

accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainant.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

[Docket No. CP21-31-000]

Texas Eastern Transmission, L.P.; Notice of Availability of the Environmental Assessment for the Proposed Perulack Compressor Units Replacement Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Perulack Compressor Units Replacement Project, proposed by Texas Eastern Transmission, LP (Texas Eastern) in the above-referenced docket. Texas Eastern requests authorization to replace four existing natural gas-fired turbine compressor engines with two new units and appurtenant facilities at its existing Perulack Compressor Station in Juniata County, Pennsylvania.

The EA assesses the potential environmental effects of the construction and operation of the Perulack Compressor Units Replacement Project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The project includes the following facilities:

- Two new 18,100-horsepower (hp) Solar Titan 130 natural gas-fired turbines;
- related software controls that would limit the total hp of each compressor unit to 17,400 hp to be consistent with current certificated capacity of the compressor station of 34,800 hp;
