity, User Software Deactivation, User Software Installation, User Software Removal, Last Date Of Software Execution, internet Application Transaction Counts, Data Volume Upload, Data Volume Download, Data Sensitivity Classification, internet Protocol, internet Port, internet Access History.

3. *Productivity Analytics records:* Records relating to the gathering, analysis, review, and investigation of information system utilization, including; Calendar Appointments, Email Read Rate, Email Response Rate, Operating System Activity History, Email Timestamp, Statements Made In Email Body, Email Sender, Email Recipient, Email Subject Line, Calendar Event Type, Calendar Event Status, Calendar Event Category, Calendar Event Subject, Calendar Event Duration, Calendar Event Attendees, Meeting Organizer, Meeting Invitees, Meeting Subject Line, Meeting Scheduled Time, Meeting Attendee Status, Meeting Scheduled Location, Web Call Organizer, Web Call Invitees, Web Call Scheduled Time, Web Call Joined Time, Web Call Duration, Web Call Status, Web Call Join Status, Number Of Collaborative Audio Calls Made, Number Of Collaborative Video Calls Made, Chat Initiator, Chat Recipient, Chat IM Sent Time, Number Of Cloud-Based Personal Storage Documents Worked On, Number Of Cloud-Based Enterprise Storage Documents Worked On, Device Name.

RECORD SOURCE CATEGORIES:

Employees; contractors; suppliers; customers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

Standard routine uses 1. through 9. apply. In addition:

(a) Disclosure of records to appropriate agencies, entities, and persons when (1) the Postal Service suspects or has confirmed that there has been a breach of the system of records; (2) the Postal Service has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Postal Service (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Postal Service's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Automated database, computer storage media, and paper.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

1. Records relating to information system access are retrievable by name, email address, username, geolocation data, and ACE ID.
2. Records relating to security analysis are retrievable by name, unique user ID, email address, geolocation data, IP address and computer name.
3. Records relating to productivity are retrievable by name, email address, and ACE ID.
4. Records relating to third-parties are retrievable by name, email address, user name, and IP address.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

1. Records relating to information system access are retained twenty-four months after last access.
2. Records relating to security analysis are retained for twenty-four months.
3. Records relating to productivity are retained for twenty-four months.
4. Records relating to third-parties are retained for twenty-four months.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Paper records, computers, and computer storage media are located in controlled-access areas under supervision of program personnel. Computer access is limited to

authorized personnel with a current security clearance, and physical access is limited to authorized personnel who must be identified with a badge.

Access to records is limited to individuals whose official duties require such access. Contractors and licensees are subject to contract controls and unannounced on-site audits and inspections.

Computers are protected by encryption, mechanical locks, card key systems, or other physical access control methods. The use of computer systems is regulated with installed security software, computer logon identifications, and operating system controls including access controls, terminal and transaction logging, and file management software.

RECORD ACCESS PROCEDURES:

Requests for access must be made in accordance with the Notification Procedure above and USPS Privacy Act regulations regarding access to records and verification of identity under 39 CFR 266.5.

CONTESTING RECORD PROCEDURES:

See Notification Procedure and Record Access Procedures above.

NOTIFICATION PROCEDURES:

Customers wanting to know if other information about them is maintained in this system of records must address inquiries in writing to the Chief Information Officer and Executive Vice President and include their name and address.

EXEMPTION PROMULGATED FROM THIS SYSTEM:

None.

BILLING CODE 7710-12-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91769; File No. SR-NYSE-2021-08]

Self-Regulatory Organizations; New York Stock Exchange LLC; Order Granting Approval of a Proposed Rule Change of New Rules Providing for the Registration and Obligations of Non-DMM Market Makers

May 4, 2021.

I. Introduction

On March 12, 2021, New York Stock Exchange, Inc. ("NYSE" or "Exchange")

filed with the Securities and Exchange Commission (“Commission”) pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b–4 thereunder,² proposed new rules providing for the registration and obligations of Non-DMM Market Makers. The proposed rule change was published for comment in the **Federal Register** on March 25, 2021.³ The Commission has received no comments on the proposed rule change. The Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

The Exchange proposes rules governing Non-DMM Market Makers who would be electronic, off-floor market makers.⁴ Non-DMM Market Makers would comprise a new category of market participants on the Exchange and would have responsibilities different than those of Designated Market Makers (“DMMs”) and Supplemental Liquidity Providers (“SLPs”).

Non-DMM Market Makers are not intended to replace DMMs or SLPs on the Exchange and would not assume any of the responsibilities already assigned to DMMs or SLPs pursuant to Exchange Rules (for example, Non-DMM Market Makers would not perform any trading floor functions such as those assigned to DMMs). Instead, under the proposed rules, for all securities that trade on the Exchange, a member organization may register as a Non-DMM Market Maker and be subject to obligations similar to those of Market Makers on NYSE Arca, Inc. (“NYSE Arca”) and NYSE American LLC (“NYSE American”) to, among other things, maintain continuous, two-sided trading interest in the securities in which they are registered as a Non-DMM Market Maker (“Two-Sided Obligation”) and adhere to certain pricing obligations.

The Exchange proposes the following rules, based on NYSE Arca and NYSE American rules of the same number with non-substantive changes, to govern the registration and obligations of Non-DMM Market Makers on the NYSE:

- Proposed Rule 1.1(p) (definition of Market Maker Authorized Trader);

- Proposed Rule 1.1(t) (definition of Non-DMM Market Maker);
- Proposed Rule 7.20 (Registration of Non-DMM Market Makers);
- Proposed Rule 7.21 (Obligations of Market Maker Authorized Traders);
- Proposed Rule 7.22 (Registration of Non-DMM Market Makers in a Security); and
- Proposed Rule 7.23 (Obligations of Non-DMM Market Makers).

These proposed rules would be applicable only to Non-DMM Market Makers. They would not apply to DMMs or SLPs, who would continue to be governed by existing Exchange rules applicable to those market participants.⁵

Proposed Rule Changes

Rule 1.1

Rule 1.1 sets forth definitions of terms that are used throughout the Exchange rules. The Exchange proposes to add the following definitions to the rule:

- The Exchange proposes to amend current Rule 1.1(p) to set forth the definition of “Market Maker Authorized Trader” or “MMAT.” A “Market Maker Authorized Trader” or “MMAT” would be defined as an Authorized Trader (as defined in Rule 1.1(a)) who performs market making activities pursuant to Rule 7P on behalf of a Non-DMM Market Maker.

- The Exchange proposes to amend current Rule 1.1(t) to set forth the definition of “Non-DMM Market Maker.” A “Non-DMM Market Maker” would be defined as a member organization that acts as a Non-DMM Market Maker pursuant to Rule 7P. Accordingly, for purposes of Exchange rules, the term “Non-DMM Market Maker” does not include DMMs or SLPs.

Rule 7P, Section 2

The Exchange proposes to amend Section 2 under Rule 7P, which is currently designated as “Reserved,” and rename it “Non-DMM Market Makers.” The Exchange proposes that the rules set forth in this section would apply only to the proposed new group of Non-DMM Market Makers and would not be applicable to DMMs or SLPs.

Rule 7.20

The Exchange proposes to add Rule 7.20 and title it “Registration of Non-DMM Market Makers.” Proposed Rule 7.20 would set forth the requirements for member organizations to apply for registration as Non-DMM Market Makers. The Exchange proposes that its Non-DMM Market Makers have the

same registration requirements as Market Makers on NYSE Arca and NYSE American. The Exchange proposes to require member organizations interested in acting as Non-DMM Market Makers to submit an application to the Exchange. Proposed Rule 7.20 would also set forth the criteria the Exchange may consider in determining whether to approve or disapprove a prospective Non-DMM Market Maker’s application and specify how a Non-DMM Market Maker’s registration may be suspended, terminated, or withdrawn.

Rule 7.21

The Exchange proposes to add Rule 7.21 and title it “Obligations of Market Maker Authorized Traders.” Proposed Rule 7.21 would provide that Market Maker Authorized Traders (“MMATs”) are permitted to enter orders only for the account of the Non-DMM Market Maker for which they are registered. In addition, the proposed rule would specify the registration requirements for MMATs and the procedures for suspension and withdrawal of registration of MMATs. Specifically, the proposed rule would provide that a Non-DMM Market Maker must submit an application to the Exchange to register an associated person as an MMAT. An MMAT must meet certain requirements, and a Non-DMM Market Maker must ensure that its MMATs are qualified to perform market making activities. Proposed Rule 7.21 also provides that the Exchange may suspend or withdraw an MMAT’s registration.

Rule 7.22

The Exchange proposes to add Rule 7.22 and title it “Registration of Non-DMM Market Makers in a Security.” Proposed Rule 7.22 would set forth the process for Non-DMM Market Makers to become registered in a security and the factors the Exchange may consider in approving such registration. Non-DMM Market Makers may submit a request to the Exchange to be registered in a security, and the Exchange will evaluate whether to approve such registration, taking into consideration factors including the Non-DMM Market Maker’s financial resources, experience in making markets, operational capability, and the character of the market for the security. Non-DMM Market Makers will generally be permitted to register in securities in which a DMM and/or SLP is also registered, subject to the Exchange’s evaluation of the character of the market

² 17 CFR 240.19b–4.

³ See Securities Exchange Act Release No. 91377 (March 19, 2021), 86 FR 15974 (March 25, 2021) (“Notice”).

⁴ A “Non-DMM Market Maker” would be defined as a member organization that acts as a Non-DMM Market Maker pursuant to Rule 7P. See Notice, *id.* at 15974.

⁵ See, e.g., NYSE Rules 98, 103, 103B, 104, and 107B.

for a given security.⁶ Finally, the proposed rule would also describe both termination of a Non-DMM Market Maker's registration in a security by the Exchange and voluntary termination by a Non-DMM Market Maker.

Rule 7.23

The Exchange proposes to add Rule 7.23 and title it "Obligations of Non-DMM Market Makers." Proposed Rule 7.23 would set forth the obligation of Non-DMM Market Makers to engage in a course of dealings for their own account to assist in the maintenance, insofar as reasonably practicable, of fair and orderly markets on the Exchange. The proposed rule would delineate the specific responsibilities and duties of Non-DMM Market Makers, including the Two-Sided Obligation applicable to securities in which the Non-DMM Market Maker is registered and the requirement that the interest satisfying the Two-Sided Obligation be not more than the Designated Percentage (as defined in Proposed Rule 7.23) away from the National Best Bid or Offer ("NBBO"). Proposed Rule 7.23 also provides that Non-DMM Market Makers will be subject to certain minimum capital requirements and sets forth the circumstances under which a Non-DMM Market Maker could be subject to disciplinary action or suspension or revocation of registration by the Exchange for failure to comply with the course of dealings obligations set forth in this proposed rule.

Specifically, with respect to the Two-Sided Obligation, proposed Rule 7.23(a)(1)(A) provides that Non-DMM Market Makers would be required to maintain displayed interest identified as interest meeting the Two-Sided Obligation on a continuous basis during Core Trading Hours for those securities in which the Non-DMM Market Maker is registered. Proposed Rule 7.23(a)(1)(B) provides that interest satisfying a Non-DMM Market Maker's Two-Sided Obligation must not be more than the Designated Percentage away from the then current NBBO, or if there is no NBBO, not more than the Designated Percentage away from the last reported sale for that security. With respect to minimum capital requirements, proposed Rule 7.23(a)(2) provides that Non-DMM Market Makers would be required to maintain adequate minimum capital in accordance with Rule 15c3-1 under the Act.

⁶ Orders entered by Non-DMM Market Makers will be allocated in accordance with Rules 7.36 and 7.37 and be treated as a Book Participant. Non-DMM Market Makers will not be eligible to participate in the allocation process as a DMM Participant.

III. Discussion and Commission Findings

After careful consideration, the Commission finds that the Exchange's proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges. In particular, the Commission finds that the Exchange's proposed rule change is consistent with Section 6(b)(5) of the Act,⁷ which requires that the rules of an exchange be designed, among other things, to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.⁸

As described above, the Exchange proposes to adopt rules for the registration and obligations of Non-DMM Market Makers that are substantially comparable to NYSE Arca and NYSE American rules. The Exchange stated that the proposed rules are designed to enable market makers that are registered on the Exchange's affiliated markets to become registered on the Exchange as Non-DMM Market Makers by meeting the same registration requirements and by agreeing to be subject to the same obligations.⁹ The Exchange represented that the proposed Non-DMM Market Makers are not intended to supplant existing DMMs or SLPs or their roles on the Exchange and Non-DMM Market Makers would not assume any of the responsibilities already assigned to DMMs or SLPs pursuant to Exchange Rules.¹⁰ According to the Exchange, the proposed rules are intended to provide for a new category of market maker that the Exchange believes will promote competition on the Exchange by enhancing the range and diversity of market making activity on the Exchange. Further, the Exchange stated that the proposal would promote competition by encouraging additional displayed liquidity. The Exchange also stated that the proposal would facilitate price

⁷ 17 U.S.C. 78f(b)(5).

⁸ In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁹ See Notice, *supra* note 3 at 15976.

¹⁰ While the proposed obligations for Non-DMM Market Makers are less stringent than those for DMMs and SLPs, the proposed rules would not affect the existing roles or obligations of DMMs and SLPs.

discovery and promote market quality on the Exchange.¹¹

The Commission believes that introducing a new category of market maker—Non-DMM Market Makers—could promote competition on the Exchange. Further the Commission believes that the introduction of Non-DMM Market Makers on the Exchange and their obligations to the market as required under NYSE Rule 7.23 could provide additional, supplemental liquidity to the market and could enhance price discovery.

Based on the foregoing, the Commission therefore finds that the proposed rule change is consistent with the Act.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,¹² that the proposed rule change (SR-NYSE-2021-08) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹³

J. Matthew DeLesDernier,
Assistant Secretary.

[Release No. 34-91757; File No. SR-C2-2021-008]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a Fee Schedule To Establish Fees for Industry Members Related to the National Market System Plan Governing the Consolidated Audit Trail

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 21, 2021, Cboe C2 Exchange, Inc. ("Exchange" or "C2") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

⁵ 17 CFR 240.19b-4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (the "Exchange" or "C2") proposes to adopt a fee schedule to establish fees for Industry Members related to the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan").³ The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/options/regulation/rule_filings/ctwo/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under the CAT NMS Plan, the Operating Committee of the Consolidated Audit Trail, LLC ("Company") ("Operating Committee") has discretion to establish funding for the Company to operate the CAT, including establishing fees that the Participants will pay, and establishing fees for Industry Members that will be implemented by the Participants.⁴ The Operating Committee has filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposal to amend the CAT NMS Plan to implement a revised funding model for the CAT ("CAT Funding Model") and to

establish a fee schedule for Participant CAT fees ("Proposed CAT Fee Plan Amendment").⁵ The Proposed CAT Fee Plan Amendment describes the CAT Funding Model in detail, including the proposal to charge Industry Members CAT fees. The Participants are required to file with the SEC under Section 19(b) of the Exchange Act any CAT fees applicable to Industry Members that the Operating Committee approves.⁶ Accordingly, the purpose of this proposed rule change is to implement the required fee schedule provisions for CAT fees applicable to Industry Members that are Trading Permit Holders in accordance with the CAT Funding Model. The fee schedule provisions will become operative upon the SEC's approval of the Proposed CAT Fee Plan Amendment.

(1) CAT Funding Model

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, the CAT fees applicable to Participants and Industry Members for the relevant quarter would be designed to cover the total CAT costs associated with developing, implementing and operating the CAT for the relevant quarter ("Total CAT Costs").⁷ The CAT Funding Model would implement a bifurcated funding model, where these costs would be borne by both Participants and Industry Members. Industry Members as a group would pay 75% of the Total CAT Costs (the "Industry Member Allocation"), and Participants as a group would pay 25% of the Total CAT Costs (the "Participant Allocation").⁸

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, each Industry Member will pay a CAT fee that is calculated by multiplying each Industry Member's message traffic percentage of the total message traffic of all Industry Members during the relevant time period by the Industry Member Allocation, subject to certain market maker message traffic discounts, a Minimum Industry Member CAT Fee and a Maximum Industry Member CAT Fee. Each Industry Member that is an Options Market Maker will have a discount based on the

options trade-to-quote ratio applied to its Options Market Maker message traffic when calculating that Industry Member's message traffic, and each Industry Member that is an Equity Market Maker will have a discount based on the NMS Stock trade-to-quote ratio applied to its Equity Market Maker message traffic when calculating that Industry Member's message traffic. In addition, each Industry Member will pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic. Furthermore, an Industry Member's CAT fee would be subject to the Maximum Industry Member CAT Fee. The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic. Each of these aspects of the Industry Member CAT fee are discussed in more detail below.

(A) CAT Fees for Both Industry Members and Participants

Under the CAT Funding Model, both Participants and Industry Members would contribute to the funding of the CAT by paying a CAT fee.⁹ As permitted by Rule 613, the CAT NMS Plan requires Industry Members to pay a CAT fee. Rule 613(a)(1)(vii)(D) contemplates Industry Members contributing to the payment of CAT costs. Specifically, this provision requires the CAT NMS Plan to address "[h]ow the plan sponsors propose to fund the creation, implementation, and maintenance of the consolidated audit trail, including the proposed allocation of such estimated costs among the plan sponsors, and between the plan sponsors and members of the plan sponsors."

In addition, as approved by the SEC, the CAT NMS Plan specifically contemplates CAT fees to be paid by both Industry Members and Participants. Section 11.1(b) states that "the Operating Committee shall have discretion to establish funding for the Company, including: (i) Establishing

⁵ See Securities Exchange Act Rel. No. 91555 (Apr. 14, 2021), 86 FR 21050 (April 21, 2021).

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ Note that certain costs would be excluded from the Historical CAT Assessment Costs, as discussed in more detail below. See Proposed CAT Fee Plan Amendment at 4, 56–57.

⁸ Each Industry Member and Participant CAT Reporter would be required to pay CAT fees established via the CAT Funding Model. CAT Reporting Agents acting in their role as such would not have an obligation to pay CAT fees. See Proposed CAT Fee Plan Amendment at 4.

⁹ Proposed CAT Fee Plan Amendment at 10–11.

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT Compliance Rule. See Chapter 7, Section B of the Exchange's Rulebook (which incorporates by reference Cboe Options Chapter 7, Section B). The Exchange and each of its affiliated exchanges (Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., Cboe Exchange, Inc., Cboe EDGA Exchange, Inc., and Cboe EDGX Exchange, Inc.) are filing to adopt the CAT fee schedule.

⁴ Section 11.1(b) of the CAT NMS Plan.

fees that the Participants shall pay; and (ii) establishing fees for Industry Members that shall be implemented by the Participants.”¹⁰ The Commission stated in approving the CAT NMS Plan the following:

The Commission believes that the proposed funding model reflects a reasonable exercise of the Participants’ funding authority to recover the Participants’ costs related to the CAT. The CAT is a regulatory facility jointly owned by the Participants and, as noted above, the Exchange Act specifically permits the Participants to charge members fees to fund their self-regulatory obligations. The Commission further believes that the proposed funding model is designed to impose fees reasonably related to the Participants’ self-regulatory obligations because the fees would be directly associated with the costs of establishing and maintaining the CAT, and not unrelated SRO services.¹¹

In its recent amendments to the CAT NMS Plan, the SEC reaffirmed the ability for the Participants to charge Industry Members a CAT fee. Specifically, the SEC noted that the amendments were not intended to change the basic funding structure for the CAT, which may include fees established by the Operating Committee, and implemented by the Participants, to recover from Industry Members the costs and expenses incurred by the Participants in connection with the development and implementation of the CAT.¹²

Finally, as noted by the SEC, the CAT “substantially enhance[s] the ability of the SROs and the Commission to oversee today’s securities markets,”¹³ thereby benefitting all market participants. As such, both Participants and Industry Members should contribute to covering the cost of the CAT.

(B) 75%/25% Allocation Between Industry Members and Participants

The CAT NMS Plan as approved by the Commission provides the Operating Committee with discretion to establish CAT fees to be paid by Participants and Industry Members. The CAT Funding Model as set out in the Proposed CAT Fee Plan Amendment contemplates allocating CAT costs between Participants and Industry Members to permit the calculation of CAT fees based on market share for Participants and

based on message traffic for Industry Members.¹⁴ Under the CAT Funding Model as proposed, Industry Members as a group would pay 75% of the Total CAT Costs (the “Industry Member Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).¹⁵ As discussed in more detail below, the Industry Member Allocation of 75% of the Total CAT Costs is included in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule for the Consolidated Audit Trail Funding Fees. In each such paragraph, the calculation of the Industry Member CAT fees is based on 75% of the Total CAT Costs.

(C) Message Traffic

The Industry Member Allocation would be allocated to each Industry Member based on message traffic.¹⁶ Each Industry Member CAT Reporter would pay a CAT fee that is calculated by multiplying each Industry Member’s percentage of the total message traffic of all Industry Members each quarter by the Industry Member Allocation, subject to certain market making discounts, Minimum Industry Member CAT Fees, and Maximum Industry Member CAT Fees. To implement the use of message traffic in the calculation of Industry Member CAT fees, the Exchange proposes to describe the use of message traffic in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule. In each such paragraph, the Industry Member CAT fees are calculated based on Industry Members’ message traffic in the CAT.

As set out in the Proposed CAT Fee Plan Amendment,¹⁷ message traffic would be calculated based on Industry Members’ Reportable Events reported to the CAT as defined in the CAT Reporting Technical Specifications for Industry Members (“IM Reporting Tech Specs”) as amended from time to time.¹⁸ The Reportable Events may vary over time if the IM Reporting Tech Specs are

amended.¹⁹ However, Reportable Events in the current IM Reporting Tech Specs that will be counted as message traffic include, but are not limited to, such events as the New Order Event, the Order Route Event and the Trade Event. In addition, message traffic will not include reporting activity related to Customer information as set forth in the CAT Reporting Customer and Account Technical Specifications for Industry Members.²⁰

(D) Market Maker Discounts

As set out in the Proposed CAT Fee Plan Amendment, the Operating Committee recognized that treating Options Market Maker message traffic and Equity Market Maker message traffic in the same way as other message traffic for purposes of calculating Industry Member CAT fees may result in an undue or inappropriate burden on competition or may lead to a reduction in market quality.²¹ For example, charging Industry Members on the basis of message traffic may impact market makers disproportionately because of their continuous quoting obligations. Moreover, in the context of Options Market Makers, message traffic would include bids and offers for every Listed Options strikes and series. Accordingly, the Operating Committee determined to discount Options Market Maker message traffic by the trade-to-quote ratio for Listed Options when calculating message traffic for Options Market Makers, and to discount Equity Market Maker message traffic by the trade-to-quote ratio for NMS Stocks when calculating message traffic for Equity Market Makers. The message traffic of Options Market Makers and Equity Market Makers, as discounted, would be counted as part of the total message

¹⁹ Due to the Phased Reporting approach, all Reportable Events will not be reported until all Industry Members are reporting all Reportable Events to the CAT. For example, Phase 2d CAT Reporting is scheduled for December 2021, and Small Industry Non-OATS Reporters are not required to report until December 2021. In addition, certain Reportable Events, such as simple options manual orders and OTC link messages, are not required to be reported until later in the Phased Reporting. For a detailed description of such Reportable Events, see CAT Reporting Technical Specifications for Industry Members (available at www.catnmsplan.com). For the Industry Member CAT reporting timeline, see, e.g., FINRA Rule 6895(c). CAT costs will be allocated based on the Reportable Events reported to the CAT in any relevant quarter, regardless of whether all Industry Members are reporting to the CAT or all Reportable Events are required to be reported to the CAT for a relevant quarter. See Proposed CAT Fee Plan Amendment at 27.

²⁰ The CAT Reporting Customer and Account Technical Specifications for Industry Members are available at www.catnmsplan.com.

²¹ See Proposed CAT Fee Plan Amendment at 27–30.

¹⁰ See also Sections 11.1(c), 11.2(c), and 11.3(a) and (b) of the CAT NMS Plan.

¹¹ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696, 84794 (Nov. 23, 2016) (“CAT NMS Plan Approval Order”).

¹² Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31329 (May 22, 2020) (“Financial Accountability Release”).

¹³ Securities Exchange Act Rel. No. 67457 (Jul. 18, 2012), 77 FR 45722, 45726 (Aug. 1, 2012).

¹⁴ See Proposed CAT Fee Plan Amendment at 12–16. Note that, in the funding model set forth in Article XI of the CAT NMS Plan (“Original Funding Model”), costs were allocated between Execution Venues and certain Industry Members, whereas the CAT Funding Model would allocate costs between Participants and Industry Members.

¹⁵ For additional discussions regarding the 75%–25% allocation, see Proposed CAT Fee Plan Amendment at 16–20.

¹⁶ For additional discussions regarding the use of message traffic for calculating Industry Member CAT fees, see Proposed CAT Fee Plan Amendment at 21–22.

¹⁷ See Proposed CAT Fee Plan Amendment at 26–27.

¹⁸ The CAT Reporting Technical Specifications for Industry Members are available at www.catnmsplan.com.

traffic for all Industry Members. The practical effect of applying such discounts for market making activity would be to lower the CAT fees for Options Market Makers and Equity Market Makers.

(I) Options Market Maker Discount

Each Industry Member that is an Options Market Maker²² would have a discount based on the options trade-to-quote ratio applied to its options market making message traffic when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on options market making due to such message traffic.²³ Specifically, for each Options Market Maker, a discount would be applied to (1) all message traffic reported to the CAT by the Options Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered, regardless of where the order is ultimately routed or executed;²⁴ and (2) all message traffic for which a "quote sent time" is reported by an Options Exchange on behalf of the given Options Market Maker.

The relevant trade-to-quote ratio for the Options Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the securities information processors ("SIP"). As an example, the trade-to-quote ratio for Listed Options for the fourth quarter of 2020 was 0.01%.

Accordingly, each Options Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the options trade-to-quote ratio. The Options Market Maker's CAT fee then would be calculated by multiplying its discounted percentage of the total

message traffic of all Industry Members during the relevant time period²⁵ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Options Market Maker discount, the Exchange proposes to add paragraph (g)(1) to the fee schedule. Paragraph (g)(1) would state that "[w]hen calculating the message traffic of an Industry Member that is an Options Market Maker, the Options Market Maker's market making message traffic would be discounted by multiplying its Listed Options market making message traffic by the Listed Options trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Options Market Maker message traffic for each of the four Industry Member CAT fees.

(II) Equity Market Maker Discount

Similarly, each Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker") would have a discount based on the NMS Stock trade-to-quote ratio applied to its market making message traffic in NMS Stocks when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on market making in NMS Stocks.²⁶ Specifically, for each Equity Market Maker, a discount would be applied to all message traffic reported to the CAT by the Equity Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered,²⁷ regardless of where the order is ultimately routed or executed.²⁸

The relevant trade-to-quote ratio for the Equity Market Maker discount would be calculated each quarter based

on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the SIP. As an example, the trade-to-quote ratio for NMS Stocks for the fourth quarter of 2020 was 4.77%.

The Equity Market Maker CAT fee would be calculated in the same manner as the Options Market Maker CAT fee. Each Equity Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the NMS Stock trade-to-quote ratio. The Equity Market Maker CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁹ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Equity Market Maker discount, the Exchanges proposes to add paragraph (g)(2) to the fee schedule. Paragraph (g)(2) would state that "[w]hen calculating the message traffic of an Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker"), the Equity Market Maker's market making message traffic would be a [sic] discounted by multiplying its market making message traffic in NMS Stocks by the NMS Stock trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Equity Market Maker message traffic for each of the four Industry Member CAT fees.

(E) Minimum Industry Member CAT Fee

Each Industry Member would be required to pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic.³⁰ All Industry Members required to report to the CAT, including those that have not yet begun to report to the CAT due to the phased implementation schedule for the CAT, would be subject to the Minimum Industry Member CAT Fee. If any Industry Member is required to pay the

²² Section 1.1 of the CAT NMS Plan, Rule 7.20(ee) defines an "Options Market Maker" as "a broker-dealer registered with an exchange for the purpose of making markets in options contracts traded on the exchange."

²³ See Proposed CAT Fee Plan Amendment at 30–32.

²⁴ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Options Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by an Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 31.

²⁵ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Options Market Makers. See Proposed CAT Fee Plan Amendment at 32.

²⁶ See Proposed CAT Fee Plan Amendment at 32–33.

²⁷ Note that Equity Market Makers do not have a quote sent time exemption comparable to the Options Market Maker quote sent time exemption, as discussed above.

²⁸ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Equity Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by the Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 32.

²⁹ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Equity Market Makers. See Proposed CAT Fee Plan Amendment at 33.

³⁰ For additional discussions regarding the Minimum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 33–35.

Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage.³¹

To implement the Minimum Industry Member CAT Fee, the Exchange proposes to add paragraph (h) to the fee schedule. Proposed paragraph (h)(1) of the fee schedule would state that “[t]he Minimum Industry Member CAT Fee is \$125 per quarter.” Proposed paragraph (h)(2) of the fee schedule would state that “[i]f any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage (“Minimum Industry Member CAT Fee Re-Allocation”).” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule describes the Minimum Industry Member CAT Fee Re-Allocation for each of the four Industry Member CAT fees.

(F) Maximum Industry Member CAT Fee

An Industry Member’s CAT fee also would be subject to a Maximum Industry Member CAT Fee.³² The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member’s fee is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry

Member’s percentage of total message traffic.

To implement the Maximum Industry Member CAT Fee, the Exchange proposes to add proposed paragraph (f) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (f)(1) would state that “[t]he Maximum Industry Member CAT Fee for each quarter is 8% of the total CAT costs for the relevant quarter.” In addition, proposed paragraph (f)(2) would state that:

If an Industry Member’s CAT Fee that is calculated pursuant to paragraph (a)(2), (b)(2), (c)(2), (d)(2), as applicable, without reference to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation, is greater than the Maximum Industry Member CAT Fee, then the Industry Member will be subject to the Maximum Industry Member CAT Fee. If any Industry Member is subject to the Maximum Industry Member CAT Fee, then any excess amount which the Industry Member otherwise would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members, including any Industry Member that is subject to the Maximum Industry Member CAT Fee or subject to the Minimum Industry Member CAT Fee in accordance with their message traffic percentage (“Maximum Industry Member CAT Fee Re-Allocation”).

Furthermore, proposed paragraphs (a)(1), (b)(1), (c)(1) and (d)(1) would state that an Industry Member’s CAT fee calculated pursuant to (a)(1), (b)(1), (c)(1) and (d)(1) would include any applicable Maximum Industry Member CAT Fee Re-Allocation. Finally, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) would state that an Industry Member’s CAT fee calculated pursuant to paragraph (a)(2), (b)(2), (c)(2) or (d)(2) is subject to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation.

(G) Total CAT Costs

As set out in the Proposed CAT Fee Plan Amendment, the Total CAT Costs for the year would be comprised of all fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during this period.³³

For purposes of the Historical CAT Assessment, the Total CAT Costs would be \$193,273,342, as set forth in the Proposed CAT Fee Plan Amendment. Accordingly, the quarterly CAT fee for the Historical CAT Assessment will be

calculated based on costs of \$36,238,752, which is 1/4th of 75% of the Total CAT Costs. This amount is set forth in proposed paragraph (b)(2) of the fee schedule.

In addition, proposed paragraph (i) of the “Consolidated Audit Trail Funding Fees” section of its fee schedule describes the Total CAT Costs to be used in calculating the Period 3 CAT Fee, the Period 4 CAT Fee and the Quarterly CAT Fees. Proposed paragraph (i)(1) of the fee schedule would state that “[t]he Period 3 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2021.” Proposed paragraph (i)(2) of the fee schedule would state that “[t]he Period 4 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2022.” Proposed paragraph (i)(3) of the fee schedule would state the following with regard to the Quarterly CAT Fees:

For purposes of the Quarterly CAT Fee, the budgeted Total CAT Costs for the relevant year shall be the total CAT costs set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan for the relevant year. The budgeted Total CAT Costs for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted budgeted costs for the CAT will be used in calculating the remaining CAT fees for that year.

(2) Proposed CAT Fees

The Exchange proposes to charge its Industry Members fees related to CAT costs. To implement these CAT fees, the Exchange proposes to add a section entitled “Consolidated Audit Trail Funding Fees” to its fee schedule, and to describe the CAT fees in that section.

(A) Historical CAT Assessment (for Pre-Period 1, Period 1 and Period 2)

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee determined to charge Industry Members a historical assessment (“Historical CAT Assessment”) to recover certain CAT costs incurred prior to January 1, 2021 (“Historical CAT Assessment Costs”).³⁴ Specifically, as detailed in the Proposed CAT Fee Plan Amendment, the Historical CAT Assessment is intended

³¹ Options Market Makers and Equity Market Makers will be required to pay the Minimum Industry Member CAT Fee if their quarterly CAT fee calculated with the market maker discounts is less than \$125 per quarter.

³² For additional discussions regarding the Maximum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 35–37.

³³ See Proposed CAT Fee Plan Amendment at 50–51.

³⁴ See Proposed CAT Fee Plan Amendment at 55–60.

to collect from Industry Members 75% of certain costs incurred through June 22, 2020, the effective date for the Financial Accountability Milestones,³⁵ certain costs from Period 1 of the Financial Accountability Milestones (which covered the period from June 22, 2020–July 31, 2020) and certain costs from Period 2 of the Financial Accountability Milestones (which covered the period from August 1, 2020–December 31, 2020). The Total CAT Costs, excluding Excluded Costs (as defined below) and certain costs related to the conclusion of the relationship with Thesys CAT, LLC is \$193,273,342. The Historical CAT Assessment is designed to recover 75% of these CAT costs. Accordingly, the Historical CAT Assessment Costs would be \$144,955,006.

Using the Historical CAT Assessment Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Historical CAT Assessment owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover the Historical CAT Assessment Costs over a period of four calendar quarters, commencing upon the SEC's approval of the Historical CAT Assessment. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic (subject to the market making discounts and the maximum fee). The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by \$36,238,752, which is 1/4th of the Historical CAT Assessment Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee

Re-Allocation, and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Historical CAT Assessment in the first quarter after SEC approval of the Historical CAT Assessment, based on CAT Data from the quarter in which the SEC approved the CAT fees.

To implement the Historical CAT Assessment, the Exchange proposes to add proposed paragraph (b) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (b) would state that "each Industry Member shall pay an Historical CAT Assessment in the amount of the greater of the following each quarter for four quarters commencing upon approval of the Historical CAT Assessment by the SEC: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by \$36,238,752 (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

In accordance with Section 11.6(b) of the CAT NMS Plan and as provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 1. Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31,

2020, the date of Initial Industry Member Core Equity and Options Reporting. As indicated by the Participants' Quarterly Progress Report,³⁶ Initial Industry Member Core Equity and Option Reporting was completed on schedule by July 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020.

As provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 2. Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. As indicated by the Participants' Quarterly Progress Report,³⁷ Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. Accordingly, proposed paragraph (b) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Historical CAT Assessment "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Historical CAT Assessment:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	\$36,238,752	Quarter of SEC approval of Historical CAT Assessment.	1st quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #2	36,238,752	1st quarter after SEC approval of Historical CAT Assessment.	2nd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #3	36,238,752	2nd quarter after SEC approval of Historical CAT Assessment.	3rd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

³⁵ See Section 11.6 of the CAT NMS Plan; and Financial Accountability Release.

³⁶ Q3 2020 Quarterly Progress Report (Oct. 30, 2020) (available at www.catnmsplan.com).

³⁷ Q4 2020 Quarterly Progress Report (Jan. 29, 2021) (available at www.catnmsplan.com).

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #4	36,238,752	3rd quarter after SEC approval of Historical CAT Assessment.	4th quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

(B) Period 3 CAT Fee

Per the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2021 through December 31, 2021, referred to as the Period 3 CAT Fee.³⁸ The Total CAT Costs incurred from January 1, 2021 through December 31, 2021 ("Period 3 CAT Costs") will be calculated at the completion of 2021. Specifically, the Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

Using the Period 3 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 3 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 3 CAT Costs over a period of four calendar quarters, commencing in 2022. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message by 1/4th of 75% of the Period 3 CAT Costs traffic (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-

Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Period 3 CAT Fee in the second quarter of 2022, based on CAT Data from the first quarter of 2022.

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2021 the Total CAT Costs for 2021 to be used in calculating the quarterly Period 3 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. Such financial statements are required to be prepared in accordance with Section 9.2 of the CAT NMS Plan, including requirements related to compliance with GAAP, auditing by an independent public accounting firm and making the statements publicly available.

To implement the Period 3 CAT Fee, the Exchange proposes to add proposed paragraph (c) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (c) would state that "each Industry Member shall pay a Period 3 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2022: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4th of 75% of the Period 3 Total CAT Costs (subject to applicable discounts for Options Market Maker

message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

Per the Proposed CAT Fee Plan Amendment, the proposed Period 3 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 3. Period 3 began on January 1, 2021 and is expected to conclude on December 31, 2021, the date of Full Availability and Regulatory Utilization of Transactional Database Functionality. As discussed above, the Period 3 CAT Costs to be recovered via the Period 3 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2020 through December 31, 2021. The collection of the full amount of the Period 3 CAT Fee will depend upon achievement of Full Availability and Regulatory Utilization of Transactional Database Functionality by December 31, 2021; if not, the amount of the Period 3 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (c) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 3 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Period 3 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 3 CAT Costs ³⁹	CAT Data from first quarter of 2022	2nd quarter of 2022.
Quarterly CAT Fee #2	1/4th of 75% of the Period 3 CAT Costs ...	CAT Data from second quarter of 2022	3rd quarter of 2022.
Quarterly CAT Fee #3	1/4th of 75% of the Period 3 CAT Costs ...	CAT Data from third quarter of 2022	4th quarter of 2022.
Quarterly CAT Fee #4	1/4th of 75% of the Period 3 CAT Costs ...	CAT Data from fourth quarter of 2022	1st quarter of 2023.

(C) Period 4 CAT Fee

As set forth in the Proposed CAT Fee Plan Amendment, the Operating

Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2022

through December 30, 2022, referred to as the Period 4 CAT Fee.⁴⁰ The Total CAT Costs incurred from January 1, 2022 through December 30, 2022

³⁸ See Proposed CAT Fee Plan Amendment at 60–63.

³⁹ The Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

⁴⁰ See Proposed CAT Fee Plan Amendment at 63–65.

(“Period 4 CAT Costs”) will be calculated at the completion of 2022. Specifically, the Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

Using the Period 4 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 4 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 4 CAT Costs over a period of four calendar quarters, commencing in 2023. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member’s message traffic would be calculated using CAT Data from the prior quarter. Industry Members will be required to commence paying the Period 4 CAT Fee

in the second quarter of 2023, based on data from the first quarter of 2023.

To implement the Period 4 CAT Fee, the Exchange proposes to add proposed paragraph (d) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (d) would state that “each Industry Member shall pay a Period 4 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the prior quarter’s message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2022 the Total CAT Costs for 2022 to be used in calculating the quarterly Period 4 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. As noted above, such

financial statements are required to be prepared in accordance with the requirements set forth in Section 9.2 of the CAT NMS Plan.

The Exchange indicates that the proposed Period 4 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 4. Period 4 is expected to begin on January 1, 2022 and conclude on December 30, 2022, the date of Full Implementation of CAT NMS Plan Requirements. As discussed above, the Period 4 CAT Costs to be recovered via the Period 4 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2022 through December 30, 2022. The collection of the full amount of the Period 4 CAT Fee will depend upon achievement of Full Implementation of CAT NMS Plan Requirements by December 30, 2022; if not, the amount of the Period 4 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (e) of the “Consolidated Audit Trail Funding Fees” section of its fee schedule would state that Industry Members will be required to pay the Period 4 CAT Fee “[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan.”

The following chart summarizes the imposition of the Period 4 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 4 CAT Costs ⁴¹	CAT Data from first quarter of 2023	2nd quarter of 2023.
Quarterly CAT Fee #2	1/4th of 75% of the Period 4 CAT Costs ...	CAT Data from second quarter of 2023	3rd quarter of 2023.
Quarterly CAT Fee #3	1/4th of 75% of the Period 4 CAT Costs ...	CAT Data from third quarter of 2023	4th quarter of 2023.
Quarterly CAT Fee #4	1/4th of 75% of the Period 4 CAT Costs ...	CAT Data from fourth quarter of 2023	1st quarter of 2024.

(D) Quarterly CAT Fee—Beginning 2023

As provided in the Proposed CAT Fee Plan Amendment, to recover the costs of the CAT going forward beginning in 2023, the Operating Committee determined to charge Industry Members an ongoing quarterly CAT fee calculated based on the allocation of Total CAT Costs pursuant to the CAT Funding Model (“Quarterly CAT Fee”).⁴² The Operating Committee will use the costs set forth in the annual operating budget as the Total CAT Costs in the calculation of the Quarterly CAT Fee. Specifically, the Total CAT Costs

budgeted for the upcoming year for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. Using these estimated Total CAT Costs, the Operating Committee will calculate the Quarterly CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. As provided in the Proposed CAT Fee Plan Amendment, the Operating Committee proposes to seek to recover the budgeted Total CAT Costs over the course of the year. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic.⁴³ The message traffic fee

would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the year (subject to applicable discounts for

Period 4 CAT Fee and the Quarterly CAT Fee) are due during the same quarter, any Industry Member obligated to pay one or more categories of fees is required to pay each category of fee for that quarter. For example, if an Industry Member would be subject to the Minimum Industry Member CAT Fee for the Period 4 CAT Fee and the Minimum Industry Member CAT Fee for the Quarterly CAT Fee during the same quarter, the Industry Member would be required to pay two minimum \$125 fees that quarter for a total of \$250. As another example, suppose that an Industry Member owed a CAT fee (other than the minimum fee of \$125) for both the Historical CAT Assessment and the Period 3 CAT Fee, the Industry Member would be required to pay both fees that quarter. See Proposed CAT Fee Plan Amendment at 66.

⁴¹ The Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

⁴² See Proposed CAT Fee Plan Amendment at 65–68.

⁴³ To the extent that any two or more of the four categories of Industry Member CAT fees (i.e., the Historical CAT Assessment, Period 3 CAT Fee,

Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using data from the prior calendar quarter. The Exchange proposes to commence charging this CAT fee in the second quarter of 2023, based on CAT Data from the first quarter of 2023.

To implement the Quarterly CAT Fee, the Exchange proposes to add proposed paragraph (a) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (a) would state that "[e]ach Industry Member shall pay a Quarterly CAT Fee in the amount of the greater of the following each quarter commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying

the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the relevant year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands the Operating Committee will announce at the beginning of the relevant year via a CAT alert the budgeted Total CAT Costs to be used in calculating the Quarterly CAT Fees for that year. The budgeted Total CAT Costs will be the costs set forth in the annual operating budget for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. As discussed above, CAT costs would include, but not be limited to, Plan Processor costs, insurance costs, third-

party support costs and an operational reserve. As required by Section 11.1(c) of the CAT NMS Plan, any surpluses collected will be treated as an operational reserve to offset future fees and will not be distributed to the Participants as profits.⁴⁴ In addition, to address potential changes in the budget during the year, the total budgeted costs for the CAT for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted total budgeted costs for the CAT will be used in calculating the remaining quarterly CAT fees for that year.

