III. AMEL for the Storage Tank

The EPA is approving the AMEL request by Rohm and Haas. Based upon our review of the AMEL request, the Agency believes that, by complying with the operating conditions specified in the following paragraphs, the proposed new tank at the Rohm and Haas Chemicals LLC facility will achieve emission reductions at least equivalent to reduction in emissions required by NSPS subpart Kb, 40 CFR 60.112b:

1. No PRD on the storage tank, or on the railcar or tank truck, shall open during loading or as a result of diurnal temperature changes (breathing losses).
2. Both PRDs on the storage tank must be set to release at no less than 9 psig at all times. Any release from a PRD as indicated by pressure reading greater than 9 psig is an excess emissions event. To demonstrate that the PRD does not open, the tank vapor space pressure and the space between the rupture disk and PRD will be continuously monitored for pressure and recorded. If a release occurs, the tank must follow 40 CFR 63.165(d)(2).
3. Each of the PRDs and components of the vapor collection system on the tank must be monitored on a quarterly basis, using EPA Method 21. An instrument reading of 500 parts per million by volume or greater is an excess emissions event.
4. VAM must be transferred from either railcars or truck trailers via welded steel piping into the new bulk storage tank. The tank must be equipped with a welded steel vapor balance line that returns displaced vinyl acetate vapors from the headspace within the tank to the railcar or tank truck during tank filling operations. The vapor balance line must be hard piped from the tank, crossing a pipe bridge, before terminating at the off-loading station. While there are a number of necessary flanged connections, flanged valves, and flexible coupling lines as part of the vapor balance line, the tank vapor balance line must not contain any PRDs or release points. Displaced vapors must be transferred to a vapor return fitting on the offloading bulk vehicle through a hose from the offloading station. Both the transfer hoses and the vapor balance return line must incorporate dry-disconnect fittings to prevent vapor discharge to the atmosphere when the line is not connected. Tank trucks and railcars must have a current certification in accordance with the DOT pressure test requirements of 49 CFR part 180 for tank trucks and 49 CFR 173.31 for railcars. Railcars or tank trucks that deliver VAM to a storage tank must be reloaded or cleaned at a facility that utilizes the control techniques specified in paragraph (4)(a) or (b).
   (a) The railcar or tank truck must be connected to a closed-vent system with a control device that reduces inlet emissions of VAM by 95 percent by weight or greater.
   (b) A vapor balancing system designed and operated to collect organic VAM vapor displaced from the tank truck or railcar during reloading must be used to route the collected HAP vapor to the storage tank from which the liquid being transferred originated.
5. Rohm and Haas must submit to the Administrator a written certification that the recharging or cleaning facility meets the requirements of paragraph 4; and the requirements for closed vent system and control device specified at 40 CFR 63.119 through 63.123. The notification and reporting requirements at 40 CFR 63.122 do not apply to the owner or operator of the offsite cleaning or reloading facility.
6. Recordkeeping requirements.
   (a) The facility must keep a record of the equipment used and the procedures to be followed when unloading the railcar or tank truck and displacing vapors from the storage tank to the transport vessel from which the liquid originates, as well as a record of all components of the PRDs, including PRVs and rupture discs.
   (b) Records must be kept as long as the storage vessel is in operation.
7. Reporting requirements. The facility must submit excess emissions and monitoring systems performance reports to the Administrator semiannually. All reports must be postmarked by the 30th day following the end of each 6-month period. Written reports of excess emissions must include the following information:
   (a) The date and time of commencement and completion of each time period of excess emissions and the process operating time during the reporting period.
   (b) The date and time identifying each period during which the continuous pressure monitoring system was inoperative except for zero and span checks and the nature of the system repairs or adjustments.
   (c) The report must include a list of the affected sources or equipment, an estimate of the volume of VAM emitted, and a description of the method used to estimate the emissions.
   (d) Continuous pressure monitoring systems have not been inoperative, repaired, or adjusted, such information shall be stated in this section of the report.
Dated: July 13, 2021.
Panagiotis Tsirigotis,
Director, Office of Air Quality Planning and Standards.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 8718–01–R5]

Public Water System Supervision Program Approval for the State of Wisconsin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of tentative approval.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has tentatively approved the State of Wisconsin’s revisions to the State’s Public Water System Supervision (PWSS) Program under the federal Safe Drinking Water Act (SDWA) for adoption of the federal Ground Water Rule, as well as revisions to the federal Surface Water Treatment Rule under the Long Term 2 Enhanced Surface Water Treatment Rule. The EPA has determined that the State’s PWSS program regulations and the revisions thereto are no less stringent than the corresponding federal regulations for the Ground Water Rule and the Long Term 2 Enhanced Surface Water Treatment Rule. Therefore, the EPA intends to approve this revision to the State of Wisconsin’s Public Water System Supervision Program, thereby giving the Wisconsin Department of Natural Resources primary enforcement responsibility for the Ground Water Rule and the Long Term 2 Enhanced Surface Water Treatment Rule. This approval action does not extend to public water systems in Indian Country. By approving this revision, the EPA does not intend to affect the rights of federally recognized Indian Tribes in Wisconsin, nor does it intend to limit existing rights of the State of Wisconsin.

