

stakeholders communicated the need to revise the Standards and the Pea and Lentil Inspection Handbook by changing the definition of Green Lentils and the criteria to include a percentage of allowable mottled lentils in the lentil sample.

Revision of Special Grade “Green Lentils”

Stakeholders, including the USADPLC, recommended AMS revise the lentil criteria for the special grade “Green” in the class “Lentils.” Stakeholders stated most shipments of lentils did not achieve the special grade “Green” based on current criteria. AMS and stakeholders worked collaboratively to redefine the special grade “Green” in lentils to best reflect the special grade condition. Additionally, stakeholders endorsed the following definition: “*Green Lentils*. Clear seeded (green) lentils possessing a natural, uniformly green color.” The proposed inspection instruction in the Pea and Lentil Handbook is being modified from what appeared in the notice and request for comments, for greater clarity, to state: “The portion size of approximately 60 grams for small seeded lentils and 125 grams for large seeded lentils must contain less than 0.5 percent lentils with mottling and be free of any lentils of contrasting color, before the removal of defects, and must be equal to or better than depicted on the Interpretive Line Print after the removal of dockage.”

Comment Review

AMS published a Notice in the **Federal Register** on September 29, 2020 (85 FR 60956), inviting interested parties to comment on the proposed revisions to the United States Standards for Lentils. AMS received one comment strongly supporting the proposed revision. AMS received no comments opposing the proposed revision. AMS believes that these revisions will facilitate the marketing of lentils and better reflect current marketing practices. Accordingly, AMS is implementing the revisions as proposed. The revisions to the standards become effective upon publication in the **Federal Register**, and the Pea and Lentil Inspection Handbook will be revised to incorporate the revisions to the standards.

Final Action

AMS–FGIS is revising the lentil standards to revise the definition for the special grade “Green” in lentils. Accordingly, the following section of the United States Standards for Lentils under the AMA is amended as follows: Section 609: Special grades and

requirements, is amended to include the following definition: *Green Lentils*. Clear seeded (green) lentils possessing a natural, uniformly green color.

AMS–FGIS is revising lentil inspection criteria in the Pea and Lentil Inspection Handbook by including the following instruction pertaining to special grade “Green”: The portion size of approximately 60 grams for small seeded lentils and 125 grams for large seeded lentils must contain less than 0.5 percent lentils with mottling and be free of any lentils of contrasting color, before the removal of defects, and must be equal to or better than depicted on the Interpretive Line Print after the removal of dockage.