The following chart summarizes the imposition of the Quarterly CAT Fee each year commencing in 2023 and continuing each year thereafter:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from first quarter of the relevant year.	2nd quarter of the relevant year.
Quarterly CAT Fee #2	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from second quarter of the relevant year.	3rd quarter of the relevant year.
Quarterly CAT Fee #3	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from third quarter of the relevant year.	4th quarter of the relevant year.
Quarterly CAT Fee #4	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from fourth quarter of the relevant year.	1st quarter of year following the relevant year.

(3) Time and Manner of Payment

The Exchange proposes to add paragraph (e) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule to describe the time and manner of the payment of the Industry Member CAT fees as provided in the Proposed CAT Fee Plan Amendment.⁴⁵ Proposed paragraph (e)(1) would state that "Consolidated Audit Trail, LLC will provide each Industry Member with an invoice setting forth the Industry Member's Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and/or Quarterly CAT Fee (as applicable) (collectively, "CAT Fees") for each payment period." Proposed paragraph (e)(2) would state that "Consolidated Audit Trail, LLC will provide each Industry Member with one invoice each payment period for its CAT Fees as determined pursuant to paragraph (a)–(d) above, regardless of whether the Industry Member is a

member of multiple self-regulatory organizations." Proposed paragraph (e)(3) would state that "[e]ach Industry Member will pay its CAT Fees to the Consolidated Audit Trail, LLC via the centralized system for the collection of CAT Fees established by the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC." Finally, proposed paragraph (e)(4) would require that Industry Members pay their CAT Fees within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due, such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (A) the Prime Rate plus 300 basis points, or (B) the

maximum rate permitted by applicable law.⁴⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,⁴⁷ which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,⁴⁸ because it provides for the equitable allocation of reasonable dues,

⁴⁴ CAT NMS Plan Approval Order at 84792.

⁴⁵ See Proposed CAT Fee Plan Amendment at 68–69.

⁴⁶ CAT Reporters will be responsible for each quarterly fee in which they are a CAT Reporter. If

a CAT Reporter ceases to meet the definition of a CAT Reporter during a quarter, the CAT Reporter will still be responsible for CAT fees attributable to its message traffic (or, the minimum fee in the

alternative) during that quarter. See Proposed CAT Fee Plan Amendment at 69.

⁴⁷ 15 U.S.C. 78f(b)(6).

⁴⁸ 15 U.S.C. 78f(b)(4).

fees and other charges among members and issuers and other persons using its facilities. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,⁴⁹ which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

Section 11.1(b) of the CAT NMS Plan states that "[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves." Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this proposed rule change to implement the Industry Member CAT fees included in the CAT Funding Model approved by the Operating Committee. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan "is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act."⁵⁰ To the extent that this proposal implements the Plan, and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

The Exchange further notes that, as provided in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed Industry Member CAT fees comply with the requirements of the Exchange Act and the CAT NMS Plan.⁵¹ The Operating Committee determined that the Industry Member CAT fees provide for the "equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities necessary or appropriate in furtherance of the purposes of this chapter,"⁵² as required by the Exchange Act. The Operating Committee determined that the CAT

fees equitably allocate CAT costs between Participants and Industry Members, and among Industry Members, as discussed in detailed [sic] above. For the reasons discussed above, the Operating Committee determined that the 75%–25% allocation between Industry Members and Participants in the CAT Funding Model as well as the use of message traffic for allocating costs among Industry Members provide for an equitable allocation of CAT costs among CAT Reporters. In addition, as discussed above, the Operating Committee determined that the imposition of minimum and maximum fees and market maker discounts would operate to provide for an equitable allocation of CAT costs among Industry Members.

As further provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined that the CAT Funding Model is "not designed to permit unfair discrimination between customers, issuers, brokers, or dealers,"⁵³ as required by the Exchange Act, as the CAT Funding Model does not unfairly discriminate between Industry Members and Participants, or among Industry Members. In making this determination, the Operating Committee noted that all Industry Members are grouped together for the purpose of determining CAT fees, and Industry Members with similar levels of activity would pay similar fees. For example, Industry Members with higher levels of message traffic would pay higher fees, and those with lower levels of message traffic would pay lower fees. With the elimination of tiers in the Original Funding Model, fees for Industry Members are directly related to their message traffic. With tiers, the relationship between message traffic and the CAT fee would not have been as direct.

In addition, as discussed in the Proposed CAT Fee Plan Amendment, where the method of fee calculation may potentially affect certain groups of CAT Reporters adversely, the Operating Committee sought to limit such adverse effects. For example, the Operating Committee proposed market maker discounts to address the high levels of message traffic generally exhibited by market makers. As discussed above, the SEC has recognized repeatedly that such favorable treatment for market makers in other contexts was not unfairly discriminatory or a burden on competition in light of its positive effects on market quality, nor was it

considered to involve an inequitable allocation of fees among members.

As also provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also proposed the Maximum Industry Member CAT Fee to address the potential for significant fees based on outsized message traffic for certain Industry Members. The Maximum Industry Member CAT Fee would serve as a method to institute a cap on fees to fairly allocate costs to Industry Members. Such a fee would prevent Industry Members from paying significantly larger CAT fees than Participant complexes.

The Proposed CAT Fee Plan Amendment notes that Operating Committee also determined that the proposed Industry Member CAT fees would promote just and equitable principles of trade, and, in general, protect investors and the public interest, as the fees would be transparent and relate specifically to CAT activity. The Operating Committee also determined that the proposed fees were reasonable because they would provide ease of calculation, ease of billing and other administrative functions. Such factors are crucial to estimating a reliable revenue stream for the Company.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act⁵⁴ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change implements provisions of the CAT NMS Plan that are subject to approval by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan. The Exchange also notes that the proposed rule changes will apply equally to all Industry Members, including its Trading Permit Holders. In addition, all national securities exchanges and FINRA are proposing a similar proposed fee change to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the exchanges and FINRA.

Moreover, the Exchange notes that, as discussed in the Proposed CAT Fee Plan Amendment, the Operating Committee

⁴⁹ 15 U.S.C. 78f(b)(8).

⁵⁰ CAT NMS Plan Approval Order at 84696.

⁵¹ See Proposed CAT Fee Plan Amendment at 70–79.

⁵² Sections 6(b)(4) and 15A(b)(5) of the Exchange Act.

⁵³ Sections 6(b)(5) and 15A(b)(6) of the Exchange Act.

⁵⁴ 15 U.S.C. 78f(b)(8).

determined that the proposed fees do not impose an unnecessary or inappropriate burden on competition as they fairly and equitably allocate costs among CAT Reporters.⁵⁵ The Operating Committee determined that the cost allocation between Participants and Industry Members recognizes the greater number of Industry Members as compared to the Participants and the greater collective revenue of Industry Members as compared to Participants. In addition, cost allocations among Industry Members based on message traffic fairly and equitably distribute CAT costs. Furthermore, the market maker discounts and the Maximum Industry Member CAT Fee address the potential for burdens on market makers and Industry Members with outsized message traffic potentially resulting from the proposed fee calculations. Moreover, the Operating Committee determined that the Minimum Industry Member CAT Fee would not act as a barrier to entry for smaller Industry Member CAT Reporters.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁵⁶ and paragraph (f) of Rule 19b-4⁵⁷ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-C2-2021-008 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-C2-2021-008. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-C2-2021-008 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁸

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91752; File No. SR-NASDAQ-2021-029]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt a Fee Schedule To Establish Fees for Industry Members Related to the National Market System Plan Governing the Consolidated Audit Trail

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 21, 2021, The Nasdaq Stock Market LLC ("Nasdaq" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt a fee schedule to establish fees for Industry Members related to the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan").³

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in Rule General 7 (Consolidated Audit Trail Compliance).

⁵⁵ See Proposed CAT Fee Plan Amendment at 78-79.

⁵⁶ 15 U.S.C. 78s(b)(3)(A).

⁵⁸ 17 CFR 200.30-3(a)(12).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under the CAT NMS Plan, the Operating Committee of the Consolidated Audit Trail, LLC ("Company") ("Operating Committee") has discretion to establish funding for the Company to operate the CAT, including establishing fees that the Participants will pay, and establishing fees for Industry Members that will be implemented by the Participants.⁴ The Operating Committee has filed with the SEC a proposal to amend the CAT NMS Plan to implement a revised funding model for the CAT ("CAT Funding Model") and to establish a fee schedule for Participant CAT fees ("Proposed CAT Fee Plan Amendment").⁵ The Proposed CAT Fee Plan Amendment describes the CAT Funding Model in detail, including the proposal to charge Industry Members CAT fees. The Participants are required to file with the SEC under Section 19(b) of the Exchange Act any CAT fees applicable to Industry Members that the Operating Committee approves.⁶ Accordingly, the purpose of this proposed rule change is to implement the required fee schedule provisions for CAT fees applicable to Industry Members that are Nasdaq members in accordance with the CAT Funding Model. The fee schedule provisions will become operative upon the SEC's approval of the Proposed CAT Fee Plan Amendment.

(1) CAT Funding Model

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, the CAT fees applicable to Participants and Industry Members for the relevant quarter would be designed to cover the total CAT costs associated with developing, implementing and operating the CAT for the relevant quarter ("Total CAT Costs").⁷ The CAT Funding Model would implement a bifurcated funding model, where these costs would be borne by both Participants and Industry Members. Industry Members as a group would pay 75% of the Total CAT Costs (the "Industry Member Allocation"), and Participants as a group would pay 25%

of the Total CAT Costs (the "Participant Allocation").⁸

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, each Industry Member will pay a CAT fee that is calculated by multiplying each Industry Member's message traffic percentage of the total message traffic of all Industry Members during the relevant time period by the Industry Member Allocation, subject to certain market maker message traffic discounts, a Minimum Industry Member CAT Fee and a Maximum Industry Member CAT Fee. Each Industry Member that is an Options Market Maker will have a discount based on the options trade-to-quote ratio applied to its Options Market Maker message traffic when calculating that Industry Member's message traffic, and each Industry Member that is an Equity Market Maker will have a discount based on the NMS Stock trade-to-quote ratio applied to its Equity Market Maker message traffic when calculating that Industry Member's message traffic. In addition, each Industry Member will pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic. Furthermore, an Industry Member's CAT fee would be subject to the Maximum Industry Member CAT Fee. The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic. Each of these aspects of the Industry Member CAT fee are discussed in more detail below.

(A) CAT Fees for Both Industry Members and Participants

Under the CAT Funding Model, both Participants and Industry Members would contribute to the funding of the

CAT by paying a CAT fee.⁹ As permitted by Rule 613, the CAT NMS Plan requires Industry Members to pay a CAT fee. Rule 613(a)(1)(vii)(D) contemplates Industry Members contributing to the payment of CAT costs. Specifically, this provision requires the CAT NMS Plan to address "[h]ow the plan sponsors propose to fund the creation, implementation, and maintenance of the consolidated audit trail, including the proposed allocation of such estimated costs among the plan sponsors, and between the plan sponsors and members of the plan sponsors."

In addition, as approved by the SEC, the CAT NMS Plan specifically contemplates CAT fees to be paid by both Industry Members and Participants. Section 11.1(b) states that "the Operating Committee shall have discretion to establish funding for the Company, including: (i) Establishing fees that the Participants shall pay; and (ii) establishing fees for Industry Members that shall be implemented by the Participants."¹⁰ The Commission stated in approving the CAT NMS Plan the following:

The Commission believes that the proposed funding model reflects a reasonable exercise of the Participants' funding authority to recover the Participants' costs related to the CAT. The CAT is a regulatory facility jointly owned by the Participants and, as noted above, the Exchange Act specifically permits the Participants to charge members fees to fund their self-regulatory obligations. The Commission further believes that the proposed funding model is designed to impose fees reasonably related to the Participants' self-regulatory obligations because the fees would be directly associated with the costs of establishing and maintaining the CAT, and not unrelated SRO services.¹¹

In its recent amendments to the CAT NMS Plan, the SEC reaffirmed the ability for the Participants to charge Industry Members a CAT fee. Specifically, the SEC noted that the amendments were not intended to change the basic funding structure for the CAT, which may include fees established by the Operating Committee, and implemented by the Participants, to recover from Industry Members the costs and expenses incurred by the Participants in connection with the

⁴ Section 11.1(b) of the CAT NMS Plan.

⁵ See Securities Exchange Act Release No. 91555 (April 14, 2017), 86 FR 21050 (April 21, 2021) ("Proposed CAT Fee Plan Amendment").

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ Note that certain costs would be excluded from the Historical CAT Assessment Costs, as discussed in more detail below. See Proposed CAT Fee Plan Amendment at 21051 [sic], 21074 [sic].

⁸ Each Industry Member and Participant CAT Reporter would be required to pay CAT fees established via the CAT Funding Model. CAT Reporting Agents acting in their role as such would not have an obligation to pay CAT fees. See Proposed CAT Fee Plan Amendment at 21051 [sic].

⁹ Proposed CAT Fee Plan Amendment at 21054–55.

¹⁰ See also Sections 11.1(c), 11.2(c), and 11.3(a) and (b) of the CAT NMS Plan.

¹¹ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696, 84794 (Nov. 23, 2016) ("CAT NMS Plan Approval Order").

development and implementation of the CAT.¹²

Finally, as noted by the SEC, the CAT “substantially enhance[s] the ability of the SROs and the Commission to oversee today’s securities markets,”¹³ thereby benefitting all market participants. As such, both Participants and Industry Members should contribute to covering the cost of the CAT.

(B) 75%/25% Allocation Between Industry Members and Participants

The CAT NMS Plan as approved by the Commission provides the Operating Committee with discretion to establish CAT fees to be paid by Participants and Industry Members. The CAT Funding Model as set out in the Proposed CAT Fee Plan Amendment contemplates allocating CAT costs between Participants and Industry Members to permit the calculation of CAT fees based on market share for Participants and based on message traffic for Industry Members.¹⁴ Under the CAT Funding Model as proposed, Industry Members as a group would pay 75% of the Total CAT Costs (the “Industry Member Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).¹⁵ As discussed in more detail below, the Industry Member Allocation of 75% of the Total CAT Costs is included in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule for the Consolidated Audit Trail Funding Fees. In each such paragraph, the calculation of the Industry Member CAT fees is based on 75% of the Total CAT Costs.

(C) Message Traffic

The Industry Member Allocation would be allocated to each Industry Member based on message traffic.¹⁶ Each Industry Member CAT Reporter would pay a CAT fee that is calculated by multiplying each Industry Member’s percentage of the total message traffic of all Industry Members each quarter by

the Industry Member Allocation, subject to certain market making discounts, Minimum Industry Member CAT Fees, and Maximum Industry Member CAT Fees. To implement the use of message traffic in the calculation of Industry Member CAT fees, the Exchange proposes to describe the use of message traffic in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule. In each such paragraph, the Industry Member CAT fees are calculated based on Industry Members’ message traffic in the CAT.

As set out in the Proposed CAT Fee Plan Amendment,¹⁷ message traffic would be calculated based on Industry Members’ Reportable Events reported to the CAT as defined in the CAT Reporting Technical Specifications for Industry Members (“IM Reporting Tech Specs”) as amended from time to time.¹⁸ The Reportable Events may vary over time if the IM Reporting Tech Specs are amended.¹⁹ However, Reportable Events in the current IM Reporting Tech Specs that will be counted as message traffic include, but are not limited to, such events as the New Order Event, the Order Route Event and the Trade Event. In addition, message traffic will not include reporting activity related to Customer information as set forth in the CAT Reporting Customer and Account Technical Specifications for Industry Members.²⁰

(D) Market Maker Discounts

As set out in the Proposed CAT Fee Plan Amendment, the Operating Committee recognized that treating Options Market Maker message traffic and Equity Market Maker message

traffic in the same way as other message traffic for purposes of calculating Industry Member CAT fees may result in an undue or inappropriate burden on competition or may lead to a reduction in market quality.²¹ For example, charging Industry Members on the basis of message traffic may impact market makers disproportionately because of their continuous quoting obligations. Moreover, in the context of Options Market Makers, message traffic would include bids and offers for every Listed Options strikes and series. Accordingly, the Operating Committee determined to discount Options Market Maker message traffic by the trade-to-quote ratio for Listed Options when calculating message traffic for Options Market Makers, and to discount Equity Market Maker message traffic by the trade-to-quote ratio for NMS Stocks when calculating message traffic for Equity Market Makers. The message traffic of Options Market Makers and Equity Market Makers, as discounted, would be counted as part of the total message traffic for all Industry Members. The practical effect of applying such discounts for market making activity would be to lower the CAT fees for Options Market Makers and Equity Market Makers.

(I) Options Market Maker Discount

Each Industry Member that is an Options Market Maker²² would have a discount based on the options trade-to-quote ratio applied to its options market making message traffic when calculating that Industry Member’s message traffic to prevent a potentially disproportionate effect on options market making due to such message traffic.²³ Specifically, for each Options Market Maker, a discount would be applied to (1) all message traffic reported to the CAT by the Options Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered, regardless of where the order is ultimately routed or executed;²⁴ and (2) all message traffic

¹⁷ See Proposed CAT Fee Plan Amendment at 21056–57.

¹⁸ The CAT Reporting Technical Specifications for Industry Members are available at www.catnmsplan.com.

¹⁹ Due to the Phased Reporting approach, all Reportable Events will not be reported until all Industry Members are reporting all Reportable Events to the CAT. For example, Phase 2d CAT Reporting is scheduled for December 2021, and Small Industry Non-OATS Reporters are not required to report until December 2021. In addition, certain Reportable Events, such as simple options manual orders and OTC link messages, are not required to be reported until later in the Phased Reporting. For a detailed description of such Reportable Events, see CAT Reporting Technical Specifications for Industry Members (available at www.catnmsplan.com). For the Industry Member CAT reporting timeline, see, e.g., FINRA Rule 6895(c). CAT costs will be allocated based on the Reportable Events reported to the CAT in any relevant quarter, regardless of whether all Industry Members are reporting to the CAT or all Reportable Events are required to be reported to the CAT for a relevant quarter. See Proposed CAT Fee Plan Amendment at 27.

²⁰ The CAT Reporting Customer and Account Technical Specifications for Industry Members are available at www.catnmsplan.com.

²¹ See Proposed CAT Fee Plan Amendment at 21057–58.

²² Section 1.1 of the CAT NMS Plan; Nasdaq General 7 Section 1(ee) defines an “Options Market Maker” as “a broker-dealer registered with an exchange for the purpose of making markets in options contracts traded on the exchange.”

²³ See Proposed CAT Fee Plan Amendment at 21058.

²⁴ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Options Market Maker with an `accountHolderType = O`. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by an Industry Member that are associated with any other

¹² Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31329 (May 22, 2020) (“Financial Accountability Release”).

¹³ Securities Exchange Act Rel. No. 67457 (Jul. 18, 2012), 77 FR 45722, 45726 (Aug. 1, 2012).

¹⁴ See Proposed CAT Fee Plan Amendment at 21055–56 [sic]. Note that, in the funding model set forth in Article XI of the CAT NMS Plan (“Original Funding Model”), costs were allocated between Execution Venues and certain Industry Members, whereas the CAT Funding Model would allocate costs between Participants and Industry Members.

¹⁵ For additional discussions regarding the 75%-25% allocation, see Proposed CAT Fee Plan Amendment at 21056–58 [sic].

¹⁶ For additional discussions regarding the use of message traffic for calculating Industry Member CAT fees, see Proposed CAT Fee Plan Amendment at 21059 [sic].

for which a “quote sent time” is reported by an Options Exchange on behalf of the given Options Market Maker.

The relevant trade-to-quote ratio for the Options Market Maker discount would be calculated each quarter based on the prior quarter’s SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the securities information processors (“SIP”). As an example, the trade-to-quote ratio for Listed Options for the fourth quarter of 2020 was 0.01%.

Accordingly, each Options Market Maker’s discounted message traffic count would be calculated by multiplying its message traffic by the options trade-to-quote ratio. The Options Market Maker’s CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁵ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Options Market Maker discount, the Exchange proposes to add paragraph (g)(1) to the fee schedule. Paragraph (g)(1) would state that “[w]hen calculating the message traffic of an Industry Member that is an Options Market Maker, the Options Market Maker’s market making message traffic would be discounted by multiplying its Listed Options market making message traffic by the Listed Options trade-to-quote ratio.” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Options Market Maker message traffic for each of the four Industry Member CAT fees.

(II) Equity Market Maker Discount

Similarly, each Industry Member that is an equity market maker in NMS Stocks (“Equity Market Maker”) would have a discount based on the NMS Stock trade-to-quote ratio applied to its market making message traffic in NMS Stocks when calculating that Industry

Member’s message traffic to prevent a potentially disproportionate effect on market making in NMS Stocks.²⁶ Specifically, for each Equity Market Maker, a discount would be applied to all message traffic reported to the CAT by the Equity Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered,²⁷ regardless of where the order is ultimately routed or executed.²⁸

The relevant trade-to-quote ratio for the Equity Market Maker discount would be calculated each quarter based on the prior quarter’s SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the SIP. As an example, the trade-to-quote ratio for NMS Stocks for the fourth quarter of 2020 was 4.77%.

The Equity Market Maker CAT fee would be calculated in the same manner as the Options Market Maker CAT fee. Each Equity Market Maker’s discounted message traffic count would be calculated by multiplying its message traffic by the NMS Stock trade-to-quote ratio. The Equity Market Maker CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁹ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Equity Market Maker discount, the Exchanges proposes to add paragraph (g)(2) to the fee schedule. Paragraph (g)(2) would state that “[w]hen calculating the message traffic of an Industry Member that is an equity market maker in NMS Stocks (“Equity Market Maker”), the Equity

²⁶ See Proposed CAT Fee Plan Amendment at 21058.

²⁷ Note that Equity Market Makers do not have a quote sent time exemption comparable to the Options Market Maker quote sent time exemption, as discussed above.

²⁸ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Equity Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by the Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 21058.

²⁹ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Equity Market Makers. See Proposed CAT Fee Plan Amendment at 21058.

Market Maker’s market making message traffic would be a [sic] discounted by multiplying its market making message traffic in NMS Stocks by the NMS Stock trade-to-quote ratio.” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Equity Market Maker message traffic for each of the four Industry Member CAT fees.

(E) Minimum Industry Member CAT Fee

Each Industry Member would be required to pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic.³⁰ All Industry Members required to report to the CAT, including those that have not yet begun to report to the CAT due to the phased implementation schedule for the CAT, would be subject to the Minimum Industry Member CAT Fee. If any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage.³¹

To implement the Minimum Industry Member CAT Fee, the Exchange proposes to add paragraph (h) to the fee schedule. Proposed paragraph (h)(1) of the fee schedule would state that “[t]he Minimum Industry Member CAT Fee is \$125 per quarter.” Proposed paragraph (h)(2) of the fee schedule would state that “[i]f any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage (“Minimum Industry Member CAT Fee Re-Allocation”).” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule describes the

³⁰ For additional discussions regarding the Minimum Industry Member CAT Fee, see Proposed CAT Fee Plan Amendment at 21058–59.

³¹ Options Market Makers and Equity Market Makers will be required to pay the Minimum Industry Member CAT Fee if their quarterly CAT fee calculated with the market maker discounts is less than \$125 per quarter.

accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 21058.

²⁵ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Options Market Makers. See Proposed CAT Fee Plan Amendment at 21058.

Minimum Industry Member CAT Fee Re-Allocation for each of the four Industry Member CAT fees.

(F) Maximum Industry Member CAT Fee

An Industry Member's CAT fee also would be subject to a Maximum Industry Member CAT Fee.³² The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member's fee is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic.

To implement the Maximum Industry Member CAT Fee, the Exchange proposes to add proposed paragraph (f) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (f)(1) would state that "[t]he Maximum Industry Member CAT Fee for each quarter is 8% of the total CAT costs for the relevant quarter." In addition, proposed paragraph (f)(2) would state that

If an Industry Member's CAT Fee that is calculated pursuant to paragraph (a)(2), (b)(2), (c)(2), (d)(2), as applicable, without reference to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation, is greater than the Maximum Industry Member CAT Fee, then the Industry Member will be subject to the Maximum Industry Member CAT Fee. If any Industry Member is subject to the Maximum Industry Member CAT Fee, then any excess amount which the Industry Member otherwise would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members, including any Industry Member that is subject to the Maximum Industry Member CAT Fee or subject to the Minimum Industry Member CAT Fee in accordance with their message traffic percentage ("Maximum Industry Member CAT Fee Re-Allocation").

Furthermore, proposed paragraphs (a)(1), (b)(1), (c)(1) and (d)(1) would state that an Industry Member's CAT fee calculated pursuant to (a)(1), (b)(1), (c)(1) and (d)(1) would include any applicable Maximum Industry Member

CAT Fee Re-Allocation. Finally, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) would state that an Industry Member's CAT fee calculated pursuant to paragraph (a)(2), (b)(2), (c)(2) or (d)(2) is subject to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation.

(G) Total CAT Costs

As set out in the Proposed CAT Fee Plan Amendment, the Total CAT Costs for the year would be comprised of all fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during this period.³³

For purposes of the Historical CAT Assessment, the Total CAT Costs would be \$193,273,342, as set forth in the Proposed CAT Fee Plan Amendment. Accordingly, the quarterly CAT fee for the Historical CAT Assessment will be calculated based on costs of \$36,238,752, which is 1/4 of 75% of the Total CAT Costs. This amount is set forth in proposed paragraph (b)(2) of the fee schedule.

In addition, proposed paragraph (i) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule describes the Total CAT Costs to be used in calculating the Period 3 CAT Fee, the Period 4 CAT Fee and the Quarterly CAT Fees. Proposed paragraph (i)(1) of the fee schedule would state that "[t]he Period 3 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2021." Proposed paragraph (i)(2) of the fee schedule would state that "[t]he Period 4 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2022." Proposed paragraph (i)(3) of the fee schedule would state the following with regard to the Quarterly CAT Fees:

For purposes of the Quarterly CAT Fee, the budgeted Total CAT Costs for the relevant year shall be the total CAT costs set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan for the relevant year. The budgeted Total CAT Costs for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted budgeted costs for the CAT will be

used in calculating the remaining CAT fees for that year.

(2) Proposed CAT Fees

The Exchange proposes to charge its Industry Members fees related to CAT costs. To implement these CAT fees, the Exchange proposes to add a section entitled "Consolidated Audit Trail Funding Fees" to its fee schedule, and to describe the CAT fees in that section.

(A) Historical CAT Assessment (for Pre-Period 1, Period 1 and Period 2)

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee determined to charge Industry Members a historical assessment ("Historical CAT Assessment") to recover certain CAT costs incurred prior to January 1, 2021 ("Historical CAT Assessment Costs").³⁴ Specifically, as detailed in the Proposed CAT Fee Plan Amendment, the Historical CAT Assessment is intended to collect from Industry Members 75% of certain costs incurred through June 22, 2020, the effective date for the Financial Accountability Milestones,³⁵ certain costs from Period 1 of the Financial Accountability Milestones (which covered the period from June 22, 2020–July 31, 2020) and certain costs from Period 2 of the Financial Accountability Milestones (which covered the period from August 1, 2020–December 31, 2020). The Total CAT Costs, excluding Excluded Costs (as defined below) and certain costs related to the conclusion of the relationship with Theysys CAT, LLC is \$193,273,342. The Historical CAT Assessment is designed to recover 75% of these CAT costs. Accordingly, the Historical CAT Assessment Costs would be \$144,955,006.

Using the Historical CAT Assessment Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Historical CAT Assessment owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover the Historical CAT Assessment Costs over a period of four calendar quarters, commencing upon the SEC's approval of the Historical CAT Assessment. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic (subject to the market making discounts and the maximum fee). The message traffic fee

³² For additional discussions regarding the Maximum Industry Member CAT Fee, see Proposed CAT Fee Plan Amendment at 21058–59 [sic].

³³ See Proposed CAT Fee Plan Amendment at 21063.

³⁴ See Proposed CAT Fee Plan Amendment at 21064–65.

³⁵ See Section 11.6 of the CAT NMS Plan; and Financial Accountability Release.

would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by \$36,238,752, which is 1/4 of the Historical CAT Assessment Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation, and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Historical CAT Assessment in the first quarter after SEC approval of the Historical CAT Assessment, based on CAT Data from the quarter in which the SEC approved the CAT fees.

To implement the Historical CAT Assessment, the Exchange proposes to add proposed paragraph (b) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (b) would state that "each Industry Member shall pay an Historical CAT Assessment in the amount of the greater of the following each quarter for four quarters commencing upon approval of the Historical CAT Assessment by the SEC: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2)

the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by \$36,238,752 (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

In accordance with Section 11.6(b) of the CAT NMS Plan and as provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 1. Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. As indicated by the Participants' Quarterly Progress Report,³⁶ Initial Industry Member Core Equity and Option Reporting was completed on schedule by July 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the

CAT during the period from June 22, 2020 through July 31, 2020.

As provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 2. Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. As indicated by the Participants' Quarterly Progress Report,³⁷ Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. Accordingly, proposed paragraph (b) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Historical CAT Assessment "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Historical CAT Assessment:

Quarterly CAT Fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	\$36,238,752	Quarter of SEC approval of Historical CAT Assessment.	1st quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #2	36,238,752	1st quarter after SEC approval of Historical CAT Assessment.	2nd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #3	36,238,752	2nd quarter after SEC approval of Historical CAT Assessment.	3rd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #4	36,238,752	3rd quarter after SEC approval of Historical CAT Assessment.	4th quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

(B) Period 3 CAT Fee

Per the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2021 through December 31, 2021, referred to as the Period 3 CAT Fee.³⁸ The Total CAT Costs incurred from January 1, 2021 through December 31, 2021 ("Period 3

CAT Costs") will be calculated at the completion of 2021. Specifically, the Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

Using the Period 3 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 3 CAT Fee owed by each Industry Member in accordance with the CAT Funding

Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 3 CAT Costs over a period of four calendar quarters, commencing in 2022. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry

³⁶ Q3 2020 Quarterly Progress Report (Oct. 30, 2020) (available at www.catnmsplan.com).

³⁷ Q4 2020 Quarterly Progress Report (Jan. 29, 2021) (available at www.catnmsplan.com).

³⁸ See Proposed CAT Fee Plan Amendment at 21065–66.

Member message by 1/4 of 75% of the Period 3 CAT Costs traffic (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Period 3 CAT Fee in the second quarter of 2022, based on CAT Data from the first quarter of 2022.

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2021 the Total CAT Costs for 2021 to be used in calculating the quarterly Period 3 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. Such financial statements are required to be prepared in accordance with Section 9.2 of the CAT NMS Plan, including requirements related to compliance with GAAP, auditing by an independent public accounting firm and making the statements publicly available.

To implement the Period 3 CAT Fee, the Exchange proposes to add proposed paragraph (c) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (c) would state that "each Industry Member shall pay a Period 3 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2022: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4 of 75% of the Period 3 Total CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

Per the Proposed CAT Fee Plan Amendment, the proposed Period 3 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 3. Period 3

began on January 1, 2021 and is expected to conclude on December 31, 2021, the date of Full Availability and Regulatory Utilization of Transaction Database Functionality. As discussed above, the Period 3 CAT Costs to be recovered via the Period 3 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2020 through December 31, 2021. The collection of the full amount of the Period 3 CAT Fee will depend upon achievement of Full Availability and Regulatory Utilization of Transaction Database Functionality by December 31, 2021; if not, the amount of the Period 3 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (c) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 3 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Period 3 CAT Fee:

Quarterly CAT Fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4 of 75% of the Period 3 CAT Costs ³⁹	CAT Data from first quarter of 2022	2nd quarter of 2022.
Quarterly CAT Fee #2	1/4 of 75% of the Period 3 CAT Costs	CAT Data from second quarter of 2022	3rd quarter of 2022.
Quarterly CAT Fee #3	1/4 of 75% of the Period 3 CAT Costs	CAT Data from third quarter of 2022	4th quarter of 2022.
Quarterly CAT Fee #4	1/4 of 75% of the Period 3 CAT Costs	CAT Data from fourth quarter of 2022	1st quarter of 2023.

(C) Period 4 CAT Fee

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2022 through December 30, 2022, referred to as the Period 4 CAT Fee.⁴⁰ The Total CAT Costs incurred from January 1, 2022 through December 30, 2022 ("Period 4 CAT Costs") will be calculated at the completion of 2022. Specifically, the Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

Using the Period 4 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 4 CAT Fee

owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 4 CAT Costs over a period of four calendar quarters, commencing in 2023. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by 1/4 of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members will be required to

commence paying the Period 4 CAT Fee in the second quarter of 2023, based on data from the first quarter of 2023.

To implement the Period 4 CAT Fee, the Exchange proposes to add proposed paragraph (d) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (d) would state that "each Industry Member shall pay a Period 4 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4 of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the

³⁹ The Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements of the Company.

⁴⁰ See Proposed CAT Fee Plan Amendment at 21066–67.

Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2022 the Total CAT Costs for 2022 to be used in calculating the quarterly Period 4 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. As noted above, such financial statements are required to be prepared in accordance with the requirements set forth in Section 9.2 of the CAT NMS Plan.

The Exchange indicates that the proposed Period 4 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 4. Period 4 is expected to begin on January 1, 2022 and conclude on December 30, 2022, the date of Full Implementation of CAT NMS Plan Requirements. As discussed above, the Period 4 CAT Costs to be recovered via the Period 4 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2022 through December 30, 2022. The collection of the full amount of the Period 4 CAT Fee will

depend upon achievement of Full Implementation of CAT NMS Plan Requirements by December 30, 2022; if not, the amount of the Period 4 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (e) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 4 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Period 4 CAT Fee:

Quarterly CAT Fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4 of 75% of the Period 4 CAT Costs ⁴¹ .	CAT Data from first quarter of 2023 ...	2nd quarter of 2023.
Quarterly CAT Fee #2	1/4 of 75% of the Period 4 CAT Costs	CAT Data from second quarter of 2023.	3rd quarter of 2023.
Quarterly CAT Fee #3	1/4 of 75% of the Period 4 CAT Costs	CAT Data from third quarter of 2023 ..	4th quarter of 2023.
Quarterly CAT Fee #4	1/4 of 75% of the Period 4 CAT Costs	CAT Data from fourth quarter of 2023	1st quarter of 2024.

(D) Quarterly CAT Fee—Beginning 2023

As provided in the Proposed CAT Fee Plan Amendment, to recover the costs of the CAT going forward beginning in 2023, the Operating Committee determined to charge Industry Members an ongoing quarterly CAT fee calculated based on the allocation of Total CAT Costs pursuant to the CAT Funding Model ("Quarterly CAT Fee").⁴² The Operating Committee will use the costs set forth in the annual operating budget as the Total CAT Costs in the calculation of the Quarterly CAT Fee. Specifically, the Total CAT Costs budgeted for the upcoming year for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. Using these estimated Total CAT Costs, the Operating Committee will calculate the Quarterly CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. As provided in the Proposed CAT Fee Plan Amendment, the Operating Committee proposes to seek to recover the budgeted Total CAT Costs over the course of the year. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic.⁴³ The message traffic fee

would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by 1/4 of 75% of the budgeted Total CAT Costs for the year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using data from the prior calendar quarter. The Exchange proposes to commence charging this CAT fee in the second quarter of 2023, based on CAT Data from the first quarter of 2023.

To implement the Quarterly CAT Fee, the Exchange proposes to add proposed paragraph (a) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (a)

would state that "[e]ach Industry Member shall pay a Quarterly CAT Fee in the amount of the greater of the following each quarter commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4 of 75% of the budgeted Total CAT Costs for the relevant year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands the Operating Committee will announce at the beginning of the relevant year via a CAT alert the budgeted Total CAT Costs to be used in calculating the Quarterly CAT Fees for that year. The budgeted Total CAT Costs will be the costs set forth in the annual operating budget for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. As discussed above, CAT costs would include, but not be limited to, Plan Processor costs, insurance costs, third-party support costs and an operational reserve. As required by Section 11.1(c) of the CAT NMS Plan, any surpluses

⁴¹ The Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements for the Company.

⁴² See Proposed CAT Fee Plan Amendment at 21067–68.

⁴³ To the extent that any two or more of the four categories of Industry Member CAT fees (*i.e.*, the

Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and the Quarterly CAT Fee) are due during the same quarter, any Industry Member obligated to pay one or more categories of fees is required to pay each category of fee for that quarter. For example, if an Industry Member would be subject to the Minimum Industry Member CAT Fee for the Period 4 CAT Fee and the Minimum Industry Member CAT Fee for the Quarterly CAT Fee during the same quarter, the Industry Member would be required to pay two minimum \$125 fees that quarter for a total of \$250. As another example, suppose that an Industry Member owed a CAT fee (other than the minimum fee of \$125) for both the Historical CAT Assessment and the Period 3 CAT Fee, the Industry Member would be required to pay both fees that quarter. See Proposed CAT Fee Plan Amendment at 21067.

collected will be treated as an operational reserve to offset future fees and will not be distributed to the Participants as profits.⁴⁴ In addition, to address potential changes in the budget during the year, the total budgeted costs for the CAT for the relevant year may be adjusted on a quarterly basis as the

Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted total budgeted costs for the CAT will be used in calculating

the remaining quarterly CAT fees for that year.

The following chart summarizes the imposition of the Quarterly CAT Fee each year commencing in 2023 and continuing each year thereafter:

Quarterly CAT Fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4 of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from first quarter of the relevant year.	2nd quarter of the relevant year.
Quarterly CAT Fee #2	1/4 of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from second quarter of the relevant year.	3rd quarter of the relevant year.
Quarterly CAT Fee #3	1/4 of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from third quarter of the relevant year.	4th quarter of the relevant year.
Quarterly CAT Fee #4	1/4 of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from fourth quarter of the relevant year.	1st quarter of year following the relevant year.

(3) Time and Manner of Payment

The Exchange proposes to add paragraph (e) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule to describe the time and manner of the payment of the Industry Member CAT fees as provided in the Proposed CAT Fee Plan Amendment.⁴⁵ Proposed paragraph (e)(1) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with an invoice setting forth the Industry Member’s Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and/or Quarterly CAT Fee (as applicable) (collectively, “CAT Fees”) for each payment period.” Proposed paragraph (e)(2) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with one invoice each payment period for its CAT Fees as determined pursuant to paragraph (a)–(d) above, regardless of whether the Industry Member is a member of multiple self-regulatory organizations.” Proposed paragraph (e)(3) would state that “[e]ach Industry Member will pay its CAT Fees to the Consolidated Audit Trail, LLC via the centralized system for the collection of CAT Fees established by the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” Finally, proposed paragraph (e)(4) would require that Industry Members pay their CAT Fees within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated).

If an Industry Member fails to pay any such fee when due, such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.⁴⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act⁴⁷, which requires, among other things, that the Exchange’s rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,⁴⁸ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act⁴⁹ which requires that the Exchange’s rules not impose any burden on competition that is not necessary or

appropriate in furtherance of the purpose of the Exchange Act.

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this proposed rule change to implement the Industry Member CAT fees included in the CAT Funding Model approved by the Operating Committee. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”⁵⁰ To the extent that this proposal implements the Plan, and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

The Exchange further notes that, as provided in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed Industry

⁴⁴ CAT NMS Plan Approval Order at 84792.

⁴⁵ See Proposed CAT Fee Plan Amendment at 21068.

⁴⁶ CAT Reporters will be responsible for each quarterly fee in which they are a CAT Reporter. If

a CAT Reporter ceases to meet the definition of a CAT Reporter during a quarter, the CAT Reporter will still be responsible for CAT fees attributable to its message traffic (or, the minimum fee in the alternative) during that quarter. See Proposed CAT Fee Plan Amendment at 21068.

⁴⁷ 15 U.S.C. 78f(b)(6).

⁴⁸ 15 U.S.C. 78f(b)(4).

⁴⁹ 15 U.S.C. 78f(b)(8).

⁵⁰ CAT NMS Plan Approval Order at 84696.

Member CAT fees comply with the requirements of the Exchange Act and the CAT NMS Plan.⁵¹ The Operating Committee determined that the Industry Member CAT fees provide for the “equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities necessary or appropriate in furtherance of the purposes of this chapter,”⁵² as required by the Exchange Act. The Operating Committee determined that the CAT fees equitably allocate CAT costs between Participants and Industry Members, and among Industry Members, as discussed in detailed [sic] above. For the reasons discussed above, the Operating Committee determined that the 75%–25% allocation between Industry Members and Participants in the CAT Funding Model as well as the use of message traffic for allocating costs among Industry Members provide for an equitable allocation of CAT costs among CAT Reporters. In addition, as discussed above, the Operating Committee determined that the imposition of minimum and maximum fees and market maker discounts would operate to provide for an equitable allocation of CAT costs among Industry Members.

As further provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined that the CAT Funding Model is “not designed to permit unfair discrimination between customers, issuers, brokers, or dealers,”⁵³ as required by the Exchange Act, as the CAT Funding Model does not unfairly discriminate between Industry Members and Participants, or among Industry Members. In making this determination, the Operating Committee noted that all Industry Members are grouped together for the purpose of determining CAT fees, and Industry Members with similar levels of activity would pay similar fees. For example, Industry Members with higher levels of message traffic would pay higher fees, and those with lower levels of message traffic would pay lower fees. With the elimination of tiers in the Original Funding Model, fees for Industry Members are directly related to their message traffic. With tiers, the relationship between message traffic and the CAT fee would not have been as direct.

In addition, as discussed in the Proposed CAT Fee Plan Amendment,

where the method of fee calculation may potentially affect certain groups of CAT Reporters adversely, the Operating Committee sought to limit such adverse effects. For example, the Operating Committee proposed market maker discounts to address the high levels of message traffic generally exhibited by market makers. As discussed above, the SEC has recognized repeatedly that such favorable treatment for market makers in other contexts was not unfairly discriminatory or a burden on competition in light of its positive effects on market quality, nor was it considered to involve an inequitable allocation of fees among members.

As also provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also proposed the Maximum Industry Member CAT Fee to address the potential for significant fees based on outsized message traffic for certain Industry Members. The Maximum Industry Member CAT Fee would serve as a method to institute a cap on fees to fairly allocate costs to Industry Members. Such a fee would prevent Industry Members from paying significantly larger CAT fees than Participant complexes.

The Proposed CAT Fee Plan Amendment notes that Operating Committee also determined that the proposed Industry Member CAT fees would promote just and equitable principles of trade, and, in general, protect investors and the public interest, as the fees would be transparent and relate specifically to CAT activity. The Operating Committee also determined that the proposed fees were reasonable because they would provide ease of calculation, ease of billing and other administrative functions. Such factors are crucial to estimating a reliable revenue stream for the Company.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act⁵⁴ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change implements provisions of the CAT NMS Plan that are subject to approval by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan. The Exchange also

notes that the proposed rule changes will apply equally to all Industry Members, including its Nasdaq members. In addition, all national securities exchanges and FINRA are proposing a similar proposed fee change to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the exchanges and FINRA.

