organic compounds (VOC), a precursor for ozone. However, operation of the Project would result in an overall reduction of regional emissions of all applicable air pollutants and would not cause a localized exceedance of an air quality standard. Since the Project will result in the exceedance of the de minimis thresholds for the precursor criteria pollutants listed above during the construction phase, Project conformity with the applicable emission standards will be accomplished through offsets of the NOx and VOC emissions, consistent with applicable regulatory requirements.

Issued in Washington, DC.
