SUPPLEMENTARY INFORMATION:

I. Background

On February 16, 2021, PHMSA published a notice in the Federal Register soliciting comments on several information collections that are due to expire in 2021 unless they are renewed by OMB.

During the 60-day comment period, PHMSA received one comment from the National Association of Pipeline Safety Representatives (NAPSR) in support of PHMSA’s decision to request a renewal, without change, for each of the information collections summarized below.

II. Summary of Impacted Collection

Section 1320.8(d), Title 5, Code of Federal Regulations, requires PHMSA to provide interested members of the public and affected agencies an opportunity to comment on information collection and recordkeeping requests. This notice identifies the information collection requests that PHMSA will submit to OMB for renewal.

The following information is provided for each information collection: (1) Title of the information collection; (2) OMB control number; (3) Current expiration date; (4) Type of request; (5) Abstract of the information collection activity; (6) Description of affected public; (7) Estimate of total annual reporting and recordkeeping burden; and (8) Frequency of collection.

PHMSA will request a three-year term of approval for each information collection activity. PHMSA requests comments on the following information collections:

The post-accident drug testing for pipeline operators information collection pertains specifically to 49 CFR 199.227(b)(4), which requires operators to maintain records of decisions not to administer post-accident employee alcohol tests for a minimum of three years. Operators must make those records available to the Secretary of Transportation upon request.

Operators also must maintain records that include a copy of the notice currently in use and evidence that notices were sent to customers within the previous three years. The purpose of the collection is to provide the Office of Pipeline Safety with adequate information about how customer-owned service lines are being maintained to prevent the potential hazards associated with not maintaining the lines.