Moreover, the Exchange notes that, as discussed in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed fees do not impose an unnecessary or inappropriate burden on competition as they fairly and equitably allocate costs among CAT Reporters.⁵⁵ The Operating Committee determined that the cost allocation between Participants and Industry Members recognizes the greater number of Industry Members as compared to the Participants and the greater collective revenue of Industry Members as compared to Participants. In addition, cost allocations among Industry Members based on message traffic fairly and equitably distribute CAT costs. Furthermore, the market maker discounts and the Maximum Industry Member CAT Fee address the potential for burdens on market makers and Industry Members with outsized message traffic potentially resulting from the proposed fee calculations. Moreover, the Operating Committee determined that the Minimum Industry Member CAT Fee would not act as a barrier to entry for smaller Industry Member CAT Reporters.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.⁵⁶

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act.

⁵¹ See Proposed CAT Fee Plan Amendment at 21068–70.

⁵² Sections 6(b)(4) and 15A(b)(5) of the Exchange Act.

⁵³ Sections 6(b)(5) and 15A(b)(6) of the Exchange Act.

⁵⁴ 15 U.S.C. 78f(b)(8).

⁵⁵ See Proposed CAT Fee Plan Amendment at 21070.

⁵⁶ 15 U.S.C. 78s(b)(3)(A)(ii).

If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2021-029 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-NASDAQ-2021-029. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NASDAQ-2021-029 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁷

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2021-09779 Filed 5-7-21; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91762; File No. SR-CboeBZX-2021-034]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a Fee Schedule To Establish Fees for Industry Members Related to the National Market System Plan Governing the Consolidated Audit Trail

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 21, 2021, Cboe BZX Exchange, Inc. ("Exchange" or "BZX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the "Exchange" or "Cboe BZX") proposes to adopt a fee schedule to establish fees for Industry Members related to the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan").³ The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

⁵⁷ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT Compliance Rule. See Rules 4.5 through 4.17 of the Exchange's Rulebook. The Exchange and each of its affiliated exchanges (Cboe BYX Exchange, Inc., Cboe C2 Exchange, Inc., Cboe Exchange, Inc., Cboe EDGA Exchange, Inc., and Cboe EDGX Exchange, Inc.) are filing to adopt the CAT fee schedule.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under the CAT NMS Plan, the Operating Committee of the Consolidated Audit Trail, LLC ("Company") ("Operating Committee") has discretion to establish funding for the Company to operate the CAT, including establishing fees that the Participants will pay, and establishing fees for Industry Members that will be implemented by the Participants.⁴ The Operating Committee has filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposal to amend the CAT NMS Plan to implement a revised funding model for the CAT ("CAT Funding Model") and to establish a fee schedule for Participant CAT fees ("Proposed CAT Fee Plan Amendment").⁵ The Proposed CAT Fee Plan Amendment describes the CAT Funding Model in detail, including the proposal to charge Industry Members CAT fees. The Participants are required to file with the SEC under Section 19(b) of the Exchange Act any CAT fees applicable to Industry Members that the Operating Committee approves.⁶ Accordingly, the purpose of this proposed rule change is to implement the required fee schedule provisions for CAT fees applicable to Industry Members that are Members in accordance with the CAT Funding Model. The fee schedule provisions will become operative upon the SEC's approval of the Proposed CAT Fee Plan Amendment.

(1) CAT Funding Model

Under the CAT Funding Model set out in the Proposed CAT Fee Plan

⁴ Section 11.1(b) of the CAT NMS Plan.

⁵ See Securities Exchange Act Rel. No. 91555 (Apr. 14, 2021), 86 FR 21050 (April 21, 2021).

⁶ Section 11.1(b) of the CAT NMS Plan.

Amendment, the CAT fees applicable to Participants and Industry Members for the relevant quarter would be designed to cover the total CAT costs associated with developing, implementing and operating the CAT for the relevant quarter (“Total CAT Costs”).⁷ The CAT Funding Model would implement a bifurcated funding model, where these costs would be borne by both Participants and Industry Members. Industry Members as a group would pay 75% of the Total CAT Costs (the “Industry Member Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).⁸

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, each Industry Member will pay a CAT fee that is calculated by multiplying each Industry Member’s message traffic percentage of the total message traffic of all Industry Members during the relevant time period by the Industry Member Allocation, subject to certain market maker message traffic discounts, a Minimum Industry Member CAT Fee and a Maximum Industry Member CAT Fee. Each Industry Member that is an Options Market Maker will have a discount based on the options trade-to-quote ratio applied to its Options Market Maker message traffic when calculating that Industry Member’s message traffic, and each Industry Member that is an Equity Market Maker will have a discount based on the NMS Stock trade-to-quote ratio applied to its Equity Market Maker message traffic when calculating that Industry Member’s message traffic. In addition, each Industry Member will pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic. Furthermore, an Industry Member’s CAT fee would be subject to the Maximum Industry Member CAT Fee. The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee

will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member’s percentage of total message traffic. Each of these aspects of the Industry Member CAT fee are discussed in more detail below.

(A) CAT Fees for Both Industry Members and Participants

Under the CAT Funding Model, both Participants and Industry Members would contribute to the funding of the CAT by paying a CAT fee.⁹ As permitted by Rule 613, the CAT NMS Plan requires Industry Members to pay a CAT fee. Rule 613(a)(1)(vii)(D) contemplates Industry Members contributing to the payment of CAT costs. Specifically, this provision requires the CAT NMS Plan to address “[h]ow the plan sponsors propose to fund the creation, implementation, and maintenance of the consolidated audit trail, including the proposed allocation of such estimated costs among the plan sponsors, and between the plan sponsors and members of the plan sponsors.”

In addition, as approved by the SEC, the CAT NMS Plan specifically contemplates CAT fees to be paid by both Industry Members and Participants. Section 11.1(b) states that “the Operating Committee shall have discretion to establish funding for the Company, including: (i) Establishing fees that the Participants shall pay; and (ii) establishing fees for Industry Members that shall be implemented by the Participants.”¹⁰ The Commission stated in approving the CAT NMS Plan the following:

The Commission believes that the proposed funding model reflects a reasonable exercise of the Participants’ funding authority to recover the Participants’ costs related to the CAT. The CAT is a regulatory facility jointly owned by the Participants and, as noted above, the Exchange Act specifically permits the Participants to charge members fees to fund their self-regulatory obligations. The Commission further believes that the proposed funding model is designed to impose fees reasonably related to the Participants’ self-regulatory obligations because the fees would be directly associated with the costs of establishing and maintaining the CAT, and not unrelated SRO services.¹¹

In its recent amendments to the CAT NMS Plan, the SEC reaffirmed the ability for the Participants to charge Industry Members a CAT fee. Specifically, the SEC noted that the amendments were not intended to change the basic funding structure for the CAT, which may include fees established by the Operating Committee, and implemented by the Participants, to recover from Industry Members the costs and expenses incurred by the Participants in connection with the development and implementation of the CAT.¹²

Finally, as noted by the SEC, the CAT “substantially enhance[s] the ability of the SROs and the Commission to oversee today’s securities markets,”¹³ thereby benefitting all market participants. As such, both Participants and Industry Members should contribute to covering the cost of the CAT.

(B) 75%/25% Allocation Between Industry Members and Participants

The CAT NMS Plan as approved by the Commission provides the Operating Committee with discretion to establish CAT fees to be paid by Participants and Industry Members. The CAT Funding Model as set out in the Proposed CAT Fee Plan Amendment contemplates allocating CAT costs between Participants and Industry Members to permit the calculation of CAT fees based on market share for Participants and based on message traffic for Industry Members.¹⁴ Under the CAT Funding Model as proposed, Industry Members as a group would pay 75% of the Total CAT Costs (the “Industry Member Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).¹⁵ As discussed in more detail below, the Industry Member Allocation of 75% of the Total CAT Costs is included in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule for the Consolidated Audit Trail Funding Fees. In each such paragraph, the calculation

¹² Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31329 (May 22, 2020) (“Financial Accountability Release”).

¹³ Securities Exchange Act Rel. No. 67457 (Jul. 18, 2012), 77 FR 45722, 45726 (Aug. 1, 2012).

¹⁴ See Proposed CAT Fee Plan Amendment at 12–16. Note that, in the funding model set forth in Article XI of the CAT NMS Plan (“Original Funding Model”), costs were allocated between Execution Venues and certain Industry Members, whereas the CAT Funding Model would allocate costs between Participants and Industry Members.

¹⁵ For additional discussions regarding the 75%–25% allocation, see Proposed CAT Fee Plan Amendment at 16–20.

⁷ Note that certain costs would be excluded from the Historical CAT Assessment Costs, as discussed in more detail below. See Proposed CAT Fee Plan Amendment at 4, 56–57.

⁸ Each Industry Member and Participant CAT Reporter would be required to pay CAT fees established via the CAT Funding Model. CAT Reporting Agents acting in their role as such would not have an obligation to pay CAT fees. See Proposed CAT Fee Plan Amendment at 4.

⁹ Proposed CAT Fee Plan Amendment at 10–11.

¹⁰ See also Sections 11.1(c), 11.2(c), and 11.3(a) and (b) of the CAT NMS Plan.

¹¹ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696, 84794 (Nov. 23, 2016) (“CAT NMS Plan Approval Order”).

of the Industry Member CAT fees is based on 75% of the Total CAT Costs.

(C) Message Traffic

The Industry Member Allocation would be allocated to each Industry Member based on message traffic.¹⁶ Each Industry Member CAT Reporter would pay a CAT fee that is calculated by multiplying each Industry Member's percentage of the total message traffic of all Industry Members each quarter by the Industry Member Allocation, subject to certain market making discounts, Minimum Industry Member CAT Fees, and Maximum Industry Member CAT Fees. To implement the use of message traffic in the calculation of Industry Member CAT fees, the Exchange proposes to describe the use of message traffic in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule. In each such paragraph, the Industry Member CAT fees are calculated based on Industry Members' message traffic in the CAT.

As set out in the Proposed CAT Fee Plan Amendment,¹⁷ message traffic would be calculated based on Industry Members' Reportable Events reported to the CAT as defined in the CAT Reporting Technical Specifications for Industry Members ("IM Reporting Tech Specs") as amended from time to time.¹⁸ The Reportable Events may vary over time if the IM Reporting Tech Specs are amended.¹⁹ However, Reportable Events in the current IM Reporting Tech Specs that will be counted as message traffic include, but are not limited to, such events as the New Order Event, the Order Route Event and the Trade Event. In addition, message traffic will not

include reporting activity related to Customer information as set forth in the CAT Reporting Customer and Account Technical Specifications for Industry Members.²⁰

(D) Market Maker Discounts

As set out in the Proposed CAT Fee Plan Amendment, the Operating Committee recognized that treating Options Market Maker message traffic and Equity Market Maker message traffic in the same way as other message traffic for purposes of calculating Industry Member CAT fees may result in an undue or inappropriate burden on competition or may lead to a reduction in market quality.²¹ For example, charging Industry Members on the basis of message traffic may impact market makers disproportionately because of their continuous quoting obligations. Moreover, in the context of Options Market Makers, message traffic would include bids and offers for every Listed Options strikes and series. Accordingly, the Operating Committee determined to discount Options Market Maker message traffic by the trade-to-quote ratio for Listed Options when calculating message traffic for Options Market Makers, and to discount Equity Market Maker message traffic by the trade-to-quote ratio for NMS Stocks when calculating message traffic for Equity Market Makers. The message traffic of Options Market Makers and Equity Market Makers, as discounted, would be counted as part of the total message traffic for all Industry Members. The practical effect of applying such discounts for market making activity would be to lower the CAT fees for Options Market Makers and Equity Market Makers.

(I) Options Market Maker Discount

Each Industry Member that is an Options Market Maker²² would have a discount based on the options trade-to-quote ratio applied to its options market making message traffic when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on options market making due to such message traffic.²³ Specifically, for each Options Market Maker, a discount would be applied to (1) all message

traffic reported to the CAT by the Options Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered, regardless of where the order is ultimately routed or executed;²⁴ and (2) all message traffic for which a "quote sent time" is reported by an Options Exchange on behalf of the given Options Market Maker.

The relevant trade-to-quote ratio for the Options Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the securities information processors ("SIP"). As an example, the trade-to-quote ratio for Listed Options for the fourth quarter of 2020 was 0.01%.

Accordingly, each Options Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the options trade-to-quote ratio. The Options Market Maker's CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁵ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Options Market Maker discount, the Exchange proposes to add paragraph (g)(1) to the fee schedule. Paragraph (g)(1) would state that "[w]hen calculating the message traffic of an Industry Member that is an Options Market Maker, the Options Market Maker's market making message traffic would be discounted by multiplying its Listed Options market making message traffic by the Listed Options trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message

¹⁶ For additional discussions regarding the use of message traffic for calculating Industry Member CAT fees, see Proposed CAT Fee Plan Amendment at 21–22.

¹⁷ See Proposed CAT Fee Plan Amendment at 26–27.

¹⁸ The CAT Reporting Technical Specifications for Industry Members are available at www.catnmsplan.com.

¹⁹ Due to the Phased Reporting approach, all Reportable Events will not be reported until all Industry Members are reporting all Reportable Events to the CAT. For example, Phase 2d CAT Reporting is scheduled for December 2021, and Small Industry Non-OATS Reporters are not required to report until December 2021. In addition, certain Reportable Events, such as simple options manual orders and OTC link messages, are not required to be reported until later in the Phased Reporting. For a detailed description of such Reportable Events, see CAT Reporting Technical Specifications for Industry Members (available at www.catnmsplan.com). For the Industry Member CAT reporting timeline, see, e.g., FINRA Rule 6895(c). CAT costs will be allocated based on the Reportable Events reported to the CAT in any relevant quarter, regardless of whether all Industry Members are reporting to the CAT or all Reportable Events are required to be reported to the CAT for a relevant quarter. See Proposed CAT Fee Plan Amendment at 27.

²⁰ The CAT Reporting Customer and Account Technical Specifications for Industry Members are available at www.catnmsplan.com.

²¹ See Proposed CAT Fee Plan Amendment at 27–30.

²² Section 1.1 of the CAT NMS Plan. Rule 4.5(ee) defines an "Options Market Maker" as "a broker-dealer registered with an exchange for the purpose of making markets in options contracts traded on the exchange."

²³ See Proposed CAT Fee Plan Amendment at 30–32.

²⁴ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Options Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by an Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 31.

²⁵ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Options Market Makers. See Proposed CAT Fee Plan Amendment at 32.

traffic calculation would be subject to applicable discounts for Options Market Maker message traffic for each of the four Industry Member CAT fees.

(II) Equity Market Maker Discount

Similarly, each Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker") would have a discount based on the NMS Stock trade-to-quote ratio applied to its market making message traffic in NMS Stocks when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on market making in NMS Stocks.²⁶ Specifically, for each Equity Market Maker, a discount would be applied to all message traffic reported to the CAT by the Equity Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered,²⁷ regardless of where the order is ultimately routed or executed.²⁸

The relevant trade-to-quote ratio for the Equity Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the SIP. As an example, the trade-to-quote ratio for NMS Stocks for the fourth quarter of 2020 was 4.77%.

The Equity Market Maker CAT fee would be calculated in the same manner as the Options Market Maker CAT fee. Each Equity Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the NMS Stock trade-to-quote ratio. The Equity Market Maker CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁹ by the Industry Member

Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Equity Market Maker discount, the Exchanges proposes to add paragraph (g)(2) to the fee schedule. Paragraph (g)(2) would state that "[w]hen calculating the message traffic of an Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker"), the Equity Market Maker's market making message traffic would be a [sic] discounted by multiplying its market making message traffic in NMS Stocks by the NMS Stock trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Equity Market Maker message traffic for each of the four Industry Member CAT fees.

(E) Minimum Industry Member CAT Fee

Each Industry Member would be required to pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic.³⁰ All Industry Members required to report to the CAT, including those that have not yet begun to report to the CAT due to the phased implementation schedule for the CAT, would be subject to the Minimum Industry Member CAT Fee. If any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage.³¹

To implement the Minimum Industry Member CAT Fee, the Exchange proposes to add paragraph (h) to the fee schedule. Proposed paragraph (h)(1) of the fee schedule would state that "[t]he Minimum Industry Member CAT Fee is \$125 per quarter." Proposed paragraph (h)(2) of the fee schedule would state that "[i]f any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional

will be calculated using the discounted total for all Equity Market Makers. See Proposed CAT Fee Plan Amendment at 33.

³⁰ For additional discussions regarding the Minimum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 33–35.

³¹ Options Market Makers and Equity Market Makers will be required to pay the Minimum Industry Member CAT Fee if their quarterly CAT fee calculated with the market maker discounts is less than \$125 per quarter.

amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage ("Minimum Industry Member CAT Fee Re-Allocation"). In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule describes the Minimum Industry Member CAT Fee Re-Allocation for each of the four Industry Member CAT fees.

(F) Maximum Industry Member CAT Fee

An Industry Member's CAT fee also would be subject to a Maximum Industry Member CAT Fee.³² The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member's fee is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic.

To implement the Maximum Industry Member CAT Fee, the Exchange proposes to add proposed paragraph (f) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (f)(1) would state that "[t]he Maximum Industry Member CAT Fee for each quarter is 8% of the total CAT costs for the relevant quarter." In addition, proposed paragraph (f)(2) would state that:

If an Industry Member's CAT Fee that is calculated pursuant to paragraph (a)(2), (b)(2), (c)(2), (d)(2), as applicable, without reference to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation, is greater than the Maximum Industry Member CAT Fee, then the Industry Member will be subject to the Maximum Industry Member CAT Fee. If any Industry Member is subject to the Maximum Industry Member CAT Fee, then any excess amount which the Industry Member otherwise would have paid as a fee above such Maximum Industry Member CAT Fee

³² For additional discussions regarding the Maximum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 35–37.

²⁶ See Proposed CAT Fee Plan Amendment at 32–33.

²⁷ Note that Equity Market Makers do not have a quote sent time exemption comparable to the Options Market Maker quote sent time exemption, as discussed above.

²⁸ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Equity Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by the Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 32.

²⁹ Note that the total message traffic of all Industry Members during the relevant time period

will be re-allocated among all Industry Members, including any Industry Member that is subject to the Maximum Industry Member CAT Fee or subject to the Minimum Industry Member CAT Fee in accordance with their message traffic percentage ("Maximum Industry Member CAT Fee Re-Allocation").

Furthermore, proposed paragraphs (a)(1), (b)(1), (c)(1) and (d)(1) would state that an Industry Member's CAT fee calculated pursuant to (a)(1), (b)(1), (c)(1) and (d)(1) would include any applicable Maximum Industry Member CAT Fee Re-Allocation. Finally, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) would state that an Industry Member's CAT fee calculated pursuant to paragraph (a)(2), (b)(2), (c)(2) or (d)(2) is subject to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation.

(G) Total CAT Costs

As set out in the Proposed CAT Fee Plan Amendment, the Total CAT Costs for the year would be comprised of all fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during this period.³³

For purposes of the Historical CAT Assessment, the Total CAT Costs would be \$193,273,342, as set forth in the Proposed CAT Fee Plan Amendment. Accordingly, the quarterly CAT fee for the Historical CAT Assessment will be calculated based on costs of \$36,238,752, which is 1/4th of 75% of the Total CAT Costs. This amount is set forth in proposed paragraph (b)(2) of the fee schedule.

In addition, proposed paragraph (i) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule describes the Total CAT Costs to be used in calculating the Period 3 CAT Fee, the Period 4 CAT Fee and the Quarterly CAT Fees. Proposed paragraph (i)(1) of the fee schedule would state that "[t]he Period 3 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2021." Proposed paragraph (i)(2) of the fee schedule would state that "[t]he Period 4 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2022." Proposed paragraph (i)(3) of the fee schedule would state the following with regard to the Quarterly CAT Fees:

For purposes of the Quarterly CAT Fee, the budgeted Total CAT Costs for the relevant year shall be the total CAT costs set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan for the relevant year. The budgeted Total CAT Costs for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted budgeted costs for the CAT will be used in calculating the remaining CAT fees for that year.

(2) Proposed CAT Fees

The Exchange proposes to charge its Industry Members fees related to CAT costs. To implement these CAT fees, the Exchange proposes to add a section entitled "Consolidated Audit Trail Funding Fees" to its fee schedule, and to describe the CAT fees in that section.

(A) Historical CAT Assessment (for Pre-Period 1, Period 1 and Period 2)

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee determined to charge Industry Members a historical assessment ("Historical CAT Assessment") to recover certain CAT costs incurred prior to January 1, 2021 ("Historical CAT Assessment Costs").³⁴ Specifically, as detailed in the Proposed CAT Fee Plan Amendment, the Historical CAT Assessment is intended to collect from Industry Members 75% of certain costs incurred through June 22, 2020, the effective date for the Financial Accountability Milestones,³⁵ certain costs from Period 1 of the Financial Accountability Milestones (which covered the period from June 22, 2020–July 31, 2020) and certain costs from Period 2 of the Financial Accountability Milestones (which covered the period from August 1, 2020–December 31, 2020). The Total CAT Costs, excluding Excluded Costs (as defined below) and certain costs related to the conclusion of the relationship with Thesys CAT, LLC is \$193,273,342. The Historical CAT Assessment is designed to recover 75% of these CAT costs. Accordingly, the Historical CAT Assessment Costs would be \$144,955,006.

Using the Historical CAT Assessment Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Historical CAT Assessment owed by each Industry

Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover the Historical CAT Assessment Costs over a period of four calendar quarters, commencing upon the SEC's approval of the Historical CAT Assessment. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic (subject to the market making discounts and the maximum fee). The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by \$36,238,752, which is 1/4th of the Historical CAT Assessment Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation, and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Historical CAT Assessment in the first quarter after SEC approval of the Historical CAT Assessment, based on CAT Data from the quarter in which the SEC approved the CAT fees.

To implement the Historical CAT Assessment, the Exchange proposes to add proposed paragraph (b) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (b) would state that "each Industry Member shall pay an Historical CAT Assessment in the amount of the greater of the following each quarter for four quarters commencing upon approval of the Historical CAT Assessment by the SEC: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by \$36,238,752 (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

In accordance with Section 11.6(b) of the CAT NMS Plan and as provided in the Proposed CAT Fee Plan

³³ See Proposed CAT Fee Plan Amendment at 50–51.

³⁴ See Proposed CAT Fee Plan Amendment at 55–60.

³⁵ See Section 11.6 of the CAT NMS Plan; and Financial Accountability Release.

Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 1. Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. As indicated by the Participants' Quarterly Progress Report,³⁶ Initial Industry Member Core Equity and Option Reporting was completed on schedule by July 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in

connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020.

As provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 2. Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. As indicated by the Participants' Quarterly Progress Report,³⁷ Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020. As discussed above, the Historical CAT

Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. Accordingly, proposed paragraph (b) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Historical CAT Assessment "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Historical CAT Assessment:

Quarterly CAT Fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	\$36,238,752	Quarter of SEC approval of Historical CAT Assessment.	1st quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #2	36,238,752	1st quarter after SEC approval of Historical CAT Assessment.	2nd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #3	36,238,752	2nd quarter after SEC approval of Historical CAT Assessment.	3rd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #4	36,238,752	3rd quarter after SEC approval of Historical CAT Assessment.	4th quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

(B) Period 3 CAT Fee

Per the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2021 through December 31, 2021, referred to as the Period 3 CAT Fee.³⁸ The Total CAT Costs incurred from January 1, 2021 through December 31, 2021 ("Period 3 CAT Costs") will be calculated at the completion of 2021. Specifically, the Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

Using the Period 3 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 3 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 3 CAT Costs over a period of four calendar quarters, commencing in 2022. Each quarter, each

Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message by 1/4th of 75% of the Period 3 CAT Costs traffic (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Period 3 CAT Fee in the second quarter of 2022, based on CAT Data from the first quarter of 2022.

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2021 the Total CAT Costs for 2021 to be used in calculating the quarterly Period 3 CAT

Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. Such financial statements are required to be prepared in accordance with Section 9.2 of the CAT NMS Plan, including requirements related to compliance with GAAP, auditing by an independent public accounting firm and making the statements publicly available.

To implement the Period 3 CAT Fee, the Exchange proposes to add proposed paragraph (c) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (c) would state that "each Industry Member shall pay a Period 3 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2022: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic

³⁶ Q3 2020 Quarterly Progress Report (Oct. 30, 2020) (available at www.catnmsplan.com).

³⁷ Q4 2020 Quarterly Progress Report (Jan. 29, 2021) (available at www.catnmsplan.com).

³⁸ See Proposed CAT Fee Plan Amendment at 60–63.

based on the prior quarter's message traffic by 1/4th of 75% of the Period 3 Total CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

Per the Proposed CAT Fee Plan Amendment, the proposed Period 3 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 3. Period 3

began on January 1, 2021 and is expected to conclude on December 31, 2021, the date of Full Availability and Regulatory Utilization of Transactional Database Functionality. As discussed above, the Period 3 CAT Costs to be recovered via the Period 3 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2020 through December 31, 2021. The collection of the full amount of the Period 3 CAT Fee will depend upon achievement of Full Availability and

Regulatory Utilization of Transaction Database Functionality by December 31, 2021; if not, the amount of the Period 3 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (c) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 3 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Period 3 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 3 CAT Costs ³⁹ .	CAT Data from first quarter of 2022 ...	2nd quarter of 2022.
Quarterly CAT Fee #2	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from second quarter of 2022.	3rd quarter of 2022.
Quarterly CAT Fee #3	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from third quarter of 2022 ..	4th quarter of 2022.
Quarterly CAT Fee #4	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from fourth quarter of 2022	1st quarter of 2023.

(C) Period 4 CAT Fee

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2022 through December 30, 2022, referred to as the Period 4 CAT Fee.⁴⁰ The Total CAT Costs incurred from January 1, 2022 through December 30, 2022 ("Period 4 CAT Costs") will be calculated at the completion of 2022. Specifically, the Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

Using the Period 4 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 4 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 4 CAT Costs over a period of four calendar quarters, commencing in 2023. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee

would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members will be required to commence paying the Period 4 CAT Fee in the second quarter of 2023, based on data from the first quarter of 2023.

To implement the Period 4 CAT Fee, the Exchange proposes to add proposed paragraph (d) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (d) would state that "each Industry Member shall pay a Period 4 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message

traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2022 the Total CAT Costs for 2022 to be used in calculating the quarterly Period 4 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. As noted above, such financial statements are required to be prepared in accordance with the requirements set forth in Section 9.2 of the CAT NMS Plan.

The Exchange indicates that the proposed Period 4 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 4. Period 4 is expected to begin on January 1, 2022 and conclude on December 30, 2022, the date of Full Implementation of CAT NMS Plan Requirements. As discussed above, the Period 4 CAT Costs to be recovered via the Period 4 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and

³⁹ The Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements of the Company.

⁴⁰ See Proposed CAT Fee Plan Amendment at 63–65.

operation of the CAT during the period from January 1, 2022 through December 30, 2022. The collection of the full amount of the Period 4 CAT Fee will depend upon achievement of Full Implementation of CAT NMS Plan Requirements by December 30, 2022; if

not, the amount of the Period 4 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (e) of the “Consolidated Audit Trail Funding

Fees” section of its fee schedule would state that Industry Members will be required to pay the Period 4 CAT Fee “[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan.”

The following chart summarizes the imposition of the Period 4 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 4 CAT Costs ⁴¹ .	CAT Data from first quarter of 2023 ...	2nd quarter of 2023.
Quarterly CAT Fee #2	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from second quarter of 2023.	3rd quarter of 2023.
Quarterly CAT Fee #3	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from third quarter of 2023 ..	4th quarter of 2023.
Quarterly CAT Fee #4	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from fourth quarter of 2023	1st quarter of 2024.

(D) Quarterly CAT Fee—Beginning 2023

As provided in the Proposed CAT Fee Plan Amendment, to recover the costs of the CAT going forward beginning in 2023, the Operating Committee determined to charge Industry Members an ongoing quarterly CAT fee calculated based on the allocation of Total CAT Costs pursuant to the CAT Funding Model (“Quarterly CAT Fee”).⁴² The Operating Committee will use the costs set forth in the annual operating budget as the Total CAT Costs in the calculation of the Quarterly CAT Fee. Specifically, the Total CAT Costs budgeted for the upcoming year for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. Using these estimated Total CAT Costs, the Operating Committee will calculate the Quarterly CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. As provided in the Proposed CAT Fee Plan Amendment, the Operating Committee proposes to seek to recover the budgeted Total CAT Costs over the course of the year. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic.⁴³ The message traffic fee

would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member’s message traffic would be calculated using data from the prior calendar quarter. The Exchange proposes to commence charging this CAT fee in the second quarter of 2023, based on CAT Data from the first quarter of 2023.

To implement the Quarterly CAT Fee, the Exchange proposes to add proposed paragraph (a) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (a) would state that “[e]ach Industry Member shall pay a Quarterly CAT Fee in the amount of the greater of the following each quarter commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the prior quarter’s message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the relevant year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the

Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

The Exchange understands the Operating Committee will announce at the beginning of the relevant year via a CAT alert the budgeted Total CAT Costs to be used in calculating the Quarterly CAT Fees for that year. The budgeted Total CAT Costs will be the costs set forth in the annual operating budget for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. As discussed above, CAT costs would include, but not be limited to, Plan Processor costs, insurance costs, third-party support costs and an operational reserve. As required by Section 11.1(c) of the CAT NMS Plan, any surpluses collected will be treated as an operational reserve to offset future fees and will not be distributed to the Participants as profits.⁴⁴ In addition, to address potential changes in the budget during the year, the total budgeted costs for the CAT for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted total budgeted costs for the CAT will be used in calculating the remaining quarterly CAT fees for that year.

The following chart summarizes the imposition of the Quarterly CAT Fee each year commencing in 2023 and continuing each year thereafter:

⁴¹ The Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements for the Company.

⁴² See Proposed CAT Fee Plan Amendment at 65–68.

⁴³ To the extent that any two or more of the four categories of Industry Member CAT fees (*i.e.*, the Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and the Quarterly CAT Fee) are due during the same quarter, any Industry Member obligated to pay one or more categories of fees is required to pay each category of fee for that quarter. For example, if an Industry Member would be subject to the Minimum Industry Member CAT Fee for the Period 4 CAT Fee and the Minimum Industry Member CAT Fee for the Quarterly CAT Fee during the same quarter, the Industry Member would be required to pay two minimum \$125 fees that quarter for a total of \$250. As another example,

suppose that an Industry Member owed a CAT fee (other than the minimum fee of \$125) for both the Historical CAT Assessment and the Period 3 CAT Fee, the Industry Member would be required to pay both fees that quarter. See Proposed CAT Fee Plan Amendment at 66.

⁴⁴ CAT NMS Plan Approval Order at 84792.

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from first quarter of the relevant year.	2nd quarter of the relevant year.
Quarterly CAT Fee #2	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from second quarter of the relevant year.	3rd quarter of the relevant year.
Quarterly CAT Fee #3	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from third quarter of the relevant year.	4th quarter of the relevant year.
Quarterly CAT Fee #4	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from fourth quarter of the relevant year.	1st quarter of year following the relevant year.

(3) Time and Manner of Payment

The Exchange proposes to add paragraph (e) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule to describe the time and manner of the payment of the Industry Member CAT fees as provided in the Proposed CAT Fee Plan Amendment.⁴⁵ Proposed paragraph (e)(1) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with an invoice setting forth the Industry Member’s Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and/or Quarterly CAT Fee (as applicable) (collectively, “CAT Fees”) for each payment period.” Proposed paragraph (e)(2) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with one invoice each payment period for its CAT Fees as determined pursuant to paragraph (a)–(d) above, regardless of whether the Industry Member is a member of multiple self-regulatory organizations.” Proposed paragraph (e)(3) would state that “[e]ach Industry Member will pay its CAT Fees to the Consolidated Audit Trail, LLC via the centralized system for the collection of CAT Fees established by the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” Finally, proposed paragraph (e)(4) would require that Industry Members pay their CAT Fees within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due, such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (A) the Prime Rate plus 300 basis points, or (B) the

maximum rate permitted by applicable law.⁴⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,⁴⁷ which requires, among other things, that the Exchange’s rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,⁴⁸ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,⁴⁹ which requires that the Exchange’s rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed

this proposed rule change to implement the Industry Member CAT fees included in the CAT Funding Model approved by the Operating Committee. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”⁵⁰ To the extent that this proposal implements the Plan, and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

The Exchange further notes that, as provided in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed Industry Member CAT fees comply with the requirements of the Exchange Act and the CAT NMS Plan.⁵¹ The Operating Committee determined that the Industry Member CAT fees provide for the “equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities necessary or appropriate in furtherance of the purposes of this chapter,”⁵² as required by the Exchange Act. The Operating Committee determined that the CAT

⁴⁵ See Proposed CAT Fee Plan Amendment at 68–69.

⁴⁶ CAT Reporters will be responsible for each quarterly fee in which they are a CAT Reporter. If a CAT Reporter ceases to meet the definition of a CAT Reporter during a quarter, the CAT Reporter will still be responsible for CAT fees attributable to its message traffic (or, the minimum fee in the alternative) during that quarter. See Proposed CAT Fee Plan Amendment at 69.

⁴⁷ 15 U.S.C. 78f(b)(6).

⁴⁸ 15 U.S.C. 78f(b)(4).

⁴⁹ 15 U.S.C. 78f(b)(8).

⁵⁰ CAT NMS Plan Approval Order at 84696.

⁵¹ See Proposed CAT Fee Plan Amendment at 70–79.

⁵² Sections 6(b)(4) and 15A(b)(5) of the Exchange Act.

fees equitably allocate CAT costs between Participants and Industry Members, and among Industry Members, as discussed in detailed [sic] above. For the reasons discussed above, the Operating Committee determined that the 75%–25% allocation between Industry Members and Participants in the CAT Funding Model as well as the use of message traffic for allocating costs among Industry Members provide for an equitable allocation of CAT costs among CAT Reporters. In addition, as discussed above, the Operating Committee determined that the imposition of minimum and maximum fees and market maker discounts would operate to provide for an equitable allocation of CAT costs among Industry Members.

As further provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined that the CAT Funding Model is “not designed to permit unfair discrimination between customers, issuers, brokers, or dealers,”⁵³ as required by the Exchange Act, as the CAT Funding Model does not unfairly discriminate between Industry Members and Participants, or among Industry Members. In making this determination, the Operating Committee noted that all Industry Members are grouped together for the purpose of determining CAT fees, and Industry Members with similar levels of activity would pay similar fees. For example, Industry Members with higher levels of message traffic would pay higher fees, and those with lower levels of message traffic would pay lower fees. With the elimination of tiers in the Original Funding Model, fees for Industry Members are directly related to their message traffic. With tiers, the relationship between message traffic and the CAT fee would not have been as direct

In addition, as discussed in the Proposed CAT Fee Plan Amendment, where the method of fee calculation may potentially affect certain groups of CAT Reporters adversely, the Operating Committee sought to limit such adverse effects. For example, the Operating Committee proposed market maker discounts to address the high levels of message traffic generally exhibited by market makers. As discussed above, the SEC has recognized repeatedly that such favorable treatment for market makers in other contexts was not unfairly discriminatory or a burden on competition in light of its positive effects on market quality, nor was it

considered to involve an inequitable allocation of fees among members.

As also provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also proposed the Maximum Industry Member CAT Fee to address the potential for significant fees based on outsized message traffic for certain Industry Members. The Maximum Industry Member CAT Fee would serve as a method to institute a cap on fees to fairly allocate costs to Industry Members. Such a fee would prevent Industry Members from paying significantly larger CAT fees than Participant complexes.

The Proposed CAT Fee Plan Amendment notes that Operating Committee also determined that the proposed Industry Member CAT fees would promote just and equitable principles of trade, and, in general, protect investors and the public interest, as the fees would be transparent and relate specifically to CAT activity. The Operating Committee also determined that the proposed fees were reasonable because they would provide ease of calculation, ease of billing and other administrative functions. Such factors are crucial to estimating a reliable revenue stream for the Company.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act⁵⁴ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change implements provisions of the CAT NMS Plan that are subject to approval by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan. The Exchange also notes that the proposed rule changes will apply equally to all Industry Members, including its Members. In addition, all national securities exchanges and FINRA are proposing a similar proposed fee change to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the exchanges and FINRA.

Moreover, the Exchange notes that, as discussed in the Proposed CAT Fee Plan Amendment, the Operating Committee

determined that the proposed fees do not impose an unnecessary or inappropriate burden on competition as they fairly and equitably allocate costs among CAT Reporters.⁵⁵ The Operating Committee determined that the cost allocation between Participants and Industry Members recognizes the greater number of Industry Members as compared to the Participants and the greater collective revenue of Industry Members as compared to Participants. In addition, cost allocations among Industry Members based on message traffic fairly and equitably distribute CAT costs. Furthermore, the market maker discounts and the Maximum Industry Member CAT Fee address the potential for burdens on market makers and Industry Members with outsized message traffic potentially resulting from the proposed fee calculations. Moreover, the Operating Committee determined that the Minimum Industry Member CAT Fee would not act as a barrier to entry for smaller Industry Member CAT Reporters.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁵⁶ and paragraph (f) of Rule 19b–4⁵⁷ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

⁵³ Sections 6(b)(5) and 15A(b)(6) of the Exchange Act.

⁵⁴ 15 U.S.C. 78f(b)(8).

⁵⁵ See Proposed CAT Fee Plan Amendment at 78–79.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeBZX-2021-034 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeBZX-2021-034. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeBZX-2021-034 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁸

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91751; File No. SR-Phlx-2021-25]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt a Fee Schedule To Establish Fees for Industry Members Related to the National Market System Plan Governing the Consolidated Audit Trail

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 21, 2021, Nasdaq PHLX LLC ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt a fee schedule to establish fees for Industry Members related to the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan").³

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/phlx/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in Nasdaq General 7 (Consolidated Audit Trail Compliance) (Phlx General 7 incorporates The Nasdaq Stock Market LLC General 7 by reference).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under the CAT NMS Plan, the Operating Committee of the Consolidated Audit Trail, LLC ("Company") ("Operating Committee") has discretion to establish funding for the Company to operate the CAT, including establishing fees that the Participants will pay, and establishing fees for Industry Members that will be implemented by the Participants.⁴ The Operating Committee has filed with the SEC a proposal to amend the CAT NMS Plan to implement a revised funding model for the CAT ("CAT Funding Model") and to establish a fee schedule for Participant CAT fees ("Proposed CAT Fee Plan Amendment").⁵ The Proposed CAT Fee Plan Amendment describes the CAT Funding Model in detail, including the proposal to charge Industry Members CAT fees. The Participants are required to file with the SEC under Section 19(b) of the Exchange Act any CAT fees applicable to Industry Members that the Operating Committee approves.⁶ Accordingly, the purpose of this proposed rule change is to implement the required fee schedule provisions for CAT fees applicable to Industry Members that are Phlx members in accordance with the CAT Funding Model. The fee schedule provisions will become operative upon the SEC's approval of the Proposed CAT Fee Plan Amendment.

While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative following Commission approval of the Join [sic] Industry Plan Amendment to the National Market System Plan Governing the Consolidated Audit Trail filed on March 31, 2021.⁷

(1) CAT Funding Model

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, the CAT fees applicable to Participants and Industry Members for the relevant quarter would be designed to cover the total CAT costs associated with developing, implementing and operating the CAT for the relevant

⁴ Section 11.1(b) of the CAT NMS Plan.

⁵ See Securities Exchange Act Release No. 91555 (April 14, 2017), 86 FR 21050 (April 21, 2021) ("Proposed CAT Fee Plan Amendment").

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ See Securities Exchange Act Release No. 91555 (April 14, 2017), 86 FR 21050 (April 21, 2021) ("Proposed CAT Fee Plan Amendment").

⁵⁸ 17 CFR 200.30-3(a)(12).

quarter (“Total CAT Costs”).⁸ The CAT Funding Model would implement a bifurcated funding model, where these costs would be borne by both Participants and Industry Members. Industry Members as a group would pay 75% of the Total CAT Costs (the “Industry Member Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).⁹

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, each Industry Member will pay a CAT fee that is calculated by multiplying each Industry Member’s message traffic percentage of the total message traffic of all Industry Members during the relevant time period by the Industry Member Allocation, subject to certain market maker message traffic discounts, a Minimum Industry Member CAT Fee and a Maximum Industry Member CAT Fee. Each Industry Member that is an Options Market Maker will have a discount based on the options trade-to-quote ratio applied to its Options Market Maker message traffic when calculating that Industry Member’s message traffic, and each Industry Member that is an Equity Market Maker will have a discount based on the NMS Stock trade-to-quote ratio applied to its Equity Market Maker message traffic when calculating that Industry Member’s message traffic. In addition, each Industry Member will pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic. Furthermore, an Industry Member’s CAT fee would be subject to the Maximum Industry Member CAT Fee. The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in

accordance with each Industry Member’s percentage of total message traffic. Each of these aspects of the Industry Member CAT fee are discussed in more detail below.

(A) CAT Fees for Both Industry Members and Participants

Under the CAT Funding Model, both Participants and Industry Members would contribute to the funding of the CAT by paying a CAT fee.¹⁰ As permitted by Rule 613, the CAT NMS Plan requires Industry Members to pay a CAT fee. Rule 613(a)(1)(vii)(D) contemplates Industry Members contributing to the payment of CAT costs. Specifically, this provision requires the CAT NMS Plan to address “[h]ow the plan sponsors propose to fund the creation, implementation, and maintenance of the consolidated audit trail, including the proposed allocation of such estimated costs among the plan sponsors, and between the plan sponsors and members of the plan sponsors.”

In addition, as approved by the SEC, the CAT NMS Plan specifically contemplates CAT fees to be paid by both Industry Members and Participants. Section 11.1(b) states that “the Operating Committee shall have discretion to establish funding for the Company, including: (i) Establishing fees that the Participants shall pay; and (ii) establishing fees for Industry Members that shall be implemented by the Participants.”¹¹ The Commission stated in approving the CAT NMS Plan the following:

The Commission believes that the proposed funding model reflects a reasonable exercise of the Participants’ funding authority to recover the Participants’ costs related to the CAT. The CAT is a regulatory facility jointly owned by the Participants and, as noted above, the Exchange Act specifically permits the Participants to charge members fees to fund their self-regulatory obligations. The Commission further believes that the proposed funding model is designed to impose fees reasonably related to the Participants’ self-regulatory obligations because the fees would be directly associated with the costs of establishing and maintaining the CAT, and not unrelated SRO services.¹²

In its recent amendments to the CAT NMS Plan, the SEC reaffirmed the ability for the Participants to charge Industry Members a CAT fee. Specifically, the SEC noted that the

amendments were not intended to change the basic funding structure for the CAT, which may include fees established by the Operating Committee, and implemented by the Participants, to recover from Industry Members the costs and expenses incurred by the Participants in connection with the development and implementation of the CAT.¹³

Finally, as noted by the SEC, the CAT “substantially enhance[s] the ability of the SROs and the Commission to oversee today’s securities markets,”¹⁴ thereby benefitting all market participants. As such, both Participants and Industry Members should contribute to covering the cost of the CAT.

