Department of Health and Human Services
Administration for Children and Families

Submission for OMB Review; Evaluation of Project Connect (New Collection)

AGENCY: Office of Planning, Research, and Evaluation; Administration for Children and Families; HHS.

ACTION: Request for public comment.

SUMMARY: The Administration for Children and Families (ACF) at the U.S. Department of Health and Human Services (HHS) is proposing a new information collection to assess the implementation of Project Connect, a comprehensive home visitation intervention that provides home-based services and treatment to child welfare-involved, substance-affected families with children and adolescents ages 0 to 17. The program aims to strengthen and address the complex needs of substance-affected families by providing intensive, long-term services that address issues of unhealthy parental substance use and provide help for parents recover while keeping children safe. It focuses on maintaining children safely in their homes and preventing admission to care, or facilitating reunification when children have been placed in out-of-home care.

The implementation study will support a planned effectiveness evaluation that will rely on administrative data to examine the impact of the program on child welfare outcomes. These information collection activities will take place over the course of five site visits to the program and child welfare agency that are participating in the study. Information collection activities include interviews with program and child welfare agency administrators, focus groups with program and child welfare agency staff, interviews and focus groups with participants, interviews with other program stakeholders, and observations of program staff meetings, program delivery, and judicial hearings. Site visits will also include direct observations of staff delivery of the program, program staff meetings, and relevant judicial hearings/activities for program families.

This evaluation is part of a larger project to help ACF build the evidence base in child welfare through rigorous evaluation of programs, practices, and policies. The activities and products from this project will contribute to evidence building in child welfare and help to determine the effectiveness of a substance use program on child welfare outcomes.

Respondents: Semi-structured interviews will be completed with agency and program administrators, parents who are participating in the program, parents receiving services as usual, and other program stakeholders. Focus groups will be conducted with agency and program staff and parents who are participating in the program and parents receiving services as usual.
