The interim final rule amending 25 CFR part 224 and NOAA part 165, which was published at 86 FR 27806 on May 24, 2021, is adopted as final without change.

Bryan Newland,
Principal Deputy Assistant Secretary—Indian Affairs.
[FR Doc. 2021–15929 Filed 7–26–21; 8:45 am]
terrorist acts, sabotage, or other subversive acts, accidents, or other causes of a similar nature. Due to the roadway passing over the Christina River, this security zone is necessary to protect these persons, the public, and the surrounding waterway.

IV. Discussion of Comments, Changes, and the Rule

A. Discussion of Comment

As noted above, we received one comment on our NPRM published April 5, 2021. The commenter made several points unrelated to this regulation.

First, the commenter suggested alternate modes of travel, such as Marine One, for those persons protected by the USSS, and expressed concern about potential delays to landside vehicular traffic. The Coast Guard does not direct movements of USSS protectees. The Coast Guard cannot change the travel routes or methods of USSS protectees. The USSS is tasked with providing the highest level of security for those it protects and has requested the Coast Guard’s assistance at this location. Accordingly, we have established this security zone, in consultation with, and at the request of the USSS.

In addition, the commenter questioned the cost-impact of the rule. The commenter has suggested that the rule would exceed $100 million. We disagree with the commenter’s statement. The costs of providing protection to USSS protectees is beyond the scope of this rule. The Coast Guard’s responsibility within this rule is to secure the route 141 bridge over the Christina River near Newport, Delaware and a portion of the waterway extending from both sides of the route 141 bridge. The Coast Guard has assessed the economic impact of this rule and has concluded the impacts to recreational vessels to be minimal. We, therefore, disagree with the commenter’s suggested economic cost—impact of this rule to be in excess of $100 million.

B. Changes From the NPRM

We made no changes to the NPRM related to comments submitted. However, we removed the use of the term “VIP” and replaced it with the term “persons protected by the United States Secret Service” to provide greater precision with this regulation and the authorities granted to the USSS by 18 U.S.C. 3056. In paragraph (b), the definition section, we have removed the term “Very Important Person” (VIP) and added in its place “USSS protectee.”

C. The Rule

This rule establishes a security zone for the protection of persons protected by the USSS under 18 U.S.C. 3056 or pursuant to Presidential memorandum as they transit by vehicle on the route 141 bridge over the Christina River near Newport Delaware. This rule is necessary to expedite the establishment and enforcement of this security zone when short notice is provided to the COTP for persons protected by the USSS traveling over the route 141 bridge. The security zone is bounded on the east by a line drawn from 39°42.55’ North Latitude (N), 075°36.53’ West Longitude (W), thence southerly to 39°42.50’ N, 075°35.87’ W proceeding from shoreline to shoreline on the Christina River in a westerly direction where it is bounded by the South James Street Bridge at 39°42.63’ N, 075°36.53’ W. No vessel or person would be permitted to enter the security zone without obtaining permission from the COTP or a designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 (“Regulatory Planning and Review”) and 13563 (“Improving Regulation and Regulatory Review”) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

The Office of Management and Budget (OMB) has not designated this rule a significant regulatory action under section 3(f) of Executive Order 12866. Accordingly, OMB has not reviewed it. A combined regulatory analysis (RA) and Regulatory Flexibility Analysis follows.

This rule will establish a security zone around the route 141 bridge, which crosses over the Christina River near Newport, Delaware. The approximate size of the security zone extends along the river for 0.64 miles with a width of approximately 77 yards shore-to-shore. The security zone will be established 1 hour prior to the USSS protectee landing in the nearby airport. Prior to the 1 hour enforcement, the COTP will issue a broadcast via VHF–FM channel 16 allowing vessel traffic time to transit out of the enforcement area.

In order to enforce this rule, the Coast Guard will station Coast Guard personnel at the borders of the security zones with the authority to manage boaters’ movement through the security zone. Recreational boaters wanting to transit the area may inquire directly with the Coast Guard personnel (or other Federal, state, and local agencies assisting the Coast Guard in enforcement of this rule) posted at the boundaries of the security zones, rather than being required to contact the COTP for access to transit the area. In addition, once USSS and the USSS protectee are transiting towards the security zone, the zone becomes a restricted area and Coast Guard personnel will prohibit boaters from operating within the security zones.
The Coast Guard does not collect data on the vessels and individuals using the waterway, since the waterway is not federally maintained. However, the Coast Guard is able to surmise the type of vessel traffic by studying the navigational chart that encompasses the security zone. From the navigational chart the Coast Guard is able to discern the water depth to be 1 to 8 feet deep, and vertical clearance (by observing the fixed bridges along the waterway) to range between 22 to 28 feet. Therefore, the Coast Guard concludes that the type of vessels most likely using the waterway are recreational boaters.

