Copies of available documents submitted to OMB may be obtained from Ms. Guido.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

**A. Overview of Information Collection**

*Title of Information Collection:* Data Collection and Reporting for HUD’s Continuum of Care Program—Annual Performance Report and System Performance Report.

*OMB Approval Number:* 2506–0145.

*Type of Request:* Reinstatement.

*Form Number:* N/A.

*Description of the need for the information and proposed use:* This request is for clearance of data collection and reporting to enable the U.S. Department of Housing and Urban Development (HUD) Office of Community Planning and Development (CPD) to continue to manage and assess the effectiveness of its homeless assistance projects on an annual basis. Per 24 CFR 578.103(e), HUD requires recipients and subrecipients that receive funding through the CoC Program (authorized by the McKinney-Vento Homeless Assistance Act, as amended by the Homeless Emergency Assistance and Rapid Transition to Housing (HEARTH) Act) to prepare and submit annual project-level reports on performance and spending.

This request will also enable the HUD CPD Office to initiate a process to assess the effectiveness of local coordinated

systems of homeless assistance. The McKinney-Vento Homeless Assistance Act, as amended, now requires communities to measure their performance as a coordinated system, in addition to analyzing performance by specific projects or project types. Section 427 of the Act established a set of selection criteria for HUD to use in awarding CoC Program funding. These selection criteria require CoCs to report to HUD their system-level performance. The intent of these selection criteria are to encourage CoCs, in coordination with Emergency Solutions Grant (ESG) Program recipients and all other homeless assistance stakeholders in the community, to regularly measure their progress in meeting the needs of people experiencing homelessness in their community and to report this progress to HUD. This request is for HUD to collect system-level performance measure data from CoCs on an annual basis, as described in Appendix B of this document.

The project APR and system-level performance measures both rely on a primary data source in each CoC—a local Homeless Management Information System (HMIS). An HMIS is an electronic data collection system that stores person-level information about homeless persons who access a community’s homeless service system. Over the past decade, HUD has supported the development of local HMIS by funding their development and implementation, by providing technical assistance, and by developing national data standards that enable the collection of standardized information on the characteristics, service patterns and service needs of homeless persons within a jurisdiction and across jurisdictions. These standards are described in HUD’s HMIS Data Standards.