(B) 75%/25% Allocation Between Industry Members and Participants

The CAT NMS Plan as approved by the Commission provides the Operating Committee with discretion to establish CAT fees to be paid by Participants and Industry Members. The CAT Funding Model as set out in the Proposed CAT Fee Plan Amendment contemplates allocating CAT costs between Participants and Industry Members to permit the calculation of CAT fees based on market share for Participants and based on message traffic for Industry Members.¹⁵ Under the CAT Funding Model as proposed, Industry Members as a group would pay 75% of the Total CAT Costs (the “Industry Member Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).¹⁶ As discussed in more detail below, the Industry Member Allocation of 75% of the Total CAT Costs is included in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule for the Consolidated Audit Trail Funding Fees. In each such paragraph, the calculation of the Industry Member CAT fees is based on 75% of the Total CAT Costs.

(C) Message Traffic

The Industry Member Allocation would be allocated to each Industry

⁸Note that certain costs would be excluded from the Historical CAT Assessment Costs, as discussed in more detail below. See Proposed CAT Fee Plan Amendment at 21051 [sic], 21074 [sic].

⁹Each Industry Member and Participant CAT Reporter would be required to pay CAT fees established via the CAT Funding Model. CAT Reporting Agents acting in their role as such would not have an obligation to pay CAT fees. See Proposed CAT Fee Plan Amendment at 21051 [sic].

¹⁰Proposed CAT Fee Plan Amendment at 21054–55.

¹¹See also Sections 11.1(c), 11.2(c), and 11.3(a) and (b) of the CAT NMS Plan.

¹²Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696, 84794 (Nov. 23, 2016) (“CAT NMS Plan Approval Order”).

¹³Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31329 (May 22, 2020) (“Financial Accountability Release”).

¹⁴Securities Exchange Act Rel. No. 67457 (Jul. 18, 2012), 77 FR 45722, 45726 (Aug. 1, 2012).

¹⁵See Proposed CAT Fee Plan Amendment at 21055–56 [sic]. Note that, in the funding model set forth in Article XI of the CAT NMS Plan (“Original Funding Model”), costs were allocated between Execution Venues and certain Industry Members, whereas the CAT Funding Model would allocate costs between Participants and Industry Members.

¹⁶For additional discussions regarding the 75%–25% allocation, see Proposed CAT Fee Plan Amendment at 21056–58 [sic].

Member based on message traffic.¹⁷ Each Industry Member CAT Reporter would pay a CAT fee that is calculated by multiplying each Industry Member's percentage of the total message traffic of all Industry Members each quarter by the Industry Member Allocation, subject to certain market making discounts, Minimum Industry Member CAT Fees, and Maximum Industry Member CAT Fees. To implement the use of message traffic in the calculation of Industry Member CAT fees, the Exchange proposes to describe the use of message traffic in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule. In each such paragraph, the Industry Member CAT fees are calculated based on Industry Members' message traffic in the CAT.

As set out in the Proposed CAT Fee Plan Amendment,¹⁸ message traffic would be calculated based on Industry Members' Reportable Events reported to the CAT as defined in the CAT Reporting Technical Specifications for Industry Members ("IM Reporting Tech Specs") as amended from time to time.¹⁹ The Reportable Events may vary over time if the IM Reporting Tech Specs are amended.²⁰ However, Reportable Events in the current IM Reporting Tech Specs that will be counted as message traffic include, but are not limited to, such events as the New Order Event, the Order Route Event and the Trade Event. In addition, message traffic will not include reporting activity related to Customer information as set forth in the CAT Reporting Customer and Account

Technical Specifications for Industry Members.²¹

(D) Market Maker Discounts

As set out in the Proposed CAT Fee Plan Amendment, the Operating Committee recognized that treating Options Market Maker message traffic and Equity Market Maker message traffic in the same way as other message traffic for purposes of calculating Industry Member CAT fees may result in an undue or inappropriate burden on competition or may lead to a reduction in market quality.²² For example, charging Industry Members on the basis of message traffic may impact market makers disproportionately because of their continuous quoting obligations. Moreover, in the context of Options Market Makers, message traffic would include bids and offers for every Listed Options strikes and series. Accordingly, the Operating Committee determined to discount Options Market Maker message traffic by the trade-to-quote ratio for Listed Options when calculating message traffic for Options Market Makers, and to discount Equity Market Maker message traffic by the trade-to-quote ratio for NMS Stocks when calculating message traffic for Equity Market Makers. The message traffic of Options Market Makers and Equity Market Makers, as discounted, would be counted as part of the total message traffic for all Industry Members. The practical effect of applying such discounts for market making activity would be to lower the CAT fees for Options Market Makers and Equity Market Makers.

(I) Options Market Maker Discount

Each Industry Member that is an Options Market Maker²³ would have a discount based on the options trade-to-quote ratio applied to its options market making message traffic when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on options market making due to such message traffic.²⁴ Specifically, for each Options Market Maker, a discount would be applied to (1) all message traffic reported to the CAT by the

Options Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered, regardless of where the order is ultimately routed or executed;²⁵ and (2) all message traffic for which a "quote sent time" is reported by an Options Exchange on behalf of the given Options Market Maker.

The relevant trade-to-quote ratio for the Options Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the securities information processors ("SIP"). As an example, the trade-to-quote ratio for Listed Options for the fourth quarter of 2020 was 0.01%.

Accordingly, each Options Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the options trade-to-quote ratio. The Options Market Maker's CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁶ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Options Market Maker discount, the Exchange proposes to add paragraph (g)(1) to the fee schedule. Paragraph (g)(1) would state that "[w]hen calculating the message traffic of an Industry Member that is an Options Market Maker, the Options Market Maker's market making message traffic would be discounted by multiplying its Listed Options market making message traffic by the Listed Options trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to

¹⁷ For additional discussions regarding the use of message traffic for calculating Industry Member CAT fees, see Proposed CAT Fee Plan Amendment at 21059 [sic].

¹⁸ See Proposed CAT Fee Plan Amendment at 21056–57.

¹⁹ The CAT Reporting Technical Specifications for Industry Members are available at www.catnmsplan.com.

²⁰ Due to the Phased Reporting approach, all Reportable Events will not be reported until all Industry Members are reporting all Reportable Events to the CAT. For example, Phase 2d CAT Reporting is scheduled for December 2021, and Small Industry Non-OATS Reporters are not required to report until December 2021. In addition, certain Reportable Events, such as simple options manual orders and OTC link messages, are not required to be reported until later in the Phased Reporting. For a detailed description of such Reportable Events, see CAT Reporting Technical Specifications for Industry Members (available at www.catnmsplan.com). For the Industry Member CAT reporting timeline, see, e.g., FINRA Rule 6895(c). CAT costs will be allocated based on the Reportable Events reported to the CAT in any relevant quarter, regardless of whether all Industry Members are reporting to the CAT or all Reportable Events are required to be reported to the CAT for a relevant quarter. See Proposed CAT Fee Plan Amendment at 27.

²¹ The CAT Reporting Customer and Account Technical Specifications for Industry Members are available at www.catnmsplan.com.

²² See Proposed CAT Fee Plan Amendment at 21057–58.

²³ Section 1.1 of the CAT NMS Plan; Nasdaq General 7 Section 1(ee) defines an "Options Market Maker" as "a broker-dealer registered with an exchange for the purpose of making markets in options contracts traded on the exchange." (Phlx General 7 incorporates The Nasdaq Stock Market LLC General 7 by reference).

²⁴ See Proposed CAT Fee Plan Amendment at 21058.

²⁵ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Options Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by an Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 21058.

²⁶ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Options Market Makers. See Proposed CAT Fee Plan Amendment at 21058.

applicable discounts for Options Market Maker message traffic for each of the four Industry Member CAT fees.

(II) Equity Market Maker Discount

Similarly, each Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker") would have a discount based on the NMS Stock trade-to-quote ratio applied to its market making message traffic in NMS Stocks when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on market making in NMS Stocks.²⁷ Specifically, for each Equity Market Maker, a discount would be applied to all message traffic reported to the CAT by the Equity Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered,²⁸ regardless of where the order is ultimately routed or executed.²⁹

The relevant trade-to-quote ratio for the Equity Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the SIP. As an example, the trade-to-quote ratio for NMS Stocks for the fourth quarter of 2020 was 4.77%.

The Equity Market Maker CAT fee would be calculated in the same manner as the Options Market Maker CAT fee. Each Equity Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the NMS Stock trade-to-quote ratio. The Equity Market Maker CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period³⁰ by the Industry Member

Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Equity Market Maker discount, the Exchanges proposes to add paragraph (g)(2) to the fee schedule. Paragraph (g)(2) would state that "[w]hen calculating the message traffic of an Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker"), the Equity Market Maker's market making message traffic would be a [sic] discounted by multiplying its market making message traffic in NMS Stocks by the NMS Stock trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Equity Market Maker message traffic for each of the four Industry Member CAT fees.

(E) Minimum Industry Member CAT Fee

Each Industry Member would be required to pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic.³¹ All Industry Members required to report to the CAT, including those that have not yet begun to report to the CAT due to the phased implementation schedule for the CAT, would be subject to the Minimum Industry Member CAT Fee. If any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage.³²

To implement the Minimum Industry Member CAT Fee, the Exchange proposes to add paragraph (h) to the fee schedule. Proposed paragraph (h)(1) of the fee schedule would state that "[t]he Minimum Industry Member CAT Fee is \$125 per quarter." Proposed paragraph (h)(2) of the fee schedule would state that "[i]f any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional

amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage ("Minimum Industry Member CAT Fee Re-Allocation")." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule describes the Minimum Industry Member CAT Fee Re-Allocation for each of the four Industry Member CAT fees.

(F) Maximum Industry Member CAT Fee

An Industry Member's CAT fee also would be subject to a Maximum Industry Member CAT Fee.³³ The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member's fee is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic.

To implement the Maximum Industry Member CAT Fee, the Exchange proposes to add proposed paragraph (f) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (f)(1) would state that "[t]he Maximum Industry Member CAT Fee for each quarter is 8% of the total CAT costs for the relevant quarter." In addition, proposed paragraph (f)(2) would state that

If an Industry Member's CAT Fee that is calculated pursuant to paragraph (a)(2), (b)(2), (c)(2), (d)(2), as applicable, without reference to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation, is greater than the Maximum Industry Member CAT Fee, then the Industry Member will be subject to the Maximum Industry Member CAT Fee. If any Industry Member is subject to the Maximum Industry Member CAT Fee, then any

²⁷ See Proposed CAT Fee Plan Amendment at 21058.

²⁸ Note that Equity Market Makers do not have a quote sent time exemption comparable to the Options Market Maker quote sent time exemption, as discussed above.

²⁹ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Equity Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by the Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 21058.

³⁰ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all

Equity Market Makers. See Proposed CAT Fee Plan Amendment at 21058.

³¹ For additional discussions regarding the Minimum Industry Member CAT Fee, see Proposed CAT Fee Plan Amendment at 21058–59.

³² Options Market Makers and Equity Market Makers will be required to pay the Minimum Industry Member CAT Fee if their quarterly CAT fee calculated with the market maker discounts is less than \$125 per quarter.

³³ For additional discussions regarding the Maximum Industry Member CAT Fee, see Proposed CAT Fee Plan Amendment at 21058–59 [sic].

excess amount which the Industry Member otherwise would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members, including any Industry Member that is subject to the Maximum Industry Member CAT Fee or subject to the Minimum Industry Member CAT Fee in accordance with their message traffic percentage (“Maximum Industry Member CAT Fee Re-Allocation”).

Furthermore, proposed paragraphs (a)(1), (b)(1), (c)(1) and (d)(1) would state that an Industry Member’s CAT fee calculated pursuant to (a)(1), (b)(1), (c)(1) and (d)(1) would include any applicable Maximum Industry Member CAT Fee Re-Allocation. Finally, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) would state that an Industry Member’s CAT fee calculated pursuant to paragraph (a)(2), (b)(2), (c)(2) or (d)(2) is subject to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation.

(G) Total CAT Costs

As set out in the Proposed CAT Fee Plan Amendment, the Total CAT Costs for the year would be comprised of all fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during this period.³⁴

For purposes of the Historical CAT Assessment, the Total CAT Costs would be \$193,273,342, as set forth in the Proposed CAT Fee Plan Amendment. Accordingly, the quarterly CAT fee for the Historical CAT Assessment will be calculated based on costs of \$36,238,752, which is 1/4th of 75% of the Total CAT Costs. This amount is set forth in proposed paragraph (b)(2) of the fee schedule.

In addition, proposed paragraph (i) of the “Consolidated Audit Trail Funding Fees” section of its fee schedule describes the Total CAT Costs to be used in calculating the Period 3 CAT Fee, the Period 4 CAT Fee and the Quarterly CAT Fees. Proposed paragraph (i)(1) of the fee schedule would state that “[t]he Period 3 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2021.” Proposed paragraph (i)(2) of the fee schedule would state that “[t]he Period 4 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit

Trail, LLC for 2022.” Proposed paragraph (i)(3) of the fee schedule would state the following with regard to the Quarterly CAT Fees:

For purposes of the Quarterly CAT Fee, the budgeted Total CAT Costs for the relevant year shall be the total CAT costs set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan for the relevant year. The budgeted Total CAT Costs for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted budgeted costs for the CAT will be used in calculating the remaining CAT fees for that year.

(2) Proposed CAT Fees

The Exchange proposes to charge its Industry Members fees related to CAT costs. To implement these CAT fees, the Exchange proposes to add a section entitled “Consolidated Audit Trail Funding Fees” to its fee schedule, and to describe the CAT fees in that section.

(A) Historical CAT Assessment (for Pre-Period 1, Period 1 and Period 2)

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee determined to charge Industry Members a historical assessment (“Historical CAT Assessment”) to recover certain CAT costs incurred prior to January 1, 2021 (“Historical CAT Assessment Costs”).³⁵ Specifically, as detailed in the Proposed CAT Fee Plan Amendment, the Historical CAT Assessment is intended to collect from Industry Members 75% of certain costs incurred through June 22, 2020, the effective date for the Financial Accountability Milestones,³⁶ certain costs from Period 1 of the Financial Accountability Milestones (which covered the period from June 22, 2020–July 31, 2020) and certain costs from Period 2 of the Financial Accountability Milestones (which covered the period from August 1, 2020–December 31, 2020). The Total CAT Costs, excluding Excluded Costs (as defined below) and certain costs related to the conclusion of the relationship with Thesys CAT, LLC is \$193,273,342. The Historical CAT Assessment is designed to recover 75%

of these CAT costs. Accordingly, the Historical CAT Assessment Costs would be \$144,955,006.

Using the Historical CAT Assessment Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Historical CAT Assessment owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover the Historical CAT Assessment Costs over a period of four calendar quarters, commencing upon the SEC’s approval of the Historical CAT Assessment. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic (subject to the market making discounts and the maximum fee). The message traffic fee would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by \$36,238,752, which is 1/4th of the Historical CAT Assessment Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation, and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member’s message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Historical CAT Assessment in the first quarter after SEC approval of the Historical CAT Assessment, based on CAT Data from the quarter in which the SEC approved the CAT fees.

To implement the Historical CAT Assessment, the Exchange proposes to add proposed paragraph (b) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (b) would state that “each Industry Member shall pay an Historical CAT Assessment in the amount of the greater of the following each quarter for four quarters commencing upon approval of the Historical CAT Assessment by the SEC: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the prior quarter’s message traffic by \$36,238,752 (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum

³⁴ See Proposed CAT Fee Plan Amendment at 21063.

³⁵ See Proposed CAT Fee Plan Amendment at 21064–65.

³⁶ See Section 11.6 of the CAT NMS Plan; and Financial Accountability Release.

Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

In accordance with Section 11.6(b) of the CAT NMS Plan and as provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 1. Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. As indicated by the Participants' Quarterly Progress Report,³⁷ Initial Industry Member Core Equity and Option Reporting was completed on schedule by July 31, 2020.

As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020.

As provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 2. Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. As indicated by the Participants' Quarterly Progress Report,³⁸ Full Implementation of Core Equity Reporting was completed on

schedule by December 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. Accordingly, proposed paragraph (b) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Historical CAT Assessment "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Historical CAT Assessment:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	\$36,238,752	Quarter of SEC approval of Historical CAT Assessment.	1st quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #2	36,238,752	1st quarter after SEC approval of Historical CAT Assessment.	2nd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #3	36,238,752	2nd quarter after SEC approval of Historical CAT Assessment.	3rd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #4	36,238,752	3rd quarter after SEC approval of Historical CAT Assessment.	4th quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

(B) Period 3 CAT Fee

Per the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2021 through December 31, 2021, referred to as the Period 3 CAT Fee.³⁹ The Total CAT Costs incurred from January 1, 2021 through December 31, 2021 ("Period 3 CAT Costs") will be calculated at the completion of 2021. Specifically, the Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

Using the Period 3 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 3 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 3 CAT Costs over a period of four calendar quarters, commencing in 2022. Each quarter, each

Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message by 1/4th of 75% of the Period 3 CAT Costs traffic (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Period 3 CAT Fee in the second quarter of 2022, based on CAT Data from the first quarter of 2022.

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2021 the Total CAT Costs for 2021 to be used in calculating the quarterly Period 3 CAT

Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. Such financial statements are required to be prepared in accordance with Section 9.2 of the CAT NMS Plan, including requirements related to compliance with GAAP, auditing by an independent public accounting firm and making the statements publicly available.

To implement the Period 3 CAT Fee, the Exchange proposes to add proposed paragraph (c) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (c) would state that "each Industry Member shall pay a Period 3 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2022: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic

³⁷ Q3 2020 Quarterly Progress Report (Oct. 30, 2020) (available at www.catnmsplan.com).

³⁸ Q4 2020 Quarterly Progress Report (Jan. 29, 2021) (available at www.catnmsplan.com).

³⁹ See Proposed CAT Fee Plan Amendment at 21065–66.

based on the prior quarter's message traffic by 1/4th of 75% of the Period 3 Total CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

Per the Proposed CAT Fee Plan Amendment, the proposed Period 3 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 3. Period 3

began on January 1, 2021 and is expected to conclude on December 31, 2021, the date of Full Availability and Regulatory Utilization of Transactional Database Functionality. As discussed above, the Period 3 CAT Costs to be recovered via the Period 3 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2020 through December 31, 2021. The collection of the full amount of the Period 3 CAT Fee will depend upon achievement of Full Availability and

Regulatory Utilization of Transactional Database Functionality by December 31, 2021; if not, the amount of the Period 3 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (c) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 3 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Period 3 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 3 CAT Costs ⁴⁰	CAT Data from first quarter of 2022	2nd quarter of 2022.
Quarterly CAT Fee #2	1/4th of 75% of the Period 3 CAT Costs ...	CAT Data from second quarter of 2022	3rd quarter of 2022.
Quarterly CAT Fee #3	1/4th of 75% of the Period 3 CAT Costs ...	CAT Data from third quarter of 2022	4th quarter of 2022.
Quarterly CAT Fee #4	1/4th of 75% of the Period 3 CAT Costs ...	CAT Data from fourth quarter of 2022	1st quarter of 2023.

(C) Period 4 CAT Fee

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2022 through December 30, 2022, referred to as the Period 4 CAT Fee.⁴¹ The Total CAT Costs incurred from January 1, 2022 through December 30, 2022 ("Period 4 CAT Costs") will be calculated at the completion of 2022. Specifically, the Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

Using the Period 4 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 4 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 4 CAT Costs over a period of four calendar quarters, commencing in 2023. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market

Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members will be required to commence paying the Period 4 CAT Fee in the second quarter of 2023, based on data from the first quarter of 2023.

To implement the Period 4 CAT Fee, the Exchange proposes to add proposed paragraph (d) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (d) would state that "each Industry Member shall pay a Period 4 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2022 the

Total CAT Costs for 2022 to be used in calculating the quarterly Period 4 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. As noted above, such financial statements are required to be prepared in accordance with the requirements set forth in Section 9.2 of the CAT NMS Plan.

The Exchange indicates that the proposed Period 4 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 4. Period 4 is expected to begin on January 1, 2022 and conclude on December 30, 2022, the date of Full Implementation of CAT NMS Plan Requirements. As discussed above, the Period 4 CAT Costs to be recovered via the Period 4 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2022 through December 30, 2022. The collection of the full amount of the Period 4 CAT Fee will depend upon achievement of Full Implementation of CAT NMS Plan Requirements by December 30, 2022; if not, the amount of the Period 4 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (e) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 4 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

⁴⁰ The Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements of the Company.

⁴¹ See Proposed CAT Fee Plan Amendment at 21066-67.

The following chart summarizes the imposition of the Period 4 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 4 CAT Costs ⁴²	CAT Data from first quarter of 2023	2nd quarter of 2023.
Quarterly CAT Fee #2	1/4th of 75% of the Period 4 CAT Costs ...	CAT Data from second quarter of 2023	3rd quarter of 2023.
Quarterly CAT Fee #3	1/4th of 75% of the Period 4 CAT Costs ...	CAT Data from third quarter of 2023	4th quarter of 2023.
Quarterly CAT Fee #4	1/4th of 75% of the Period 4 CAT Costs ...	CAT Data from fourth quarter of 2023	1st quarter of 2024.

(D) Quarterly CAT Fee—Beginning 2023

As provided in the Proposed CAT Fee Plan Amendment, to recover the costs of the CAT going forward beginning in 2023, the Operating Committee determined to charge Industry Members an ongoing quarterly CAT fee calculated based on the allocation of Total CAT Costs pursuant to the CAT Funding Model (“Quarterly CAT Fee”).⁴³ The Operating Committee will use the costs set forth in the annual operating budget as the Total CAT Costs in the calculation of the Quarterly CAT Fee. Specifically, the Total CAT Costs budgeted for the upcoming year for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. Using these estimated Total CAT Costs, the Operating Committee will calculate the Quarterly CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. As provided in the Proposed CAT Fee Plan Amendment, the Operating Committee proposes to seek to recover the budgeted Total CAT Costs over the course of the year. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic.⁴⁴ The message traffic fee would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the year (subject to applicable discounts for Options Market Maker message traffic

and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member’s message traffic would be calculated using data from the prior calendar quarter. The Exchange proposes to commence charging this CAT fee in the second quarter of 2023, based on CAT Data from the first quarter of 2023.

To implement the Quarterly CAT Fee, the Exchange proposes to add proposed paragraph (a) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (a) would state that “[e]ach Industry Member shall pay a Quarterly CAT Fee in the amount of the greater of the following each quarter commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the prior quarter’s message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the relevant year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

The Exchange understands the Operating Committee will announce at the beginning of the relevant year via a CAT alert the budgeted Total CAT Costs to be used in calculating the Quarterly CAT Fees for that year. The budgeted Total CAT Costs will be the costs set forth in the annual operating budget for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. As discussed above, CAT costs would include, but not be limited to, Plan Processor costs, insurance costs, third-party support costs and an operational reserve. As required by Section 11.1(c) of the CAT NMS Plan, any surpluses collected will be treated as an operational reserve to offset future fees and will not be distributed to the Participants as profits.⁴⁵ In addition, to address potential changes in the budget during the year, the total budgeted costs for the CAT for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted total budgeted costs for the CAT will be used in calculating the remaining quarterly CAT fees for that year.

The following chart summarizes the imposition of the Quarterly CAT Fee each year commencing in 2023 and continuing each year thereafter:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from first quarter of the relevant year.	2nd quarter of the relevant year.
Quarterly CAT Fee #2	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from second quarter of the relevant year.	3rd quarter of the relevant year.

⁴² The Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements for the Company.

⁴³ See Proposed CAT Fee Plan Amendment at 21067–68.

⁴⁴ To the extent that any two or more of the four categories of Industry Member CAT fees (*i.e.*, the Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and the Quarterly CAT Fee) are

due during the same quarter, any Industry Member obligated to pay one or more categories of fees is required to pay each category of fee for that quarter. For example, if an Industry Member would be subject to the Minimum Industry Member CAT Fee for the Period 4 CAT Fee and the Minimum Industry Member CAT Fee for the Quarterly CAT Fee during the same quarter, the Industry Member would be required to pay two minimum \$125 fees

that quarter for a total of \$250. As another example, suppose that an Industry Member owed a CAT fee (other than the minimum fee of \$125) for both the Historical CAT Assessment and the Period 3 CAT Fee, the Industry Member would be required to pay both fees that quarter. See Proposed CAT Fee Plan Amendment at 21067.

⁴⁵ CAT NMS Plan Approval Order at 84792.

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #3	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from third quarter of the relevant year.	4th quarter of the relevant year.
Quarterly CAT Fee #4	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from fourth quarter of the relevant year.	1st quarter of year following the relevant year.

(3) Time and Manner of Payment

The Exchange proposes to add paragraph (e) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule to describe the time and manner of the payment of the Industry Member CAT fees as provided in the Proposed CAT Fee Plan Amendment.⁴⁶ Proposed paragraph (e)(1) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with an invoice setting forth the Industry Member’s Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and/or Quarterly CAT Fee (as applicable) (collectively, “CAT Fees”) for each payment period.” Proposed paragraph (e)(2) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with one invoice each payment period for its CAT Fees as determined pursuant to paragraph (a)–(d) above, regardless of whether the Industry Member is a member of multiple self-regulatory organizations.” Proposed paragraph (e)(3) would state that “[e]ach Industry Member will pay its CAT Fees to the Consolidated Audit Trail, LLC via the centralized system for the collection of CAT Fees established by the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” Finally, proposed paragraph (e)(4) would require that Industry Members pay their CAT Fees within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due, such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.⁴⁷

⁴⁶ See Proposed CAT Fee Plan Amendment at 21068.

⁴⁷ CAT Reporters will be responsible for each quarterly fee in which they are a CAT Reporter. If a CAT Reporter ceases to meet the definition of a CAT Reporter during a quarter, the CAT Reporter will still be responsible for CAT fees attributable to its message traffic (or, the minimum fee in the

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,⁴⁸ which requires, among other things, that the Exchange’s rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,⁴⁹ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act⁵⁰ which requires that the Exchange’s rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this proposed rule change to implement the Industry Member CAT fees included in the CAT Funding Model approved by the Operating Committee. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public

alternative) during that quarter. See Proposed CAT Fee Plan Amendment at 21068.

⁴⁸ 15 U.S.C. 78f(b)(6).

⁴⁹ 15 U.S.C. 78f(b)(4).

⁵⁰ 15 U.S.C. 78f(b)(8).

interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”⁵¹ To the extent that this proposal implements the Plan, and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

The Exchange further notes that, as provided in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed Industry Member CAT fees comply with the requirements of the Exchange Act and the CAT NMS Plan.⁵² The Operating Committee determined that the Industry Member CAT fees provide for the “equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities necessary or appropriate in furtherance of the purposes of this chapter,”⁵³ as required by the Exchange Act. The Operating Committee determined that the CAT fees equitably allocate CAT costs between Participants and Industry Members, and among Industry Members, as discussed in detailed [sic] above. For the reasons discussed above, the Operating Committee determined that the 75%–25% allocation between Industry Members and Participants in the CAT Funding Model as well as the use of message traffic for allocating costs among Industry Members provide for an equitable allocation of CAT costs among CAT Reporters. In addition, as discussed above, the Operating Committee determined that the imposition of minimum and maximum fees and market maker discounts would operate to provide for an equitable allocation of CAT costs among Industry Members.

As further provided in the Proposed CAT Fee Plan Amendment, the

⁵¹ CAT NMS Plan Approval Order at 84696.

⁵² See Proposed CAT Fee Plan Amendment at 21068–70.

⁵³ Sections 6(b)(4) and 15A(b)(5) of the Exchange Act.

Operating Committee also determined that the CAT Funding Model is “not designed to permit unfair discrimination between customers, issuers, brokers, or dealers,”⁵⁴ as required by the Exchange Act, as the CAT Funding Model does not unfairly discriminate between Industry Members and Participants, or among Industry Members. In making this determination, the Operating Committee noted that all Industry Members are grouped together for the purpose of determining CAT fees, and Industry Members with similar levels of activity would pay similar fees. For example, Industry Members with higher levels of message traffic would pay higher fees, and those with lower levels of message traffic would pay lower fees. With the elimination of tiers in the Original Funding Model, fees for Industry Members are directly related to their message traffic. With tiers, the relationship between message traffic and the CAT fee would not have been as direct.

In addition, as discussed in the Proposed CAT Fee Plan Amendment, where the method of fee calculation may potentially affect certain groups of CAT Reporters adversely, the Operating Committee sought to limit such adverse effects. For example, the Operating Committee proposed market maker discounts to address the high levels of message traffic generally exhibited by market makers. As discussed above, the SEC has recognized repeatedly that such favorable treatment for market makers in other contexts was not unfairly discriminatory or a burden on competition in light of its positive effects on market quality, nor was it considered to involve an inequitable allocation of fees among members.

As also provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also proposed the Maximum Industry Member CAT Fee to address the potential for significant fees based on outsized message traffic for certain Industry Members. The Maximum Industry Member CAT Fee would serve as a method to institute a cap on fees to fairly allocate costs to Industry Members. Such a fee would prevent Industry Members from paying significantly larger CAT fees than Participant complexes.

The Proposed CAT Fee Plan Amendment notes that Operating Committee also determined that the proposed Industry Member CAT fees would promote just and equitable principles of trade, and, in general, protect investors and the public interest,

as the fees would be transparent and relate specifically to CAT activity. The Operating Committee also determined that the proposed fees were reasonable because they would provide ease of calculation, ease of billing and other administrative functions. Such factors are crucial to estimating a reliable revenue stream for the Company.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act⁵⁵ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change implements provisions of the CAT NMS Plan that are subject to approval by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan. The Exchange also notes that the proposed rule changes will apply equally to all Industry Members, including its Phlx members. In addition, all national securities exchanges and FINRA are proposing a similar proposed fee change to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the exchanges and FINRA.

Moreover, the Exchange notes that, as discussed in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed fees do not impose an unnecessary or inappropriate burden on competition as they fairly and equitably allocate costs among CAT Reporters.⁵⁶ The Operating Committee determined that the cost allocation between Participants and Industry Members recognizes the greater number of Industry Members as compared to the Participants and the greater collective revenue of Industry Members as compared to Participants. In addition, cost allocations among Industry Members based on message traffic fairly and equitably distribute CAT costs. Furthermore, the market maker discounts and the Maximum Industry Member CAT Fee address the potential for burdens on market makers and Industry Members with outsized message traffic potentially resulting

from the proposed fee calculations. Moreover, the Operating Committee determined that the Minimum Industry Member CAT Fee would not act as a barrier to entry for smaller Industry Member CAT Reporters.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.⁵⁷

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-Phlx-2021-25 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-Phlx-2021-25. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent

⁵⁴ Sections 6(b)(5) and 15A(b)(6) of the Exchange Act.

⁵⁵ 15 U.S.C. 78f(b)(8).

⁵⁶ See Proposed CAT Fee Plan Amendment at 21070.

⁵⁷ 15 U.S.C. 78s(b)(3)(A)(ii).

amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-Phlx-2021-25 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁸

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91748; File No. SR-MEMX-2021-06]

Self-Regulatory Organizations; MEMX LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Related to the Handling of Displayed Odd Lot Orders and Non-Displayed Orders That Become Locked or Crossed

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 30, 2021, MEMX LLC ("MEMX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a "non-controversial" proposed rule change pursuant to

Section 19(b)(3)(A)(iii) of the Act³ and Rule 19b-4(f)(6) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change related to: (1) The handling of a Limit Order of Odd Lot size with a Displayed instruction that is resting on the MEMX Book and subsequently becomes locked or crossed by an away Trading Center's Protected Quotation; and (2) the handling of a Limit Order with a Non-Displayed instruction that is resting on the MEMX Book and subsequently becomes crossed by an away Trading Center's Protected Quotation.⁵ The text of the proposed rule change is provided in Exhibit 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Introduction

The Exchange proposes to make changes to the Exchange's Rules related to the handling of a Limit Order⁶ of

Odd Lot⁷ size with a Displayed⁸ instruction (a "Displayed Odd Lot Order") that is resting on the MEMX Book⁹ and subsequently becomes locked or crossed by an away Trading Center's¹⁰ Protected Quotation.¹¹ In addition, the Exchange proposes to make changes to the Exchange's Rules related to the handling of a Limit Order with a Non-Displayed¹² instruction (a "Non-Displayed Order") that is resting on the MEMX Book and subsequently becomes crossed by an away Trading Center's Protected Quotation.

The Exchange's Rules currently describe all functionality with respect to orders of Round Lot, Mixed Lot and Odd Lot size without distinction because the Exchange generally handles these orders the same. However, the Exchange's System currently handles Displayed Odd Lot Orders differently than other orders in specific market circumstances, as described below. The Exchange proposes to codify this behavior as set forth in proposed Rules 11.6(j) and 11.8(b)(8). In addition, the Exchange proposes a change to current functionality with respect to orders with an Odd Lot size and orders with a Non-Displayed instruction that are eligible to be routed, as further described below.

⁷ The term "Odd Lot" refers to any amount less than a Round Lot. Orders of Odd Lot size are only eligible to be Protected Quotations if aggregated to form a Round Lot. The term "Round Lot" refers to one hundred (100) shares or any multiple thereof, unless an alternative number of shares is established as a Round Lot by the listing exchange for the security. Orders that are a Round Lot are eligible to be Protected Quotations. See Exchange Rule 11.6(q).

⁸ The term "Displayed" refers to an instruction a User may attach to an order stating that the order is to be displayed by the System on the MEMX Book. See Exchange Rule 11.6(c)(1).

⁹ The term "MEMX Book" refers to the System's electronic file of orders. See Exchange Rule 1.5(q). The term "System" refers to the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing. See Exchange Rule 1.5(gg). The term "User" refers to any Member or Sponsored Participant who is authorized to obtain access to the System. See Exchange Rule 1.5(jj).

¹⁰ The term "Trading Center" refers to other securities exchanges, facilities of securities exchanges, automated trading systems, electronic communications networks or other brokers or dealers.

¹¹ The term "Protected Quotation" refers to a quotation that is a Protected Bid or Protected Offer. The term "Protected Bid" or "Protected Offer" refers to a bid or offer in a stock that is (i) displayed by an automated trading center; (ii) disseminated pursuant to an effective national market system plan; and (iii) an automated quotation that is the best bid or best offer of a national securities exchange or association. See Exchange Rule 1.5(z).

¹² The term "Non-Displayed" refers to an instruction a User may attach to an order stating that the order is not to be displayed by the System on the MEMX Book. See Exchange Rule 11.6(c)(2).

⁵⁸ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A)(iii).

⁴ 17 CFR 240.19b-4(f)(6).

⁵ All terms as further defined below.

⁶ Limit Orders are described in Exchange Rule 11.8(b) and generally defined as an order to buy or sell a stated amount of a security at a specified price or better.

Displayed Odd Lot Orders

Currently, when an away Trading Center publishes a Protected Quotation that locks or crosses the displayed price of a Displayed Odd Lot Order and the Exchange does not have a Protected Quotation displayed at such price, such order will be cancelled by the System unless such order contains a multiple price sliding instruction, in which case such order will be re-priced pursuant to Rule 11.6(j)(1)(A). The Exchange proposes to add language to this effect to Rule 11.8(b)(8), which currently addresses the handling of Limit Orders in certain circumstances where such orders would cross Protected Quotations of other Trading Centers. As proposed, under Rule 11.8(b)(8), when an away Trading Center publishes a Protected Quotation that locks or crosses the displayed price of a resting Limit Order of Odd Lot size with a Displayed instruction and the Exchange does not have a Protected Quotation displayed at such price, such order will be cancelled by the System unless such order contains a multiple price sliding instruction, in which case such order will be re-priced pursuant to Rule 11.6(j)(1)(A), or the order is routed, as described below. The Exchange also proposes to rename Rule 11.8(b)(8) as “Locked or Crossed Market.”

In addition to the changes described above with respect to Rule 11.8(b)(8), the Exchange proposes to codify the re-pricing functionality applied to Displayed Odd Lot Orders with a multiple price sliding instruction that are subsequently locked or crossed by other Trading Centers. As background, the Exchange currently offers price sliding functionality that allows display-eligible orders to be permissibly ranked and displayed in accordance with Regulation NMS. Pursuant to this price sliding functionality, an order that would be a Locking or Crossing Quotation of an away Trading Center if displayed by the System on the MEMX Book at the time of entry will be ranked at the Locking Price in the MEMX Book (*i.e.*, executable at that price but not displayed) and displayed by the System one Minimum Price Variation away (*i.e.*, lower for a bid or higher for an offer).¹³ In turn, once an order has been permissibly displayed by the System, such order will generally *only be re-ranked and re-displayed to the extent it achieves a more aggressive price*.¹⁴ In other words, once an order is displayed on the MEMX Book it will stand its ground and not be re-priced to a less

aggressive price even if other Trading Centers publish Protected Quotations that lock or cross its displayed price, except in two circumstances described below; one of these circumstances is already described in MEMX Rule 11.6(j)(1)(A)(ii) and the other circumstance the Exchange proposes to codify in such Rule.

As currently set forth in Rule 11.6(j)(1)(A)(ii), the Exchange will re-price an order resting on the MEMX Book that is subject to display-price sliding when an away Trading Center publishes a Protected Quotation at a price that locks or crosses such order's displayed price. In such circumstance, the Exchange will re-rank the order subject to display-price sliding so that the order's ranked price is the same price as the displayed price. The Exchange re-ranks an order to a less aggressive price in this circumstance to avoid potentially trading through a Protected Quotation displayed by another Trading Center (*i.e.*, the ranked price, which is not displayed and not permitted to stand its ground, is changed to a less aggressive price to be the same price as the displayed price).

In addition to the exception set forth in Rule 11.6(j)(1)(A)(ii) described above, the Exchange also currently re-prices a Displayed Odd Lot Order with a multiple price sliding instruction to a less aggressive price when the Exchange is not displaying a Protected Quotation at the displayed price of such order and such order's displayed price is locked or crossed by a Protected Quotation published by an away Trading Center. Specifically, when an away Trading Center publishes a Protected Quotation that locks or crosses the displayed price of a resting Displayed Odd Lot Order with a multiple price sliding instruction and the Exchange does not have a Protected Quotation displayed at such order's displayed price, the resting Displayed Odd Lot Order is re-ranked at the Locking Price in the MEMX Book and re-displayed by the System at one Minimum Price Variation lower (higher) than the Locking Price for orders to buy (sell). The Exchange proposes to codify this behavior through both the proposed amendment to Rule 11.8(b)(8), discussed above, and a proposed amendment to Rule 11.6(j)(1)(A)(ii).

The final codification of existing behavior proposed by the Exchange relates to the Exchange's handling of a Displayed Odd Lot Order subject to Rule 201 of Regulation SHO that is subsequently locked or crossed. As set forth in Rule 11.6(j)(2)(A), the Exchange cancels any order with a Non-Displayed instruction subject to Rule 201 of Regulation SHO when the NBB changes

such that the order would be a Locking Quotation or Crossing Quotation. Because Displayed Odd Lot Orders are displayed on the Exchange's proprietary data feed but not on the consolidated market data feeds, the Exchange applies this same logic to Displayed Odd Lot Orders when such orders are subject to Rule 201 of Regulation SHO (*i.e.*, marked short and a Short Sale Circuit Breaker is in effect). Accordingly, the Exchange cancels any Displayed Odd Lot Order subject to Rule 201 of Regulation SHO when the NBB locks or crosses the price of such an order and proposes to add language to this effect to Rule 11.6(j)(2)(A) to codify this behavior.

In addition to codifying the current functionality regarding the handling of Displayed Odd Lot Orders that are locked or crossed by other Trading Centers as described above, the Exchange proposes to add functionality to route such orders in this circumstance to the extent the orders are eligible to be routed. Based on the proposed amendment to Rule 11.8(b)(8), when a Displayed Odd Lot Order is locked or crossed by a Protected Quotation published by another Trading Center and such order is eligible for routing such order will be routed according to the User's instructions. The Exchange believes that a User that has originally designated an order as a routable order (thus willing to remove liquidity from an away Trading Center on entry), instead of having an order of Odd Lot size canceled or price slid, would prefer to have such order routed if it is subsequently locked or crossed by a Protected Quotation published by another Trading Center.

Examples

The below examples illustrate the proposed behavior for a Displayed Odd Lot Order.

Assume the National Best Bid and Offer (“NBBO”) is \$10.00 by \$10.10. An order to sell 5 shares of security ABC is displayed on the MEMX Book at \$10.07 (“Order 1”). Order 1 has a Short Sale instruction, however, security ABC is not currently subject to a Short Sale Circuit Breaker pursuant to Rule 201 of Regulation SHO. There are no other orders to buy or sell security ABC resting on the MEMX Book. An away Trading Center publishes a Protected Bid to buy 100 shares of security ABC at \$10.08, thus updating the NBBO to \$10.08 by \$10.10. The handling of Order 1 will depend on the User's instructions for the order, with three potential outcomes:

- If Order 1 has a multiple price sliding instruction, then the order will

¹³ See MEMX Rule 11.6(j)(1)(A)(i).

¹⁴ See MEMX Rule 11.6(j)(1)(A)(ii) (emphasis added).

be re-priced and ranked to sell at \$10.08 and re-displayed at \$10.09.

- If Order 1 is eligible for routing, then the order will be routed with a limit price of \$10.07 to attempt to execute against the Protected Bid displayed at \$10.08 by the away Trading Center.

- If Order 1 does not have a multiple price sliding instruction and is ineligible for routing, then the order will be cancelled.

Assume the same example as above, however, instead assume that security ABC is currently subject to a Short Sale Circuit Breaker pursuant to Rule 201 of Regulation SHO. If an away Trading Center publishes a Protected Bid to buy 100 shares of security ABC at \$10.08, thus updating the NBBO to \$10.08 by \$10.10, Order 1 will be cancelled. This outcome is the same even if such order has a multiple price sliding instruction or was submitted as a routable order.

Non-Displayed Orders

As set forth in current Rule 11.8(b)(8), when a Non-Displayed Order would be a Crossing Quotation if displayed at the price at which it is ranked (*i.e.*, when an away Trading Center publishes a Protected Quotation that crosses the ranked price of such an order), the Exchange cancels such order in order to prevent a trade-through that would occur if such order were instead executed at its ranked price. The Exchange proposes to maintain this behavior for Non-Displayed Orders (including orders of Round Lot, Mixed Lot and Odd Lot size) that are not routable; however, consistent with the proposed change above regarding routable Displayed Odd Lot Orders, the Exchange proposes to route a Non-Displayed Order in such circumstance if the order is routable. Accordingly, the Exchange proposes to amend Rule 11.8(b)(8) so that a Non-Displayed Order that is eligible for routing will route according to a User's instructions when such order would be a Crossing Quotation of another Trading Center. As is the case today, if a Non-Displayed Order is not eligible for routing and an away Trading Center publishes a Protected Quotation that crosses the ranked price of such order, the order will be canceled.

