

or natural gas pipeline. The pilot projects must be conducted outside the linear right-of-way for the associated powerline facility or natural gas pipeline; may not extend more than 150 feet from either side of the powerline facility or natural gas pipeline; and may not have a total width of more than 200 feet including both sides of the powerline facility or natural gas pipeline. In addition, the pilot projects may not overlap with vegetation management conducted under the special use authorization for the powerline facility or natural gas pipeline, including removal and pruning of hazard trees outside the linear right-of-way for a powerline facility. The liability provisions in a special use permit for a pilot project have no effect on the liability provisions in the special use authorization for the powerline facility or natural gas pipeline, including the liability provisions that apply to removal and pruning of hazard trees inside and outside the linear right-of-way. Proposed new clause B-39 in Forest Service Handbook 2709.11, Chapter 50, section 52.2, would provide for authorizing vegetation management pilot projects consistent with section 8630 of the Farm Bill and Title V of the Federal Land Policy and Management Act, section 28 of the Mineral Leasing Act, and their implementing regulations.
