DEPARTMENT OF LABOR

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Mine Safety and Health Administration Grant Performance Reports

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Mine Safety and Health Administration (MSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before July 1, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAmain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Crystal Rennie, Acting Assistant Secretary, Employee Benefits Security Administration, U.S. Department of Labor. [FR Doc. 2021–11475 Filed 5–28–21; 8:45 am]

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the Federal Register and two were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAmain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance
Science (AAAS) and the American Educational Research Association (AERA). The commenters requested that NCSES include measures of sexual orientation and gender identity on the SDR and on other NCSES surveys (specifically, the National Survey of College Graduates and the Survey of Earned Doctorates).

Response: NCSES informed the commenters that it continues to actively engage on the Federal Committee on Statistical Methodology’s (FCSM) Working Group on Measuring Sexual Orientation and Gender Identity and described its research efforts for development and fielding possible questionnaire additions to address the topic. NCSES informed the commenters that it does not intend to include these measures in the 2021 SDR.

Title of Collection: 2021 Survey of Doctorate Recipients.

OMB Approval Number: 3145–0020.

Summary of Collection: The purpose of this panel survey is to collect data that will be used to provide national estimates on the doctoral science and engineering workforce and changes in their employment, education, and demographic characteristics. The SDR is sponsored by the National Center for Science and Engineering Statistics (NCSES) within the NSF and by the National Institutes of Health.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “opportunities for women and minorities as well as of other social, economic, and educational factors that impact the nation’s science and engineering workforce and changes in that workforce.” The SDR is designed to comply with these mandates by providing information on the supply and utilization of the nation’s doctoral level scientists and engineers.

Use of the Information: The NSF uses the information from the SDR to prepare congressionally-mandated reports such as Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators. NCSES also produces, on a biennial basis, a set of statistical tables from the SDR, and publishes statistics from the SDR in other reports.

Expected Respondents: A statistical sample of 130,938 individuals who had earned a research doctorate degree from a U.S. academic institution in the fields of science, engineering, or health (SEH) will be contacted in 2021; these individuals may reside in the U.S. or abroad. Among prior SDR data collection cycles, the sample consists of all eligible cases from the previous cycle, as well as a sample of new doctoral graduates, who received their doctorate between 1 July 2017 and 30 June 2019. In addition, the sample may include 5,000 cases that will be part of a non-production bridge panel designed to quantify the potential impact of question wording modifications on key survey estimates. Another 9% of the production sample may submit an inter-round updated contact form that takes about 3 minutes to complete.

Estimate of Burden: NCSES expects the overall 2021 SDR response rate to be approximately 70 percent. The amount of time to complete the questionnaire may vary depending on an individual’s circumstances; however, based on 2019 SDR completion times, NCSES estimates an average completion time of approximately 21 minutes. NCSES estimates that the average annual burden for the 2021 survey cycle over the course of the three-year OMB clearance period will be no more than 10,882 hours [(130,938 individuals × 70% response × 21 minutes) + (125,938 × 9% participation × 3 minutes)]/3 years/60 minutes.

Dated: May 26, 2021.

Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–295, 50–304, and 72–1037; NRC–2019–0236]

In the Matter of ZionSolutions, LLC and Exelon Generation Company, LLC; Zion Nuclear Power Station, Units 1 and 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Direct transfer of license; extending effectiveness of order.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an Order to extend until November 26, 2021, the effectiveness of a November 26, 2019, order, which approved the direct transfer of Facility Operating License Nos. DPR–39 and DPR–48 for Zion Nuclear Power Station (ZNPS), Units 1 and 2, respectively, and the general license for the ZNPS independent spent fuel storage installation from the current holder, ZionSolutions, LLC, to Exelon Generation Company, LLC and amended the facility operating licenses for administrative purposes to reflect the transfer.
