SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

Each underground coal mine has an emergency response plan (ERP) and refuge alternatives (RA) that protect miners when escape from a mine during a mine emergency is not possible by providing secure spaces with isolated atmospheres that create life-sustaining environments.

Title 30 CFR 75.1506 requires mine operators to provide RAs.

Section 75.1507 requires the development and implementation of ERP. It requires that the ERP provide detailed information about the RAs used in the mine. This information assists miners, supervisors, emergency responders, and MSHA in ensuring that all essential preparations are made and required materials are readily available and in working order. A mine operator may notify the District Manager and update the existing ERP if there is a

need to locate an RA in a different location than the one identified in the ERP for that mine (as required by section 75.1506(c)(2)).

Section 75.1508 requires the mine operator to certify that persons assigned to examine, maintain, and repair RAs and components are trained for those tasks. Training certifications assist MSHA in determining that persons received the required training. The training certification for persons assigned to examine RAs is integrated into existing requirements for preshift examinations of the mine under section 75.360 (OMB 1219-0088). The training certification for persons assigned to maintain and repair RAs is included in this package under section 75.1508(a).

Section 75.1508(b) requires a record of any maintenance and repair performed on an RA. This record assists MSHA in identifying design flaws or other weaknesses in the RA or its components that could adversely impact the safety of miners.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Refuge Alternatives for Underground Coal Mines. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Background documents related to this information collection request are available at <https://regulations.gov> and at DOL-MSHA located at 201 12th Street South, Suite 4E401, Arlington, VA 22202-5452. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.
