Final Approval Under OMB Delegated Authority of the Extension for Three Years, Without Revision, of the Following Information Collection

Report title: Recordkeeping Provisions Associated with Stress Testing Guidance.

Agency form number: FR 4202.

OMB control number: 7100-0348.

Frequency: As needed.

Respondents: Banking organizations.

Estimated number of respondents: 100.

Estimated average hours per response: 180.

Estimated annual burden hours: 18,000.

General description of report: On May 17, 2012, the Board published the Supervisory Guidance on Stress Testing for Banking Organizations With More Than \$10 Billion in Total Consolidated Assets (Stress Testing Guidance) in the

Federal Register.¹ The Stress Testing Guidance outlines high-level principles for stress testing practices applicable to all Board-supervised banking organizations with more than \$10 billion in total consolidated assets.²

The Stress Testing Guidance recommends that banking organizations (i) have a stress testing framework that includes clearly defined objectives, well-designed scenarios tailored to the banking organization's business and risks, well-documented assumptions, conceptually sound methodologies to assess potential impact on the banking organization's financial condition, informative management reports, and recommended actions based on stress test results; and (ii) have policies and procedures for a stress testing framework. These recordkeeping activities are collections of information under the PRA.

An organization should have written policies, approved and annually reviewed by the board, that direct and govern the implementation of the stress testing framework in a comprehensive manner. Policies, along with procedures to implement them, should:

- Describe the overall purpose of stress testing activities;
- articulate consistent and sufficiently rigorous stress testing practices across the entire organization;
- indicate stress testing roles and responsibilities, including controls over external resources used for any part of stress testing (such as vendors and data providers);
- describe the frequency and priority with which stress testing activities should be conducted;
- indicate how stress test results are used and by whom, and
- be reviewed and updated as necessary to ensure that stress testing practices remain appropriate and keep up to date with changes in market conditions, organization products and strategies, organization exposures and activities, the organization's established risk appetite, and industry stress testing practices.