Examples

The below examples illustrate the proposed behavior for a Non-Displayed Order.

Again, assume the National Best Bid and Offer ("NBBO") is \$10.00 by \$10.10. An order to sell 100 shares of security ABC is resting non-displayed on the MEMX Book at \$10.07 ("Order 2").

Order 2 has a Short Sale instruction, however, security ABC is not currently subject to a Short Sale Circuit Breaker pursuant to Rule 201 of Regulation SHO. There are no other orders to buy or sell security ABC resting on the MEMX Book. An away Trading Center publishes a Protected Bid to buy 100 shares of security ABC at \$10.08, thus updating the NBBO to \$10.08 by \$10.10. The handling of Order 2 will depend on the User's instructions for the order, with two potential outcomes:

- If Order 2 is eligible for routing, then the order will be routed with a limit price of \$10.07 to attempt to execute against the Protected Bid displayed at \$10.08 by the away Trading Center.

- If Order 2 is ineligible for routing, then the order will be cancelled.

Assume the same example as above, however that security ABC is currently subject to a Short Sale Circuit Breaker pursuant to Rule 201 of Regulation SHO. If an away Trading Center publishes a Protected Bid to buy 100 shares of security ABC at \$10.08, thus updating the NBBO to \$10.08 by \$10.10, Order 2 will be cancelled. This outcome is the same even if such order was submitted as a routable order.

Additional Discussion

The Exchange has implemented its System functionality in order to maintain compliance with Regulation NMS, Regulation SHO and other applicable regulations. The functionality described above, both current and proposed, is designed to ensure that the Exchange does not display quotations that would lock or cross Protected Quotations of other Trading Centers nor maintain orders at price levels at which, if executed, would trade through Protected Quotations (or at the NBB in the context of an order subject to Rule 201 of Regulation SHO). Although the exact treatment of orders of Odd Lot size described above is not explicitly required by these regulations, and indeed the Exchange could have adopted a different implementation with respect to certain points, the Exchange does believe that its implementation is consistent with such regulations and the Act, generally. In particular, although Displayed Odd Lot Orders are technically displayed by the System and thus can be accessed by market participants, such orders are not Protected Quotations and are not displayed on consolidated market data feeds. As such, the Exchange's current implementation that it is proposing to codify treats such orders in certain ways similar to the manner in which the Exchange handles Non-Displayed

Orders. Further, the Exchange believes that its proposed new functionality with respect to routing proposes sufficient optionality for Users of the Exchange to determine how they wish to have their Displayed Odd Lot Orders handled in the event such orders are locked or crossed by a Protected Quotation published by an away Trading Center. In particular, by offering the ability to either be canceled, re-priced or routed away from the Exchange, the Exchange believes that Users will be able to select their preferred order handling. The Exchange similarly believes that its proposed new functionality with respect to routing Non-Displayed Orders would enable Users to select their preferred order handling with respect to such orders when an away Trading Center publishes a Protected Quotation that crosses the ranked price of such an order.

Based on a review of the current rules of other exchanges, certain aspects of the Exchange's current handling of Displayed Odd Lot Orders is unique and some exchanges allow such orders to stand their ground when an odd lot order is crossed by a Protected Quotation published by another Trading Center.¹⁵ However, other exchanges have previously maintained similar functionality to instead cancel, route or re-price odd lot orders in such a circumstance. For instance, the Chicago Stock Exchange ("CHX") previously offered functionality approved by the Commission that, like the Exchange's proposed functionality, treated odd lot orders and unexecuted odd lot remainders in a manner similar to non-displayed orders when CHX had no displayed round lots at a particular price level and thus allowed such orders to be cancelled or routed away from CHX.¹⁶ Similarly, NYSE Arca, Inc. ("Arca") previously maintained special functionality to re-price odd lot orders when such orders were resting on the Arca order book based on changes to the protected best bid and offer ("PBBO").¹⁷

¹⁵ See, e.g., NYSE Rule 7.38, which states that round lot, mixed lot and odd lot orders are treated in the same manner on NYSE, and NYSE Rule 7.36(b)(4), which states that NYSE does not adjust the display price of limit orders on NYSE that have been locked or crossed.

¹⁶ See Securities Exchange Act Release No. 60353 (July 21, 2009), 74 FR 37076 (July 27, 2009) (SR-CHX-2009-02) (Order Granting Approval of Proposed Rule Change Related to the Rejection of Undisplayed Odd-lot Orders from the Exchange's Matching System).

¹⁷ See Securities Exchange Act Release No. 85265 (March 7, 2019), 84 FR 9175 (March 13, 2019) (SR-NYSEARCA-2019-08) (Notice of Filing and Immediate Effectiveness of Proposed Changes to Amend Certain Trading Rules including 7.38-E, relating to Odd Lots).

While the Exchange is not aware of another exchange that currently cancels a Displayed Odd Lot Order subject to Rule 201 of Regulation SHO when the NBB locks or crosses the price of such order, other exchanges have implemented functionality to treat displayed odd lots the same way that non-displayed orders are treated in the context of functionality to comply with Regulation SHO.¹⁸ As described above, the Exchange cancels a Displayed Odd Lot Order subject to Rule 201 of Regulation SHO when the NBB locks or crosses the price of such an order to maintain consistent functionality with that used to handle orders resting on the MEMX Book with a Non-Displayed instruction.

With respect to the proposed option to have a resting Displayed Odd Lot Order or Non-Displayed Order that is locked and/or crossed by another Trading Center, as applicable, routed to such Trading Center, the Exchange notes that similar behavior is available on other exchanges with a variety of options and other distinct implementations.¹⁹ Thus, the Exchange believes that its proposed implementation, allowing Displayed Odd Lot Orders and Non-Displayed Orders to route away from the Exchange when locked and/or crossed by a Protected Quotation published by an away Trading Center, is consistent with such features currently offered by other exchanges.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act²⁰ in general, and furthers the objectives of Section 6(b)(5) of the Act²¹ in particular, in that it is

designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The proposed changes to the Exchange's Rules currently are designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. As set forth above, the Exchange's Rules describe all functionality with respect to orders of Round Lot, Mixed Lot and Odd Lot size without distinction because the Exchange generally handles these orders the same. However, in the specific circumstances set forth above, namely when an away Trading Center has published a Protected Quotation that locks or crosses the displayed price of a Displayed Odd Lot Order and the Exchange does not have a Protected Quotation at such price, the Exchange's implementation of logic to comply with Regulation NMS results in the cancellation of such orders unless a User has selected a multiple price sliding instruction, in which case an order is re-priced. The Exchange proposes to codify this behavior in its Rules and to adopt additional functionality that would route such an order that is eligible for routing. Thus, the Exchange will offer three options to Users with Displayed Odd Lot Orders on the MEMX Book. As is the case today, such orders can be repriced pursuant to the Exchange's display-price sliding logic (if entered with a multiple price sliding instruction) or cancelled when locked or crossed by an away Trading Center's Protected Quotation. In addition, the Exchange will offer routing to such away Trading Center to the extent a User submitted a routable order in the first instance. The Exchange believes that this functionality enables Users to elect an order instruction consistent with their intent to execute their orders in the marketplace. The amended functionality would ensure executions at the best available price displayed on another Trading Center, for an order to be returned to a User or to remain on the MEMX Book pursuant to the Exchange's display-price sliding functionality according to the User's instructions. The

Exchange notes that other exchanges have previously maintained functionality specific to orders of odd lot size that resulted in such orders being routed, cancelled or their price adjusted.²² Finally, by limiting this aspect of the proposed change to Displayed Odd Lot Orders that are locked or crossed by the Protected Quotation published by an away Trading Center, the proposal retains existing functionality with respect to the handling of all other orders with a Displayed instruction and remains consistent with the Exchange's general handling of Non-Displayed Orders. Although aspects of the Exchange's implementation of order handling rules for odd lots that are subsequently locked or crossed by a Protected Quotation published by an away Trading Centers are unique compared to existing functionality on other exchanges and the because prohibitions against both locked and crossed markets and trade-throughs do not apply to odd lot orders, pursuant to guidance published by Commission staff, exchanges are permitted to establish their own rules for handling odd-lot orders and the odd-lot portions of mixed-lot orders, and the Exchange believes its implementation is consistent with such guidance and the applicable regulations, generally.²³

The Exchange further believes that routing orders away from the Exchange, whether Displayed Odd Lot Orders or Non-Displayed Orders, when such orders were routable upon initial entry to the Exchange and such orders would otherwise be cancelled is consistent with the Act, as it avoids unnecessary cancellations of orders that could instead be executed by away Trading Centers. Further, as described above, the Exchange notes that similar behavior is in place on other exchanges.²⁴

For the reasons set forth above, the Exchange believes the proposal promotes just and equitable principles of trade, fosters cooperation and coordination with persons engaged in facilitating transactions in securities, removes impediments to and perfects the mechanism of a free and open market and a national market system, and, in general, protects investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in

¹⁸ See Securities Exchange Act Release No. 75467 (July 16, 2015), 80 FR 43515, 43521 (July 22, 2015) (SR-NYSEARCA-2015-58). In describing proposed functionality to re-price sell short orders of odd lot size in circumstances where round lot orders stand their ground, the following description was used: "because Rule 201 refers to displayed in the context of an order displayed via the public data feeds, for the purposes of proposed Rule 7.16P the Exchange proposes to process all sell short odd lot orders the same as sell short orders that are ranked Priority 3—Non-Display Orders. . . ."

¹⁹ See, e.g., Cboe EDGX Rule 11.6(n)(2), which defines the "Super Aggressive" instruction as an instruction that an EDGX user may use to direct EDGX to route an order if an away Trading Center locks or crosses the limit price of an order resting on EDGX; further, the Super Aggressive instruction may be applied to routable orders posted to the EDGX Book with remaining size of an Odd Lot. See also Nasdaq Rules 4758(a)(1)(A)(iii) and (viii), which describe two routing strategies that route orders (including displayed odd lot orders and non-displayed orders) resting on the Nasdaq order book when such orders are locked or crossed by an away market center.

²⁰ 15 U.S.C. 78f(b).

²¹ 15 U.S.C. 78f(b)(5).

²² See *supra* notes 16–18.

²³ See Response No. 7.03 in "Responses to Frequently Asked Questions Concerning Rule 611 and Rule 610 of Regulation NMS," Division of Trading and Markets, dated June 8, 2007.

²⁴ See *supra* note 19.

any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. On the contrary, certain of the proposed changes are intended to codify current behavior on the Exchange related to the Exchange's implementation of applicable regulations and the other proposed changes are intended to provide additional optionality to the User, including the routing of orders that are already resting on the MEMX Book to away Trading Centers if such orders were routable upon initial entry to the Exchange. Thus, to the extent the change is intended to improve transparency regarding the Exchange's handling of Displayed Odd Lot Orders, such proposal does not have any direct impact on the competitive environment. The proposed change to functionality on the Exchange that would route certain orders resting on the MEMX Book is designed to encourage Users to direct their orders to the Exchange, however, while the change is competitive, the Exchange does not believe the proposed change will result in any burden on intermarket competition as it is a minor change to already available functionality. Further, the proposed new functionality is similar to functionality offered by other exchanges and would also result in additional volume on away Trading Centers instead of the Exchange, to the extent such orders are executed when routed away from the Exchange. The proposed changes to the Exchange's Rules also promote intramarket competition because they will facilitate the execution of orders that would otherwise remain unexecuted, thereby increasing the efficient functioning of the Exchange. All participants on the Exchange can utilize each of the potential features that will impact the handling of their Displayed Odd Lot Orders and Non-Displayed Orders in the event such orders are resting on the Exchange at a price that is subsequently locked or crossed by a Protected Quotation displayed by an away Trading Center. Therefore, the Exchange does not believe the proposed rule change will result in any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act²⁵ and Rule 19b-4(f)(6) thereunder.²⁶ Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²⁷ and subparagraph (f)(6) of Rule 19b-4 thereunder.²⁸

A proposed rule change filed under Rule 19b-4(f)(6)²⁹ normally does not become operative prior to 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)³⁰ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative upon filing. The Exchange believes a waiver is consistent with the protection of investors and the public interest because, among other things, it would allow the Exchange to route certain odd lot orders as soon as practicable, thus helping market participants to obtain timely executions even if not on the Exchange. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because the proposed rule change does not raise any new or novel issues. Among other things, the proposed order handling functionalities are similar to the past practices of other exchanges. Accordingly, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing so that the benefits of this

²⁶ 17 CFR 240.19b-4(f)(6).

²⁷ 15 U.S.C. 78s(b)-(3)(A).

²⁸ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

²⁹ 17 CFR 240.19b-4(f)(6).

³⁰ 17 CFR 240.19b-4(f)(6)(iii).

proposed rule change can be realized immediately.³¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)³² to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-MEMX-2021-06 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to File Number SR-MEMX-2021-06. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public

³¹ For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

³² 15 U.S.C. 78s(b)(2)(B).

Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-MEMX-2021-06 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³³

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: 2:00 p.m. on Thursday, May 13, 2021.

PLACE: The meeting will be held via remote means and/or at the Commission's headquarters, 100 F Street NE, Washington, DC 20549.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters also may be present.

In the event that the time, date, or location of this meeting changes, an announcement of the change, along with the new time, date, and/or place of the meeting will be posted on the Commission's website at <https://www.sec.gov>.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (6), (7), (8), 9(B) and (10) and 17 CFR 200.402(a)(3), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9)(ii) and (a)(10), permit consideration of the scheduled matters at the closed meeting.

The subject matter of the closed meeting will consist of the following topics:

Institution and settlement of injunctive actions;
Institution and settlement of administrative proceedings;
Resolution of litigation claims; and
Other matters relating to examinations and enforcement proceedings.

At times, changes in Commission priorities require alterations in the scheduling of meeting agenda items that may consist of adjudicatory, examination, litigation, or regulatory matters.

CONTACT PERSON FOR MORE INFORMATION: For further information; please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551-5400.

Dated: May 6, 2021.

Vanessa A. Countryman,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91759; File No. SR-CboeEDGA-2021-010]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a Fee Schedule To Establish Fees for Industry Members Related to the National Market System Plan Governing the Consolidated Audit Trail

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 21, 2021, Cboe EDGA Exchange, Inc. ("Exchange" or "EDGA") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the "Exchange" or "Cboe EDGA") proposes to adopt a fee schedule to establish fees for Industry Members related to the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan").³ The text of the

proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/edga/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under the CAT NMS Plan, the Operating Committee of the Consolidated Audit Trail, LLC ("Company") ("Operating Committee") has discretion to establish funding for the Company to operate the CAT, including establishing fees that the Participants will pay, and establishing fees for Industry Members that will be implemented by the Participants.⁴ The Operating Committee has filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposal to amend the CAT NMS Plan to implement a revised funding model for the CAT ("CAT Funding Model") and to establish a fee schedule for Participant CAT fees ("Proposed CAT Fee Plan Amendment").⁵ The Proposed CAT Fee Plan Amendment describes the CAT Funding Model in detail, including the proposal to charge Industry Members CAT fees. The Participants are required to file with the SEC under Section 19(b) of the Exchange Act any CAT fees applicable to Industry Members that the

the CAT Compliance Rule. See Rules 4.5 through 4.17 of the Exchange's Rulebook. The Exchange and each of its affiliated exchanges (Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., Cboe C2 Exchange, Inc., Cboe Exchange, Inc., and Cboe EDGX Exchange, Inc.) are filing to adopt the CAT fee schedule.

⁴ Section 11.1(b) of the CAT NMS Plan.

⁵ See Securities Exchange Act Rel. No. 91555 (Apr. 14, 2021), 86 FR 21050 (April 21, 2021).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in

³³ 17 CFR 200.30-3(a)(12).

Operating Committee approves.⁶ Accordingly, the purpose of this proposed rule change is to implement the required fee schedule provisions for CAT fees applicable to Industry Members that are Members in accordance with the CAT Funding Model. The fee schedule provisions will become operative upon the SEC's approval of the Proposed CAT Fee Plan Amendment.

(1) CAT Funding Model

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, the CAT fees applicable to Participants and Industry Members for the relevant quarter would be designed to cover the total CAT costs associated with developing, implementing and operating the CAT for the relevant quarter ("Total CAT Costs").⁷ The CAT Funding Model would implement a bifurcated funding model, where these costs would be borne by both Participants and Industry Members. Industry Members as a group would pay 75% of the Total CAT Costs (the "Industry Member Allocation"), and Participants as a group would pay 25% of the Total CAT Costs (the "Participant Allocation").⁸

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, each Industry Member will pay a CAT fee that is calculated by multiplying each Industry Member's message traffic percentage of the total message traffic of all Industry Members during the relevant time period by the Industry Member Allocation, subject to certain market maker message traffic discounts, a Minimum Industry Member CAT Fee and a Maximum Industry Member CAT Fee. Each Industry Member that is an Options Market Maker will have a discount based on the options trade-to-quote ratio applied to its Options Market Maker message traffic when calculating that Industry Member's message traffic, and each Industry Member that is an Equity Market Maker will have a discount based on the NMS Stock trade-to-quote ratio applied to its Equity Market Maker message traffic when calculating that Industry Member's message traffic. In addition, each Industry Member will pay a Minimum Industry Member CAT

Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic. Furthermore, an Industry Member's CAT fee would be subject to the Maximum Industry Member CAT Fee. The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic. Each of these aspects of the Industry Member CAT fee are discussed in more detail below.

(A) CAT Fees for Both Industry Members and Participants

Under the CAT Funding Model, both Participants and Industry Members would contribute to the funding of the CAT by paying a CAT fee.⁹ As permitted by Rule 613, the CAT NMS Plan requires Industry Members to pay a CAT fee. Rule 613(a)(1)(vii)(D) contemplates Industry Members contributing to the payment of CAT costs. Specifically, this provision requires the CAT NMS Plan to address "[h]ow the plan sponsors propose to fund the creation, implementation, and maintenance of the consolidated audit trail, including the proposed allocation of such estimated costs among the plan sponsors, and between the plan sponsors and members of the plan sponsors."

In addition, as approved by the SEC, the CAT NMS Plan specifically contemplates CAT fees to be paid by both Industry Members and Participants. Section 11.1(b) states that "the Operating Committee shall have discretion to establish funding for the Company, including: (i) establishing fees that the Participants shall pay; and (ii) establishing fees for Industry Members that shall be implemented by the Participants."¹⁰ The Commission stated in approving the CAT NMS Plan the following:

The Commission believes that the proposed funding model reflects a reasonable exercise of the Participants' funding authority to recover the Participants' costs

related to the CAT. The CAT is a regulatory facility jointly owned by the Participants and, as noted above, the Exchange Act specifically permits the Participants to charge members fees to fund their self-regulatory obligations. The Commission further believes that the proposed funding model is designed to impose fees reasonably related to the Participants' self-regulatory obligations because the fees would be directly associated with the costs of establishing and maintaining the CAT, and not unrelated SRO services.¹¹

In its recent amendments to the CAT NMS Plan, the SEC reaffirmed the ability for the Participants to charge Industry Members a CAT fee. Specifically, the SEC noted that the amendments were not intended to change the basic funding structure for the CAT, which may include fees established by the Operating Committee, and implemented by the Participants, to recover from Industry Members the costs and expenses incurred by the Participants in connection with the development and implementation of the CAT.¹²

Finally, as noted by the SEC, the CAT "substantially enhance[s] the ability of the SROs and the Commission to oversee today's securities markets,"¹³ thereby benefitting all market participants. As such, both Participants and Industry Members should contribute to covering the cost of the CAT.

(B) 75%/25% Allocation between Industry Members and Participants

The CAT NMS Plan as approved by the Commission provides the Operating Committee with discretion to establish CAT fees to be paid by Participants and Industry Members. The CAT Funding Model as set out in the Proposed CAT Fee Plan Amendment contemplates allocating CAT costs between Participants and Industry Members to permit the calculation of CAT fees based on market share for Participants and based on message traffic for Industry Members.¹⁴ Under the CAT Funding Model as proposed, Industry Members as a group would pay 75% of the Total CAT Costs (the "Industry Member

¹¹ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696, 84794 (Nov. 23, 2016) ("CAT NMS Plan Approval Order").

¹² Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31329 (May 22, 2020) ("Financial Accountability Release").

¹³ Securities Exchange Act Rel. No. 67457 (Jul. 18, 2012), 77 FR 45722, 45726 (Aug. 1, 2012).

¹⁴ See Proposed CAT Fee Plan Amendment at 12–16. Note that, in the funding model set forth in Article XI of the CAT NMS Plan ("Original Funding Model"), costs were allocated between Execution Venues and certain Industry Members, whereas the CAT Funding Model would allocate costs between Participants and Industry Members.

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ Note that certain costs would be excluded from the Historical CAT Assessment Costs, as discussed in more detail below. See Proposed CAT Fee Plan Amendment at 4, 56–57.

⁸ Each Industry Member and Participant CAT Reporter would be required to pay CAT fees established via the CAT Funding Model. CAT Reporting Agents acting in their role as such would not have an obligation to pay CAT fees. See Proposed CAT Fee Plan Amendment at 4.

⁹ Proposed CAT Fee Plan Amendment at 10–11.

¹⁰ See also Sections 11.1(c), 11.2(c), and 11.3(a) and (b) of the CAT NMS Plan.

Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).¹⁵ As discussed in more detail below, the Industry Member Allocation of 75% of the Total CAT Costs is included in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule for the Consolidated Audit Trail Funding Fees. In each such paragraph, the calculation of the Industry Member CAT fees is based on 75% of the Total CAT Costs.

(C) Message Traffic

The Industry Member Allocation would be allocated to each Industry Member based on message traffic.¹⁶ Each Industry Member CAT Reporter would pay a CAT fee that is calculated by multiplying each Industry Member’s percentage of the total message traffic of all Industry Members each quarter by the Industry Member Allocation, subject to certain market making discounts, Minimum Industry Member CAT Fees, and Maximum Industry Member CAT Fees. To implement the use of message traffic in the calculation of Industry Member CAT fees, the Exchange proposes to describe the use of message traffic in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule. In each such paragraph, the Industry Member CAT fees are calculated based on Industry Members’ message traffic in the CAT.

As set out in the Proposed CAT Fee Plan Amendment,¹⁷ message traffic would be calculated based on Industry Members’ Reportable Events reported to the CAT as defined in the CAT Reporting Technical Specifications for Industry Members (“IM Reporting Tech Specs”) as amended from time to time.¹⁸ The Reportable Events may vary over time if the IM Reporting Tech Specs are amended.¹⁹ However, Reportable Events

in the current IM Reporting Tech Specs that will be counted as message traffic include, but are not limited to, such events as the New Order Event, the Order Route Event and the Trade Event. In addition, message traffic will not include reporting activity related to Customer information as set forth in the CAT Reporting Customer and Account Technical Specifications for Industry Members.²⁰

(D) Market Maker Discounts

As set out in the Proposed CAT Fee Plan Amendment, the Operating Committee recognized that treating Options Market Maker message traffic and Equity Market Maker message traffic in the same way as other message traffic for purposes of calculating Industry Member CAT fees may result in an undue or inappropriate burden on competition or may lead to a reduction in market quality.²¹ For example, charging Industry Members on the basis of message traffic may impact market makers disproportionately because of their continuous quoting obligations. Moreover, in the context of Options Market Makers, message traffic would include bids and offers for every Listed Options strikes and series. Accordingly, the Operating Committee determined to discount Options Market Maker message traffic by the trade-to-quote ratio for Listed Options when calculating message traffic for Options Market Makers, and to discount Equity Market Maker message traffic by the trade-to-quote ratio for NMS Stocks when calculating message traffic for Equity Market Makers. The message traffic of Options Market Makers and Equity Market Makers, as discounted, would be counted as part of the total message traffic for all Industry Members. The practical effect of applying such discounts for market making activity would be to lower the CAT fees for Options Market Makers and Equity Market Makers.

(I) Options Market Maker Discount

Each Industry Member that is an Options Market Maker²² would have a

discount based on the options trade-to-quote ratio applied to its options market making message traffic when calculating that Industry Member’s message traffic to prevent a potentially disproportionate effect on options market making due to such message traffic.²³ Specifically, for each Options Market Maker, a discount would be applied to (1) all message traffic reported to the CAT by the Options Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered, regardless of where the order is ultimately routed or executed;²⁴ and (2) all message traffic for which a “quote sent time” is reported by an Options Exchange on behalf of the given Options Market Maker.

The relevant trade-to-quote ratio for the Options Market Maker discount would be calculated each quarter based on the prior quarter’s SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the securities information processors (“SIP”). As an example, the trade-to-quote ratio for Listed Options for the fourth quarter of 2020 was 0.01%.

Accordingly, each Options Market Maker’s discounted message traffic count would be calculated by multiplying its message traffic by the options trade-to-quote ratio. The Options Market Maker’s CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁵ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Options Market Maker discount, the Exchange proposes

dealer registered with an exchange for the purpose of making markets in options contracts traded on the exchange.”

²³ See Proposed CAT Fee Plan Amendment at 30–32.

²⁴ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Options Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by an Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 31.

²⁵ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Options Market Makers. See Proposed CAT Fee Plan Amendment at 32.

¹⁵ For additional discussions regarding the 75%–25% allocation, see Proposed CAT Fee Plan Amendment at 16–20.

¹⁶ For additional discussions regarding the use of message traffic for calculating Industry Member CAT fees, see Proposed CAT Fee Plan Amendment at 21–22.

¹⁷ See Proposed CAT Fee Plan Amendment at 26–27.

¹⁸ The CAT Reporting Technical Specifications for Industry Members are available at www.catnmsplan.com.

¹⁹ Due to the Phased Reporting approach, all Reportable Events will not be reported until all Industry Members are reporting all Reportable Events to the CAT. For example, Phase 2d CAT Reporting is scheduled for December 2021, and Small Industry Non-OATS Reporters are not required to report until December 2021. In addition, certain Reportable Events, such as simple options manual orders and OTC link messages, are not required to be reported until later in the Phased Reporting. For a detailed description of such Reportable Events, see CAT Reporting Technical Specifications for Industry Members (available at

www.catnmsplan.com). For the Industry Member CAT reporting timeline, see, e.g., FINRA Rule 6895(c). CAT costs will be allocated based on the Reportable Events reported to the CAT in any relevant quarter, regardless of whether all Industry Members are reporting to the CAT or all Reportable Events are required to be reported to the CAT for a relevant quarter. See Proposed CAT Fee Plan Amendment at 27.

²⁰ The CAT Reporting Customer and Account Technical Specifications for Industry Members are available at www.catnmsplan.com.

²¹ See Proposed CAT Fee Plan Amendment at 27–30.

²² Section 1.1 of the CAT NMS Plan. Rule 4.5(ee) defines an “Options Market Maker” as “a broker-

to add paragraph (g)(1) to the fee schedule. Paragraph (g)(1) would state that “[w]hen calculating the message traffic of an Industry Member that is an Options Market Maker, the Options Market Maker’s market making message traffic would be discounted by multiplying its Listed Options market making message traffic by the Listed Options trade-to-quote ratio.” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Options Market Maker message traffic for each of the four Industry Member CAT fees.

(II) Equity Market Maker Discount

Similarly, each Industry Member that is an equity market maker in NMS Stocks (“Equity Market Maker”) would have a discount based on the NMS Stock trade-to-quote ratio applied to its market making message traffic in NMS Stocks when calculating that Industry Member’s message traffic to prevent a potentially disproportionate effect on market making in NMS Stocks.²⁶ Specifically, for each Equity Market Maker, a discount would be applied to all message traffic reported to the CAT by the Equity Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered,²⁷ regardless of where the order is ultimately routed or executed.²⁸

The relevant trade-to-quote ratio for the Equity Market Maker discount would be calculated each quarter based on the prior quarter’s SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the SIP. As an example, the trade-to-quote ratio for NMS Stocks for the fourth quarter of 2020 was 4.77%.

The Equity Market Maker CAT fee would be calculated in the same manner

as the Options Market Maker CAT fee. Each Equity Market Maker’s discounted message traffic count would be calculated by multiplying its message traffic by the NMS Stock trade-to-quote ratio. The Equity Market Maker CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁹ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Equity Market Maker discount, the Exchanges proposes to add paragraph (g)(2) to the fee schedule. Paragraph (g)(2) would state that “[w]hen calculating the message traffic of an Industry Member that is an equity market maker in NMS Stocks (“Equity Market Maker”), the Equity Market Maker’s market making message traffic would be a [sic] discounted by multiplying its market making message traffic in NMS Stocks by the NMS Stock trade-to-quote ratio.” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Equity Market Maker message traffic for each of the four Industry Member CAT fees.

(E) Minimum Industry Member CAT Fee

Each Industry Member would be required to pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic.³⁰ All Industry Members required to report to the CAT, including those that have not yet begun to report to the CAT due to the phased implementation schedule for the CAT, would be subject to the Minimum Industry Member CAT Fee. If any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage.³¹

²⁹ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Equity Market Makers. See Proposed CAT Fee Plan Amendment at 33.

³⁰ For additional discussions regarding the Minimum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 33–35.

³¹ Options Market Makers and Equity Market Makers will be required to pay the Minimum

To implement the Minimum Industry Member CAT Fee, the Exchange proposes to add paragraph (h) to the fee schedule. Proposed paragraph (h)(1) of the fee schedule would state that “[t]he Minimum Industry Member CAT Fee is \$125 per quarter.” Proposed paragraph (h)(2) of the fee schedule would state that “[i]f any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage (“Minimum Industry Member CAT Fee Re-Allocation”).” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule describes the Minimum Industry Member CAT Fee Re-Allocation for each of the four Industry Member CAT fees.

(F) Maximum Industry Member CAT Fee

An Industry Member’s CAT fee also would be subject to a Maximum Industry Member CAT Fee.³² The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member’s fee is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member’s percentage of total message traffic.

To implement the Maximum Industry Member CAT Fee, the Exchange proposes to add proposed paragraph (f) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (f)(1) would state that “[t]he Maximum Industry Member CAT Fee for each quarter is 8% of the total CAT costs for the relevant quarter.” In addition, proposed paragraph (f)(2) would state that:

Industry Member CAT Fee if their quarterly CAT fee calculated with the market maker discounts is less than \$125 per quarter.

³² For additional discussions regarding the Maximum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 35–37.

²⁶ See Proposed CAT Fee Plan Amendment at 32–33.

²⁷ Note that Equity Market Makers do not have a quote sent time exemption comparable to the Options Market Maker quote sent time exemption, as discussed above.

²⁸ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Equity Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by the Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 32.

If an Industry Member's CAT Fee that is calculated pursuant to paragraph (a)(2), (b)(2), (c)(2), (d)(2), as applicable, without reference to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation, is greater than the Maximum Industry Member CAT Fee, then the Industry Member will be subject to the Maximum Industry Member CAT Fee. If any Industry Member is subject to the Maximum Industry Member CAT Fee, then any excess amount which the Industry Member otherwise would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members, including any Industry Member that is subject to the Maximum Industry Member CAT Fee or subject to the Minimum Industry Member CAT Fee in accordance with their message traffic percentage ("Maximum Industry Member CAT Fee Re-Allocation").

Furthermore, proposed paragraphs (a)(1), (b)(1), (c)(1) and (d)(1) would state that an Industry Member's CAT fee calculated pursuant to (a)(1), (b)(1), (c)(1) and (d)(1) would include any applicable Maximum Industry Member CAT Fee Re-Allocation. Finally, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) would state that an Industry Member's CAT fee calculated pursuant to paragraph (a)(2), (b)(2), (c)(2) or (d)(2) is subject to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation.

(G) Total CAT Costs

As set out in the Proposed CAT Fee Plan Amendment, the Total CAT Costs for the year would be comprised of all fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during this period.³³

For purposes of the Historical CAT Assessment, the Total CAT Costs would be \$193,273,342, as set forth in the Proposed CAT Fee Plan Amendment. Accordingly, the quarterly CAT fee for the Historical CAT Assessment will be calculated based on costs of \$36,238,752, which is 1/4th of 75% of the Total CAT Costs. This amount is set forth in proposed paragraph (b)(2) of the fee schedule.

In addition, proposed paragraph (i) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule describes the Total CAT Costs to be used in calculating the Period 3 CAT Fee, the Period 4 CAT Fee and the Quarterly CAT Fees. Proposed paragraph (i)(1) of the fee schedule would state that "[t]he Period 3 CAT Costs shall be the total CAT costs set

forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2021." Proposed paragraph (i)(2) of the fee schedule would state that "[t]he Period 4 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2022." Proposed paragraph (i)(3) of the fee schedule would state the following with regard to the Quarterly CAT Fees:

For purposes of the Quarterly CAT Fee, the budgeted Total CAT Costs for the relevant year shall be the total CAT costs set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan for the relevant year. The budgeted Total CAT Costs for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted budgeted costs for the CAT will be used in calculating the remaining CAT fees for that year.

(2) Proposed CAT Fees

The Exchange proposes to charge its Industry Members fees related to CAT costs. To implement these CAT fees, the Exchange proposes to add a section entitled "Consolidated Audit Trail Funding Fees" to its fee schedule, and to describe the CAT fees in that section.

(A) Historical CAT Assessment (for Pre-Period 1, Period 1 and Period 2)

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee determined to charge Industry Members a historical assessment ("Historical CAT Assessment") to recover certain CAT costs incurred prior to January 1, 2021 ("Historical CAT Assessment Costs").³⁴ Specifically, as detailed in the Proposed CAT Fee Plan Amendment, the Historical CAT Assessment is intended to collect from Industry Members 75% of certain costs incurred through June 22, 2020, the effective date for the Financial Accountability Milestones,³⁵ certain costs from Period 1 of the Financial Accountability Milestones (which covered the period from June 22, 2020–July 31, 2020) and certain costs from Period 2 of the Financial Accountability Milestones (which covered the period from August 1, 2020–December 31, 2020). The Total CAT Costs, excluding Excluded Costs

(as defined below) and certain costs related to the conclusion of the relationship with Theysys CAT, LLC is \$193,273,342. The Historical CAT Assessment is designed to recover 75% of these CAT costs. Accordingly, the Historical CAT Assessment Costs would be \$144,955,006.

Using the Historical CAT Assessment Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Historical CAT Assessment owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover the Historical CAT Assessment Costs over a period of four calendar quarters, commencing upon the SEC's approval of the Historical CAT Assessment. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic (subject to the market making discounts and the maximum fee). The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by \$36,238,752, which is 1/4th of the Historical CAT Assessment Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation, and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Historical CAT Assessment in the first quarter after SEC approval of the Historical CAT Assessment, based on CAT Data from the quarter in which the SEC approved the CAT fees.

To implement the Historical CAT Assessment, the Exchange proposes to add proposed paragraph (b) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (b) would state that "each Industry Member shall pay an Historical CAT Assessment in the amount of the greater of the following each quarter for four quarters commencing upon approval of the Historical CAT Assessment by the SEC: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the

³⁴ See Proposed CAT Fee Plan Amendment at 55–60.

³⁵ See Section 11.6 of the CAT NMS Plan; and Financial Accountability Release.

³³ See Proposed CAT Fee Plan Amendment at 50–51.

prior quarter's message traffic by \$36,238,752 (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

In accordance with Section 11.6(b) of the CAT NMS Plan and as provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 1. Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. As indicated by the Participants' Quarterly Progress

Report,³⁶ Initial Industry Member Core Equity and Option Reporting was completed on schedule by July 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020.

As provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 2. Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. As indicated by the Participants' Quarterly Progress Report,³⁷ Full Implementation of Core

Equity Reporting was completed on schedule by December 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. Accordingly, proposed paragraph (b) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Historical CAT Assessment "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Historical CAT Assessment:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	\$36,238,752	Quarter of SEC approval of Historical CAT Assessment.	1st quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #2	36,238,752	1st quarter after SEC approval of Historical CAT Assessment.	2nd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #3	36,238,752	2nd quarter after SEC approval of Historical CAT Assessment.	3rd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #4	36,238,752	3rd quarter after SEC approval of Historical CAT Assessment.	4th quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

(B) Period 3 CAT Fee

Per the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2021 through December 31, 2021, referred to as the Period 3 CAT Fee.³⁸ The Total CAT Costs incurred from January 1, 2021 through December 31, 2021 ("Period 3 CAT Costs") will be calculated at the completion of 2021. Specifically, the Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

Using the Period 3 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 3 CAT Fee owed by each Industry Member in accordance with the CAT Funding

Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 3 CAT Costs over a period of four calendar quarters, commencing in 2022. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message by 1/4th of 75% of the Period 3 CAT Costs traffic (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated

using CAT Data from the prior quarter. Industry Members would be required to commence paying the Period 3 CAT Fee in the second quarter of 2022, based on CAT Data from the first quarter of 2022.

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2021 the Total CAT Costs for 2021 to be used in calculating the quarterly Period 3 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. Such financial statements are required to be prepared in accordance with Section 9.2 of the CAT NMS Plan, including requirements related to compliance with GAAP, auditing by an independent public accounting firm and making the statements publicly available.

To implement the Period 3 CAT Fee, the Exchange proposes to add proposed

³⁶ Q3 2020 Quarterly Progress Report (Oct. 30, 2020) (available at www.catnmsplan.com).

³⁷ Q4 2020 Quarterly Progress Report (Jan. 29, 2021) (available at www.catnmsplan.com).

³⁸ See Proposed CAT Fee Plan Amendment at 60–63.

paragraph (c) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (c) would state that “each Industry Member shall pay a Period 3 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2022: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the prior quarter’s message traffic by 1/4th of 75% of the Period 3 Total CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum

Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

Per the Proposed CAT Fee Plan Amendment, the proposed Period 3 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 3. Period 3 began on January 1, 2021 and is expected to conclude on December 31, 2021, the date of Full Availability and Regulatory Utilization of Transactional Database Functionality. As discussed above, the Period 3 CAT Costs to be recovered via the Period 3 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the

CAT during the period from January 1, 2020 through December 31, 2021. The collection of the full amount of the Period 3 CAT Fee will depend upon achievement of Full Availability and Regulatory Utilization of Transactional Database Functionality by December 31, 2021; if not, the amount of the Period 3 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (c) of the “Consolidated Audit Trail Funding Fees” section of its fee schedule would state that Industry Members will be required to pay the Period 3 CAT Fee “[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan.”

The following chart summarizes the imposition of the Period 3 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 3 CAT Costs ³⁹ .	CAT Data from first quarter of 2022 ...	2nd quarter of 2022.
Quarterly CAT Fee #2	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from second quarter of 2022.	3rd quarter of 2022.
Quarterly CAT Fee #3	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from third quarter of 2022 ..	4th quarter of 2022.
Quarterly CAT Fee #4	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from fourth quarter of 2022	1st quarter of 2023.

(C) Period 4 CAT Fee

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2022 through December 30, 2022, referred to as the Period 4 CAT Fee.⁴⁰ The Total CAT Costs incurred from January 1, 2022 through December 30, 2022 (“Period 4 CAT Costs”) will be calculated at the completion of 2022. Specifically, the Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

Using the Period 4 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 4 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 4 CAT Costs over a period of four calendar quarters, commencing in 2023. Each quarter, each Industry Member will pay the greater of

the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member’s message traffic would be calculated using CAT Data from the prior quarter. Industry Members will be required to commence paying the Period 4 CAT Fee in the second quarter of 2023, based on data from the first quarter of 2023.

To implement the Period 4 CAT Fee, the Exchange proposes to add proposed paragraph (d) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (d) would state that “each Industry Member shall pay a Period 4 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum

Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the prior quarter’s message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2022 the Total CAT Costs for 2022 to be used in calculating the quarterly Period 4 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. As noted above, such financial statements are required to be prepared in accordance with the requirements set forth in Section 9.2 of the CAT NMS Plan.

The Exchange indicates that the proposed Period 4 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 4. Period 4 is expected to begin

³⁹ The Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements of the Company.

⁴⁰ See Proposed CAT Fee Plan Amendment at 63–65.

on January 1, 2022 and conclude on December 30, 2022, the date of Full Implementation of CAT NMS Plan Requirements. As discussed above, the Period 4 CAT Costs to be recovered via the Period 4 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period

from January 1, 2022 through December 30, 2022. The collection of the full amount of the Period 4 CAT Fee will depend upon achievement of Full Implementation of CAT NMS Plan Requirements by December 30, 2022; if not, the amount of the Period 4 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section

11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (e) of the “Consolidated Audit Trail Funding Fees” section of its fee schedule would state that Industry Members will be required to pay the Period 4 CAT Fee “[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan.”

The following chart summarizes the imposition of the Period 4 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 4 CAT Costs ⁴¹ .	CAT Data from first quarter of 2023 ...	2nd quarter of 2023.
Quarterly CAT Fee #2	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from second quarter of 2023.	3rd quarter of 2023.
Quarterly CAT Fee #3	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from third quarter of 2023 ..	4th quarter of 2023.
Quarterly CAT Fee #4	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from fourth quarter of 2023	1st quarter of 2024.

(D) Quarterly CAT Fee—Beginning 2023

As provided in the Proposed CAT Fee Plan Amendment, to recover the costs of the CAT going forward beginning in 2023, the Operating Committee determined to charge Industry Members an ongoing quarterly CAT fee calculated based on the allocation of Total CAT Costs pursuant to the CAT Funding Model (“Quarterly CAT Fee”).⁴² The Operating Committee will use the costs set forth in the annual operating budget as the Total CAT Costs in the calculation of the Quarterly CAT Fee. Specifically, the Total CAT Costs budgeted for the upcoming year for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. Using these estimated Total CAT Costs, the Operating Committee will calculate the Quarterly CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. As provided in the Proposed CAT Fee Plan Amendment, the Operating Committee proposes to seek to recover the budgeted Total CAT Costs over the course of the year. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic.⁴³ The message traffic fee

would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member’s message traffic would be calculated using data from the prior calendar quarter. The Exchange proposes to commence charging this CAT fee in the second quarter of 2023, based on CAT Data from the first quarter of 2023.

To implement the Quarterly CAT Fee, the Exchange proposes to add proposed paragraph (a) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (a) would state that “[e]ach Industry Member shall pay a Quarterly CAT Fee in the amount of the greater of the following each quarter commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the

prior quarter’s message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the relevant year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

The Exchange understands the Operating Committee will announce at the beginning of the relevant year via a CAT alert the budgeted Total CAT Costs to be used in calculating the Quarterly CAT Fees for that year. The budgeted Total CAT Costs will be the costs set forth in the annual operating budget for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. As discussed above, CAT costs would include, but not be limited to, Plan Processor costs, insurance costs, third-party support costs and an operational reserve. As required by Section 11.1(c) of the CAT NMS Plan, any surpluses collected will be treated as an operational reserve to offset future fees and will not be distributed to the Participants as profits.⁴⁴ In addition, to address potential changes in the budget during the year, the total budgeted costs for the CAT for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted total budgeted costs for the CAT will be used in calculating

⁴¹ The Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements for the Company.

⁴² See Proposed CAT Fee Plan Amendment at 65–68.