Observable throughout Google maps, there is one access point, a boat ramp, located a few hundred yards from the route 141 bridge. During the enforcement of the security zone, local authorities will be restricting boater access to the river. As mentioned above, since this waterway is not federally maintained, the Coast Guard does not have data on the number of boaters that utilize this portion of the river; however, according to subject matter experts, the amount of traffic using this section of the river is minimal.

Costs

Once the security zone is implemented, the Coast Guard anticipates that recreational boaters transiting the waterway may have a very brief conversation with Coast Guard officials stationed at both ends of the security zone. If access to transit is granted, recreational boaters would then proceed through the security zone (without stopping or loitering) and exit the security zone in a timely manner. We anticipate that this conversation would last between 15 and 30 seconds per recreational boater. Because we do not know the number boats, or how many recreational boaters are on the average boat and because of how small the amount of interaction per recreational boaters is likely to be, we are unable to anticipate total quantitative impacted burden these conversations will have on the affected population.

In addition, during the actual transit of the USSS protectee crossing the route 141 bridge, all waterway traffic along the security zone will be halted. Since the USSS controls the movement of the USSS protectee, the Coast Guard is unable to discern the length of time the security zone will be closed once the USSS protectee is moving. Given the length of the bridge, the Coast Guard anticipates the length of time the security zone will be restrictive to be several minutes while the USSS protectee transits through the security zone.

Although the Coast Guard is unable to obtain information about the frequency of boaters using the waterway, the Coast Guard was able to assess the rate by which leisure time is computed, and that rate comes to $15.80 per hour. The elements used to tabulate leisure wage is outlined in the DOT travel time guidance document. We also used the census information the obtain the median household income for the State of Delaware. The DOT travel time guidance document provided the methodology for determining leisure time. Even though the document is assessing surface travel, we accept the methodology used in the document as a good approximation for determining recreational boater’s leisure time.

The cost of the rule would be leisure rate multiplied by the amount of time boaters are prevented from enjoying their leisure time. Unfortunately, as mentioned above, the Coast Guard does not have information pertaining to the number of boaters using this waterway and, therefore, is unable assess total recreational boaters loss of leisure time for this rule. However, the Coast Guard is able to provide the per vessel (one individual boater per vessel) cost of this rule prior to fully restricting (100%) access to the security zone. The Coast Guard estimates interaction time between boaters and uniform personnel to average 23 seconds, for which we obtain an average per vessel cost of

### Table 1—Summary of Rule’s Anticipated Impacts

<table>

</tr>
</tbody>
</table>

3. Published September 2020.
$0.11 (= $15.80 leisure wage * .007 equivalent hours \(^3\)). In addition, in order to estimate the cost associated when the full restriction of the security zone is implemented, we make the assumption that it will take 10 minutes for the USSS protecnees to transit through the security zone. The Coast Guard estimates those cost to be $2.69 (= $15.80 leisure wage * .17 equivalent hours \(^4\)). The combined costs of vessel-boater interaction with uniform personal is estimated at $2.80. Although the information of the population is limited, Coast Guard is confident that the overall costs of this rule is minimal.\(^5\)

**B. Impact on Small Entities**

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard received no comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the FOR FURTHER INFORMATION CONTACT section.

Small businesses may send comments on the actions of Federal employees who make decisions or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture

---

\(^3\) To calculate the equivalent hours of 23 seconds, we divide 23 by 3600 (3600 is the number of seconds in one hour). Hence, 23 sec/3600 sec = .007 equivalent hour.

\(^4\) Equivalent hour calculation for 10 min is 10 min/60 min = .17.

\(^5\) The Coast Guard also estimated the round trip (arriving and leaving Delaware using the same route) at $5.60 per vessel.

---

**C. Collection of Information**

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

**D. Federalism and Indian Tribal Governments**

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

**E. Unfunded Mandates Reform Act**

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

**F. Environment**

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a security zone for the protection of USSS protecnees as they transit the route 141 bridge over the Christina River near Newport, Delaware. It is categorically excluded from further review under paragraph L[60a] of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the ADDRESSES section of this preamble.

