

NUCLEAR REGULATORY COMMISSION**[NRC-2015-0220]****Seismic Design Classification for Nuclear Power Plants****AGENCY:** Nuclear Regulatory Commission.**ACTION:** Regulatory guide; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing Revision 6 to Regulatory Guide (RG) 1.29, “Seismic Design Classification for Nuclear Power Plants.” This RG describes a method that the staff of the NRC considers acceptable for use in identifying and classifying those features of light-water-reactor nuclear power plants that must be designed to withstand the effects of the safe-shutdown earthquake. Revision 6 corrects a minor error in the numbering of the elements in Section C, “Staff Regulatory Guidance.”

DATES: RG 1.29 is available on August 2, 2021.

SUPPLEMENTARY INFORMATION:**I. Discussion**

The NRC is issuing a revision to an existing guide in the NRC’s “Regulatory Guide” series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, techniques that the NRC staff uses in evaluating specific issues or postulated events, and data that the NRC staff needs in its review of applications for permits and licenses.

II. Additional Information

RG 1.29, Revision 6 corrects a minor error in the numbering within the Section C, “Staff Regulatory Guidance.” What was C.1.i became C.2. This results in C.2 becoming C.3 and C.3 became C.4. In addition, RG 1.29 was reformatted to conform with the current template for Regulatory Guides.

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting and Issue Finality

Issuance of RG 1.29 does not constitute backfitting as defined in Section 50.109 of title 10 of the *Code of Federal Regulations* (10 CFR), “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; constitute forward fitting as that term is defined and described in MD 8.4; or affect issue finality of any approval issued under 10 CFR part 52, “Licenses, Certificates, and Approvals

for Nuclear Power Plants.” As explained in this regulatory guide, applicants and licensees would not be required to comply with the positions set forth in this RG.

Dated: July 27, 2021.

For the Nuclear Regulatory Commission.

Chief, Regulatory Guide and Programs Management Branch, Division of Engineering, Office of Nuclear Regulatory Research.