DATES: Any interested party may request a public hearing on this determination. A request for a public hearing must be submitted by August 18, 2021. The EPA Region 5 Administrator may deny frivolous or insubstantial requests for a hearing. If a substantial request for a public hearing is made by August 18, 2021, EPA Region 5 will hold a public hearing. A notice of the public hearing will be published in the Federal Register and a newspaper of general
circulation. Any request for a public hearing shall include the following information: The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; a brief statement of the requesting person’s interest in the Regional Administrator’s determination; a brief statement of the information that the requesting person intends to submit at such hearing; and the signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

If EPA Region 5 does not receive a timely and appropriate request for a hearing and the Regional Administrator does not elect to hold a hearing upon her own motion, this determination shall become final and effective on August 18, 2021 and no further public notice will be issued.

ADDRESSES: To receive copies of documents related to this determination, please contact Victoria Heath at Heath.Victoria@epa.gov or 312–886–0703. Documents relating to this determination are available for inspection at the following locations: Wisconsin Department of Natural Resources, Public Water Supply Section, 101 S Webster St., Madison, WI 53707–7921; and the U.S. Environmental Protection Agency Region 5, Ground Water and Drinking Water Branch (WG–15J), 77 W Lake Blvd., Chicago, IL 60604.

FOR FURTHER INFORMATION CONTACT: Victoria Heath, EPA Region 5, Ground Water and Drinking Water Branch, at the address given above, by telephone at 312–886–0703, or at Heath.Victoria@epa.gov.

Authority: Section 1413 of the Safe Drinking Water Act, 42 U.S.C. 300g–2, and the federal regulations implementing Section 1413 of the Act set forth at 40 CFR part 142.

Dated: July 13, 2021.

Cheryl Newton,
Acting Regional Administrator, Region 5.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–XXX, 3060–1286; FRS 38003]

Information Collections Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission’s burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before September 17, 2021. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to Nicole.Ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–XXXX.
Title: Private Entity Robocall and Spoofing Information Submission Portal, FCC Form 5642.
Form Number: FCC Form 5642.
Type of Review: New collection.
Respondents: Business or other for-profit entities, and non-profit organizations.
Number of Respondents and Responses: 50 respondents; 50 responses.
Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement; third party disclosure requirement.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in the TRACED Act section 10(a).

Total Annual Burden: 50 hours.
Total Annual Cost: No Cost.
Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: Assurances of confidentiality will be provided to the respondents; however, respondents will be made aware that their submissions may be shared with the Department of Justice, Federal Trade Commission, other federal agencies combating robocalls, state attorney general offices, other law enforcement entities with which the Commission has information sharing agreements, and the registered traceback consortium.

Needs and Uses: Section 10(a) of the Pallone-Thune Telephone Robocall Abuse Criminal Enforcement and Deterrence Act (TRACED Act) directs the Commission to establish regulations to create a process that “streamlines the ways in which a private entity may voluntarily share with the Commission information relating to” a call or text message that violates prohibitions regarding robocalls or spoofing set forth section 227(b) and 227(e) of the Communications Act of 1934, as amended. On June 17, 2021, the Commission adopted a Report and Order to implement section 10(a) by creating an online portal located on the Commission’s website where private entities may submit information about robocall and spoofing violations. The Enforcement Bureau (Bureau) will manage this portal. A private entity is any entity other than (1) an individual natural person or (2) a public entity. A public entity is any governmental organization at the federal, state, or local level. Thus, the portal is not intended for individual consumers who already have a mechanism to submit robocall or spoofing complaints via the Commission’s informal complaint process.

The portal will request private entities to submit certain minimum information including, but not necessarily limited to, the name of the reporting private entity, contact information, including at least one individual name and means of contacting the entity (e.g., a phone number), the caller ID information displayed, the phone number(s) called, the date(s) and time(s) of the relevant calls or texts, the name of the reporting private entity’s service provider, and a