⁴³ To the extent that any two or more of the four categories of Industry Member CAT fees (*i.e.*, the Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and the Quarterly CAT Fee) are due during the same quarter, any Industry Member obligated to pay one or more categories of fees is required to pay each category of fee for that quarter. For example, if an Industry Member would be subject to the Minimum Industry Member CAT Fee for the Period 4 CAT Fee and the Minimum

Industry Member CAT Fee for the Quarterly CAT Fee during the same quarter, the Industry Member would be required to pay two minimum \$125 fees that quarter for a total of \$250. As another example, suppose that an Industry Member owed a CAT fee (other than the minimum fee of \$125) for both the Historical CAT Assessment and the Period 3 CAT Fee, the Industry Member would be required to pay both fees that quarter. See Proposed CAT Fee Plan Amendment at 66.

⁴⁴ CAT NMS Plan Approval Order at 84792.

the remaining quarterly CAT fees for that year.

The following chart summarizes the imposition of the Quarterly CAT Fee

each year commencing in 2023 and continuing each year thereafter:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from first quarter of the relevant year.	2nd quarter of the relevant year.
Quarterly CAT Fee #2	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from second quarter of the relevant year.	3rd quarter of the relevant year.
Quarterly CAT Fee #3	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from third quarter of the relevant year.	4th quarter of the relevant year.
Quarterly CAT Fee #4	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from fourth quarter of the relevant year.	1st quarter of year following the relevant year.

(3) Time and Manner of Payment

The Exchange proposes to add paragraph (e) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule to describe the time and manner of the payment of the Industry Member CAT fees as provided in the Proposed CAT Fee Plan Amendment.⁴⁵ Proposed paragraph (e)(1) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with an invoice setting forth the Industry Member’s Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and/or Quarterly CAT Fee (as applicable) (collectively, “CAT Fees”) for each payment period.” Proposed paragraph (e)(2) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with one invoice each payment period for its CAT Fees as determined pursuant to paragraph (a)–(d) above, regardless of whether the Industry Member is a member of multiple self-regulatory organizations.” Proposed paragraph (e)(3) would state that “[e]ach Industry Member will pay its CAT Fees to the Consolidated Audit Trail, LLC via the centralized system for the collection of CAT Fees established by the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” Finally, proposed paragraph (e)(4) would require that Industry Members pay their CAT Fees within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due, such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (A) the Prime Rate plus 300 basis points, or (B) the

maximum rate permitted by applicable law.⁴⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,⁴⁷ which requires, among other things, that the Exchange’s rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,⁴⁸ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,⁴⁹ which requires that the Exchange’s rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this proposed rule change to implement

the Industry Member CAT fees included in the CAT Funding Model approved by the Operating Committee. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”⁵⁰ To the extent that this proposal implements the Plan, and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

The Exchange further notes that, as provided in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed Industry Member CAT fees comply with the requirements of the Exchange Act and the CAT NMS Plan.⁵¹ The Operating Committee determined that the Industry Member CAT fees provide for the “equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities necessary or appropriate in furtherance of the purposes of this chapter,”⁵² as required by the Exchange Act. The Operating Committee determined that the CAT fees equitably allocate CAT costs between Participants and Industry Members, and among Industry

⁴⁵ See Proposed CAT Fee Plan Amendment at 68–69.

⁴⁶ CAT Reporters will be responsible for each quarterly fee in which they are a CAT Reporter. If a CAT Reporter ceases to meet the definition of a CAT Reporter during a quarter, the CAT Reporter will still be responsible for CAT fees attributable to its message traffic (or, the minimum fee in the alternative) during that quarter. See Proposed CAT Fee Plan Amendment at 69.

⁴⁷ 15 U.S.C. 78f(b)(6).

⁴⁸ 15 U.S.C. 78f(b)(4).

⁴⁹ 15 U.S.C. 78f(b)(8).

⁵⁰ CAT NMS Plan Approval Order at 84696.

⁵¹ See Proposed CAT Fee Plan Amendment at 70–79.

⁵² Sections 6(b)(4) and 15A(b)(5) of the Exchange Act.

Members, as discussed in detailed [sic] above. For the reasons discussed above, the Operating Committee determined that the 75%-25% allocation between Industry Members and Participants in the CAT Funding Model as well as the use of message traffic for allocating costs among Industry Members provide for an equitable allocation of CAT costs among CAT Reporters. In addition, as discussed above, the Operating Committee determined that the imposition of minimum and maximum fees and market maker discounts would operate to provide for an equitable allocation of CAT costs among Industry Members.

As further provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined that the CAT Funding Model is “not designed to permit unfair discrimination between customers, issuers, brokers, or dealers,”⁵³ as required by the Exchange Act, as the CAT Funding Model does not unfairly discriminate between Industry Members and Participants, or among Industry Members. In making this determination, the Operating Committee noted that all Industry Members are grouped together for the purpose of determining CAT fees, and Industry Members with similar levels of activity would pay similar fees. For example, Industry Members with higher levels of message traffic would pay higher fees, and those with lower levels of message traffic would pay lower fees. With the elimination of tiers in the Original Funding Model, fees for Industry Members are directly related to their message traffic. With tiers, the relationship between message traffic and the CAT fee would not have been as direct.

In addition, as discussed in the Proposed CAT Fee Plan Amendment, where the method of fee calculation may potentially affect certain groups of CAT Reporters adversely, the Operating Committee sought to limit such adverse effects. For example, the Operating Committee proposed market maker discounts to address the high levels of message traffic generally exhibited by market makers. As discussed above, the SEC has recognized repeatedly that such favorable treatment for market makers in other contexts was not unfairly discriminatory or a burden on competition in light of its positive effects on market quality, nor was it considered to involve an inequitable allocation of fees among members.

As also provided in the Proposed CAT Fee Plan Amendment, the Operating

Committee also proposed the Maximum Industry Member CAT Fee to address the potential for significant fees based on outsized message traffic for certain Industry Members. The Maximum Industry Member CAT Fee would serve as a method to institute a cap on fees to fairly allocate costs to Industry Members. Such a fee would prevent Industry Members from paying significantly larger CAT fees than Participant complexes.

The Proposed CAT Fee Plan Amendment notes that Operating Committee also determined that the proposed Industry Member CAT fees would promote just and equitable principles of trade, and, in general, protect investors and the public interest, as the fees would be transparent and relate specifically to CAT activity. The Operating Committee also determined that the proposed fees were reasonable because they would provide ease of calculation, ease of billing and other administrative functions. Such factors are crucial to estimating a reliable revenue stream for the Company.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act⁵⁴ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change implements provisions of the CAT NMS Plan that are subject to approval by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan. The Exchange also notes that the proposed rule changes will apply equally to all Industry Members, including its Members. In addition, all national securities exchanges and FINRA are proposing a similar proposed fee change to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the exchanges and FINRA.

Moreover, the Exchange notes that, as discussed in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed fees do not impose an unnecessary or inappropriate burden on competition as they fairly and equitably allocate costs

among CAT Reporters.⁵⁵ The Operating Committee determined that the cost allocation between Participants and Industry Members recognizes the greater number of Industry Members as compared to the Participants and the greater collective revenue of Industry Members as compared to Participants. In addition, cost allocations among Industry Members based on message traffic fairly and equitably distribute CAT costs. Furthermore, the market maker discounts and the Maximum Industry Member CAT Fee address the potential for burdens on market makers and Industry Members with outsized message traffic potentially resulting from the proposed fee calculations. Moreover, the Operating Committee determined that the Minimum Industry Member CAT Fee would not act as a barrier to entry for smaller Industry Member CAT Reporters.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁵⁶ and paragraph (f) of Rule 19b-4⁵⁷ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

⁵⁵ See Proposed CAT Fee Plan Amendment at 78–79.

⁵⁶ 15 U.S.C. 78s(b)(3)(A).

⁵⁷ 17 CFR 240.19b-4(f).

⁵³ Sections 6(b)(5) and 15A(b)(6) of the Exchange Act.

⁵⁴ 15 U.S.C. 78f(b)(8).

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeEDGA-2021-010 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeEDGA-2021-010. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeEDGA-2021-010 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁸

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91760; File No. SR-CBOE-2021-030]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a Fee Schedule to Establish Fees for Industry Members Related to the National Market System Plan Governing the Consolidated Audit Trail

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 21, 2021, Cboe Exchange, Inc. ("Exchange" or "Cboe Options") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the "Exchange" or "Cboe Options") proposes to adopt a fee schedule to establish fees for Industry Members related to the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan").³ The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (<http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx>), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under the CAT NMS Plan, the Operating Committee of the Consolidated Audit Trail, LLC ("Company") ("Operating Committee") has discretion to establish funding for the Company to operate the CAT, including establishing fees that the Participants will pay, and establishing fees for Industry Members that will be implemented by the Participants.⁴ The Operating Committee has filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposal to amend the CAT NMS Plan to implement a revised funding model for the CAT ("CAT Funding Model") and to establish a fee schedule for Participant CAT fees ("Proposed CAT Fee Plan Amendment").⁵ The Proposed CAT Fee Plan Amendment describes the CAT Funding Model in detail, including the proposal to charge Industry Members CAT fees. The Participants are required to file with the SEC under Section 19(b) of the Exchange Act any CAT fees applicable to Industry Members that the Operating Committee approves.⁶ Accordingly, the purpose of this proposed rule change is to implement the required fee schedule provisions for CAT fees applicable to Industry Members that are Trading Permit Holders in accordance with the CAT Funding Model. The fee schedule provisions will become operative upon the SEC's approval of the Proposed CAT Fee Plan Amendment.

(1) CAT Funding Model

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, the CAT fees applicable to Participants and Industry Members for the relevant quarter would be designed to cover the total CAT costs associated with developing, implementing and operating the CAT for the relevant quarter ("Total CAT Costs").⁷ The CAT

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT Compliance Rule. See Chapter 7, Section B of the Exchange's Rulebook. The Exchange and each of its affiliated exchanges (Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., Cboe C2 Exchange, Inc., Cboe EDGA Exchange, Inc., and Cboe EDGX Exchange, Inc.) are filing to adopt the CAT fee schedule.

⁴ Section 11.1(b) of the CAT NMS Plan.

⁵ See Securities Exchange Act Rel. No. 91555 (Apr. 14, 2021), 86 FR 21050 (April 21, 2021).

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ Note that certain costs would be excluded from the Historical CAT Assessment Costs, as discussed in more detail below. See Proposed CAT Fee Plan Amendment at 4, 56-57.

⁵⁸ 17 CFR 200.30-3(a)(12).

Funding Model would implement a bifurcated funding model, where these costs would be borne by both Participants and Industry Members. Industry Members as a group would pay 75% of the Total CAT Costs (the "Industry Member Allocation"), and Participants as a group would pay 25% of the Total CAT Costs (the "Participant Allocation").⁸

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, each Industry Member will pay a CAT fee that is calculated by multiplying each Industry Member's message traffic percentage of the total message traffic of all Industry Members during the relevant time period by the Industry Member Allocation, subject to certain market maker message traffic discounts, a Minimum Industry Member CAT Fee and a Maximum Industry Member CAT Fee. Each Industry Member that is an Options Market Maker will have a discount based on the options trade-to-quote ratio applied to its Options Market Maker message traffic when calculating that Industry Member's message traffic, and each Industry Member that is an Equity Market Maker will have a discount based on the NMS Stock trade-to-quote ratio applied to its Equity Market Maker message traffic when calculating that Industry Member's message traffic. In addition, each Industry Member will pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT Fee would be less than \$125 per quarter when calculated based on message traffic. Furthermore, an Industry Member's CAT fee would be subject to the Maximum Industry Member CAT Fee. The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic. Each of these aspects of the Industry Member CAT fee are discussed in more detail below.

⁸ Each Industry Member and Participant CAT Reporter would be required to pay CAT fees established via the CAT Funding Model. CAT Reporting Agents acting in their role as such would not have an obligation to pay CAT fees. See Proposed CAT Fee Plan Amendment at 4.

(A) CAT Fees for Both Industry Members and Participants

Under the CAT Funding Model, both Participants and Industry Members would contribute to the funding of the CAT by paying a CAT fee.⁹ As permitted by Rule 613, the CAT NMS Plan requires Industry Members to pay a CAT fee. Rule 613(a)(1)(vii)(D) contemplates Industry Members contributing to the payment of CAT costs. Specifically, this provision requires the CAT NMS Plan to address "[h]ow the plan sponsors propose to fund the creation, implementation, and maintenance of the consolidated audit trail, including the proposed allocation of such estimated costs among the plan sponsors, and between the plan sponsors and members of the plan sponsors."

In addition, as approved by the SEC, the CAT NMS Plan specifically contemplates CAT fees to be paid by both Industry Members and Participants. Section 11.1(b) states that "the Operating Committee shall have discretion to establish funding for the Company, including: (i) Establishing fees that the Participants shall pay; and (ii) establishing fees for Industry Members that shall be implemented by the Participants."¹⁰ The Commission stated in approving the CAT NMS Plan the following:

The Commission believes that the proposed funding model reflects a reasonable exercise of the Participants' funding authority to recover the Participants' costs related to the CAT. The CAT is a regulatory facility jointly owned by the Participants and, as noted above, the Exchange Act specifically permits the Participants to charge members fees to fund their self-regulatory obligations. The Commission further believes that the proposed funding model is designed to impose fees reasonably related to the Participants' self-regulatory obligations because the fees would be directly associated with the costs of establishing and maintaining the CAT, and not unrelated SRO services.¹¹

In its recent amendments to the CAT NMS Plan, the SEC reaffirmed the ability for the Participants to charge Industry Members a CAT fee. Specifically, the SEC noted that the amendments were not intended to change the basic funding structure for the CAT, which may include fees established by the Operating Committee, and implemented by the Participants, to recover from Industry Members the costs and expenses incurred by the

⁹ Proposed CAT Fee Plan Amendment at 10–11.

¹⁰ See also Sections 11.1(c), 11.2(c), and 11.3(a) and (b) of the CAT NMS Plan.

¹¹ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696, 84794 (Nov. 23, 2016) ("CAT NMS Plan Approval Order").

Participants in connection with the development and implementation of the CAT.¹²

Finally, as noted by the SEC, the CAT "substantially enhance[s] the ability of the SROs and the Commission to oversee today's securities markets,"¹³ thereby benefitting all market participants. As such, both Participants and Industry Members should contribute to covering the cost of the CAT.

(B) 75%/25% Allocation between Industry Members and Participants

The CAT NMS Plan as approved by the Commission provides the Operating Committee with discretion to establish CAT fees to be paid by Participants and Industry Members. The CAT Funding Model as set out in the Proposed CAT Fee Plan Amendment contemplates allocating CAT costs between Participants and Industry Members to permit the calculation of CAT fees based on market share for Participants and based on message traffic for Industry Members.¹⁴ Under the CAT Funding Model as proposed, Industry Members as a group would pay 75% of the Total CAT Costs (the "Industry Member Allocation"), and Participants as a group would pay 25% of the Total CAT Costs (the "Participant Allocation").¹⁵ As discussed in more detail below, the Industry Member Allocation of 75% of the Total CAT Costs is included in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule for the Consolidated Audit Trail Funding Fees. In each such paragraph, the calculation of the Industry Member CAT fees is based on 75% of the Total CAT Costs.

(C) Message Traffic

The Industry Member Allocation would be allocated to each Industry Member based on message traffic.¹⁶ Each Industry Member CAT Reporter would pay a CAT fee that is calculated by multiplying each Industry Member's percentage of the total message traffic of

¹² Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31329 (May 22, 2020) ("Financial Accountability Release").

¹³ Securities Exchange Act Rel. No. 67457 (Jul. 18, 2012), 77 FR 45722, 45726 (Aug. 1, 2012).

¹⁴ See Proposed CAT Fee Plan Amendment at 12–16. Note that, in the funding model set forth in Article XI of the CAT NMS Plan ("Original Funding Model"), costs were allocated between Execution Venues and certain Industry Members, whereas the CAT Funding Model would allocate costs between Participants and Industry Members.

¹⁵ For additional discussions regarding the 75%–25% allocation, see Proposed CAT Fee Plan Amendment at 16–20.

¹⁶ For additional discussions regarding the use of message traffic for calculating Industry Member CAT fees, see Proposed CAT Fee Plan Amendment at 21–22.

all Industry Members each quarter by the Industry Member Allocation, subject to certain market making discounts, Minimum Industry Member CAT Fees, and Maximum Industry Member CAT Fees. To implement the use of message traffic in the calculation of Industry Member CAT fees, the Exchange proposes to describe the use of message traffic in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule. In each such paragraph, the Industry Member CAT fees are calculated based on Industry Members' message traffic in the CAT.

As set out in the Proposed CAT Fee Plan Amendment,¹⁷ message traffic would be calculated based on Industry Members' Reportable Events reported to the CAT as defined in the CAT Reporting Technical Specifications for Industry Members ("IM Reporting Tech Specs") as amended from time to time.¹⁸ The Reportable Events may vary over time if the IM Reporting Tech Specs are amended.¹⁹ However, Reportable Events in the current IM Reporting Tech Specs that will be counted as message traffic include, but are not limited to, such events as the New Order Event, the Order Route Event and the Trade Event. In addition, message traffic will not include reporting activity related to Customer information as set forth in the CAT Reporting Customer and Account Technical Specifications for Industry Members.²⁰

(D) Market Maker Discounts

As set out in the Proposed CAT Fee Plan Amendment, the Operating Committee recognized that treating Options Market Maker message traffic

and Equity Market Maker message traffic in the same way as other message traffic for purposes of calculating Industry Member CAT fees may result in an undue or inappropriate burden on competition or may lead to a reduction in market quality.²¹ For example, charging Industry Members on the basis of message traffic may impact market makers disproportionately because of their continuous quoting obligations. Moreover, in the context of Options Market Makers, message traffic would include bids and offers for every Listed Options strikes and series. Accordingly, the Operating Committee determined to discount Options Market Maker message traffic by the trade-to-quote ratio for Listed Options when calculating message traffic for Options Market Makers, and to discount Equity Market Maker message traffic by the trade-to-quote ratio for NMS Stocks when calculating message traffic for Equity Market Makers. The message traffic of Options Market Makers and Equity Market Makers, as discounted, would be counted as part of the total message traffic for all Industry Members. The practical effect of applying such discounts for market making activity would be to lower the CAT fees for Options Market Makers and Equity Market Makers.

(I) Options Market Maker Discount

Each Industry Member that is an Options Market Maker²² would have a discount based on the options trade-to-quote ratio applied to its options market making message traffic when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on options market making due to such message traffic.²³ Specifically, for each Options Market Maker, a discount would be applied to (1) all message traffic reported to the CAT by the Options Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered, regardless of where the order is ultimately routed or executed;²⁴ and (2) all message traffic

for which a "quote sent time" is reported by an Options Exchange on behalf of the given Options Market Maker.

The relevant trade-to-quote ratio for the Options Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the securities information processors ("SIP"). As an example, the trade-to-quote ratio for Listed Options for the fourth quarter of 2020 was 0.01%.

Accordingly, each Options Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the options trade-to-quote ratio. The Options Market Maker's CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁵ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Options Market Maker discount, the Exchange proposes to add paragraph (g)(1) to the fee schedule. Paragraph (g)(1) would state that "[w]hen calculating the message traffic of an Industry Member that is an Options Market Maker, the Options Market Maker's market making message traffic would be discounted by multiplying its Listed Options market making message traffic by the Listed Options trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Options Market Maker message traffic for each of the four Industry Member CAT fees.

(II) Equity Market Maker Discount

Similarly, each Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker") would have a discount based on the NMS Stock trade-to-quote ratio applied to its market making message traffic in NMS Stocks when calculating that Industry

accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 31.

²⁵ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Options Market Makers. See Proposed CAT Fee Plan Amendment at 32.

¹⁷ See Proposed CAT Fee Plan Amendment at 26–27.

¹⁸ The CAT Reporting Technical Specifications for Industry Members are available at www.catnmsplan.com.

¹⁹ Due to the Phased Reporting approach, all Reportable Events will not be reported until all Industry Members are reporting all Reportable Events to the CAT. For example, Phase 2d CAT Reporting is scheduled for December 2021, and Small Industry Non-OATS Reporters are not required to report until December 2021. In addition, certain Reportable Events, such as simple options manual orders and OTC link messages, are not required to be reported until later in the Phased Reporting. For a detailed description of such Reportable Events, see CAT Reporting Technical Specifications for Industry Members (available at www.catnmsplan.com). For the Industry Member CAT reporting timeline, see, e.g., FINRA Rule 6895(c). CAT costs will be allocated based on the Reportable Events reported to the CAT in any relevant quarter, regardless of whether all Industry Members are reporting to the CAT or all Reportable Events are required to be reported to the CAT for a relevant quarter. See Proposed CAT Fee Plan Amendment at 27.

²⁰ The CAT Reporting Customer and Account Technical Specifications for Industry Members are available at www.catnmsplan.com.

²¹ See Proposed CAT Fee Plan Amendment at 27–30.

²² Section 1.1 of the CAT NMS Plan. Rule 7.20(ee) defines an "Options Market Maker" as "a broker-dealer registered with an exchange for the purpose of making markets in options contracts traded on the exchange."

²³ See Proposed CAT Fee Plan Amendment at 30–32.

²⁴ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Options Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by an Industry Member that are associated with any other

Member's message traffic to prevent a potentially disproportionate effect on market making in NMS Stocks.²⁶ Specifically, for each Equity Market Maker, a discount would be applied to all message traffic reported to the CAT by the Equity Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered,²⁷ regardless of where the order is ultimately routed or executed.²⁸

The relevant trade-to-quote ratio for the Equity Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the SIP. As an example, the trade-to-quote ratio for NMS Stocks for the fourth quarter of 2020 was 4.77%.

The Equity Market Maker CAT fee would be calculated in the same manner as the Options Market Maker CAT fee. Each Equity Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the NMS Stock trade-to-quote ratio. The Equity Market Maker CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁹ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Equity Market Maker discount, the Exchange proposes to add paragraph (g)(2) to the fee schedule. Paragraph (g)(2) would state that "[w]hen calculating the message traffic of an Industry Member that is an equity market maker in NMS Stocks ('Equity Market Maker'), the Equity

Market Maker's market making message traffic would be a [sic] discounted by multiplying its market making message traffic in NMS Stocks by the NMS Stock trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Equity Market Maker message traffic for each of the four Industry Member CAT fees.

(E) Minimum Industry Member CAT Fee

Each Industry Member would be required to pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic.³⁰ All Industry Members required to report to the CAT, including those that have not yet begun to report to the CAT due to the phased implementation schedule for the CAT, would be subject to the Minimum Industry Member CAT Fee. If any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage.³¹

To implement the Minimum Industry Member CAT Fee, the Exchange proposes to add paragraph (h) to the fee schedule. Proposed paragraph (h)(1) of the fee schedule would state that "[t]he Minimum Industry Member CAT Fee is \$125 per quarter." Proposed paragraph (h)(2) of the fee schedule would state that "[i]f any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage ('Minimum Industry Member CAT Fee Re-Allocation')." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule describes the

Minimum Industry Member CAT Fee Re-Allocation for each of the four Industry Member CAT fees.

(F) Maximum Industry Member CAT Fee

An Industry Member's CAT fee also would be subject to a Maximum Industry Member CAT Fee.³² The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member's fee is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member's percentage of total message traffic.

To implement the Maximum Industry Member CAT Fee, the Exchange proposes to add proposed paragraph (f) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (f)(1) would state that "[t]he Maximum Industry Member CAT Fee for each quarter is 8% of the total CAT costs for the relevant quarter." In addition, proposed paragraph (f)(2) would state that:

If an Industry Member's CAT Fee that is calculated pursuant to paragraph (a)(2), (b)(2), (c)(2), (d)(2), as applicable, without reference to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation, is greater than the Maximum Industry Member CAT Fee, then the Industry Member will be subject to the Maximum Industry Member CAT Fee. If any Industry Member is subject to the Maximum Industry Member CAT Fee, then any excess amount which the Industry Member otherwise would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members, including any Industry Member that is subject to the Maximum Industry Member CAT Fee or subject to the Minimum Industry Member CAT Fee in accordance with their message traffic percentage ('Maximum Industry Member CAT Fee Re-Allocation').

Furthermore, proposed paragraphs (a)(1), (b)(1), (c)(1) and (d)(1) would state that an Industry Member's CAT fee calculated pursuant to (a)(1), (b)(1), (c)(1) and (d)(1) would include any applicable Maximum Industry Member

²⁶ See Proposed CAT Fee Plan Amendment at 32–33.

²⁷ Note that Equity Market Makers do not have a quote sent time exemption comparable to the Options Market Maker quote sent time exemption, as discussed above.

²⁸ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Equity Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by the Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 32.

²⁹ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Equity Market Makers. See Proposed CAT Fee Plan Amendment at 33.

³⁰ For additional discussions regarding the Minimum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 33–35.

³¹ Options Market Makers and Equity Market Makers will be required to pay the Minimum Industry Member CAT Fee if their quarterly CAT fee calculated with the market maker discounts is less than \$125 per quarter.

³² For additional discussions regarding the Maximum Industry Member CAT Fee, See Proposed CAT Fee Plan Amendment at 35–37.

CAT Fee Re-Allocation. Finally, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) would state that an Industry Member's CAT fee calculated pursuant to paragraph (a)(2), (b)(2), (c)(2) or (d)(2) is subject to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation.

(G) Total CAT Costs

As set out in the Proposed CAT Fee Plan Amendment, the Total CAT Costs for the year would be comprised of all fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during this period.³³

For purposes of the Historical CAT Assessment, the Total CAT Costs would be \$193,273,342, as set forth in the Proposed CAT Fee Plan Amendment. Accordingly, the quarterly CAT fee for the Historical CAT Assessment will be calculated based on costs of \$36,238,752, which is 1/4th of 75% of the Total CAT Costs. This amount is set forth in proposed paragraph (b)(2) of the fee schedule.

In addition, proposed paragraph (i) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule describes the Total CAT Costs to be used in calculating the Period 3 CAT Fee, the Period 4 CAT Fee and the Quarterly CAT Fees. Proposed paragraph (i)(1) of the fee schedule would state that "[t]he Period 3 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2021." Proposed paragraph (i)(2) of the fee schedule would state that "[t]he Period 4 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2022." Proposed paragraph (i)(3) of the fee schedule would state the following with regard to the Quarterly CAT Fees:

For purposes of the Quarterly CAT Fee, the budgeted Total CAT Costs for the relevant year shall be the total CAT costs set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan for the relevant year. The budgeted Total CAT Costs for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted budgeted costs for the CAT will be

used in calculating the remaining CAT fees for that year.

(2) Proposed CAT Fees

The Exchange proposes to charge its Industry Members fees related to CAT costs. To implement these CAT fees, the Exchange proposes to add a section entitled "Consolidated Audit Trail Funding Fees" to its fee schedule, and to describe the CAT fees in that section.

(A) Historical CAT Assessment (for Pre-Period 1, Period 1 and Period 2)

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee determined to charge Industry Members a historical assessment ("Historical CAT Assessment") to recover certain CAT costs incurred prior to January 1, 2021 ("Historical CAT Assessment Costs").³⁴ Specifically, as detailed in the Proposed CAT Fee Plan Amendment, the Historical CAT Assessment is intended to collect from Industry Members 75% of certain costs incurred through June 22, 2020, the effective date for the Financial Accountability Milestones,³⁵ certain costs from Period 1 of the Financial Accountability Milestones (which covered the period from June 22, 2020–July 31, 2020) and certain costs from Period 2 of the Financial Accountability Milestones (which covered the period from August 1, 2020–December 31, 2020). The Total CAT Costs, excluding Excluded Costs (as defined below) and certain costs related to the conclusion of the relationship with Thesys CAT, LLC is \$193,273,342. The Historical CAT Assessment is designed to recover 75% of these CAT costs. Accordingly, the Historical CAT Assessment Costs would be \$144,955,006.

Using the Historical CAT Assessment Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Historical CAT Assessment owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover the Historical CAT Assessment Costs over a period of four calendar quarters, commencing upon the SEC's approval of the Historical CAT Assessment. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic (subject to the market making discounts and the maximum fee). The message traffic fee

would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by \$36,238,752, which is 1/4th of the Historical CAT Assessment Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation, and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Historical CAT Assessment in the first quarter after SEC approval of the Historical CAT Assessment, based on CAT Data from the quarter in which the SEC approved the CAT fees.

To implement the Historical CAT Assessment, the Exchange proposes to add proposed paragraph (b) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (b) would state that "each Industry Member shall pay an Historical CAT Assessment in the amount of the greater of the following each quarter for four quarters commencing upon approval of the Historical CAT Assessment by the SEC: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by \$36,238,752 (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

In accordance with Section 11.6(b) of the CAT NMS Plan and as provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 1. Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. As indicated by the Participants' Quarterly Progress

³⁴ See Proposed CAT Fee Plan Amendment at 55–60.

³⁵ See Section 11.6 of the CAT NMS Plan; and Financial Accountability Release.

³³ See Proposed CAT Fee Plan Amendment at 50–51.

Report,³⁶ Initial Industry Member Core Equity and Option Reporting was completed on schedule by July 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020.

As provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-

Amendment Expenses incurred during Period 2. Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. As indicated by the Participants' Quarterly Progress Report,³⁷ Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in

connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. Accordingly, proposed paragraph (b) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Historical CAT Assessment "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Historical CAT Assessment:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	\$36,238,752	Quarter of SEC approval of Historical CAT Assessment.	1st quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #2	\$36,238,752	1st quarter after SEC approval of Historical CAT Assessment.	2nd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #3	36,238,752	2nd quarter after SEC approval of Historical CAT Assessment.	3rd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #4	36,238,752	3rd quarter after SEC approval of Historical CAT Assessment.	4th quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

(B) Period 3 CAT Fee

Per the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2021 through December 31, 2021, referred to as the Period 3 CAT Fee.³⁸ The Total CAT Costs incurred from January 1, 2021 through December 31, 2021 ("Period 3 CAT Costs") will be calculated at the completion of 2021. Specifically, the Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

Using the Period 3 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 3 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 3 CAT Costs over a period of four calendar quarters,

commencing in 2022. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message by 1/4th of 75% of the Period 3 CAT Costs traffic (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Period 3 CAT Fee in the second quarter of 2022, based on CAT Data from the first quarter of 2022.

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2021 the

Total CAT Costs for 2021 to be used in calculating the quarterly Period 3 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. Such financial statements are required to be prepared in accordance with Section 9.2 of the CAT NMS Plan, including requirements related to compliance with GAAP, auditing by an independent public accounting firm and making the statements publicly available.

To implement the Period 3 CAT Fee, the Exchange proposes to add proposed paragraph (c) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (c) would state that "each Industry Member shall pay a Period 3 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2022: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated

³⁶ Q3 2020 Quarterly Progress Report (Oct. 30, 2020) (available at www.catnmsplan.com).

³⁷ Q4 2020 Quarterly Progress Report (Jan. 29, 2021) (available at www.catnmsplan.com).

³⁸ See Proposed CAT Fee Plan Amendment at 60–63.

by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4th of 75% of the Period 3 Total CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

Per the Proposed CAT Fee Plan Amendment, the proposed Period 3 CAT Fee seeks to recover costs that will

be related to Post-Amendment Expenses incurred during Period 3. Period 3 began on January 1, 2021 and is expected to conclude on December 31, 2021, the date of Full Availability and Regulatory Utilization of Transactional Database Functionality. As discussed above, the Period 3 CAT Costs to be recovered via the Period 3 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2020 through December 31, 2021. The collection of the full amount of the Period 3 CAT Fee will depend upon

achievement of Full Availability and Regulatory Utilization of Transactional Database Functionality by December 31, 2021; if not, the amount of the Period 3 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (c) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 3 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Period 3 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 3 CAT Costs ³⁹ .	CAT Data from first quarter of 2022 ...	2nd quarter of 2022.
Quarterly CAT Fee #2	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from second quarter of 2022.	3rd quarter of 2022.
Quarterly CAT Fee #3	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from third quarter of 2022 ..	4th quarter of 2022.
Quarterly CAT Fee #4	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from fourth quarter of 2022	1st quarter of 2023.

(C) Period 4 CAT Fee

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2022 through December 30, 2022, referred to as the Period 4 CAT Fee.⁴⁰ The Total CAT Costs incurred from January 1, 2022 through December 30, 2022 ("Period 4 CAT Costs") will be calculated at the completion of 2022. Specifically, the Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

Using the Period 4 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 4 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 4 CAT Costs over a period of four calendar quarters, commencing in 2023. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on

message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members will be required to commence paying the Period 4 CAT Fee in the second quarter of 2023, based on data from the first quarter of 2023.

To implement the Period 4 CAT Fee, the Exchange proposes to add proposed paragraph (d) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (d) would state that "each Industry Member shall pay a Period 4 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the

total Industry Member message traffic based on the prior quarter's message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2022 the Total CAT Costs for 2022 to be used in calculating the quarterly Period 4 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. As noted above, such financial statements are required to be prepared in accordance with the requirements set forth in Section 9.2 of the CAT NMS Plan.

The Exchange indicates that the proposed Period 4 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 4. Period 4 is expected to begin on January 1, 2022 and conclude on December 30, 2022, the date of Full Implementation of CAT NMS Plan Requirements. As discussed above, the Period 4 CAT Costs to be recovered via the Period 4 CAT Fee would include

³⁹ The Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements of the Company.

⁴⁰ See Proposed CAT Fee Plan Amendment at 63-65.

fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2022 through December 30, 2022. The collection of the full amount of the Period 4 CAT Fee will depend upon achievement of Full

Implementation of CAT NMS Plan Requirements by December 30, 2022; if not, the amount of the Period 4 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (e) of

the “Consolidated Audit Trail Funding Fees” section of its fee schedule would state that Industry Members will be required to pay the Period 4 CAT Fee “[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan.”

The following chart summarizes the imposition of the Period 4 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 4 CAT Costs ⁴¹ .	CAT Data from first quarter of 2023 ...	2nd quarter of 2023.
Quarterly CAT Fee #2	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from second quarter of 2023.	3rd quarter of 2023.
Quarterly CAT Fee #3	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from third quarter of 2023 ..	4th quarter of 2023.
Quarterly CAT Fee #4	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from fourth quarter of 2023	1st quarter of 2024.

(D) Quarterly CAT Fee—Beginning 2023

As provided in the Proposed CAT Fee Plan Amendment, to recover the costs of the CAT going forward beginning in 2023, the Operating Committee determined to charge Industry Members an ongoing quarterly CAT fee calculated based on the allocation of Total CAT Costs pursuant to the CAT Funding Model (“Quarterly CAT Fee”).⁴² The Operating Committee will use the costs set forth in the annual operating budget as the Total CAT Costs in the calculation of the Quarterly CAT Fee. Specifically, the Total CAT Costs budgeted for the upcoming year for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. Using these estimated Total CAT Costs, the Operating Committee will calculate the Quarterly CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. As provided in the Proposed CAT Fee Plan Amendment, the Operating Committee proposes to seek to recover the budgeted Total CAT Costs over the course of the year. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic.⁴³ The message traffic fee

would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member’s message traffic would be calculated using data from the prior calendar quarter. The Exchange proposes to commence charging this CAT fee in the second quarter of 2023, based on CAT Data from the first quarter of 2023.

To implement the Quarterly CAT Fee, the Exchange proposes to add proposed paragraph (a) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (a) would state that “[e]ach Industry Member shall pay a Quarterly CAT Fee in the amount of the greater of the following each quarter commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the

prior quarter’s message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the relevant year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

The Exchange understands the Operating Committee will announce at the beginning of the relevant year via a CAT alert the budgeted Total CAT Costs to be used in calculating the Quarterly CAT Fees for that year. The budgeted Total CAT Costs will be the costs set forth in the annual operating budget for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. As discussed above, CAT costs would include, but not be limited to, Plan Processor costs, insurance costs, third-party support costs and an operational reserve. As required by Section 11.1(c) of the CAT NMS Plan, any surpluses collected will be treated as an operational reserve to offset future fees and will not be distributed to the Participants as profits.⁴⁴ In addition, to address potential changes in the budget during the year, the total budgeted costs for the CAT for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted total budgeted costs for the CAT will be used in calculating

⁴¹ The Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements for the Company.

⁴² See Proposed CAT Fee Plan Amendment at 65–68.

⁴³ To the extent that any two or more of the four categories of Industry Member CAT fees (*i.e.*, the Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and the Quarterly CAT Fee) are due during the same quarter, any Industry Member obligated to pay one or more categories of fees is required to pay each category of fee for that quarter. For example, if an Industry Member would be subject to the Minimum Industry Member CAT Fee for the Period 4 CAT Fee and the Minimum

Industry Member CAT Fee for the Quarterly CAT Fee during the same quarter, the Industry Member would be required to pay two minimum \$125 fees that quarter for a total of \$250. As another example, suppose that an Industry Member owed a CAT fee (other than the minimum fee of \$125) for both the Historical CAT Assessment and the Period 3 CAT Fee, the Industry Member would be required to pay both fees that quarter. See Proposed CAT Fee Plan Amendment at 66.

⁴⁴ CAT NMS Plan Approval Order at 84792.

the remaining quarterly CAT fees for that year.

The following chart summarizes the imposition of the Quarterly CAT Fee

each year commencing in 2023 and continuing each year thereafter:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from first quarter of the relevant year.	2nd quarter of the relevant year.
Quarterly CAT Fee #2	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from second quarter of the relevant year.	3rd quarter of the relevant year.
Quarterly CAT Fee #3	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from third quarter of the relevant year.	4th quarter of the relevant year.
Quarterly CAT Fee #4	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from fourth quarter of the relevant year.	1st quarter of year following the relevant year.

(3) Time and Manner of Payment

The Exchange proposes to add paragraph (e) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule to describe the time and manner of the payment of the Industry Member CAT fees as provided in the Proposed CAT Fee Plan Amendment.⁴⁵ Proposed paragraph (e)(1) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with an invoice setting forth the Industry Member’s Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and/or Quarterly CAT Fee (as applicable) (collectively, “CAT Fees”) for each payment period.” Proposed paragraph (e)(2) would state that “Consolidated Audit Trail, LLC will provide each Industry Member with one invoice each payment period for its CAT Fees as determined pursuant to paragraph (a)–(d) above, regardless of whether the Industry Member is a member of multiple self-regulatory organizations.” Proposed paragraph (e)(3) would state that “[e]ach Industry Member will pay its CAT Fees to the Consolidated Audit Trail, LLC via the centralized system for the collection of CAT Fees established by the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” Finally, proposed paragraph (e)(4) would require that Industry Members pay their CAT Fees within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due, such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum

rate equal to the lesser of (A) the Prime Rate plus 300 basis points, or (B) the maximum rate permitted by applicable law.⁴⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,⁴⁷ which requires, among other things, that the Exchange’s rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,⁴⁸ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,⁴⁹ which requires that the Exchange’s rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file

with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this proposed rule change to implement the Industry Member CAT fees included in the CAT Funding Model approved by the Operating Committee. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”⁵⁰ To the extent that this proposal implements the Plan, and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

The Exchange further notes that, as provided in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed Industry Member CAT fees comply with the requirements of the Exchange Act and the CAT NMS Plan.⁵¹ The Operating Committee determined that the Industry Member CAT fees provide for the “equitable allocation of reasonable dues, fees, and other charges among its

⁴⁵ See Proposed CAT Fee Plan Amendment at 68–69.

⁴⁶ CAT Reporters will be responsible for each quarterly fee in which they are a CAT Reporter. If a CAT Reporter ceases to meet the definition of a CAT Reporter during a quarter, the CAT Reporter will still be responsible for CAT fees attributable to its message traffic (or, the minimum fee in the alternative) during that quarter. See Proposed CAT Fee Plan Amendment at 69.

⁴⁷ 15 U.S.C. 78f(b)(6).

⁴⁸ 15 U.S.C. 78f(b)(4).

⁴⁹ 15 U.S.C. 78f(b)(8).

⁵⁰ CAT NMS Plan Approval Order at 84696.

⁵¹ See Proposed CAT Fee Plan Amendment at 70–79.

members and issuers and other persons using its facilities necessary or appropriate in furtherance of the purposes of this chapter,”⁵² as required by the Exchange Act. The Operating Committee determined that the CAT fees equitably allocate CAT costs between Participants and Industry Members, and among Industry Members, as discussed in detailed [sic] above. For the reasons discussed above, the Operating Committee determined that the 75%-25% allocation between Industry Members and Participants in the CAT Funding Model as well as the use of message traffic for allocating costs among Industry Members provide for an equitable allocation of CAT costs among CAT Reporters. In addition, as discussed above, the Operating Committee determined that the imposition of minimum and maximum fees and market maker discounts would operate to provide for an equitable allocation of CAT costs among Industry Members.

As further provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined that the CAT Funding Model is “not designed to permit unfair discrimination between customers, issuers, brokers, or dealers,”⁵³ as required by the Exchange Act, as the CAT Funding Model does not unfairly discriminate between Industry Members and Participants, or among Industry Members. In making this determination, the Operating Committee noted that all Industry Members are grouped together for the purpose of determining CAT fees, and Industry Members with similar levels of activity would pay similar fees. For example, Industry Members with higher levels of message traffic would pay higher fees, and those with lower levels of message traffic would pay lower fees. With the elimination of tiers in the Original Funding Model, fees for Industry Members are directly related to their message traffic. With tiers, the relationship between message traffic and the CAT fee would not have been as direct.

In addition, as discussed in the Proposed CAT Fee Plan Amendment, where the method of fee calculation may potentially affect certain groups of CAT Reporters adversely, the Operating Committee sought to limit such adverse effects. For example, the Operating Committee proposed market maker discounts to address the high levels of message traffic generally exhibited by

market makers. As discussed above, the SEC has recognized repeatedly that such favorable treatment for market makers in other contexts was not unfairly discriminatory or a burden on competition in light of its positive effects on market quality, nor was it considered to involve an inequitable allocation of fees among members.

As also provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also proposed the Maximum Industry Member CAT Fee to address the potential for significant fees based on outsized message traffic for certain Industry Members. The Maximum Industry Member CAT Fee would serve as a method to institute a cap on fees to fairly allocate costs to Industry Members. Such a fee would prevent Industry Members from paying significantly larger CAT fees than Participant complexes.

The Proposed CAT Fee Plan Amendment notes that Operating Committee also determined that the proposed Industry Member CAT fees would promote just and equitable principles of trade, and, in general, protect investors and the public interest, as the fees would be transparent and relate specifically to CAT activity. The Operating Committee also determined that the proposed fees were reasonable because they would provide ease of calculation, ease of billing and other administrative functions. Such factors are crucial to estimating a reliable revenue stream for the Company.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act⁵⁴ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change implements provisions of the CAT NMS Plan that are subject to approval by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan. The Exchange also notes that the proposed rule changes will apply equally to all Industry Members, including its Trading Permit Holders. In addition, all national securities exchanges and FINRA are proposing a similar proposed fee change to implement the requirements of the CAT NMS Plan. Therefore, this is not a

competitive fee filing, and, therefore, it does not raise competition issues between and among the exchanges and FINRA.

