Abstract: This ICR applies to contractors who perform response services at sensitive sites with serious security concerns where the Agency and public interest would best be protected through drug testing. It requires the contractor to test its employees for the use of marijuana, cocaine, opiates, amphetamines, phencyclidine (PCP), and any other controlled substances. Only contractor employees who have been tested within the previous 90 calendar days and have passing drug test results may be directly engaged in on-site response work and/or on-site related activities at designated sites with significant security concerns. The Agency may request contractors responding to any of these types of incidents to conduct drug testing and apply Government-established suitability criteria in title 5 CFR 731.104, Appointments subject to investigation, 732.201, Sensitivity level designations and investigative requirements, and 736.102, Notice to investigative sources, when determining whether employees are acceptable to perform on given sites or on specific projects.