**G. Protest Activities**

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the FOR FURTHER INFORMATION CONTACT section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

**List of Subjects in 33 CFR Part 165**

Harbors, Marine Safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard is amending 33 CFR part 165 as follows:

**PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS**

1. The authority citation for part 165 is revised to read as follows:

**Authority:** 46 U.S.C. 70034, 70051; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.2.

2. Add § 165.560 to read as follows:

**§ 165.560 Security Zone; Christina River, Newport, DE.**

(a) Location. The following area is a security zone: All waters of the Christina River, from shoreline to shoreline bounded on the east by a line drawn from 39°42′55″ North Latitude (N), 75°35′88″ West Longitude (W), thence southerly to 39°42′56″ N, 75°35′87″ W thence along the Christina River in a westerly direction and bounded by the South James Street Bridge at 39°42′63″ N, 75°36′53″ W. These coordinates are based on North American Datum 83 (NAD83).
(b) Definitions. As used in this section—

Designated representative means a Coast Guard Patrol Commander, including a Coast Guard Coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Delaware Bay (COTP) in the enforcement of the security zone.

Official patrol vessel means any Coast Guard, Coast Guard Auxiliary, State, or local law enforcement vessel assigned or approved by the COTP.

USSS protectee means any person for whom the United States Secret Service (USSS) requests implementation of a security zone in order to supplement protection of said person(s).

(c) Regulations. [1] In accordance with the general regulations contained in §165.33, entry into or movement within this zone is prohibited unless authorized by the COTP, Delaware Bay, or designated representative.

[2] Only vessels or people specifically authorized by the Captain of the Port, Delaware Bay, or designated representative, may enter or remain in the regulated area. To seek permission to enter, contact the COTP or the COTP’s representative on VHF–FM channel 13 or 16. Those in the security zone must comply with all lawful orders or directions given to them by the COTP or the COTP’s designated representative. No person may swim upon or below the surface of the water of this security zone unless authorized by the COTP or his designated representative.

(3) Upon being hailed by an official patrol vessel or the designated representative, by siren, radio, flashing light or other means, the operator of the vessel shall proceed as directed. Failure to comply with lawful direction may result in expulsion from the regulated area, citation for failure to comply, or both.

(d) Enforcement. This security zone will be enforced with actual notice by the U.S. Coast Guard representatives on scene, as well as other methods listed in §165.7. The Coast Guard will enforce the security zone created by this section only when it is necessary for the protection of a USSS protectee traveling across the route 141 bridge in Newport, Delaware. The U.S. Coast Guard may be additionally assisted in the patrol and enforcement of the zone by Federal, State, and local agencies.

Jonathan D. Theel,
Captain, U.S. Coast Guard, Captain of the Port, Delaware Bay.

POSTAL SERVICE
39 CFR Part 20
International Mailing Services: Price Changes

AGENCY: Postal Service.™

ACTION: Final action.

SUMMARY: On May 28, 2021, the Postal Service published proposed price changes to reflect a notice of price adjustments filed with the Postal Regulatory Commission (PRC). The PRC found that price adjustments contained in the Postal Service’s notification may go into effect on August 29, 2021. The Postal Service will revise Notice 123, Price List, to reflect the new prices.

DATES: The revisions to Notice 123, Price List, are effective August 29, 2021.

SUPPLEMENTARY INFORMATION:

I. Proposed Rule and Response

On May 28, 2021, the Postal Service filed a notice with the PRC in Docket Number R2021–2 of mailing services price adjustments to be effective on August 29, 2021. On June 3, 2021, USPS® published a notification of proposed price changes in the Federal Register entitled “International Mailing Services: Proposed Price Changes” (86 FR 29732). The notification included price changes that the Postal Service would adopt for services covered by Mailing Standards of the United States Postal Service, International Mail Manual (IMM®) and publish in Notice 123, Price List, on Postal Explorer® at pe.usps.com. The Postal Service received no comments.

II. Decision of the Postal Regulatory Commission

As stated in the PRC’s Order No. 5937, issued on July 19, 2021, in PRC Docket No. R2021–2, the PRC found that the prices in the Postal Service’s notification may go into effect on August 29, 2021. The new prices will accordingly be posted in Notice 123, Price List on Postal Explorer at pe.usps.com.

III. Summary of Changes

First-Class Mail International

The price for a single-piece postcard will be $1.30 worldwide. The First-Class Mail International (FCMI) letter nonmachinable surcharge will increase to $0.30. The FCMI single-piece letter and flat prices will be as follows:
