Abstract: In 2019 the National Park Service (NPS) completed a plan for non-native fish management from Glen Canyon Dam to Lees Ferry and on through Grand Canyon National Park. The NPS identified specific tools for managing non-native brown trout with public and partner input, including an incentivized harvest program that offers a reward to anglers for catching and harvesting brown trout. The Glen Canyon Dam Adaptive Management Program along with its science provider, the US Geological Survey's Grand Canyon Monitoring and Research Center, is interested in understanding the participation of anglers in the brown trout incentivized harvest program. A mail-back survey will be used to collect information concerning (1) trip characteristics, (2) incentive structure and (3) opinions on river management. This collection proposes to provide data that will be used to inform the ongoing incentivized harvest program.