Moreover, the Exchange notes that, as discussed in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed fees do not impose an unnecessary or inappropriate burden on competition as they fairly and equitably allocate costs among CAT Reporters.⁵⁵ The Operating Committee determined that the cost allocation between Participants and Industry Members recognizes the greater number of Industry Members as compared to the Participants and the greater collective revenue of Industry Members as compared to Participants. In addition, cost allocations among Industry Members based on message traffic fairly and equitably distribute CAT costs. Furthermore, the market maker discounts and the Maximum Industry Member CAT Fee address the potential for burdens on market makers and Industry Members with outsized message traffic potentially resulting from the proposed fee calculations. Moreover, the Operating Committee determined that the Minimum Industry Member CAT Fee would not act as a barrier to entry for smaller Industry Member CAT Reporters.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁵⁶ and paragraph (f) of Rule 19b-4⁵⁷ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

⁵² Sections 6(b)(4) and 15A(b)(5) of the Exchange Act.

⁵³ Sections 6(b)(5) and 15A(b)(6) of the Exchange Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CBOE-2021-030 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CBOE-2021-030. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CBOE-2021-030 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁸

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91754; File No. SR-IEX-2021-08]

Self-Regulatory Organizations: Investors Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Allow Discretionary Limit Orders To Be Reserve Orders

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 23, 2021, the Investors Exchange LLC ("IEX" or the "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Act,³ and Rule 19b-4 thereunder,⁴ IEX is filing with the Commission a proposed rule change to allow Discretionary Limit orders to be reserve orders. The Exchange has designated this rule change as "non-controversial" under Section 19(b)(3)(A) of the Act⁵ and provided the Commission with the notice required by Rule 19b-4(f)(6) thereunder.⁶

The text of the proposed rule change is available at the Exchange's website at www.iextrading.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule filing is to amend IEX Rule 11.190 to allow a Discretionary Limit⁷ ("D-Limit") order to be a reserve order.⁸ As proposed, a D-Limit reserve order will essentially function like any other reserve order, *i.e.*, on entry, it will be processed as a single order, and if not fully executed, the D-Limit reserve order will post to the Order Book⁹ and effectively be treated by the System¹⁰ as two discrete orders: The displayed portion of the order will be a displayed D-Limit order, and the reserve portion will be a non-displayed D-Limit order. However, consistent with existing D-Limit functionality, there are two differences between D-Limit reserve orders and other reserve orders: (1) Both the displayed and non-displayed portions of a D-Limit reserve order may be subject to an automatic price adjustment during periods of quote instability; (2) D-Limit reserve orders can only execute during the Regular Market Session.¹¹ IEX also proposes to make some conforming edits to the subparagraph headers in the D-Limit order definition to align the rule text with other order definitions.

Background

Since the approval of its exchange application, IEX, like other equities exchanges,¹² has offered Members¹³ a "reserve" order type, which allows

⁶ 17 CFR 240.19b-4.

Members to submit a partially displayed limit order,¹⁴ so that a portion of the order is displayed (“display quantity”) and a portion of the order is non-displayed (“reserve quantity”).¹⁵ As set forth in IEX Rule 11.190(b)(2), when Members submit a reserve order, they must specify the display quantity (which must be equal to or greater than one round lot). Upon entry, the System attempts to execute a reserve order as a single order of its full, unexecuted size. If an incoming reserve order is not fully executed, it posts to the Order Book where it is effectively treated as two discrete orders: the display quantity (“displayed portion”) and the reserve quantity (“non-displayed portion”). For the purposes of pricing reserve orders on the Order Book, displayed portions are treated as displayed orders and non-displayed portions are treated as non-displayed orders. As described in IEX Rule 11.190(h), it is possible for the non-displayed portion to rest at a different price than the displayed portion, because the displayed portion is subject to display-price sliding¹⁶ while the non-displayed portion is subject to the Midpoint Price Constraint.¹⁷ If the displayed portion of the reserve order is decremented such that less than one round lot would be displayed, the displayed portion of the reserve order shall be refreshed for either (i) the original displayed quantity, or (ii) the entire reserve quantity, if the total number of unexecuted shares in the order is smaller than the original Member instructed displayed quantity. Each time the displayed portion of the order is refreshed from the reserve quantity, that portion is prioritized behind other existing displayed orders; the priority of the non-displayed portion, however, is unchanged by the refresh process.

IEX recently introduced a new type of limit order, the D-Limit order,¹⁸ which is designed to protect liquidity providers from potential adverse selection by latency arbitrage trading strategies in a fair and nondiscriminatory manner.¹⁹ A D-Limit order may be a displayed or non-displayed limit order that upon entry and when posting to the Order Book is priced to be equal to and ranked at the

order’s limit price, but will be adjusted to a less-aggressive price during periods of quote instability, as defined in IEX Rule 11.190(g).²⁰

Specifically, if the System receives a D-Limit buy (sell) order during a period of quote instability (*i.e.*, the Crumbling Quote Indicator or “CQI” is on), and the D-Limit order has a limit price equal to or higher (lower) than the quote instability determination price level (“CQI Price”), the price of the order will be automatically adjusted by the System to one (1) MPV²¹ lower (higher) than the CQI Price (the “effective limit price”). Similarly, when unexecuted shares of a D-Limit buy (sell) order are posted to the Order Book, if a quote instability determination is made and such shares are ranked and displayed (in the case of a displayed order) by the System at a price equal to or higher (lower) than the CQI Price, the price of the order will be automatically adjusted by the System to the effective limit price. A D-Limit order with an effective limit price will not revert to the price at which it was previously ranked and displayed (in the case of a displayed order). Once the price of a D-Limit order that has been posted to the Order Book is automatically adjusted by the System, the order will continue to be ranked and displayed (in the case of a displayed order) at the effective limit price, unless subject to another automatic adjustment, or if the order is subject to the price sliding provisions of IEX Rule 11.190(h). Otherwise, a D-Limit order operates in the same manner as either a displayed or non-displayed limit order, as applicable.²²

D-Limit orders currently cannot be a reserve order.²³ However, IEX has received informal feedback from Members indicating that they prefer to use reserve orders to post displayed liquidity and would like to be able to use such functionality for D-Limit orders. Based on this feedback, IEX proposes to enable D-Limit orders to be reserve orders, consistent with how IEX treats any other limit orders.²⁴

Proposal

IEX proposes to amend IEX Rules 11.190(b)(2), 11.190(b)(7), and Supplementary Material .01 to allow D-Limit orders to be submitted as a reserve order. D-Limit orders already may be submitted as either displayed or non-displayed orders, and this proposal will allow Members to submit both a

displayed and non-displayed D-Limit order as a single reserve order that allows the Member to control how much of the D-Limit order is displayed at any given time.

As proposed, a D-Limit reserve order will essentially function like any other reserve order, *i.e.*, on entry, it will be processed as a single order, and if not fully executed, the D-Limit reserve order will post to the Order Book and effectively be treated by the System as two discrete orders: The displayed portion of the order will be a displayed D-Limit order, and the reserve portion will be a non-displayed D-Limit order. However, consistent with existing D-Limit functionality, there are two differences between D-Limit reserve orders and other reserve orders, as described below.

First, D-Limit reserve orders, like all D-Limit orders, will only be eligible to trade during the Regular Market Session, and a D-Limit reserve order with a Time-in-Force of “DAY” submitted before the opening of the Regular Market Session will be queued by the System until the start of the Regular Market Session.²⁵ Any D-Limit reserve orders submitted after the closing of the Regular Market Session will be rejected.²⁶ This functionality differs from other reserve orders, which may be submitted during the Pre-Market Session,²⁷ the Post Market Session,²⁸ or the Regular Market Session.²⁹

Second, D-Limit reserve orders, as described above, may also be subject to an effective limit price if their price is adjusted by the System during a period of quote instability. Therefore, a D-Limit reserve order resting on the Order Book will function like any other reserve order except that it can never be priced above either its limit price or its effective limit price.

Finally, IEX proposes to make conforming changes to IEX Rule 11.190(b)(7) to conform the subparagraph numbering with other order types described in IEX Rule 11.190(a) and (b).

The following is a list of the specific proposed changes to IEX Rule 11.190:

- Modify IEX Rule 11.190(b)(2)(A), which currently says reserve orders must be limit orders to add the clarifying words “including a Discretionary Limit order.”
- Modify IEX Rule 11.190(b)(2)(F), which describes how reserve orders may be submitted during the Pre-Market, Regular Market, and Post-Market sessions, to add the words “with the exception of Discretionary

¹⁴ See IEX Rule 11.190(a)(1).

¹⁵ See IEX Rule 11.190(b)(2).

¹⁶ See IEX Rule 11.190(h)(1).

¹⁷ See IEX Rule 11.190(h)(2).

¹⁸ See Securities Exchange Act Release No. 89686 (August 26, 2020), 85 FR 54438 (September 1, 2020) (SR-IEX-2019-15) (“D-Limit Approval Order”).

¹⁹ See Securities Exchange Act Release No. 87814 (December 20, 2019), 84 FR 71997, 71998 (December 30, 2019) (SR-IEX-2019-15) (“D-Limit Proposal”).

²⁰ See IEX Rules 11.190(b)(7) and 11.190(g).

²¹ See IEX Rule 11.210.

²² See IEX Rule 11.190(b)(7).

²³ See IEX Rule 11.190(b)(7)(e)(H).

²⁴ See IEX Rule 11.190(b)(2)(A).

²⁵ See IEX Rule 11.190(b)(7)(E)(e).

²⁶ See *Id.*

²⁷ See IEX Rule 1.160(z).

²⁸ See IEX Rule 1.160(aa).

²⁹ See IEX Rule 11.190(b)(2)(F).

Limit reserve orders, which may only be submitted as set forth in IEX Rule 11.190(b)(7)(E)(v).”

- Modify the main paragraph of IEX Rule 11.190(b)(7) to specify that D-Limit orders may also be “partially displayed” (*i.e.*, reserve orders).

- Remove IEX Rule 11.190(b)(7)(e)(H), which states that D-Limit orders may not be reserve orders.

- Re-letter and re-number the subparagraphs of the D-Limit order definition to conform to the other order types in the rule. Specifically:

- Re-letter IEX Rule 11.190(b)(7) subparagraphs (a)–(e) to now be subparagraphs (A)–(E)

- Re-number the subparagraphs under IEX Rule 11.190(b)(7)(E) ³⁰ from (A)–(J) to (i)–(ix).

- Modify IEX Rule 11.190(b)(7)(C)–(E) ³¹ so that the three parentheticals that say “in the case of a displayed order” include the words “or the displayed portion of a reserve order.”

- Modify IEX Rule 11.190(b)(7)(E)(viii) ³² to specify that the displayed portions of D-Limit reserve orders, like displayed D-Limit orders, are not eligible to be invited by the System to Recheck as described in IEX Rule 11.230(a)(4)(D).

- Modify Supplementary Material .01 to IEX Rule 11.190(b) (“Reserve Orders”) to add the following language to the end of the first paragraph:

- “D-Limit reserve orders function like any other reserve order, except they can only trade during the Regular Market Session, and if a D-Limit reserve order has been subject to an automatic price adjustment pursuant to paragraphs (b)(7)(C) and (D) of this IEX Rule, both the displayed and non-displayed portions of the D-Limit reserve order will continue to be ranked and displayed (in the case of the displayed portion) at the adjusted price. The adjusted price functions as an effective limit price for both the displayed and non-displayed portions of the D-Limit reserve order if one or both portions of the D-Limit reserve order are subsequently price adjusted pursuant to the Price Sliding provisions of paragraph (h) of this IEX Rule.”

Implementation

This proposed rule change will be immediately effective upon filing. The Exchange will provide at least ten (10) days’ notice to Members and market participants of the implementation timeline.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,³³ in general, and furthers the objectives of Section 6(b)(5),³⁴ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of

trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Specifically, the Exchange believes that the proposed rule change is consistent with the protection of investors and the public interest because it is designed to provide more flexibility and opportunities for Members to add both displayed and non-displayed liquidity to the Exchange. As noted in the Purpose section, the proposed rule change is responsive to informal feedback from Members indicating that they prefer to use reserve orders to post displayed liquidity and would like to be able to use such functionality for D-Limit orders. Thus, IEX believes that the proposed rule change will attract additional liquidity to the Exchange and, to the extent it is successful in doing so, will benefit all market participants, thereby supporting the purposes of the Act to remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, to protect investors and the public interest. The Exchange also believes that enabling the entry of D-Limit orders that can be partially displayed, will enhance opportunities for price discovery and increase the overall displayed (and non-displayed) liquidity profile on the Exchange, to the benefit of all market participants.

Moreover, the proposed rule change will merely combine the attributes of two existing order types—D-Limit orders and reserve orders—to expand the functionality available to Members. Consequently, the Exchange does not believe that the proposed rule change raises any novel issues not already considered by the Commission.

Furthermore, IEX believes it is consistent with the purposes of the Act for D-Limit reserve orders to function like other reserve orders except for when they can be submitted and how they behave if their price was adjusted during a period of quote instability, because these two differences are essential aspects of D-Limit orders. Similarly, IEX believes that updating the reserve order description in the Supplementary Material to IEX Rule 11.190(b) is consistent with the protection of investors and the public interest by providing clarity to all market participants about how D-Limit reserve orders function, including the two ways in which their functionality differs from that of other reserve orders.

Thus, these proposed changes support the purposes of the Act to remove impediments to and perfect the mechanism of a free and open market and a national market system, and in general, to protect investors and the public interest.

In addition, as noted in the Purpose section, a D-Limit reserve order is a combination of two order types the Commission has already approved—reserve orders ³⁵—which are a common order type on equity exchanges ³⁶—and D-Limit orders.³⁷ Thus, IEX does not believe that the proposed changes raise any new or novel material issues that have not already been considered by the Commission in connection with existing order types offered by IEX and other national securities exchanges.

Finally, the Exchange believes that the proposed non-substantive conforming changes to IEX Rule 11.190(b)(7) are consistent with the protection of investors and the public interest because they will have no impact on the functionality of D-Limit orders, but rather simply provide consistency and clarity in IEX’s “Orders and Modifiers” rule, thereby reducing the potential for confusion of any market participants.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the proposal is designed to enhance IEX’s competitiveness with other markets by further enhancing IEX’s reserve order and D-Limit order types. As discussed in the Purpose section, the proposal is designed to incentivize the entry of additional liquidity providing orders on IEX by offering Members the flexibility of using a reserve order to control what portion of their D-Limit orders are displayed at any time. Further, by enabling the entry of D-Limit orders that can be partially displayed, IEX believes this proposal will enhance opportunities for price discovery and increase the overall displayed (and non-displayed) liquidity profile on the

³⁵ See Securities Exchange Act Release No. 78101 (June 17, 2016), 81 FR 41142 (June 23, 2016) (File No. 10–222) (approving IEX’s exchange application, which included the reserve order type).

³⁶ See *supra* note 12.

³⁷ See *supra* note 18.

³⁰ Currently IEX Rule 11.190(b)(7)(e).

³¹ Currently IEX Rule 11.190(b)(7)(c)–(e).

³² Currently IEX Rule 11.190(b)(7)(e)(I).

³³ 15 U.S.C. 78f(b).

³⁴ 15 U.S.C. 78f(b)(5).

Exchange, to the benefit of all market participants.

The Exchange also does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. All Members would be eligible to use a D-Limit reserve order, and all Members would be eligible to execute against any portion of a D-Limit reserve order. Moreover, the proposal would provide potential benefits to all Members to the extent that there is more liquidity available on IEX as a result of increased use of D-Limit orders attributable to the ability to enter such orders as reserve orders.

Further, the proposed conforming edits to IEX Rule 11.190(b)(7) are not designed to address any competitive issue, but rather to provide additional clarity in IEX's rulebook.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has designated this rule filing as non-controversial under Section 19(b)(3)(A) ³⁸ of the Act and Rule 19b-4(f)(6) ³⁹ thereunder. Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(f)(6) thereunder.

The Exchange believes that the proposed rule change meets the criteria of subparagraph (f)(6) of Rule 19b-4 ⁴⁰ because it would not significantly affect the protection of investors or the public interest. Rather, the proposed rule change neither significantly affects the protection of investors or the public interest, nor does it impose any burden on competition because it would merely combine the attributes of two existing order types—D-Limit orders and reserve orders—to expand the functionality available to Members, as discussed in the Purpose section, and does not raise any new or novel material issues that

have not already been considered by the Commission in connection with existing order types offered by IEX. Accordingly, IEX has designated this rule filing as non-controversial under Section 19(b)(3)(A) of the Act ⁴¹ and paragraph (f)(6) of Rule 19b-4 thereunder. ⁴²

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) ⁴³ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-IEX-2021-08 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to File Number SR-IEX-2021-08. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-IEX-2021-08, and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. ⁴⁴

J. Matthew DeLesDernier,

Assistant Secretary.

System Plan Governing the Consolidated Audit Trail (the “CAT NMS Plan” or “Plan”).³

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/gemx/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under the CAT NMS Plan, the Operating Committee of the Consolidated Audit Trail, LLC (“Company”) (“Operating Committee”) has discretion to establish funding for the Company to operate the CAT, including establishing fees that the Participants will pay, and establishing fees for Industry Members that will be implemented by the Participants.⁴ The Operating Committee has filed with the SEC a proposal to amend the CAT NMS Plan to implement a revised funding model for the CAT (“CAT Funding Model”) and to establish a fee schedule for Participant CAT fees (“Proposed CAT Fee Plan Amendment”).⁵ The Proposed CAT Fee Plan Amendment describes the CAT Funding Model in detail, including the proposal to charge Industry Members CAT fees. The Participants are required to file with the SEC under Section 19(b) of the Exchange Act any CAT fees applicable to Industry Members that the Operating Committee approves.⁶ Accordingly, the purpose of this proposed rule change is

to implement the required fee schedule provisions for CAT fees applicable to Industry Members that are GEMX members in accordance with the CAT Funding Model. The fee schedule provisions will become operative upon the SEC’s approval of the Proposed CAT Fee Plan Amendment.

(1) CAT Funding Model

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, the CAT fees applicable to Participants and Industry Members for the relevant quarter would be designed to cover the total CAT costs associated with developing, implementing and operating the CAT for the relevant quarter (“Total CAT Costs”).⁷ The CAT Funding Model would implement a bifurcated funding model, where these costs would be borne by both Participants and Industry Members. Industry Members as a group would pay 75% of the Total CAT Costs (the “Industry Member Allocation”), and Participants as a group would pay 25% of the Total CAT Costs (the “Participant Allocation”).⁸

Under the CAT Funding Model set out in the Proposed CAT Fee Plan Amendment, each Industry Member will pay a CAT fee that is calculated by multiplying each Industry Member’s message traffic percentage of the total message traffic of all Industry Members during the relevant time period by the Industry Member Allocation, subject to certain market maker message traffic discounts, a Minimum Industry Member CAT Fee and a Maximum Industry Member CAT Fee. Each Industry Member that is an Options Market Maker will have a discount based on the options trade-to-quote ratio applied to its Options Market Maker message traffic when calculating that Industry Member’s message traffic, and each Industry Member that is an Equity Market Maker will have a discount based on the NMS Stock trade-to-quote ratio applied to its Equity Market Maker message traffic when calculating that Industry Member’s message traffic. In addition, each Industry Member will pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic. Furthermore, an Industry

Member’s CAT fee would be subject to the Maximum Industry Member CAT Fee. The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member’s percentage of total message traffic. Each of these aspects of the Industry Member CAT fee are discussed in more detail below.

(A) CAT Fees for Both Industry Members and Participants

Under the CAT Funding Model, both Participants and Industry Members would contribute to the funding of the CAT by paying a CAT fee.⁹ As permitted by Rule 613, the CAT NMS Plan requires Industry Members to pay a CAT fee. Rule 613(a)(1)(vii)(D) contemplates Industry Members contributing to the payment of CAT costs. Specifically, this provision requires the CAT NMS Plan to address “[h]ow the plan sponsors propose to fund the creation, implementation, and maintenance of the consolidated audit trail, including the proposed allocation of such estimated costs among the plan sponsors, and between the plan sponsors and members of the plan sponsors.”

In addition, as approved by the SEC, the CAT NMS Plan specifically contemplates CAT fees to be paid by both Industry Members and Participants. Section 11.1(b) states that “the Operating Committee shall have discretion to establish funding for the Company, including: (i) Establishing fees that the Participants shall pay; and (ii) establishing fees for Industry Members that shall be implemented by the Participants.”¹⁰ The Commission stated in approving the CAT NMS Plan the following:

The Commission believes that the proposed funding model reflects a reasonable exercise of the Participants’ funding authority to recover the Participants’ costs related to the CAT. The CAT is a regulatory facility jointly owned by the Participants and, as noted above, the Exchange Act specifically permits the Participants to charge

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in Rule General 7 (Consolidated Audit Trail Compliance) (GEMX General 7 incorporates The Nasdaq Stock Market LLC General 7 by reference).

⁴ Section 11.1(b) of the CAT NMS Plan.

⁵ See Securities Exchange Act Release No. 91555 (April 14, 2017), 86 FR 21050 (April 21, 2021) (“Proposed CAT Fee Plan Amendment”).

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ Note that certain costs would be excluded from the Historical CAT Assessment Costs, as discussed in more detail below. See Proposed CAT Fee Plan Amendment at 21051 [sic], 21074 [sic].

⁸ Each Industry Member and Participant CAT Reporter would be required to pay CAT fees established via the CAT Funding Model. CAT Reporting Agents acting in their role as such would not have an obligation to pay CAT fees. See Proposed CAT Fee Plan Amendment at 21051 [sic].

⁹ Proposed CAT Fee Plan Amendment at 21054–55.

¹⁰ See also Sections 11.1(c), 11.2(c), and 11.3(a) and (b) of the CAT NMS Plan.

members fees to fund their self-regulatory obligations. The Commission further believes that the proposed funding model is designed to impose fees reasonably related to the Participants' self-regulatory obligations because the fees would be directly associated with the costs of establishing and maintaining the CAT, and not unrelated SRO services.¹¹

In its recent amendments to the CAT NMS Plan, the SEC reaffirmed the ability for the Participants to charge Industry Members a CAT fee. Specifically, the SEC noted that the amendments were not intended to change the basic funding structure for the CAT, which may include fees established by the Operating Committee, and implemented by the Participants, to recover from Industry Members the costs and expenses incurred by the Participants in connection with the development and implementation of the CAT.¹²

Finally, as noted by the SEC, the CAT "substantially enhance[s] the ability of the SROs and the Commission to oversee today's securities markets,"¹³ thereby benefitting all market participants. As such, both Participants and Industry Members should contribute to covering the cost of the CAT.

(B) 75%/25% Allocation Between Industry Members and Participants

The CAT NMS Plan as approved by the Commission provides the Operating Committee with discretion to establish CAT fees to be paid by Participants and Industry Members. The CAT Funding Model as set out in the Proposed CAT Fee Plan Amendment contemplates allocating CAT costs between Participants and Industry Members to permit the calculation of CAT fees based on market share for Participants and based on message traffic for Industry Members.¹⁴ Under the CAT Funding Model as proposed, Industry Members as a group would pay 75% of the Total CAT Costs (the "Industry Member Allocation"), and Participants as a group would pay 25% of the Total CAT

Costs (the "Participant Allocation").¹⁵ As discussed in more detail below, the Industry Member Allocation of 75% of the Total CAT Costs is included in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule for the Consolidated Audit Trail Funding Fees. In each such paragraph, the calculation of the Industry Member CAT fees is based on 75% of the Total CAT Costs.

(C) Message Traffic

The Industry Member Allocation would be allocated to each Industry Member based on message traffic.¹⁶ Each Industry Member CAT Reporter would pay a CAT fee that is calculated by multiplying each Industry Member's percentage of the total message traffic of all Industry Members each quarter by the Industry Member Allocation, subject to certain market making discounts, Minimum Industry Member CAT Fees, and Maximum Industry Member CAT Fees. To implement the use of message traffic in the calculation of Industry Member CAT fees, the Exchange proposes to describe the use of message traffic in proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule. In each such paragraph, the Industry Member CAT fees are calculated based on Industry Members' message traffic in the CAT.

As set out in the Proposed CAT Fee Plan Amendment,¹⁷ message traffic would be calculated based on Industry Members' Reportable Events reported to the CAT as defined in the CAT Reporting Technical Specifications for Industry Members ("IM Reporting Tech Specs") as amended from time to time.¹⁸ The Reportable Events may vary over time if the IM Reporting Tech Specs are amended.¹⁹ However, Reportable Events

in the current IM Reporting Tech Specs that will be counted as message traffic include, but are not limited to, such events as the New Order Event, the Order Route Event and the Trade Event. In addition, message traffic will not include reporting activity related to Customer information as set forth in the CAT Reporting Customer and Account Technical Specifications for Industry Members.²⁰

(D) Market Maker Discounts

As set out in the Proposed CAT Fee Plan Amendment, the Operating Committee recognized that treating Options Market Maker message traffic and Equity Market Maker message traffic in the same way as other message traffic for purposes of calculating Industry Member CAT fees may result in an undue or inappropriate burden on competition or may lead to a reduction in market quality.²¹ For example, charging Industry Members on the basis of message traffic may impact market makers disproportionately because of their continuous quoting obligations. Moreover, in the context of Options Market Makers, message traffic would include bids and offers for every Listed Options strikes and series. Accordingly, the Operating Committee determined to discount Options Market Maker message traffic by the trade-to-quote ratio for Listed Options when calculating message traffic for Options Market Makers, and to discount Equity Market Maker message traffic by the trade-to-quote ratio for NMS Stocks when calculating message traffic for Equity Market Makers. The message traffic of Options Market Makers and Equity Market Makers, as discounted, would be counted as part of the total message traffic for all Industry Members. The practical effect of applying such discounts for market making activity would be to lower the CAT fees for Options Market Makers and Equity Market Makers.

(I) Options Market Maker Discount

Each Industry Member that is an Options Market Maker²² would have a

Reportable Events reported to the CAT in any relevant quarter, regardless of whether all Industry Members are reporting to the CAT or all Reportable Events are required to be reported to the CAT for a relevant quarter. See Proposed CAT Fee Plan Amendment at 27.

²⁰ The CAT Reporting Customer and Account Technical Specifications for Industry Members are available at www.catnmsplan.com.

²¹ See Proposed CAT Fee Plan Amendment at 21057–58.

²² Section 1.1 of the CAT NMS Plan; Nasdaq General 7 Section 1(ee) defines an "Options Market Maker" as "a broker-dealer registered with an

¹¹ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696, 84794 (Nov. 23, 2016) ("CAT NMS Plan Approval Order").

¹² Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31329 (May 22, 2020) ("Financial Accountability Release").

¹³ Securities Exchange Act Rel. No. 67457 (Jul. 18, 2012), 77 FR 45722, 45726 (Aug. 1, 2012).

¹⁴ See Proposed CAT Fee Plan Amendment at 21055–56 [sic]. Note that, in the funding model set forth in Article XI of the CAT NMS Plan ("Original Funding Model"), costs were allocated between Execution Venues and certain Industry Members, whereas the CAT Funding Model would allocate costs between Participants and Industry Members.

¹⁵ For additional discussions regarding the 75%-25% allocation, see Proposed CAT Fee Plan Amendment at 21056–58 [sic].

¹⁶ For additional discussions regarding the use of message traffic for calculating Industry Member CAT fees, see Proposed CAT Fee Plan Amendment at 21059 [sic].

¹⁷ See Proposed CAT Fee Plan Amendment at 21056–57.

¹⁸ The CAT Reporting Technical Specifications for Industry Members are available at www.catnmsplan.com.

¹⁹ Due to the Phased Reporting approach, all Reportable Events will not be reported until all Industry Members are reporting all Reportable Events to the CAT. For example, Phase 2d CAT Reporting is scheduled for December 2021, and Small Industry Non-OATS Reporters are not required to report until December 2021. In addition, certain Reportable Events, such as simple options manual orders and OTC link messages, are not required to be reported until later in the Phased Reporting. For a detailed description of such Reportable Events, see CAT Reporting Technical Specifications for Industry Members (available at www.catnmsplan.com). For the Industry Member CAT reporting timeline, see, e.g., FINRA Rule 6895(c). CAT costs will be allocated based on the

discount based on the options trade-to-quote ratio applied to its options market making message traffic when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on options market making due to such message traffic.²³ Specifically, for each Options Market Maker, a discount would be applied to (1) all message traffic reported to the CAT by the Options Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered, regardless of where the order is ultimately routed or executed;²⁴ and (2) all message traffic for which a "quote sent time" is reported by an Options Exchange on behalf of the given Options Market Maker.

The relevant trade-to-quote ratio for the Options Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the securities information processors ("SIP"). As an example, the trade-to-quote ratio for Listed Options for the fourth quarter of 2020 was 0.01%.

Accordingly, each Options Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the options trade-to-quote ratio. The Options Market Maker's CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁵ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

exchange for the purpose of making markets in options contracts traded on the exchange." (GEMX General 7 incorporates The Nasdaq Stock Market LLC General 7 by reference).

²³ See Proposed CAT Fee Plan Amendment at 21058.

²⁴ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Options Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by an Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 21058.

²⁵ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Options Market Makers. See Proposed CAT Fee Plan Amendment at 21058.

To implement the Options Market Maker discount, the Exchange proposes to add paragraph (g)(1) to the fee schedule. Paragraph (g)(1) would state that "[w]hen calculating the message traffic of an Industry Member that is an Options Market Maker, the Options Market Maker's market making message traffic would be discounted by multiplying its Listed Options market making message traffic by the Listed Options trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Options Market Maker message traffic for each of the four Industry Member CAT fees.

(II) Equity Market Maker Discount

Similarly, each Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker") would have a discount based on the NMS Stock trade-to-quote ratio applied to its market making message traffic in NMS Stocks when calculating that Industry Member's message traffic to prevent a potentially disproportionate effect on market making in NMS Stocks.²⁶ Specifically, for each Equity Market Maker, a discount would be applied to all message traffic reported to the CAT by the Equity Market Maker related to an order originated by a market maker in its market making account for a security in which it is registered,²⁷ regardless of where the order is ultimately routed or executed.²⁸

The relevant trade-to-quote ratio for the Equity Market Maker discount would be calculated each quarter based on the prior quarter's SIP Data that is included in CAT Data. The discount is calculated by dividing the adjusted trade count (that is, the total number of trades for the quarter minus the total number of trade busts) by the total number of quotes received by the SIP. As an example, the trade-to-quote ratio for NMS Stocks for the fourth quarter of 2020 was 4.77%.

²⁶ See Proposed CAT Fee Plan Amendment at 21058.

²⁷ Note that Equity Market Makers do not have a quote sent time exemption comparable to the Options Market Maker quote sent time exemption, as discussed above.

²⁸ Under the current version of the IM Reporting Tech Specs, the discount would apply to new order messages and all related messages reported to the CAT by an Equity Market Maker with an accountHolderType = O. See CAT FAQ C5 (available at www.catnmsplan.com). The discount would not apply to messages by the Industry Member that are associated with any other accountHolderType. The IM Reporting Tech Specs may be amended from time to time and this designation could be changed. See Proposed CAT Fee Plan Amendment at 21058.

The Equity Market Maker CAT fee would be calculated in the same manner as the Options Market Maker CAT fee. Each Equity Market Maker's discounted message traffic count would be calculated by multiplying its message traffic by the NMS Stock trade-to-quote ratio. The Equity Market Maker CAT fee then would be calculated by multiplying its discounted percentage of the total message traffic of all Industry Members during the relevant time period²⁹ by the Industry Member Allocation, subject to the Minimum Industry Member CAT Fee and the Maximum Industry Member CAT Fee.

To implement the Equity Market Maker discount, the Exchanges proposes to add paragraph (g)(2) to the fee schedule. Paragraph (g)(2) would state that "[w]hen calculating the message traffic of an Industry Member that is an equity market maker in NMS Stocks ("Equity Market Maker"), the Equity Market Maker's market making message traffic would be a [sic] discounted by multiplying its market making message traffic in NMS Stocks by the NMS Stock trade-to-quote ratio." In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule would state that the message traffic calculation would be subject to applicable discounts for Equity Market Maker message traffic for each of the four Industry Member CAT fees.

(E) Minimum Industry Member CAT Fee

Each Industry Member would be required to pay a Minimum Industry Member CAT Fee of \$125 per quarter if its CAT fee would be less than \$125 per quarter when calculated based on message traffic.³⁰ All Industry Members required to report to the CAT, including those that have not yet begun to report to the CAT due to the phased implementation schedule for the CAT, would be subject to the Minimum Industry Member CAT Fee. If any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member

²⁹ Note that the total message traffic of all Industry Members during the relevant time period will be calculated using the discounted total for all Equity Market Makers. See Proposed CAT Fee Plan Amendment at 21058.

³⁰ For additional discussions regarding the Minimum Industry Member CAT Fee, see Proposed CAT Fee Plan Amendment at 21058–59.

CAT Fee in accordance with their message traffic percentage.³¹

To implement the Minimum Industry Member CAT Fee, the Exchange proposes to add paragraph (h) to the fee schedule. Proposed paragraph (h)(1) of the fee schedule would state that “[t]he Minimum Industry Member CAT Fee is \$125 per quarter.” Proposed paragraph (h)(2) of the fee schedule would state that “[i]f any Industry Member is required to pay the Minimum Industry Member CAT Fee, the total additional amount paid by all such Industry Members over the amount they otherwise would have paid as a result of their message traffic calculation would be discounted from all Industry Members other than those that were subject to a Minimum Industry Member CAT Fee in accordance with their message traffic percentage (“Minimum Industry Member CAT Fee Re-Allocation”).” In addition, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) of the fee schedule describes the Minimum Industry Member CAT Fee Re-Allocation for each of the four Industry Member CAT fees.

(F) Maximum Industry Member CAT Fee

An Industry Member’s CAT fee also would be subject to a Maximum Industry Member CAT Fee.³² The Maximum Industry Member CAT Fee would be the fee calculated based on 8% of the total message traffic for all Industry Members. If an Industry Member’s fee is subject to the Maximum Industry Member CAT Fee, any excess amount which the Industry Member would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members (including any Industry Members subject to the Maximum Industry Member CAT Fee and any Industry Members subject to the Minimum Industry Member CAT Fee) in accordance with each Industry Member’s percentage of total message traffic.

To implement the Maximum Industry Member CAT Fee, the Exchange proposes to add proposed paragraph (f) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (f)(1) would state that “[t]he Maximum Industry Member CAT Fee for each

quarter is 8% of the total CAT costs for the relevant quarter.” In addition, proposed paragraph (f)(2) would state that

If an Industry Member’s CAT Fee that is calculated pursuant to paragraph (a)(2), (b)(2), (c)(2), (d)(2), as applicable, without reference to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation, is greater than the Maximum Industry Member CAT Fee, then the Industry Member will be subject to the Maximum Industry Member CAT Fee. If any Industry Member is subject to the Maximum Industry Member CAT Fee, then any excess amount which the Industry Member otherwise would have paid as a fee above such Maximum Industry Member CAT Fee will be re-allocated among all Industry Members, including any Industry Member that is subject to the Maximum Industry Member CAT Fee or subject to the Minimum Industry Member CAT Fee in accordance with their message traffic percentage (“Maximum Industry Member CAT Fee Re-Allocation”).

Furthermore, proposed paragraphs (a)(1), (b)(1), (c)(1) and (d)(1) would state that an Industry Member’s CAT fee calculated pursuant to (a)(1), (b)(1), (c)(1) and (d)(1) would include any applicable Maximum Industry Member CAT Fee Re-Allocation. Finally, proposed paragraphs (a)(2), (b)(2), (c)(2) and (d)(2) would state that an Industry Member’s CAT fee calculated pursuant to paragraph (a)(2), (b)(2), (c)(2) or (d)(2) is subject to the Maximum Industry Member CAT Fee and the Maximum Industry Member CAT Fee Re-Allocation.

(G) Total CAT Costs

As set out in the Proposed CAT Fee Plan Amendment, the Total CAT Costs for the year would be comprised of all fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during this period.³³

For purposes of the Historical CAT Assessment, the Total CAT Costs would be \$193,273,342, as set forth in the Proposed CAT Fee Plan Amendment. Accordingly, the quarterly CAT fee for the Historical CAT Assessment will be calculated based on costs of \$36,238,752, which is 1/4th of 75% of the Total CAT Costs. This amount is set forth in proposed paragraph (b)(2) of the fee schedule.

In addition, proposed paragraph (i) of the “Consolidated Audit Trail Funding Fees” section of its fee schedule describes the Total CAT Costs to be used in calculating the Period 3 CAT

Fee, the Period 4 CAT Fee and the Quarterly CAT Fees. Proposed paragraph (i)(1) of the fee schedule would state that “[t]he Period 3 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2021.” Proposed paragraph (i)(2) of the fee schedule would state that “[t]he Period 4 CAT Costs shall be the total CAT costs set forth in the year-end financial statements of the Consolidated Audit Trail, LLC for 2022.” Proposed paragraph (i)(3) of the fee schedule would state the following with regard to the Quarterly CAT Fees:

For purposes of the Quarterly CAT Fee, the budgeted Total CAT Costs for the relevant year shall be the total CAT costs set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan for the relevant year. The budgeted Total CAT Costs for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted budgeted costs for the CAT will be used in calculating the remaining CAT fees for that year.

(2) Proposed CAT Fees

The Exchange proposes to charge its Industry Members fees related to CAT costs. To implement these CAT fees, the Exchange proposes to add a section entitled “Consolidated Audit Trail Funding Fees” to its fee schedule, and to describe the CAT fees in that section.

(A) Historical CAT Assessment (for Pre-Period 1, Period 1 and Period 2)

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee determined to charge Industry Members a historical assessment (“Historical CAT Assessment”) to recover certain CAT costs incurred prior to January 1, 2021 (“Historical CAT Assessment Costs”).³⁴ Specifically, as detailed in the Proposed CAT Fee Plan Amendment, the Historical CAT Assessment is intended to collect from Industry Members 75% of certain costs incurred through June 22, 2020, the effective date for the Financial Accountability Milestones,³⁵ certain costs from Period 1 of the Financial Accountability Milestones (which covered the period from June 22, 2020—July 31, 2020) and certain costs from Period 2 of the Financial

³¹ Options Market Makers and Equity Market Makers will be required to pay the Minimum Industry Member CAT Fee if their quarterly CAT fee calculated with the market maker discounts is less than \$125 per quarter.

³² For additional discussions regarding the Maximum Industry Member CAT Fee, see Proposed CAT Fee Plan Amendment at 21058–59 [sic].

³³ See Proposed CAT Fee Plan Amendment at 21063.

³⁴ See Proposed CAT Fee Plan Amendment at 21064–65.

³⁵ See Section 11.6 of the CAT NMS Plan; and Financial Accountability Release.

Accountability Milestones (which covered the period from August 1, 2020—December 31, 2020). The Total CAT Costs, excluding Excluded Costs (as defined below) and certain costs related to the conclusion of the relationship with Thesys CAT, LLC is \$193,273,342. The Historical CAT Assessment is designed to recover 75% of these CAT costs. Accordingly, the Historical CAT Assessment Costs would be \$144,955,006.

Using the Historical CAT Assessment Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Historical CAT Assessment owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover the Historical CAT Assessment Costs over a period of four calendar quarters, commencing upon the SEC's approval of the Historical CAT Assessment. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic (subject to the market making discounts and the maximum fee). The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by \$36,238,752, which is 1/4th of the Historical CAT Assessment Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation, and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to

commence paying the Historical CAT Assessment in the first quarter after SEC approval of the Historical CAT Assessment, based on CAT Data from the quarter in which the SEC approved the CAT fees.

To implement the Historical CAT Assessment, the Exchange proposes to add proposed paragraph (b) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (b) would state that "each Industry Member shall pay an Historical CAT Assessment in the amount of the greater of the following each quarter for four quarters commencing upon approval of the Historical CAT Assessment by the SEC: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by \$36,238,752 (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

In accordance with Section 11.6(b) of the CAT NMS Plan and as provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 1. Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. As indicated by the

Participants' Quarterly Progress Report,³⁶ Initial Industry Member Core Equity and Option Reporting was completed on schedule by July 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020.

As provided in the Proposed CAT Fee Plan Amendment, the proposed Historical CAT Assessment seeks to recover costs that are related to Post-Amendment Expenses incurred during Period 2. Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. As indicated by the Participants' Quarterly Progress Report,³⁷ Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020. As discussed above, the Historical CAT Assessment Costs to be recovered via the Historical CAT Assessment would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. Accordingly, proposed paragraph (b) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Historical CAT Assessment "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Historical CAT Assessment:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	\$36,238,752	Quarter of SEC approval of Historical CAT Assessment.	1st quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #2	36,238,752	1st quarter after SEC approval of Historical CAT Assessment.	2nd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #3	36,238,752	2nd quarter after SEC approval of Historical CAT Assessment.	3rd quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.
Quarterly CAT Fee #4	36,238,752	3rd quarter after SEC approval of Historical CAT Assessment.	4th quarter after SEC approval of Industry Member CAT Fees as set forth in the CAT Fee Plan Amendment.

³⁶ Q3 2020 Quarterly Progress Report (Oct. 30, 2020) (available at www.catnmsplan.com).

³⁷ Q4 2020 Quarterly Progress Report (Jan. 29, 2021) (available at www.catnmsplan.com).

(B) Period 3 CAT Fee

Per the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2021 through December 31, 2021, referred to as the Period 3 CAT Fee.³⁸ The Total CAT Costs incurred from January 1, 2021 through December 31, 2021 (“Period 3 CAT Costs”) will be calculated at the completion of 2021. Specifically, the Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

Using the Period 3 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 3 CAT Fee owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 3 CAT Costs over a period of four calendar quarters, commencing in 2022. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member’s fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message by ROTFLth of 75% of the Period 3 CAT Costs traffic (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee

Re-Allocation). Each Industry Member’s message traffic would be calculated using CAT Data from the prior quarter. Industry Members would be required to commence paying the Period 3 CAT Fee in the second quarter of 2022, based on CAT Data from the first quarter of 2022.

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2021 the Total CAT Costs for 2021 to be used in calculating the quarterly Period 3 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. Such financial statements are required to be prepared in accordance with Section 9.2 of the CAT NMS Plan, including requirements related to compliance with GAAP, auditing by an independent public accounting firm and making the statements publicly available.

To implement the Period 3 CAT Fee, the Exchange proposes to add proposed paragraph (c) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule. Proposed paragraph (c) would state that “each Industry Member shall pay a Period 3 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2022: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member’s message traffic of the total Industry Member message traffic based on the prior quarter’s message traffic by 1/4th of 75% of the Period 3 Total CAT Costs (subject to applicable discounts for Options Market Maker

message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation).”

