- *Attention:* The PDR, where you may examine and order copies of public documents, is currently closed. You may submit your request to the PDR via email at pdr.resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2021–0091 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at [https://](https://www.regulations.gov)

www.regulations.gov as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Additional Information

The NRC is issuing for public comment a draft guide in the NRC’s “Regulatory Guide” series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The issuance of this DG allows the NRC staff to withdraw the outdated guidance in RS–002 while retaining the PPE information in DG–4029 for future use by prospective ESP applicants. Therefore, NRC staff is withdrawing RS–002 in conjunction with the issuance of DG–4029.

The DG, entitled, “Use of Plant Parameter Envelope in Early Site Permit Applications” is a proposed new guide temporarily identified by its task number, DG–4029. It proposes guidance for ESP applicants that elect to use the PPE concept to postulate certain design parameters when a specific reactor technology has not been selected for a proposed site. The guide incorporates the guidance on PPE found in NRC’s Office of Nuclear Reactor Regulation RS–002, “Processing Applications for Early Site Permits,” (ADAMS Accession No. ML040700236). Subsequent to issuance of RS–002 in 2004, many sections of it have been superseded and do not fully reflect the NRC’s implementation of a risk-informed, performance-based approach to licensing. The issuance of this DG allows the NRC staff to withdraw the outdated guidance in RS–002 while retaining the PPE information for future use by prospective ESP applicants.

The staff is also issuing for public comment a regulatory analysis (ADAMS Accession No. ML21049A182). The staff develops a regulatory analysis to assess

the value of issuing or revising a regulatory guide as well as alternative courses of action. The analysis provides the public with an insight in how the NRC arrives at a regulatory decision.

III. Backfitting, Forward Fitting, and Issue Finality

Issuance of DG–4029, if finalized, would not constitute backfitting as that term is defined in section 50.109 of title 10 of the *Code of Federal Regulations* (10 CFR) section, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; constitute forward fitting as that term is defined and described in MD 8.4; or affect issue finality of any approval issued under 10 CFR part 52, “Licenses, Certificates, and Approvals for Nuclear Power Plants.” As explained in DG–4029, applicants and licensees are not required to comply with the positions set forth in DG–4029.
