The Service has made a preliminary determination that the applicant’s project, including land clearing, infrastructure building, landscaping, and the proposed mitigation, would individually and cumulatively have a minor or negligible effect on sand skinks and the environment. Therefore, we have preliminarily concluded that the ITP for this project would qualify for categorical exclusion and that the HCP is low effect under our NEPA regulations at 43 CFR 419.2005 and 419.2010. A low-effect HCP is one that would result in (1) minor or negligible effects on federally listed, proposed, and candidate species and their habitats; (2) minor or negligible effects on other environmental values or resources; and, (3) impacts that, when considered together with the impacts of other past, present, and reasonably foreseeable similarly situated projects, would not result in significant cumulative effects to environmental values or resources over time.

**Next Steps**

The Service will evaluate the application and the comments received to determine whether to issue the requested permit. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding findings, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number ESPER0007024 to Spring Grove, LLC.

**Authority**

The Service provides this notice under section 10(c) of the ESA (16 U.S.C. 1533 et seq.) and its implementing regulations (50 CFR 17.32) and NEPA (42 U.S.C. 4321 et seq.) and its implementing regulations (40 CFR 1506.6 and 43 CFR 46.305).

utility, and clarity of the information to be collected; and (5) how might the USGS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: A major component of the Department of the Interior’s vision is to “Increase access to outdoor recreation opportunities for all Americans so that our people can be healthier, more fully enjoy the wonderful features of their federal lands, and take advantage of hunting, fishing, and other outdoor recreation pursuits that are the roots of the conservation movement.” At the direction of DOI, the US Geological Survey is advancing that vision with the launch of the National Digital Trails Network (NDT) project. The two-year project consists of three major goals:

1. Develop a web-based geospatial analysis tool to assist Federal land managers in identifying and prioritizing candidate trails for the connection of existing trails and trail networks.

3. Develop a mobile responsive application that will assist trail stewards, land management agencies, and members of the public in the maintenance of trails information.

This information collection request focuses on Goal 2, the Nationwide Digital Trails Dataset. The National Digital Trails Portal will support development and maintenance of the robust USGS Nationwide Digital Trails Dataset (Goal 2). In turn, the Nationwide Digital Trails Dataset is a primary component of the TRAILS decision support tool (Goal 1) which provides DOI bureaus and trail managers a tool to improve trail connectivity throughout the Nation’s public lands.

The National Digital Trails Portal will facilitate an efficient digital trails data submission process and communication between USGS and data providers. Authoritative trail mangers will be able to login to submit their trails data along with relevant information, for USGS review and integration into the Nationwide Trails Dataset. USGS staff will be able to login to download the submitted data, perform preliminary assessment, and provide status updates for every trail data submission. No data edits or integration will take place within the National Digital Trails Portal.

The following information will be collected for every authoritative data provider that submits trails data for USGS integration: name, email, and organization. This information will allow USGS to identify appropriate point of contact for every data source in the Nationwide Digital Trails Dataset. It may be necessary to reach out to a contact to provide status updates, or to clarify data discrepancies, or to obtain the latest trails data to perform updates to the Nationwide Digital Trails Dataset.

OMB Control Number: 1028–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: Federal, state or local government agencies; nonprofit organizations.

Total Estimated Number of Annual Respondents: 100.

Total Estimated Number of Annual Responses: 100.

Estimated Completion Time per Response: 25 minutes on average.

Total Estimated Number of Annual Burden Hours: 42 hours.

Respondent’s Obligation: Voluntary.

Frequency of Collection: Occasional.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

BILLING CODE 4338–11–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–1071 (Third Review)]

Magnesium From China; Institution of a Five-Year Review

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted a review pursuant to the Tariff Act of 1930 (“the Act”), as amended, to determine whether revocation of the antidumping duty order on magnesium from China would be likely to lead to continuation or recurrence of material injury.

Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted June 1, 2021. To be assured of consideration, the deadline for responses is July 1, 2021. Comments on the adequacy of responses may be filed with the Commission by August 19, 2021.

General information concerning the Commission may also be obtained by accessing its internet server (https://www.usitc.gov). The public record for this proceeding may be viewed on the Commission’s electronic docket (EDIS) at https://edis.usitc.gov.

SUPPLEMENTARY INFORMATION:

Background.—On April 15, 2005, the Department of Commerce (“Commerce”) issued an antidumping duty order on imports of magnesium from China (70 FR 19928). Following the five-year reviews by Commerce and the Commission, effective March 11, 2011, Commerce issued a continuation of the antidumping duty order on imports of magnesium metal from China (76 FR 13356). Following the second five-year reviews by Commerce and the Commission, effective July 21, 2016, Commerce issued a continuation of the antidumping duty order on imports of magnesium metal from China (81 FR 47351). The Commission is now