Per the Proposed CAT Fee Plan Amendment, the proposed Period 3 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 3. Period 3 began on January 1, 2021 and is expected to conclude on December 31, 2021, the date of Full Availability and Regulatory Utilization of Transactional Database Functionality. As discussed above, the Period 3 CAT Costs to be recovered via the Period 3 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2020 through December 31, 2021. The collection of the full amount of the Period 3 CAT Fee will depend upon achievement of Full Availability and Regulatory Utilization of Transactional Database Functionality by December 31, 2021; if not, the amount of the Period 3 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (c) of the “Consolidated Audit Trail Funding Fees” section of its fee schedule would state that Industry Members will be required to pay the Period 3 CAT Fee “[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan.”

The following chart summarizes the imposition of the Period 3 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 3 CAT Costs ³⁹ .	CAT Data from first quarter of 2022 ...	2nd quarter of 2022.
Quarterly CAT Fee #2	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from second quarter of 2022.	3rd quarter of 2022.
Quarterly CAT Fee #3	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from third quarter of 2022 ..	4th quarter of 2022.
Quarterly CAT Fee #4	1/4th of 75% of the Period 3 CAT Costs.	CAT Data from fourth quarter of 2022	1st quarter of 2023

(C) Period 4 CAT Fee

As set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined to charge Industry Members a quarterly fee to recover a percentage of the Total CAT Costs incurred from January 1, 2022

through December 30, 2022, referred to as the Period 4 CAT Fee.⁴⁰ The Total CAT Costs incurred from January 1, 2022 through December 30, 2022 (“Period 4 CAT Costs”) will be calculated at the completion of 2022. Specifically, the Period 4 CAT Costs

will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements of the Company.

Using the Period 4 CAT Costs, as set forth in the Proposed CAT Fee Plan Amendment, the Operating Committee will calculate the Period 4 CAT Fee

³⁸ See Proposed CAT Fee Plan Amendment at 21065–66.

³⁹ The Period 3 CAT Costs will be the total actual costs incurred for the CAT for 2021 as set forth in the 2021 financial statements for the Company.

⁴⁰ See Proposed CAT Fee Plan Amendment at 21066–67.

owed by each Industry Member in accordance with the CAT Funding Model. Per the Proposed CAT Fee Plan Amendment, the Operating Committee plans to recover Period 4 CAT Costs over a period of four calendar quarters, commencing in 2023. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic. The message traffic fee would be calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using CAT Data from the prior quarter. Industry Members will be required to commence paying the Period 4 CAT Fee in the second quarter of 2023, based on data from the first quarter of 2023.

To implement the Period 4 CAT Fee, the Exchange proposes to add proposed paragraph (d) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (d) would state that "each Industry Member

shall pay a Period 4 CAT Fee in the amount of the greater of the following each quarter for four quarters commencing in the second quarter of 2023: (1) Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4th of 75% of the Period 4 CAT Costs (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands that the Operating Committee will announce via a CAT alert after the end of 2022 the Total CAT Costs for 2022 to be used in calculating the quarterly Period 4 CAT Fees. Such Total CAT Costs will be set forth in the year-end financial statements of the Consolidated Audit Trail, LLC. As noted above, such financial statements are required to be prepared in accordance with the requirements set forth in Section 9.2 of the CAT NMS Plan.

The Exchange indicates that the proposed Period 4 CAT Fee seeks to recover costs that will be related to Post-Amendment Expenses incurred during Period 4. Period 4 is expected to begin on January 1, 2022 and conclude on December 30, 2022, the date of Full Implementation of CAT NMS Plan Requirements. As discussed above, the Period 4 CAT Costs to be recovered via the Period 4 CAT Fee would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2022 through December 30, 2022. The collection of the full amount of the Period 4 CAT Fee will depend upon achievement of Full Implementation of CAT NMS Plan Requirements by December 30, 2022; if not, the amount of the Period 4 CAT Fee that may be collected from the Industry Members will depend upon the fee limitations set forth in Section 11.6(a)(ii) of the CAT NMS Plan. Accordingly, proposed paragraph (e) of the "Consolidated Audit Trail Funding Fees" section of its fee schedule would state that Industry Members will be required to pay the Period 4 CAT Fee "[s]ubject to the requirements of Section 11.6 of the CAT NMS Plan."

The following chart summarizes the imposition of the Period 4 CAT Fee:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the Period 4 CAT Costs ⁴¹ .	CAT Data from first quarter of 2023 ...	2nd quarter of 2023.
Quarterly CAT Fee #2	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from second quarter of 2023.	3rd quarter of 2023.
Quarterly CAT Fee #3	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from third quarter of 2023 ..	4th quarter of 2023.
Quarterly CAT Fee #4	1/4th of 75% of the Period 4 CAT Costs.	CAT Data from fourth quarter of 2023	1st quarter of 2024.

(D) Quarterly CAT Fee—Beginning 2023

As provided in the Proposed CAT Fee Plan Amendment, to recover the costs of the CAT going forward beginning in 2023, the Operating Committee determined to charge Industry Members an ongoing quarterly CAT fee calculated based on the allocation of Total CAT Costs pursuant to the CAT Funding Model ("Quarterly CAT Fee").⁴² The Operating Committee will use the costs

set forth in the annual operating budget as the Total CAT Costs in the calculation of the Quarterly CAT Fee. Specifically, the Total CAT Costs budgeted for the upcoming year for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan. Using these estimated Total CAT Costs, the Operating Committee will calculate the Quarterly CAT Fee owed by each Industry Member in accordance with

the CAT Funding Model. As provided in the Proposed CAT Fee Plan Amendment, the Operating Committee proposes to seek to recover the budgeted Total CAT Costs over the course of the year. Each quarter, each Industry Member will pay the greater of the minimum fee of \$125 or the Industry Member's fee calculated based on message traffic.⁴³ The message traffic fee would be calculated by multiplying the

⁴¹ The Period 4 CAT Costs will be the total actual costs incurred for the CAT for 2022 as set forth in the 2022 financial statements for the Company.

⁴² See Proposed CAT Fee Plan Amendment at 21067–68.

⁴³ To the extent that any two or more of the four categories of Industry Member CAT fees (*i.e.*, the Historical CAT Assessment, Period 3 CAT Fee,

Period 4 CAT Fee and the Quarterly CAT Fee) are due during the same quarter, any Industry Member obligated to pay one or more categories of fees is required to pay each category of fee for that quarter. For example, if an Industry Member would be subject to the Minimum Industry Member CAT Fee for the Period 4 CAT Fee and the Minimum Industry Member CAT Fee for the Quarterly CAT Fee during the same quarter, the Industry Member

would be required to pay two minimum \$125 fees that quarter for a total of \$250. As another example, suppose that an Industry Member owed a CAT fee (other than the minimum fee of \$125) for both the Historical CAT Assessment and the Period 3 CAT Fee, the Industry Member would be required to pay both fees that quarter. See Proposed CAT Fee Plan Amendment at 21067.

percentage of the Industry Member's message traffic of the total Industry Member message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation). Each Industry Member's message traffic would be calculated using data from the prior calendar quarter. The Exchange proposes to commence charging this CAT fee in the second quarter of 2023, based on CAT Data from the first quarter of 2023.

To implement the Quarterly CAT Fee, the Exchange proposes to add proposed paragraph (a) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule. Proposed paragraph (a) would state that "[e]ach Industry Member shall pay a Quarterly CAT Fee in the amount of the greater of the following each quarter commencing in the second quarter of 2023: (1)

Minimum Industry Member CAT Fee (plus any applicable Maximum Industry Member CAT Fee Re-Allocation); or (2) the amount calculated by multiplying the percentage of the Industry Member's message traffic of the total Industry Member message traffic based on the prior quarter's message traffic by 1/4th of 75% of the budgeted Total CAT Costs for the relevant year (subject to applicable discounts for Options Market Maker message traffic and Equity Market Maker message traffic, the Maximum Industry Member CAT Fee, the Maximum Industry Member CAT Fee Re-Allocation and the Minimum Industry Member CAT Fee Re-Allocation)."

The Exchange understands the Operating Committee will announce at the beginning of the relevant year via a CAT alert the budgeted Total CAT Costs to be used in calculating the Quarterly CAT Fees for that year. The budgeted Total CAT Costs will be the costs set forth in the annual operating budget for the Company required pursuant to Section 11.1(a) of the CAT NMS Plan.

As discussed above, CAT costs would include, but not be limited to, Plan Processor costs, insurance costs, third-party support costs and an operational reserve. As required by Section 11.1(c) of the CAT NMS Plan, any surpluses collected will be treated as an operational reserve to offset future fees and will not be distributed to the Participants as profits.⁴⁴ In addition, to address potential changes in the budget during the year, the total budgeted costs for the CAT for the relevant year may be adjusted on a quarterly basis as the Operating Committee reasonably deems appropriate for the prudent operation of the Company. To the extent that the Operating Committee adjusts the total budgeted costs for the CAT for the relevant year during its quarterly budget review, the adjusted total budgeted costs for the CAT will be used in calculating the remaining quarterly CAT fees for that year.

The following chart summarizes the imposition of the Quarterly CAT Fee each year commencing in 2023 and continuing each year thereafter:

Quarterly CAT fee	Quarterly industry member allocation	CAT data used for message traffic calculation	Payment due
Quarterly CAT Fee #1	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from first quarter of the relevant year.	2nd quarter of the relevant year
Quarterly CAT Fee #2	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from second quarter of the relevant year.	3rd quarter of the relevant year
Quarterly CAT Fee #3	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from third quarter of the relevant year.	4th quarter of the relevant year
Quarterly CAT Fee #4	1/4th of 75% of the budgeted annual CAT costs for the relevant year.	CAT Data from fourth quarter of the relevant year.	1st quarter of year following the relevant year

(3) Time and Manner of Payment

The Exchange proposes to add paragraph (e) to the "Consolidated Audit Trail Funding Fees" section of its fee schedule to describe the time and manner of the payment of the Industry Member CAT fees as provided in the Proposed CAT Fee Plan Amendment.⁴⁵ Proposed paragraph (e)(1) would state that "Consolidated Audit Trail, LLC will provide each Industry Member with an invoice setting forth the Industry Member's Historical CAT Assessment, Period 3 CAT Fee, Period 4 CAT Fee and/or Quarterly CAT Fee (as applicable) (collectively, "CAT Fees") for each payment period." Proposed paragraph (e)(2) would state that "Consolidated Audit Trail, LLC will provide each Industry Member with one invoice each payment period for its CAT Fees as determined pursuant to paragraph (a)–(d) above, regardless of

whether the Industry Member is a member of multiple self-regulatory organizations." Proposed paragraph (e)(3) would state that "[e]ach Industry Member will pay its CAT Fees to the Consolidated Audit Trail, LLC via the centralized system for the collection of CAT Fees established by the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC." Finally, proposed paragraph (e)(4) would require that Industry Members pay their CAT Fees within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due, such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime

Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.⁴⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,⁴⁷ which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the

⁴⁴ CAT NMS Plan Approval Order at 84792.

⁴⁵ See Proposed CAT Fee Plan Amendment at 21068.

⁴⁶ CAT Reporters will be responsible for each quarterly fee in which they are a CAT Reporter. If a CAT Reporter ceases to meet the definition of a CAT Reporter during a quarter, the CAT Reporter will still be responsible for CAT fees attributable to

its message traffic (or, the minimum fee in the alternative) during that quarter. See Proposed CAT Fee Plan Amendment at 21068.

⁴⁷ 15 U.S.C. 78f(b)(6).

Act,⁴⁸ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act⁴⁹ which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

Section 11.1(b) of the CAT NMS Plan states that "[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves." Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this proposed rule change to implement the Industry Member CAT fees included in the CAT Funding Model approved by the Operating Committee. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan "is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act."⁵⁰ To the extent that this proposal implements the Plan, and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

The Exchange further notes that, as provided in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed Industry Member CAT fees comply with the requirements of the Exchange Act and the CAT NMS Plan.⁵¹ The Operating Committee determined that the Industry Member CAT fees provide for the "equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities necessary or appropriate in furtherance of the purposes of this chapter,"⁵² as required

by the Exchange Act. The Operating Committee determined that the CAT fees equitably allocate CAT costs between Participants and Industry Members, and among Industry Members, as discussed in detailed [sic] above. For the reasons discussed above, the Operating Committee determined that the 75%–25% allocation between Industry Members and Participants in the CAT Funding Model as well as the use of message traffic for allocating costs among Industry Members provide for an equitable allocation of CAT costs among CAT Reporters. In addition, as discussed above, the Operating Committee determined that the imposition of minimum and maximum fees and market maker discounts would operate to provide for an equitable allocation of CAT costs among Industry Members.

As further provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also determined that the CAT Funding Model is "not designed to permit unfair discrimination between customers, issuers, brokers, or dealers,"⁵³ as required by the Exchange Act, as the CAT Funding Model does not unfairly discriminate between Industry Members and Participants, or among Industry Members. In making this determination, the Operating Committee noted that all Industry Members are grouped together for the purpose of determining CAT fees, and Industry Members with similar levels of activity would pay similar fees. For example, Industry Members with higher levels of message traffic would pay higher fees, and those with lower levels of message traffic would pay lower fees. With the elimination of tiers in the Original Funding Model, fees for Industry Members are directly related to their message traffic. With tiers, the relationship between message traffic and the CAT fee would not have been as direct.

In addition, as discussed in the Proposed CAT Fee Plan Amendment, where the method of fee calculation may potentially affect certain groups of CAT Reporters adversely, the Operating Committee sought to limit such adverse effects. For example, the Operating Committee proposed market maker discounts to address the high levels of message traffic generally exhibited by market makers. As discussed above, the SEC has recognized repeatedly that such favorable treatment for market makers in other contexts was not unfairly discriminatory or a burden on competition in light of its positive

effects on market quality, nor was it considered to involve an inequitable allocation of fees among members.

As also provided in the Proposed CAT Fee Plan Amendment, the Operating Committee also proposed the Maximum Industry Member CAT Fee to address the potential for significant fees based on outsized message traffic for certain Industry Members. The Maximum Industry Member CAT Fee would serve as a method to institute a cap on fees to fairly allocate costs to Industry Members. Such a fee would prevent Industry Members from paying significantly larger CAT fees than Participant complexes.

The Proposed CAT Fee Plan Amendment notes that Operating Committee also determined that the proposed Industry Member CAT fees would promote just and equitable principles of trade, and, in general, protect investors and the public interest, as the fees would be transparent and relate specifically to CAT activity. The Operating Committee also determined that the proposed fees were reasonable because they would provide ease of calculation, ease of billing and other administrative functions. Such factors are crucial to estimating a reliable revenue stream for the Company.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act⁵⁴ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change implements provisions of the CAT NMS Plan that are subject to approval by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan. The Exchange also notes that the proposed rule changes will apply equally to all Industry Members, including its GEMX members. In addition, all national securities exchanges and FINRA are proposing a similar proposed fee change to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the exchanges and FINRA.

⁴⁸ 15 U.S.C. 78f(b)(4).

⁴⁹ 15 U.S.C. 78f(b)(8).

⁵⁰ CAT NMS Plan Approval Order at 84696.

⁵¹ See Proposed CAT Fee Plan Amendment at 21068–70.

⁵² Sections 6(b)(4) and 15A(b)(5) of the Exchange Act.

⁵³ Sections 6(b)(5) and 15A(b)(6) of the Exchange Act.

⁵⁴ 15 U.S.C. 78f(b)(8).

Moreover, the Exchange notes that, as discussed in the Proposed CAT Fee Plan Amendment, the Operating Committee determined that the proposed fees do not impose an unnecessary or inappropriate burden on competition as they fairly and equitably allocate costs among CAT Reporters.⁵⁵ The Operating Committee determined that the cost allocation between Participants and Industry Members recognizes the greater number of Industry Members as compared to the Participants and the greater collective revenue of Industry Members as compared to Participants. In addition, cost allocations among Industry Members based on message traffic fairly and equitably distribute CAT costs. Furthermore, the market maker discounts and the Maximum Industry Member CAT Fee address the potential for burdens on market makers and Industry Members with outsized message traffic potentially resulting from the proposed fee calculations. Moreover, the Operating Committee determined that the Minimum Industry Member CAT Fee would not act as a barrier to entry for smaller Industry Member CAT Reporters.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.⁵⁶ At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-GEMX-2021-03 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-GEMX-2021-03. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-GEMX-2021-03 and should be submitted on or before June 1, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁷

J. Matthew DeLesDernier,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91770; File No. SR-NSCC-2021-801]

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of No Objection To Advance Notice To Amend the Supplemental Liquidity Deposit Requirements

May 4, 2021.

I. Introduction

On March 5, 2021, National Securities Clearing Corporation ("NSCC") filed with the Securities and Exchange Commission ("Commission") advance notice SR-NSCC-2021-801 ("Advance Notice") pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, entitled Payment, Clearing and Settlement Supervision Act of 2010 ("Clearing Supervision Act")¹ and Rule 19b-4(n)(1)(i)² under the Securities Exchange Act of 1934 ("Exchange Act")³ to amend its Supplemental Liquidity Deposit Requirements.⁴ The Advance Notice was published for comment in the **Federal Register** on March 24, 2021,⁵ and the Commission has received comments in support of the changes proposed in the Advance Notice.⁶ The Commission is hereby providing notice of no objection to the Advance Notice.

¹ 12 U.S.C. 5465(e)(1).

² 17 CFR 240.19b-4(n)(1)(i).

³ 15 U.S.C. 78a *et seq.*

⁴ See Notice of Filing *infra* note 5, at 86 FR 15750.

⁵ Exchange Act Release No. 91347 (March 18, 2021), 86 FR 15750 (March 24, 2021) (File No. SR-NSCC-2021-801) ("Notice of Filing"). NSCC also filed a related proposed rule change with the Commission pursuant to Section 19(b)(1) of the Exchange Act and Rule 19b-4 thereunder. 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b-4, respectively. NSCC seeks approval of the proposed changes to its rules necessary to implement the Advance Notice (the "Proposed Rule Change"). The Proposed Rule Change was published in the **Federal Register** on March 24, 2021. Securities Exchange Act Release No. 91350 (March 18, 2021), 86 FR 15738 (March 24, 2021) (SR-NSCC-2021-002). The comment period for the related Proposed Rule Change closed on April 14, 2021.

⁶ Comments are available at <https://www.sec.gov/comments/sr-nsc-2021-801/srnscc2021801.htm>. Since the proposal contained in the Advance Notice was also filed as a separate but related Proposed Rule Change, all public comments received on the proposals are considered regardless of whether the comments are submitted to the Proposed Rule Change or the Advance Notice. To date, the comments received generally support the proposal.

⁵⁶ 15 U.S.C. 78s(b)(3)(A)(ii).

⁵⁷ 17 CFR 200.30-3(a)(12).

II. The Advance Notice

A. Background

As a central counterparty (“CCP”),⁷ NSCC occupies an important role in the securities settlement system by interposing itself between counterparties to financial transactions, becoming the buyer to each seller and seller to each buyer to ensure the performance of the contract, thereby reducing the risk faced by its Members⁸ and contributing to global financial stability. NSCC’s liquidity risk management plays an integral part in NSCC’s ability to perform its role as a CCP. If a Member defaults, NSCC, as a CCP, would need to complete settlement of guaranteed transactions on the failing Member’s behalf from the date of default through the remainder of the settlement cycle (currently two days for securities that settle on a regular way basis in the U.S. markets). To do so, and to meet its related regulatory requirements, NSCC seeks to maintain sufficient liquid resources in order to meet the potential funding required to settle outstanding transactions of a defaulting Member in a timely manner, as well as to hold qualifying liquid resources sufficient to meet its minimum liquidity resource requirement in each relevant currency for which it has payment obligations owed to its Members.⁹

NSCC has a number of default liquidity resources that it considers to be qualifying liquid resources for the purposes of Rule 17Ad–22(a)(14).¹⁰ These resources include: (1) Cash deposits to the NSCC Clearing Fund;¹¹ (2) the proceeds of the issuance and private placement of (a) short-term, unsecured notes in the form of commercial paper and extendable notes (“Commercial Paper Program”),¹² and

(b) term debt (“Term Debt Issuance”);¹³ (3) cash that would be obtained by drawing on NSCC’s committed 364-day credit facility with a consortium of banks (“Line of Credit”);¹⁴ and (4) supplemental liquidity deposits, collected pursuant to NSCC Rule 4(A), as discussed further below.¹⁵

B. Current Rules Relating to Supplemental Liquidity Deposits

Currently, NSCC only collects supplemental liquidity deposits during monthly options expiry periods in order to cover the heightened liquidity exposure resulting from increased trading activity around options expiration.¹⁶ NSCC only collects supplemental liquidity deposits from its 30 largest Members or group of affiliated Members (hereinafter, “Providers”).¹⁷ NSCC calculates each Provider’s supplemental liquidity obligation for an upcoming options expiry period using an estimate based on NSCC’s highest liquidity need and the Provider’s settlement activity during the prior 24-months.¹⁸ Providers, in turn, must fund their supplemental liquidity obligations two business days prior to the start of the options expiry period, which NSCC will return seven business days after the end of that period.¹⁹

In order to ensure NSCC maintains adequate liquidity resources throughout the options expiry period, providers may voluntarily prefund additional supplemental liquidity deposits at the start of the period, if it anticipates

increases in its trading activity, compared to its historical activity, will create a liquidity shortfall at NSCC.²⁰ In the event a Provider fails to provide adequate voluntary prefunded deposits, NSCC may require the Provider to fund additional supplemental liquidity deposits if NSCC experiences a resulting liquidity shortfall,²¹ which NSCC may hold for up to 90 days.²² The 90-day lock-up incentivizes Providers to voluntarily prefund their supplemental liquidity deposits in order to ensure NSCC maintains adequate liquidity resources throughout the options expiry period.

C. Proposed Changes to the Rules Relating to Supplemental Liquidity Deposits

As discussed above, NSCC may only collect supplemental liquidity deposits during monthly options expiry periods under its current Rules. However, NSCC can face sudden liquidity shortfalls on any business day, not just those business days that fall within monthly options expiry periods, particularly during volatile market conditions unrelated to options expiration.²³ To address this issue, NSCC proposes to change the frequency at which it may collect supplemental liquidity deposits to each business day, based on a daily calculation. This proposed approach to collecting supplemental liquidity deposits should allow NSCC to respond quickly to any sudden liquidity shortfalls arising from a Provider’s activity, regardless of when those shortfalls occur.

NSCC also proposes an alternative pro rata daily calculation in the rare event its regular daily calculation would inadvertently result in collecting supplemental liquidity deposits from multiple Providers that, taken together, would significantly exceed NSCC’s liquidity needs on that day. Additionally, NSCC proposes the ability to collect supplemental liquidity deposits on an intraday basis in certain instances where sudden intraday increases in liquidity risk justify shortening the amount of time NSCC is exposed to that risk, including a mandatory intraday collection in connection with monthly options expiry periods.

1. Proposed Daily Calculation of Supplemental Liquidity Deposits

A Provider²⁴ will be obligated to provide a supplemental liquidity deposit on each business day in which its settlement activity causes a liquidity shortfall at NSCC.²⁵ NSCC will provide a notice to each Provider of the amount of its supplemental liquidity deposit, which the Provider will be required to fund within one hour of such notice.²⁶ NSCC proposes to return supplemental liquidity deposits on the next business day.²⁷

NSCC states that, under its proposed calculation, it will no longer need to estimate its liquidity need for a Provider's expected settlement activity based on the Provider's historical settlement activity.²⁸ Instead, each Provider's deposit will be calculated based on NSCC's actual liquidity need based on the Provider's daily settlement activity in the event the Provider defaulted on that day, which NSCC believes will provide both NSCC and Providers with a more reliable measure of the liquidity risks posed to NSCC.²⁹

NSCC provided the Commission with the results of an impact study comparing the proposal against the observed regulatory liquidity needs and

NSCC's qualifying liquid resources available during the period from 2016 through 2020. The study assessed both pro-forma and hypothetical impacts of the proposal under various liquidity scenarios. The study also analyzed historical trends including the average composition and rankings of the top 30 Providers at NSCC during the 2016 to 2020 period. Based on the pro-forma/hypothetical impact as well as analysis of the top Providers, the study's results generally indicate that the proposal would continue to allow NSCC to meet its regulatory liquidity obligations, and the largest Members would continue to be the ones affected by supplemental liquidity obligations.³⁰

2. Proposed Pro Rata Calculation of Supplemental Liquidity Deposits

As a potential alternative to the calculation described above, NSCC proposes a discretionary pro rata calculation that could apply in the event two or more Providers each would be obligated to provide a supplemental liquidity deposit of more than \$2 billion on a business day pursuant to the calculation described above.³¹ Under the proposed alternative, NSCC will have the option to allocate, on a pro rata basis, its largest liquidity need on a business day to all Providers that are required to make a supplemental liquidity deposit on that day, thereby reducing all such Providers' obligations to NSCC on that day. NSCC's determination will be based on the market conditions at that time. For example, NSCC may determine that, in certain market conditions, this alternative approach would be appropriate to alleviate liquidity pressures on all Providers required to make a supplemental liquidity deposit on that day.³² NSCC states this alternative would allow NSCC to use this pro rata calculation to sufficiently cover its liquidity exposure on that day, without requiring that all Providers fund the total amount of its calculated supplemental liquidity deposit on that day.

3. Proposed Intraday Supplemental Liquidity Calls

NSCC also proposes to establish intraday supplemental liquidity calls, which are intended to allow NSCC to calculate and collect additional supplemental liquidity deposits on an intraday basis if a Provider's increased daily activity levels or projected settlement activity causes a NSCC liquidity shortfall during a given day.³³ NSCC believes the proposed intraday supplemental liquidity calls will help to mitigate increased liquidity exposures presented to NSCC on an intraday basis in specified circumstances, as discussed further below.³⁴

i. Proposed Mandatory Intraday Supplemental Liquidity Call

First, NSCC proposes to establish a mandatory monthly intraday supplemental liquidity call that is calculated and collected, when applicable, on the first business day (typically a Friday) of an options expiry period.³⁵ A Provider's mandatory intraday supplemental liquidity call will be the difference between, on the one hand, NSCC's qualifying liquid resources and, on the other hand, NSCC's daily liquidity need based on the Provider's settlement activity at the start of the business day, recalculated to account for both the Provider's actual settlement activity submitted to NSCC over the course of the day, and the Provider's projected settlement activity in stock options expected to be submitted to NSCC.³⁶ Because NSCC's recalculated daily liquidity need will not factor in late day trades or other off-setting settlement activity,³⁷ NSCC proposes to adjust its re-calculated daily liquidity need using an estimated

²⁴ Under the proposal, Providers will continue to be the 30 largest Members or group of affiliated Members, but NSCC proposes to simplify how it determines the 30 Providers in order to provide greater transparency and predictability in its determination. The 30 Providers will be determined daily and will be based on the Provider's settlement activity during the prior 24-months. NSCC's determination will no longer require a calculation of liquidity exposures the Providers presented to NSCC based on NSCC's qualifying liquid resources throughout a 24 month lookback period. NSCC will continue to make available to each Member daily information on NSCC's liquidity need based on that Member's settlement activity on the previous business day.

²⁵ A liquidity shortfall will arise if NSCC's daily liquidity need exceeds its qualifying liquid resources, assuming stressed market conditions. NSCC will continue to apply stress scenarios in determining its total qualifying liquid resources in order to anticipate market conditions that could cause those resources to be unavailable on that day. Because the daily calculation will be done at the start of each business day, it will be based on the qualifying liquid resources available to NSCC as of the end of the prior business day.

²⁶ NSCC's proposed timing would mirror the current requirement that is applied to its Members' Required Fund Deposits (*i.e.*, margin), which is also calculated and collected daily, and must be funded within one hour of demand. NSCC expects to deliver notification of Provider obligations by around 8:30 a.m. ET each business day, with deposits required by no later than 9:30 a.m. ET. *See* Notice of Filing, *supra* note 5, at 15753.

²⁷ *See* Notice of Filing, *supra* note 5, at 15754. Because NSCC would recalculate supplemental liquidity deposits daily, NSCC will no longer need to hold deposits for the extended periods under its current Rules. *See id.*

²⁸ *See* Notice of Filing, *supra* note 5, at 15753.

²⁹ *See id.*

³⁰ *See id.* NSCC further states that if its other qualifying liquid resources materially decrease, it would expect to see an increase in both number and amount of supplemental liquidity obligations that Providers would have been required to fund under the proposed rule. *See id.* at 15756.

³¹ NSCC represents that it has never had two or more Providers owe more than \$2 billion on a calculation date since its adoption of the supplemental liquidity deposit Rules in 2013. Therefore, NSCC believes this alternative calculation would only be available in very limited circumstances. *See* Notice of Filing, *supra* note 5, at 15754.

³² *See* Notice of Filing, *supra* note 5, at 15754.

³³ The alternative pro rata calculation described in Section ILC.2 would not apply to an intraday supplemental liquidity call.

³⁴ *See* Notice of Filing, *supra* note 5, at 15754.

³⁵ NSCC will retain how it defines the duration of the options expiry periods in its Rules. *See supra* note 19.

³⁶ Each business day, NSCC receives information regarding projected settlement activity from The Options Clearing Corporation ("OCC") pursuant to a Stock and Futures Settlement Agreement. That agreement provides for the clearance and settlement of exercises and assignments of options on eligible securities or the maturity of eligible stock futures contracts through NSCC. *See* Securities Exchange Act Release No. 81260 (July 31, 2017), 82 FR 36484 (August 4, 2017) (File Nos. SR-NSCC-2017-803; SR-OCC-2017-804). In this case, the re-calculation will be based on the data NSCC receives from OCC late Thursday.

³⁷ *See* Notice of Filing, *supra* note 5, at 15754. For example, an affiliated Member may be entitled, under NSCC Rules, to liquidity credits based the trading activity of its affiliates, who are also Members, in order to determine NSCC's net liquidity exposure from the affiliated family of Members.

netting percentage based on each Provider's average percentage of netting from its off-setting settlement activity observed over the prior 24 months. NSCC states that the actual settlement activity flowing into NSCC for cash settlement of stocks underlying expiring options is typically lower than the projected settlement activity NSCC receives from OCC on the Thursday before the start of the options expiry period due to late day offsetting trades in stock options on that Friday; therefore, applying this netting percentage should more accurately reflect the actual liquidity exposures that will be presented to NSCC from the Providers.³⁸

ii. Proposed Discretionary Intraday Supplemental Liquidity Call

Second, NSCC proposes to establish a discretionary intraday supplemental liquidity call on any business day other than the first business day during options expiry periods. Under this provision, NSCC will have the discretion to call for additional supplemental liquidity deposits on an intraday basis on any such business day if a Provider's increased activity levels during that day would cause a liquidity shortfall at NSCC. The amount of a Provider's intraday supplemental liquidity call, pursuant to NSCC's discretion, would be the difference between NSCC's daily liquidity need, recalculated to take into account the increase in the Provider's settlement activity during the day, and NSCC's qualifying liquid resources.

NSCC states that it would collect a discretionary intraday call in circumstances where NSCC believes it should accelerate the collection of a Provider's supplemental liquidity obligation because that Provider's intraday settlement activity would cause NSCC's liquidity needs to exceed its liquidity resources.³⁹ For example, NSCC may impose an intraday supplemental liquidity call on a Provider if NSCC determines that Provider is unlikely to meet its projected settlement obligations through the settlement cycle due to rapidly escalating financial stress.⁴⁰ NSCC will make this determination based on a variety of factors, including NSCC's assessment of the Provider's ability to meet its obligations to NSCC (*i.e.*, an assessment of the Provider's creditworthiness on a particular business day) or estimates of settlement activity that could offset settlement

exposures and are not reflected in NSCC's liquidity estimates.⁴¹

III. Discussion and Commission Findings

Although the Clearing Supervision Act does not specify a standard of review for an advance notice, the stated purpose of the Clearing Supervision Act is instructive: To mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for SIFMUs and strengthening the liquidity of SIFMUs.⁴²

Section 805(a)(2) of the Clearing Supervision Act authorizes the Commission to prescribe regulations containing risk management standards for the payment, clearing, and settlement activities of designated clearing entities engaged in designated activities for which the Commission is the supervisory agency.⁴³ Section 805(b) of the Clearing Supervision Act provides the following objectives and principles for the Commission's risk management standards prescribed under Section 805(a):⁴⁴

- To promote robust risk management;
- to promote safety and soundness;
- to reduce systemic risks; and
- to support the stability of the broader financial system.

Section 805(c) provides, in addition, that the Commission's risk management standards may address such areas as risk management and default policies and procedures, among other areas.⁴⁵

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and Section 17A of the Exchange Act (the "Clearing Agency Rules").⁴⁶ The Clearing Agency Rules require, among other things, each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for its operations and risk management practices on an ongoing basis.⁴⁷ As such, it is appropriate for the Commission to review advance notices against the Clearing Agency Rules and

the objectives and principles of these risk management standards as described in Section 805(b) of the Clearing Supervision Act. As discussed below, the Commission finds the proposal in the Advance Notice is consistent with the objectives and principles described in Section 805(b) of the Clearing Supervision Act,⁴⁸ and in the Clearing Agency Rules, in particular Rule 17Ad-22(e)(7)(i) and (ii).⁴⁹

A. Consistency With Section 805(b) of the Clearing Supervision Act

The Commission finds that the Advance Notice is consistent with the stated objectives and principles of Section 805(b) of the Clearing Supervision Act.⁵⁰ Specifically, the Commission finds that the changes proposed in the Advance Notice are consistent with promoting robust risk management in the area of liquidity risk, promoting safety and soundness, reducing systemic risks, and supporting the broader financial system.

The Commission finds that the changes proposed in the Advance Notice are consistent with promoting robust risk management, in particular the management of liquidity risk presented to NSCC. As a CCP and a SIFMU, it is imperative that NSCC maintains adequate resources to satisfy liquidity needs arising from its settlement obligations, including in the event of a Member default. As described above in Section II.C.1, NSCC currently may only collect supplemental liquidity deposits during monthly options expiry periods. However, NSCC can also face increased liquidity exposure from a Member's activity outside of these periods, even if unrelated to options settlement activity. The ability to calculate and collect supplemental liquidity deposits, as applicable, on a daily basis should help NSCC more accurately manage its daily liquidity exposures based on Members' actual activity, as opposed to only being able to collect additional liquidity resources from Members during monthly options expiry. Moreover, the proposal would allow NSCC to determine the amount of supplemental liquidity deposits based on Members' actual activity, providing more precise and, potentially, lower charges for Members than provided under the current methodology, which uses estimates based on a look-back period and can, on occasion, result in NSCC collecting more resources than needed to cover its exposure.

⁵⁰ 12 U.S.C. 5464(b).

³⁸ See Notice of Filing, *supra* note 5, at 15754.

³⁹ See *id.*

⁴⁰ See *id.*

Additionally, as described above in Section II.C.3, NSCC also proposes to include both mandatory and discretionary intraday supplemental liquidity calls which would allow NSCC to calculate and collect additional supplemental liquidity deposits on an intraday basis if a Provider's increased activity levels during that day or projected settlement activity causes NSCC's daily liquidity need to exceed its qualifying liquid resources. The Commission finds that the mandatory monthly intraday supplemental liquidity calls on the first business day of the monthly options expiry periods should help NSCC continue to manage the potential increased liquidity exposures that may arise from options settlement-related activity by allowing it to accelerate the collection of supplemental liquidity deposits on that day, as opposed to waiting for the proposed daily collection that would occur on the morning of the following business day. Moreover, the proposed discretionary intraday supplemental liquidity calls should collect additional supplemental liquidity deposits from Members whose activity outside of the monthly options expiry periods may cause a sudden increase in NSCC's liquidity needs on an overnight basis. Therefore, because NSCC's proposal is designed to enable NSCC to better limit its liquidity exposures that could arise in the event of a Member default, the Commission finds the changes proposed in the Advance Notice promote robust risk management, specifically in the area of liquidity risk.

The Commission also finds that the changes proposed in the Advance Notice are consistent with promoting safety and soundness, reducing systemic risks, and promoting the stability of the broader financial system. As described above, NSCC's proposal to calculate and collect, if applicable, supplemental liquidity deposits on a daily basis could provide NSCC with additional liquidity resources, including on days outside of monthly Options Expiration Activity Periods, in the event of a Member default. Therefore, the changes proposed would promote safety and soundness by enabling NSCC to obtain additional liquid resources to cover a liquidity gap that could arise in the event of a Member default.⁵¹ By

covering such a gap, the proposal bolsters NSCC's ability to meet its settlement obligations in the event of a Member default and its ability to continue to provide CCP services to its Members.

In addition, the proposed changes should reduce the potential procyclicality of NSCC's liquidity demands, which could reduce the potential for unexpected liquidity stress to market participants in certain situations. Because NSCC would now calculate and collect, if applicable, supplemental liquidity deposits on a daily basis, the proposal should reduce the likelihood that NSCC would have to call on its Members to contribute additional liquidity in periods of financial stress, when liquidity may be most costly. Therefore, the Commission finds that by enhancing NSCC's ability to address losses and liquidity pressures that otherwise might cause financial distress to NSCC or its Members, the Advance Notice promotes safety and soundness.

Maintaining adequate liquidity resources to help meet settlement obligations in the event of a Member default also enhances NSCC's ability to manage systemic risk and to support the broader financial system. NSCC's ability to obtain additional liquid resources for use in the event of a Member default should reduce the risk of loss contagion (*i.e.*, the risk of losses arising at other NSCC Members if NSCC is unable to deliver cash or securities on the defaulting Member's behalf). Reducing the risk of loss contagion would reduce the potential transmission of financial shocks from defaulting Members to non-defaulting Members, thereby enhancing the ability of NSCC and its Members to continue to provide stability and safety to the financial markets that they serve.

Additionally, establishing an optional alternative pro rata calculation of supplemental liquidity deposits could help NSCC alleviate any unintended but significant liquidity constraints on its Members, while still enabling NSCC to meet its regulatory requirements with respect to liquidity without collecting more liquidity resources than needed. The proposed pro rata calculation would provide NSCC with a method to reduce the supplemental liquidity deposits owed by all Providers who would otherwise be obligated to provide such a deposit, which would be appropriate in light of the likely stressed

could arise if investor demand for the short-term notes issued under the Commercial Paper Program weakens, there is limited investor demand for term debt issued pursuant to a Term Debt Issuance, or NSCC is unable to renew its Line of Credit at the targeted amount.

market conditions that would result in two or more Providers presenting a potential supplemental liquidity deposit of over \$2 billion. Likewise, because NSCC would recalculate supplemental liquidity deposit obligations each business day, NSCC will no longer need to hold supplemental liquidity deposits for the extended periods under its current Rule 4(A), which could also alleviate liquidity pressures on its Members. Accordingly, the Commission finds the proposal is consistent with reducing systemic risks, and promoting the stability of the broader financial system as contemplated in Section 805(b) of the Clearing Supervision Act.⁵²

For the reasons stated above, the Commission finds the changes proposed in the Advance Notice are consistent with Section 805(b) of the Clearing Supervision Act.⁵³

B. Consistency With Rule 17Ad-22(e)(7)(i) and (ii)

The Commission finds the changes proposed in the Advance Notice are consistent with Rules 17Ad-22(e)(7)(i) and (ii), each promulgated under the Exchange Act,⁵⁴ for the reasons described below.

Rule 17Ad-22(e)(7)(i) under the Exchange Act requires that a covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to maintain sufficient liquid resources at the minimum in all relevant currencies to effect same-day and, where appropriate, intraday and multiday settlement of payment obligations with a high degree of confidence under a wide range of foreseeable stress scenarios that includes, but is not limited to, the default of the participant family that would generate the largest aggregate payment obligation for the covered clearing agency in extreme but plausible market conditions.⁵⁵ Rule 17Ad-22(e)(7)(ii) under the Act requires that a covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to hold qualifying liquid resources sufficient to meet the minimum liquidity resource requirement under Rule 17Ad-22(e)(7)(i) in each relevant currency for which the covered clearing agency has

⁵¹ The Commission has reviewed and considered the results of NSCC's hypothetical impact studies. See *supra* note 30 and accompanying text. Based on that review, the Commission concludes that the proposal could help mitigate the risks to NSCC that could arise if NSCC is unable to secure adequate default liquidity from other sources in an amount necessary to meet its liquidity needs. For example, the proposal could help mitigate the risks that

⁵² 12 U.S.C. 5464(b).

⁵³ 12 U.S.C. 5464(b).

⁵⁴ 17 CFR 240.17Ad-22(e)(7)(i) and (ii).

⁵⁵ 17 CFR 240.17Ad-22(e)(7)(i).

payment obligations owed to its clearing members.⁵⁶

As described above, the changed proposed in the Advance Notice would help strengthen NSCC's ability to maintain sufficient liquid resources to complete end-of-day settlement in the event of the Member default by allowing NSCC to calculate and collect, when applicable, supplemental liquidity deposits every business day, or on an intraday basis, from those Members that pose the largest liquidity exposures to NSCC on that day. These resources would be available to NSCC to complete end-of-day settlement in the event of the default of a Member. Moreover, the Commission has reviewed and considered the impact study results provided by NSCC comparing the proposal against the observed regulatory liquidity needs and NSCC's qualifying liquid resources available during the period from 2016 through 2020, to assess both pro-forma and hypothetical impacts of the proposal under various liquidity scenarios,⁵⁷ and finds that these results generally indicated that the proposal would continue allow NSCC to meet its regulatory liquidity obligations.

In addition, deposits made to satisfy supplemental liquidity deposit obligations are currently and will continue to be required to be made as cash deposits, which will continue to be held by NSCC at either its cash deposit account at the Federal Reserve Bank of New York, at a creditworthy commercial bank, or in other investments pursuant to NSCC's Clearing Agency Investment Policy.⁵⁸ Therefore, supplemental liquidity deposits would continue to be considered a qualifying liquid resource, as defined by Rule 17Ad-22(a)(14),⁵⁹ and would support NSCC's ability to hold qualifying liquid resources sufficient to meet the minimum liquidity resource requirement under Rule 17Ad-22(e)(7)(i),⁶⁰ as required by Rule 17Ad-22(e)(7)(ii).⁶¹

Accordingly, the Commission finds that implementation of the proposed amendments to supplemental liquidity

deposits would be consistent with Rule 17Ad-22(e)(7)(i) and (ii) under the Exchange Act.⁶²

IV. Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Clearing Supervision Act, that the Commission *does not object* to Advance Notice (SR-NSCC-2021-801) and that NSCC is *authorized* to implement the proposed change as of the date of this notice or the date of an order by the Commission approving proposed rule change SR-NSCC-2021-002, whichever is later.

By the Commission.

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-91753; File No. SR-MRX-2021-05]

Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt a Fee Schedule To Establish Fees for Industry Members Related to the National Market System Plan Governing the Consolidated Audit Trail

May 4, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 21, 2021, Nasdaq MRX, LLC ("MRX" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt a fee schedule to establish fees for Industry Members related to the National Market System Plan Governing the Consolidated Audit Trail (the "CAT NMS Plan" or "Plan").³

⁶² 17 CFR 240.17Ad-22(e)(7).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in Rule General 7 (Consolidated Audit Trail Compliance) (MRX General 7 incorporates The Nasdaq Stock Market LLC General 7 by reference).

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/mrx/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose
