

unreasonable adverse effects on human health or the environment. As part of the registration review process, the Agency has completed comprehensive draft human health and/or ecological risk assessments for all pesticides listed in the Table in Unit IV. After reviewing comments received during the public comment period, EPA may issue a revised risk assessment, explain any changes to the draft risk assessment, and respond to comments and may request public input on risk mitigation before completing a proposed registration review decision for the pesticides listed in the Table in Unit IV. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge,

including its effects on human health and the environment.

III. Authority

EPA is conducting its registration review of the chemicals listed in the Table in Unit IV pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA, a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)). When used

in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human dietary risk from residues that result from the use of a pesticide in or on food.

IV. What action is the agency taking?

Pursuant to 40 CFR 155.58, this notice announces the availability of EPA's human health and/or ecological risk assessments for the pesticides shown in the following table and opens a 60-day public comment period on the risk assessments.

TABLE—DRAFT RISK ASSESSMENTS BEING MADE AVAILABLE FOR PUBLIC COMMENT

Pursuant to 40 CFR 155.53(c), EPA is providing an opportunity, through this notice of availability, for interested parties to provide comments and input concerning the Agency's draft human health and/or ecological risk assessments for the pesticides listed in the Table in Unit IV. The Agency will consider all comments received during the public comment period and make changes, as appropriate, to a draft human health and/or ecological risk assessment. EPA may then issue a revised risk assessment, explain any changes to the draft risk assessment, and respond to comments.

Information submission requirements. Anyone may submit data or information in response to this document. To be considered during a pesticide's registration review, the submitted data or information must meet the following requirements:

- To ensure that EPA will consider data or information submitted, interested persons must submit the data or information during the comment period. The Agency may, at its discretion, consider data or information submitted at a later date.
- The data or information submitted must be presented in a legible and useable form. For example, an English translation must accompany any material that is not in English and a written transcript must accompany any information submitted as an audio-graphic or video-graphic record. Written

material may be submitted in paper or electronic form.

- Submitters must clearly identify the source of any submitted data or information.
- Submitters may request the Agency to reconsider data or information that the Agency rejected in a previous review. However, submitters must explain why they believe the Agency should reconsider the data or information in the pesticide's registration review.

As provided in 40 CFR 155.58, the registration review docket for each pesticide case will remain publicly accessible through the duration of the registration review process; that is, until all actions required in the final decision on the registration review case have been completed.

II. Background

The FIFRA SAP serves as a scientific peer review mechanism of EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) and is structured to provide independent scientific advice, information, and recommendations to the EPA Administrator on pesticides and pesticide-related issues as to the impact of regulatory actions on health and the environment. The FIFRA SAP is a federal advisory committee established in 1975 under FIFRA that operates in accordance with requirements of the Federal Advisory Committee Act (5 U.S.C. Appendix). The FIFRA SAP is composed of a permanent panel consisting of seven members who are appointed by the EPA Administrator from nominees provided by the National Institutes of Health (NIH) and the National Science Foundation (NSF). Members serve staggered terms of appointment, generally of three to six years duration. FIFRA established a Science Review Board (SRB) consisting of at least 60 scientists who are available to the FIFRA SAP on an ad hoc basis to assist in reviews conducted by the FIFRA SAP. As a scientific peer review mechanism, the FIFRA SAP provides comments, evaluations, and recommendations to improve the effectiveness and quality of analyses made by Agency scientists. Members of the FIFRA SAP are scientists who have sufficient professional qualifications, including training and experience, to provide expert advice and recommendations to the Agency.

III. Charter

A Charter for the FIFRA SAP, dated October 17, 2020, was issued in accordance with the requirements of the Federal Advisory Committee Act, Public Law 92–463, 86 Stat. 770 (5 U.S.C. Appendix). The Charter provides for open meetings with opportunities for public participation.

IV. Nominees

A. Qualifications of Members

Members are scientists who have sufficient professional qualifications, including training and experience, to provide expert comments on the impact of pesticides on human health and the environment. In accordance with section 25(d)(1) of FIFRA, the Administrator shall require nominees to the FIFRA SAP to furnish information concerning their professional qualifications, including educational background, employment history, and scientific publications. No persons shall be ineligible to serve on the FIFRA SAP by reason of their membership on any other advisory committee to a federal department or agency, or their employment by a federal department or agency (except the EPA). FIFRA further stipulates that the Agency publish the name, address, and professional affiliation of the nominees in the **Federal Register**.

B. Applicability of Existing Regulations

With respect to the requirements of section 25(d) of FIFRA that the Administrator promulgate regulations regarding conflicts of interest, FIFRA SAP members are subject to the provisions of the Standards of Ethical Conduct for Employees of the Executive Branch at 5 Code of Federal Regulations Part 2635, conflict of interest statutes in Title 18 of the United States Code, and related regulations. Each nominee selected by the Administrator, before being formally appointed, is required to submit a Confidential Financial Disclosure Form, which shall fully disclose, among other financial interests, the nominee's sources of research support, if any.

C. Process of Obtaining Nominees

The Agency, at this time, anticipates selecting new members to serve on the panel to address upcoming expirations of membership terms.

On February 5, 2021, in accordance with the provisions of section 25(d) of FIFRA, EPA requested that the NIH and the NSF nominate scientists to fill vacancies occurring on the FIFRA SAP. The Agency requested that NIH and NSF nominate experts in the fields of ecological and human exposure assessment, including expertise in environmental fate and transport of chemicals, mathematical biostatistics, New Approach Methodologies (NAMs), including *in vitro* to *in vivo* extrapolation (IVIVE), and expertise in toxicology, including carcinogenicity and physiologically-based pharmacokinetic modeling (PBPK).

Experts with specific experience in risk assessment, dose response analysis, cheminformatics, bioinformatics, and genomics are preferred. Nominees should be well published and current in their fields of expertise.

NIH and NSF responded, providing the Agency with a total of 25 nominees. One nominee, Dr. Jeffrey Bloomquist, Ph.D., of the University of Florida is a member of the FIFRA SAP with a current term ending in 2022. Therefore, he is not considered further at this time. Of the remaining 24 nominees, 10 are interested and available to actively participate in FIFRA SAP meetings (see Unit IV.D.).
