[Docket No. RM93–11–000]

Revisions to Oil Pipeline Regulations, Pursuant to the Energy Policy Act of 1992; Notice of Annual Change in the Producer Price Index for Finished Goods

The Commission’s regulations include a methodology for oil pipelines to change their rates through use of an index system that establishes ceiling levels for such rates. The Commission bases the index system, found at 18 CFR 342.3, on the annual change in the Producer Price Index for Finished Goods (PPI–FG), plus point seven eight percent (PPI–FG + 0.78). The Commission determined in an Order Establishing Index Level,¹ issued

¹ 173 FERC ¶ 61,245, at P 63 (2020), reh’g pending.
December 17, 2020, that PPI–FG + 0.78 is the appropriate oil pricing index factor for pipelines to use for the five-year period commencing July 1, 2021. The regulations provide that the Commission will publish annually an index figure reflecting the final change in the PPI–FG after the Bureau of Labor Statistics publishes the final PPI–FG in May of each calendar year. The annual average PPI–FG index figures were 205.7 for 2019 and 202.9 for 2020. Thus, the percent change (expressed as a decimal) in the annual average PPI–FG from 2019 to 2020, plus 0.78 percent, is negative 0.005812. Oil pipelines must multiply their July 1, 2020, through June 30, 2021, index ceiling levels by the President on March 13, 2020. Emergency concerning the Novel Coronavirus Disease (COVID-19) issued by the President on March 13, 2020.

User assistance is available for eLibrary and other aspects of FERC’s website during normal business hours. For assistance, please contact the Commission’s Online Support at 1–866–30, 2021, index ceiling levels by multiplying their July 1, 2020, through June 30, 2021, index ceiling levels by 205.7 for 2019 and 202.9 for 2020. Thus, the percent change (expressed as a decimal) in the annual average PPI–FG from 2019 to 2020, plus 0.78 percent, is negative 0.005812.
