Endangered and Threatened Wildlife and Plants: Draft Recovery Plan for the Rufa Red Knot

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and request for public comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of the draft recovery plan for rufa red knot, a bird subspecies listed as threatened under the Endangered Species Act. We request public comment on the draft recovery plan from local, State, and Federal agencies, and the public.

DATES: We must receive comments by July 12, 2021.

ADDRESSES:

Submitting Comments: You may submit comments by one of the following methods:

The recovery strategy is to prevent loss of the rufa red knot’s adaptive capacity by maintaining representation within and among four Recovery Units, and improving their resiliency and redundancy. Recovery efforts will focus on protecting, restoring, maintaining, and managing important nonbreeding habitats for adults and juveniles. Recovery actions will directly abate threats to red knots in their wintering and migration ranges, and will also increase resiliency of populations to withstand threats that stem from climate change in their Arctic breeding range and elsewhere. These actions include monitoring and safeguarding ample food supplies; preventing impacts from development and shoreline stabilization; managing human disturbance; and restoring key habitats. They may also include land acquisition, facilitated migration of certain beaches or tidal flats, and restoring natural coastal processes that create and maintain red knot habitat.

Availability of Public Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
